Getting Started with Service-Learning

1. Consider which type of service-learning you would like to conduct. See the models below.

Campus Compacts Six Model's of Service-Learning

Pure	These are courses that send students out into the community to serve. These courses have as their intellectual core the idea of service to community by students. They are not typically lodged in any one discipline.
Discipline-based	Students are expected to have a presence in the community throughout the semester and reflect on their experiences on a regular basis through the semester using course content as a basis for their analysis.
Problem-based	Students (or teams of students) relate to the community much as “consultants” working for a “client.” Students work with community members to understand a particular community problem or need.
Capstone Courses	These courses are generally designed for majors and minors in a given discipline and are offered almost exclusively to students in their final year. Capstone courses ask students to draw upon the knowledge they have obtained through their course work and combine it with relevant service work in the community.
Internships	Like traditional internships, these experiences are more intense than typical service-learning courses, with students working as many as 10 to 20 hours a week in a community setting. Service internships have ongoing reflective opportunities that help students analyze their new experiences using discipline-based theories.
Community-based Action Research	Community-based action research is similar to an independent study option for the rare student who is highly experienced in community work. Community-based action research can also be effective with small classes or groups of students. In this model, students work closely with faculty members to learn research methodology while serving as advocates for communities.

2. Identify how adding community service to your course will enhance student learning?
 - a. What are your academic/discipline learning outcomes? Consider the following:
 - i. Course-specific academic learning
 - ii. Generic academic learning
 - iii. Learning how to learn
 - iv. Community learning
 - v. Inter- and Intra-Personal learning
 - b. What are your civic learning outcomes? Consider the following:
 - i. Democratic citizenship learning
 - ii. Diversity learning
 - iii. Political learning
 - iv. Leadership learning
 - v. Inter- and Intra-Personal learning
 - vi. Social responsibility learning

- c. What outcomes are related to relevant and meaningful service with the community?
 - i. What are community needs?
 - ii. How is student community service addressing these needs?
 - iii. What will be the impact for community partners?
3. Identify Community Partner(s)
 - a. Connect with your campus Office of Service-Learning or Office of Community Service.
 - b. Ask your colleagues across campus for leads to community partners.
 - c. Attend community events and meetings to connect with potential community partners.
 - d. Set up informational interviews with community partners to establish if course learning outcomes are a fit for their needs.
