Dr. James Kennedy Honored for 35 years of service

Dr. James Kennedy, director of the School of Music, was honored for 35 years of service at the University during the ninth annual Staff Awards Banquet, April 6. Dr. Kennedy came to the University in 1936 as director of choral activities.

The banquet was held to recognize employees in civil service, administration and related areas who have been with the University five years or more. More than 180 employees received pins this year.

Five persons received 25 year pins. They were Edith Asher, food service; Wilbur Bankey, central stores; Ruth Kilmer, University library; Glenn Van Wormer, dean of admissions and records; and James C. Wright, counseling center.

President Moore presented the awards, which were either a tie tack or a pin resembling a falcon with the University inscription and the number of service years beneath. John Hayes, director of personnel services, acted as toastmaster for the evening.

Accreditation Team
To Be Here April 24-27

A team representing the North Central Association of Colleges and Secondary Schools will be on campus April 24-27 studying and evaluating the University.

While the team will be studying the entire University, special emphasis will be given the University’s application for full accreditation for the education specialist degree program in mathematics supervision and in educational administration. Full accreditation for the doctoral programs in English, psychology, speech, educational administration and biology also will be studied.

The result of this evaluation by the North Central Association will mark the final approval of these programs which received preliminary accreditation five years ago. The undergraduate programs at the University are already fully accredited by the Association.

Although many components of the University will be studied during the team’s visit, the main objective of the team will be to see how well the stated goals of the University are being implemented.

The eight-member team, which is made up of nationally-known educators who are specialists in their fields, will be interviewing faculty, staff, and students. The visit marks the first in a planned series of evaluation visits scheduled every ten years.

The evaluation is the culmination of the work of the Central Coordinating Committee, headed by Dr. Charles Leone, vice provost for research and graduate studies. All areas of the University cooperated in a self study project which began in October, 1972. After all areas had reported to the Committee, the material and data were gathered into a 700-page document which was sent to the North Central Association for study.

The seven-volume study is a "now" look at the University. It is the basis for accreditation for all programs at the University and it is historically significant because it is the first complete profile of the University, according to Dr. Leone.
Approval of the 1973-74 budget, instructional fee and tuition surcharge adjustments, and dormitory renovations were spotlighted during the Board meeting, April 5.

TRIBUTE TO TRUSTEE

A resolution commending the work of Robert Winzeler Sr., was approved by the Board. Mr. Winzeler, a trustee since 1967, died March 16 in Naples, Florida after suffering a heart attack.

He was appointed by former Gov. James Rhodes in 1967 to fill the unexpired term of James Donnell II, Findlay, who resigned. Mr. Winzeler was then re-appointed to a nine-year term in 1970.

He was president and board chairman of the Winzeler Stamping Co., of Montpelier, Ohio and a former state representative.

BUDGET APPROVED

A $32,567,000 educational budget for the main campus was approved and the educational budget for the Firelands Campus was approved in the amount of $849,687. Breakdown of the main campus budget is a follows:

<table>
<thead>

In making the budget recommendation President Moore said:

"The budget which I am recommending is one which I hope is based on a false assumption, namely that House Bill 86 (which calls for a three per cent increase to higher education) will pass as presently written. That would mean an increase in student fees and an adjustment in the state subsidy for instruction which combined would fail to meet normal expected increases due to rising costs and other demands on our budget. More than that, such action would place added burdens on students and their parents and would cripple our programs in a very serious manner.

"Yet to present to this Board of Trustees a budget based on anything other than the appropriation bill which has been introduced in the Ohio General Assembly would be to fall back on conjecture and speculation. However, it is not only my hope but by prediction that the Legislature will readjust present anticipated subsidy support for universities. Should this be done we will adjust the student fees in proportion to the improvement in state support.

"Full acceptance of the Regents' recommendations on subsidies (6.5 per cent) favorable action on two special University requests and supplemental appropriation for all increases subsequently mandated by legislative action (such as increases in pay and benefits for civil service employees) will in fact persuade me to recommend at a subsequent meeting of this Board that the action today raising student fees will be rescinded and rolled back to 1972-73 levels."

Approximately $1 million in new funds is expected for the University next year, Dr. Michael Ferrari, acting provost and coordinator of budgeting and planning, told the Trustees. These funds will be used for the continued development of academic programs and operational costs at the University.

The four main areas to benefit from these funds are programs with rapidly rising student credit hour growth and new staff for these programs ($150,000), plant operations ($327,000), three new doctoral programs ($60,000), and the Student Development Program ($50,000).

The money allocated for plant operations is still $72,000 short of the amount required to sustain existing operations.

Salary increases for employees were met by cutting existing departmental budgets throughout the University.

Salary increases for employees were met by cutting existing departmental budgets throughout the University. An average salary increase of four per cent for contract faculty and staff, and actual step increases for classified staff totals more than $750,000. This does not include retirement benefits of $175,000 which will be paid from the new funds received from the State.

Normally new funds are applied towards salary increases but if that were to happen for 1973-74, progress on developmental programs would be slowed.

Four auxiliary budgets were also approved by the Board. The budgets, which are supported by the General Fee, are Intercollegiate Athletics, $673,692, University Union, $623,100, Stadium Building, $195,852, and the Ice Arena, $177,160.

A balance of $794,196 of the General Fee remains to be allocated to other auxiliary budgets such as the BG News, golf course, health services, and other areas. These will be voted upon for approval at the next Trustees meeting, May 3.

FEES ADJUSTED

The board also moved to adjust student fees to help meet the budget demands. The General Fee of $50 will remain the same for 1973-74, while the instructional fee
will be increased $6 a quarter to $216 for undergraduates, $9 a quarter to $309 for graduate, and a quarterly increase of $12 to $393 for out-of-state students.

Dr. Moore stated at the Board meeting that the subsidy support be increased by the Legislature for the University. It is expected that fees will be adjusted in proportion to the improved state support.

The change in fees is a result of two major factors which will affect the University's budget for the next academic year: 1) the amount of a state appropriations for 1973-74 has not been determined by the State Legislature, and 2) some of the additional funds required may be authorized by the legislature and by the Board of Regents through increased student fees.

At a press conference on April 5 — by coincidence only a few hours after the University Trustees had met — Gov. John Gilliagan reported the availability of $118 million more revenue than had been expected for the 1973-75 biennium. He recommended that $34.7 million should go for higher education.

At the same time the office of the Ohio Board of Regents was conducting a second look at enrollment projections, revising them downward at most campuses [but not Bowling Green]. Savings due to smaller enrollment figures could provide money which would be available for subsidy increase.

At press time for Monitor both these developments cloud the budget picture for the University. But President Moore said, "Undoubtedly our income and fee structures are affected favorably, but exactly how much is speculative. However, if preliminary estimates of added income to the University become law, we will roll back our instructional fees to 1972-73 level regardless of the maximum fee allowed."

INSURANCE BENEFITS

The Board approved an increase in insurance benefits for classified employees, totaling an annual cost of $52,777. The benefits will provide for the addition of diagnostic services in the Blue Cross hospitalization coverage; the change from the $450 physician's schedule to Usual, Customary and Reasonable (UCR) surgical-physicians charges; and, the increase of the Travel Risk death payment, with dismemberment benefits, from $10,000 to $50,000.

The approval was the result of a recommendation by the Personnel Services Advisory Committee to the Budget Council. The committee, formed during the fall quarter, reviewed personnel procedures and employee benefits for classified and contract employees.

During the review it was discovered that there was a difference in hospital and medical insurance benefits covering the two groups of employees. The new coverage will produce similar benefits for both groups.

RENOVATIONS

Small Group Living Units: The Board approved the renovation of the University's "small group living units" at a combined projected cost of $1,950,000, including financing costs. The project will be financed by the sale of revenue bonds.

The units, which presently house fraternity and sorority members, are more in need of heating, wiring, and plumbing improvements than redecorating.

In considering the renovation of the units Dr. Moore told the Trustees: "Nothing has been more encouraging to me personally and to members of the entire University community than the decision of the Trustees a year ago to expend the necessary funds to improve the quality of the residence halls on our campus and to bring all of them up to an acceptable, contemporary standard. This has not been without its economic benefits also. I am quite sure that our present experience — approximately 275 more occupants in our residence halls this spring quarter than projected for this time and 185 more than the spring quarter of last year — is surely the direct result of this action. It seems to me our students have responded effectively and encouragingly to the efforts we have made. Our residence hall experience is unique in the State of Ohio — the envy of many other residential universities, and our financial position with respect to the procedures recommended here is sound."

"We have now completed major renovation and redecoration in all of the units except the twenty small residence units which are presently occupied for the most part by fraternities and sororities. There are additional renovations to be made also in the east and west wings of Conklin Hall."

"It is now my recommendation to complete the task which we started a year ago and to do so by the issuance of revenue bonds. The estimated cost will be approximately $1,500,000 exclusive of furnishings and approximately $350,000 for furniture and similar items."

"I make this recommendation because we have been assured that the structures are sound and that with this renovation we can expect an additional occupancy life of at least twenty years without costs other than normal repair and redecoration. Furthermore, I am persuaded even if the present occupants of these buildings should disband or prefer to live off campus that the living in a smaller unit is attractive and would guarantee occupancy either by other groups or by other students who would have this as one of their several options on this campus. Moreover, the improvements are largely in the nature of heating, wiring, plumbing and therefore would be necessary no matter what use these buildings may serve in the ensuing two decades."

"It is our intent, if action by the Board is favorable, to proceed rapidly with bidding and construction during the next six months and to thereby accomplish much of our objective by the opening of the fall quarter, 1973."

"Therefore, I very much hope that we can with this move take the final step in the extraordinarily ambitious project which we started a year ago. I confess it has been my hope that we could do this in the twenty small units with attention similar to that which we gave in the other residence halls, largely redecoration and new furniture. But this simply is not the case because much more basic improvements need to be made. Therefore, we cannot finance the project as we did with the other residence halls out of our depreciation reserve. It is for this reason that we recommend the issuance of revenue bonds."

Health Center: An alteration expenditure of $30,000 was approved for the Student Health Center. The alteration will provide space for Computational Services with funds to be provided from the Health Services Student Facilities Project Fund Balance.

The Computational Services area will be transferred from the Administration Building to the second floor of the Health Center which is not currently required for student medical services. The transfer will not affect the Northwestern Ohio University Computer Center (N0UCC) equipment. The NOUCC will move to its new center near Perrysburg after the building is constructed.

The transfer will release office space in the Administration Building for the Dean of Arts and Sciences office and for the reorganization of personnel for the new Vice President of Resource Planning.

[cont. on page 4]
Student Services: The Board voted to approve a $13,000 renovation of the Student Services building for the 1973-74 academic year. Improvements will include replacement of carpeting, the purchase of office equipment, and maintenance and custodial expenditures.

COLLEGE OF EDUCATION

Departmental status was approved for three divisions within the College of Education.

A department of educational administration and supervision will embody the master's degree in educational administration; the specialist degree in educational administration; and, the doctorate in educational administration. The department of curriculum and instruction will sponsor the bachelor's degree in elementary and secondary education; and, the master's degree in elementary, secondary, and reading education. It will also confer the specialist in reading degree.

The third department is special education with the bachelor's degree in the fields of emotionally disturbed, educable mentally retarded, and trainable mentally retarded. The master's degree offered in this department will specialize in the fields of the emotionally disturbed, educable mentally retarded, and trainable mentally retarded.

ASSOCIATE OF ARTS DEGREE AT FIRELANDS

The associate of arts degree was approved to begin at the Firelands Campus during the 1973-74 academic year. The new degree will join two others already awarded by the Firelands Campus, the Associate of Applied Business program, and the Associate of Applied Science programs.

Better coordination between courses required by the University for four-year degrees and those available at the Firelands Campus prompted the move to the associate degree.

GRANTS

A total of $97,977.04 in grants and/or contracts for the month of March was accepted by the Board.

Dr. Charles Leone, vice provost for research and graduate studies, reported that awards for the current year amount to $1,858,811.42 which is an increase over the comparable period last year of $337,595.93.

Awards received for the third quarter amounted to $543,700.69, an increase of more than $144,000 over the third quarter in 1972.

ENROLLMENT

Enrollment for the spring quarter is 15,691 for the main campus and all branches. This is an increase of 447 total enrollment compared to last year's spring quarter enrollment which was 15,244.

REPORTS

Gynecological services: Trustees heard a report on the recently established gynecological services at the University. To date eight clinics have been held with a total of 110 patients being treated.

The program is a cooperative agreement with the Medical College of Ohio which calls for a gynecological specialist, an MCO faculty member, to be on campus two afternoons a week. He is aided by a resident physician whenever possible.

Faculty Welfare: Dr. Karl Schurr, department of biology, reported to the Board on behalf of the faculty. Dr. Schurr pointed out to the Board that it was recently brought to the Faculty Senate's attention that step-children of faculty are not covered as benefactors by the State Teachers Retirement System. Dr. Schurr asked the Board for its suggestions for possible solutions to this problem.

Faculty Senate Highlights

Academic scholarships and Charter changes highlighted the March 6 Faculty Senate meeting.

MERIT AWARDS STUDIED

The question of awards given to students on the basis of talent as distinguished from scholarship was discussed by the Senate and the following resolution was passed as a result of the discussion.

"That in accord with the resolution of May, 1972 (calling for expenditures for academic scholarships that would match the expenditures for athletic scholarships) the Faculty Senate requests the University Budget Council and the Student Financial Aids Committee, Subcommittee on Grants-In-Aid, to make similar declarations and put them into effect.

"That the Senate Executive Committee report to the Faculty Senate during 1973-74 on the progress made toward full implementation of the resolution."

Discussion leading to the resolution pointed out that during 1972-73 approximately $498,000 was awarded to students on the basis of merit. Of this total $66,000 was awarded on the basis of scholarship and the remaining $432,000 was given on the basis of talent.

A breakdown in the talent area showed that athletic grants totaled $329,000, music $74,000 speech $19,000, and art $10,000. Book scholarships totaled $38,000 in the scholarship area, with $17,000 from the President's Achievement Scholarships, and $11,000 in Alumni scholarships.

CHARTER CHANGE

Article VI, Section 3 of the Charter was changed to read as follows (changes are in UPPER CASE):

The appointment of a new Provost or the evaluation of an incumbent is to be conducted in such fashion as to share responsibility with elected faculty AND STUDENT representatives. Such sharing of responsibility shall be achieved in one of two ways:

1. By making use of the elected FACULTY members of the Academic Council, THE STUDENT BODY PRESIDENT AND THE COORDINATOR OF ACADEMIC AFFAIRS, AND ONE REPRESENTATIVE OF THE GRADUATE STUDENT BODY, as a screening or evaluation committee, or
2. By having the University faculty elect FACULTY REPRESENTATIVES, THE UNDERGRADUATE STUDENT BODY ELECT UNDERGRADUATE STUDENT REPRESENTATIVES, AND THE GRADUATE STUDENT BODY ELECT AT LEAST ONE GRADUATE STUDENT REPRESENTATIVE TO an ad hoc screening or evaluation committee. THE COMMITTEE WILL HAVE THE SAME RATIO OF FACULTY TO STUDENTS AS IN NUMBER ONE ABOVE.

OFS STATEMENT ADOPTED

The principles of the Ohio Faculty Senate statement on professional responsibilities was adopted by the Senate. A committee designated by SEC will study the OFS statement and make recommendations for its implementation at the University by the end of the fall quarter, 1973-74.

The OFS statement outlines the expected ethical practice of faculty towards their students, colleagues, and keeping up-to-date in their specialization.
American Cancer Society, Ohio Division, $4100 for “Granulopoietic Control Factors in Human Myelogenous Leukemia” project under the direction of Dr. J. D. Graham, department of biology.

Department of Health, Education, and Welfare, $6,501.25 for “Effects of 2-Desoxy-D-Glucose on Sleep-Waking Patterns” project under the direction of Dr. Jaak Panksepp, department of psychology.

Martha Holden Jennings Foundation, $4,000 for “Martha Holden Jennings Foundation Alumni Workshop” under the direction of Dr. Fred Pigge, department of education.

National Endowment for the Arts, $1,000 for concerts designed to expand jazz audiences project under the direction of Dr. Wendell Jones, School of Music.

National Science Foundation, $30,000 for research on human memory project under the direction of Dr. Donald DeRosas, department of psychology. Also $46,000 for the 1973 summer chemistry institute project under the direction of Dr. W. H. Hall, chemistry department.

Northwest Ohio ETV Foundation, $7,827.07 for career education films project under the direction of Dr. Duane Tucker, director of broadcasting.

Rockefeller Foundation, $4,223.72 for economics project under the direction of Dr. Bevars Mabry, department of economics.

State of Ohio Department of Education:

$3,900 for “Account Clerk Workshop” project under the direction of Dr. Don Bright, department of business education.

$5,050 for “Learning Activities for Distributive Education” under the direction of Kenneth Green, department of business education.

$300 for “One Day Drive-In Conference” project under the direction of Dr. Don Bright, department of business education.

$30,000 for summer conference for BOE teachers project under the direction of Dr. Don Bright, department of business education.

Toledo Public Schools, $16,710 for Family Learning Center project under the direction of Dr. Fred Pigge, department of education. Also $15,365 for Mexican-American curriculum office project under the direction of Dr. Pigge.

Popular Culture Center Receives Donation for Center’s Library

The Center for Popular Culture recently received approximately $800 in materials from R. Jeff Banks of Nacogdoches, Texas. Mr. Banks’ total contribution to the Center for the past five years is estimated to be more than $5,600 worth of materials.

The latest donation includes 55 pulp magazines, such as Popular Detective and Argosy, 50 science fiction fanzines, and 966 paperbacks. Fanzines are magazines written by and geared toward certain collecting groups, such as science fiction or comic book collectors.

According to William Schurk, director of the Center’s library, the current contribution is of particular value because it fills in some of the gaps in the Center’s collection.

**Grants and Scholarships Received**

**Employment Opportunities**

For job description for faculty and staff positions contact the Office of Equal Opportunity, 238 Adm. Bldg. Check the posting of bulletins from Personnel Services for classified positions.

**STAFF POSITIONS**

Coordinator for Academic Program Development: Master's or Ph. D. required. Evidence of successful experience in aiding the development of new academic programs; specific experience in proposal writing and presentation together with knowledge of foundations. Contact Dr. Kenneth Rothe, provost designate.

**FACULTY POSITIONS**

Asst./Assoc. professor in anthropology: Ph. D. required. Contact Chairperson, department of sociology.

Asst. professor of speech: Ph. D. required. Academic specialties must include contemporary rhetoric and, either academic preparation for forensics direction or work in small groups. Practical experience in forensics direction required, if second speciality is in this area. One or two years’ teaching experience preferred. Contact Dr. F Lee Miesle, chairman, department of speech.

**PART-TIME FACULTY POSITIONS**

Several departments consistently employ part-time faculty each quarter. Individuals interested in being considered for such positions should contact the following departments: Art, English, Education and Student Teaching.

**Guidelines for Advertising**

**Job Openings Reviewed**

Since the creation of the Office of Equal Opportunity definite guidelines have been in effect for advertising for job positions within various departments and areas.

After a position has been created or authorized to be filled, the department or area head should notify the Office of Equal Opportunity. Notification of classified employee vacancies will be made by the director of personnel services to the Office of Equal Opportunity.

Notification of the vacancy should include a job description, salary range and indications if it is open, the name of the person and/or department to whom the application should be made, deadline for applications and credentials, and the amount of preparation and experience necessary for the position. Also the date the position is available should be stated and the names of professional organizations and/or publications with which the position is listed should be included.

When professional organizations, local agencies and media are contacted the statement of equal employment opportunity should be included.

When the position has been filled, the Office of Equal Opportunity will be notified by the department or area head. Any questions concerning the University policy should be directed to Vivian Lawyer, director of the Office of Equal Opportunity 372-2319, at the University.
Training Programs Aid Employees

Several in-service training courses are being offered by the Office of Personnel Services to staff members this spring. The major goal of these courses, according to Robert Griss, test-training officer, is to upgrade the personal and job-related skills of University employees.

A course in computer basics was taught during the winter quarter. University employees took the course at no cost, but people from the surrounding community had to pay a $30 fee for the non-credit course.

The course was a general survey of the development and growth of modern computers, their languages and applications, computer "jargon" and other related areas in the computer world. The main benefit to University staff was to help them to understand how their job relates to the computer and the computer services area. The ten-session course was taught by Dr. Richard Thomas, department of computer science. There were 27 employees enrolled.

A one-day training program which studied the area of human relations was held Feb. 28 for management members of the University staff.

The one-day session, taught by Robert Leonard, department of distributive education for the state of Ohio at Toledo, featured practical methods for supervisors to use to help develop skills in achieving results through others. Emphasis was on communication with employees, identifying employees' needs which would help create better job satisfaction, practical case studies, and aids to better human relations.

A third program for clerical, secretarial, and administrative employees began March 22 and will run once a week through April 24. The emphasis of this five-session training program will be on the improvement of personal and job-related skills. Each session will be presented twice on the scheduled day to facilitate maximum attendance and minimum work stoppage.

Classes are being taught by various University personnel including the Provost's Office and the Office of Vice President for Operations. A certificate will be given at the end of the five-week course to those who complete all five sessions.

Finally, in cooperation with WBGU-TV, the Office of Personnel Services will offer a televised training program which will focus on supervisory leadership. This program began April 11 and will continue through May 30 over closed-circuit television.

Each Wednesday session will include a 30 minute broadcast followed by group discussions. Individual discussion groups will meet in reserved classrooms or designated work areas.

Directed by Dr. George Heaton, a human relations consultant, the course will emphasize the leadership responsibility of the supervisor. The television presentation plus the action tasks set up in the work sessions are meant to help supervisors relate the concepts discussed to their on-the-job behavior. Fundamental duties of the supervisor, attitudes of people, group participation, and basic leadership skills, will be part of the course material studied.

"Thrust - Now" Conference Sponsored By Student Development Program

The Student Development Program sponsored a two-day conference for college admissions and minority service personnel from Ohio and Michigan March 2-3. The conference, entitled "Thrust - Now," was designed to allow visiting administrators to exchange ideas and to establish contacts with other personnel involved in development of minority students.

The conference also helped to identify area professionals in the student development field and to facilitate interprogram communications. As a result, a directory has been compiled to aid in these communications.

Visiting administrators also exchanged ideas and compared the student development programs in the colleges represented at the conference.

Finally, a format was established which will set up an organization in developmental education and which is intended to lead to a recognized professional association.

Highlighting the conference was an address by Dr. Robert Green, Dean of the College of Urban Affairs, Michigan State University.

Dr. Robert Green, Dean of the College of Urban Affairs, Michigan State University

The Student Development Program sponsored a two-day conference for college admissions and minority service personnel from Ohio and Michigan March 2-3. The conference, entitled "Thrust - Now," was designed to allow visiting administrators to exchange ideas and to establish contacts with other personnel involved in development of minority students.

The conference also helped to identify area professionals in the student development field and to facilitate interprogram communications. As a result, a directory has been compiled to aid in these communications.

Visiting administrators also exchanged ideas and compared the student development programs in the colleges represented at the conference.

Finally, a format was established which will set up an organization in developmental education and which is intended to lead to a recognized professional association.

Highlighting the conference was an address by Dr. Robert Green, Dean of the College of Urban Affairs. Dr. Green stressed the importance of personnel in student development programs to be innovative and not content to remain in the expected role of their administrative positions.
Inter-University Program
Designed for Mutual Growth
of Area Universities

The presidents and board chairmen of northwest Ohio's three major state universities have announced they will meet regularly in an effort to stimulate mutual programs of study as well as cooperative arrangements which can lead to administrative economies.

Representatives of Bowling Green State University, the Medical College of Ohio at Toledo and the University of Toledo discussed expansion of present cooperative arrangements for graduate study, mutual interests in health education areas, including nursing, and other items of common interest, at the initial meeting.

Attending the first meeting were Trustees' chairman Anita S. Ward and President Moore of Bowling Green, Trustees' chairman Henry L. Morse and President Marion C. Anderson of the Medical College of Ohio and Trustees' chairman Stephen Stranahan and President Glen R. Driscoll of Toledo.

Broadcast Policy Committee
Approved by President's Council

The President's Advisory Council approved the formation of a Broadcast Policy Committee March 8 with membership being made up of the current members of an informal broadcasting committee.

The broadcast area has expanded at the University and has been removed from the speech department thus giving it no faculty or student body group to use for planning input.

The committee is composed of Dr. Harvey Donley, quantitative analysis and control; Dr. Reginald Noble, biology; Dr. Genevieve Stang, education; Dr. Singer Buchanan, speech; Dr. Lynn Ward, business law; James Perdue, sophomore in the college of arts and sciences; Dennis Petine, junior in the college of business administration; Dr. Duane Tucker, director of broadcasting, and one graduate student as yet to be appointed.

Alumni Donations
Increase in 1972

Alumni contributions to the University totaled $120,487 in 1972, an increase of $17,000 from the previous year. The number of alumni donating to the University, however, dropped from 19 to 16 per cent of University graduates contributing to the alumni fund.

James Lessig, alumni affairs director, attributed the dollar increase in donations to a greater number in the large donor category. Last year 355 persons gave $100 or more compared with 300 in 1971. The percentage dip was probably due to the fact that 50 per cent of all alumni have graduated since 1965 and, according to Mr. Lessig, younger alumni may not contribute to the University for four or five years after graduation.

Of the $120,487 more than $52,000 was designated by the donors for certain University departments and services. The remaining money was allocated by the alumni finance committee to other areas in need of and requesting funds, and to scholarships for about 60 students.

MAP Moves Into Third Phase
Of First Year's Program

Freshman students enrolled in the Modular Achievement Program (MAP) will soon face a series of examinations that will determine if their levels of achievement are high enough to permit them to be recommended for "junior" status at the end of this academic year. The freshmen who succeed will have earned 90 credit hours and will be eligible to receive their baccalaureate degrees in three rather than four years.

MAP was created with a $142,000 grant from the Carnegie Foundation last summer. Proposals for the program suggested that a time-shortened degree program might work because high school graduates are better prepared for college today, and because something had to be done to lower the high cost of a college education.

Dr. Richard Giardina, MAP director, says the emphasis in MAP has been placed on what the student learns and achieves rather than how many credit hours are accumulated. Students who are in the program, approximately 150 to date, were chosen without regard to prior academic accomplishments. Entrance exam scores ranged from below to above normal for the enrolled students.

The program has been divided into three areas for this first year. The "Little College," a communications module, was featured during the fall quarter. During the winter quarter students concentrated on the humanities, and the sciences are being studied in the spring quarter, through the Science Cluster College. Students who move on to the junior year level after successfully passing the achievement tests at the end of this academic year will then concentrate for the remaining two years on their degree areas.

Academic planning and career selection also plays a major role in MAP.

It is hoped that modules in education, business, languages, and social sciences can begin to operate during the 1973-74 academic year.

GOOD NEWS FOR CARS — Ash fallout will become a thing of the past after mid-June — the target date for completion of the heating plant's fuel conversion from coal to oil and gas. Pictured above is the 200,000 gallon tank for oil storage being built next to the heating plant. A new boiler for the heating system is expected to be in operation sometime next fall. Although there will be no ash fallout with the new type of heating, the "ash fallout" signs may stay because coal will be used as a standby fuel. The area around the heating plant will be landscaped and an eight-foot brick wall will be built around the storage tank. An additional 18 parking spaces will be made available after construction is completed.
Appointments and Promotions

Several appointments, promotions and a retirement have been approved since the Board of Trustees meeting, March 1.

Robert Bone, professor in the School of Art, will retire at the end of the first summer session, July 19. Mr. Bone has taught at the University since 1948.

Mrs. Demetria Cardenas has been appointed to the Affirmative Action Committee as announced by the Office of Equal Opportunities on March 14. Mrs. Cardenas, who attended Bowling Green High School, is employed in the food services area.

Harold Eckel, acting director of computational services, has been appointed director effective Feb. 9.

Patrick Fitzgerald has joined WBGU-TV as producer-director. He was previously with the Brooklyn College Television Center as an executive producer of a series of half-hour programs.

Charles Gallagher has been named Director for Operations in the Office of Computational Services. Mr. Gallagher was formerly assistant personnel director and has been with the University since 1970.

Dr. Gary Hess has been named chairman of the history department, effective September, 1973. Dr. Hess has been with the University since 1964 and presently holds the position of professor in that department.

Dr. Joseph Kivlin has been elected chairman of the sociology department. Dr. Kivlin was an associate professor with the department and has taught at the University since 1961.

C. Richard Marsh has been appointed to post of administrative advisor to the President.

Dr. Charles Mott has been named chairman of the quantitative analysis and control department. Dr. Mott was named an associate professor in 1970 and has taught at the University since 1966.

Dr. Leo Navin has been named chairman of the economics department, effective September, 1973. Dr. Navin has taught at the University since 1964 and is presently an associate professor in the department.

Clarence Russell has been named director of custodial services effective Feb. 15. Mr. Russell was formerly sales manager for Matt King Supply Company of Toledo. Before that he was owner and president of Guardian Chemical Company of Toledo.

Bettie Williamson has been named community affairs director for WBGU-FM radio station. Miss Williamson was formerly with the faculty at Florida A&M University in the department of sociology.

WBGU-TV No Longer Channel 70

On March 24th WBGU-TV began transmitting with increased power to a 19-county area of northwest Ohio. The station is now transmitting over the new channel number, 57, and broadcasts programs in color.

It also began Saturday programming which now gives the station seven days a week of air time.

A newly-constructed transmitter and tower near Leipsic in Putnam County permitted the power increase from 10,000 watts to 750,000 watts.

Advisory Committee for Collection of Fine Arts Established

An Advisory Committee for the Collection of Fine Arts at the University was established March 12 by President Moore. The new committee will study and assess the means of providing for the storage, distribution and exhibition of works of art as an adjunct to the functions of the School of Art. The committee will also oversee the University’s present collection, valued in excess of $114,000.

The permanent collection of fine arts at the University provides classroom and curriculum resources for research in art history, museum and exhibition practices. It is also for the education and cultural enrichment of students, faculty and residents of northwestern Ohio and helps to enable persons to become aware of esthetic values in their environment.

Members of the advisory committee are Ronald Coleman, director, School of Arts and chairman of the committee; Eric McCready, instructor in art history; Dr. Otto OcVirk, art studio division; David Neuman, assistant to the University architect; and James Lessig, director of alumni relations.
