Board of Trustees News

TV advisory council formed

The University's Board of Trustees approved a charter of association for the Public Access Communications Television Advisory Council (PACT) and accepted nearly $600,000 in grants and contracts at its April 8 meeting.

Vice chairman Robert Savage presided at the April meeting of the Board, in the absence of chairman Charles Shanklin.

Repairs Authorized

Trustees considered the recommendations of the Finance Committee, chaired by Trustee John Lipaj, concerning two University repair projects.

The Board approved allocation of funds for the repair of roof decks on the east and west units of Conklin Quadrangle, at a total cost not to exceed $140,000.

The present roof decks have required a considerable amount of repair and maintenance since the buildings were completed in 1961.

The traffic-bearing decks will be stripped to the existing concrete roof slabs and a completely new roof system installed.

Plans call for the work to be done in July and August.

Trustees also approved funding for emergency repairs to an electrical generator in Offenhuber Towers, at a cost of $8,100.

The generator is a large emergency electrical generator which is water cooled via its own radiator. The equipment was damaged during a test operation of the system when a water hose failure occurred.

PACT Approved

A charter of association for the Bowling Green State University Public Advisory Council for Television was approved and takes effect immediately.

The charter establishes an advisory group for the Public Access Communications Television (PACT) and consists of individuals in the community who will provide advice and counsel on matters related to the operation of WBGU-TV.

PACT membership includes individuals in local chapters, several of which already exist in their particular communities.

Grants Accepted

PACT membership includes individuals in local chapters, several of which already exist in their particular communities.

Grants—contract amounts totaling $194,191 during the month of March were accepted—totaling $194,191 during the month of March were accepted and expenditures applicable to them were authorized.

President Moore noted that the University had accrued more than $4,620,000 in grants and contracts during the 1975-76 fiscal year to date. Almost $600,000 of this amount consists of research grants.

Personnel Changes

The following personnel changes were approved:

Administrative appointments:
- David A. Finley, asst. football coach and lecturer in health and physical education; Larry Thompson, asst. football coach; John Weir, head basketball coach and lecturer in HPF.

Administrative resignations:
- Mario Russo, asst. football coach.
- Carl E. Peschel, from director of foundation accounting to adm. assist in the Office of Development.

Academic retirements:
- Sidney Stone, assoc. prof. of sociology; Theora S. Smith, asst. prof. of education; Andrew W. Wein, asst. prof. of computer science; Frank Zahn Jr., assoc. prof. of economics.

Academic changes:
- Myron Chenault, coordinator of human resources, appointed at the rank of asst. prof. in College of Health and Community Services; Annette Johnson, from acting director to director of Continuing Education.

Special appointments:
- David H. McLean, adjunct asst. prof. in the College of Health and Community Services.

Part-time faculty appointments:
- Helen Landry, instructor in College of Health and Community Services; Bert Lucas, reappointed instructor in sociology; Mary M. Shreffler, reappointed lecturer in sociology.

Non-faculty appointments—externally-funded programs:
- Ching Hsing Liao, research associate in biological sciences; David G. Peckah, research fellow, biological sciences; Margaret G. Keller, cataloguer, Northwest Ohio Great Lakes Research Center; Mary Jo Bulich, microfilm camera operator, Northwest Ohio Great Lakes Research Center.

Representatives Reports

Joseph Perry, prof. of sociology and vice chairperson of the Faculty Senate, reported to the Trustees in the absence of Stuart Givens.

The Senate leaders urged the Board to approve a 1976-77 budget that is "equitable in its regard to all segments of the University." and also encouraged maximum effort at maintaining high academic standards.

Senate also expressed concern for loss of (cont. on page 2)
Board of Trustees

control by the University over standards, curriculum, or budget, and cited the state-mandated teacher education redesign program as an area for potential loss of authority.

Mr. Perry also expressed the gratitude of the faculty to Mrs. Anita Ward, whose term as a University Trustee expires in May.

Trustees Day Postponed

Dennis Bottorini, undergraduate student representative to the Board, said the Student Recreation Center committee had been working on the detailed stages of the building plans.

He also noted that an ad hoc liaison committee had been formed to communicate issues between the Graduate Student Senate and the Student Government Association.

The annual Trustees Day, normally held in April, was postponed until at least fall quarter due to difficulties in scheduling, he said. Mark Kerns, who will serve as undergraduate student representative during the 1976-77 academic year, will plan the program.

New Grad Student Rep

Maria Sauder, graduate student representative, introduced Michael Coffman, newly-mandated teacher education redesign for the B.F. Goodrich Company, who will serve as the new graduate student representative to the Trustees.

Elections for the Graduate Student Senate were held April 2. In addition to Mr. Coffman, graduate students Roger Barone, vice president, and Victor Balest, director, were elected.

Mr. Coffman is a 1974 graduate of Bowling Green University, majoring in American Studies.

Capital Improvements

The status of various capital improvements on the campus was reported to the Trustees.

Included in the report was a review of progress made on the planned Musical Arts Building. The architects, Richards, Bauer and Moorhead of Toledo, are working on schematic designs for the building.

Work continues on the Alumni Center and renovation of the Adm. Bldg. is expected by July 1.

Renovations to the Men's Gym have been completed and work continues on renovation projects at the University Library and Hanna Hall.

Enrollment Report

A preliminary enrollment report for spring quarter was presented to the Trustees showing a grand total of 15,447 students on the main campus and 965 students at Firelands.

May Meeting

President Moore advised Trustees that they would be asked to consider the University's 1976-77 educational budget at the May meeting, when the Board had planned to hold its deliberations at the Firelands Campus.

Dr. Moore suggested that the Trustees meet at both places so that those interested in the budget proceedings would not experience difficulty attending the meeting.

Tentative plans call for a meeting of the Board at 10 a.m., Thursday, May 13 in the Alumni Room of the Union. The meeting will probably recess and reconvene in the afternoon on the Firelands Campus, according to Kenneth McFall, secretary to the Board of Trustees.

Site Development

Following the close of the meeting, Trustees met informally for a presentation on the site development plan for the new Music Arts Building and the Student Recreation Center, by Warren Lamb, landscape architect.

Both buildings will be located in the Sterling Farm area.

Bicentennial Notes

The National Endowment for the Arts has awarded a $27,000 grant to the University for a Black Swamp Folk Life Festival to be held here May 21-23.

According to Dr. Joseph Arpad, a visiting faculty member in the popular culture department, the festival is expected to involve people from throughout northwest Ohio who will demonstrate crafts and a variety of folk activities.

Dr. Arpad said the three-day festival will include exhibits of small crafts and arts, stage performances of folk music, and traditional folk and square dancing.

Tentative plans also include holding a farm auction, a flea market, a tractor or horse pulling contest, a thrilling machine exhibition and the actual building of a log cabin.

"Folklore is not an artifact itself but a performance of skills or knowledge that is passed from person to person," explained Dr. Arpad. "Our philosophy is to exhibit as much folk life as possible and get people involved."

Exhibit space will be offered free of charge for area residents to show their crafts or demonstrate skills, such as churning butter.

During the winter, Dr. Arpad and a number of popular culture students conducted research on the folk life of the Black Swamp and much of what they have learned will be published in an almanac, to be released in conjunction with the festival.

The book will include folk remedies, illustrations from 19th and 20th century almanacs, recipes, lists of area festivals and legends about the Black Swamp, in addition to a brief history and a map of the region.

Several northwest Ohio groups, including Bicentennial committees, arts councils and historical societies, have offered help in gathering information for the almanac and in planning the festival, Dr. Arpad said.

The director said he hopes to have residents from throughout the Black Swamp, which includes all or parts of Defiance, Paulding, Putnam, Henry, Wood, Hancock, Van Wert, Fulton, Williams, Sandusky, Seneca, Ohio and Lucas counties, involved in the festival.

"Science, Technology and Ohio's Future" will be the topic of the last symposium in the University's three-part Bicentennial series, to be held April 29.

The symposium will bring together representatives of business, government and higher education for a dialogue on the role of science and technology in the industrial development of the state.

The opening session will begin at 2 p.m. in the Alumni Room of the Union with presentations by Robert J. Fawcett, vice president for research and development for the B.F. Goodrich Co.; T. Robert Santelli, vice president for research and development at Owens-Illinois, Inc., and Bert Herron, manager of the Bureau of Business Research in the Ohio Department of Economic and Community Development.

Mr. Fawcett will describe factors affecting the development of the rubber and plastics industry while Mr. Santelli will talk about the role of research in the future.

Swan Club show stops the presses

The 30th annual Swan Club show, directed by Iris E. Andrews, prof. of physical education and recreation, will be performed at 8:30 p.m. Thursday, Friday and Saturday, April 22-24, in the natatorium.

The show will be dedicated to Dr. Andrews who has been director and producer of all 30 Swan Club shows.

Forty-six students are involved in the synchronized swimming show entitled "Stop the Press," a newspaper theme. Thirty-eight students are members of the Swan Club, three of whom are men. Eight swimmers from the men's team will also take part in the show.

Tickets are $1 for students and $1.50 for adults. They can be purchased Monday, Tuesday and Wednesday, April 18-21, at the women's building from noon-4 p.m. and at the door the night of the show.

"Monitor" is published monthly for the faculty and staff of Bowling Green State University by the News Service, 306 Adm. Bldg.

Publication for the next issue is scheduled for Friday, May 14. Copy deadline is Wednesday, May 12.
Faculty Senate Highlights

Vocationalism subject of 1976 conference

Virginia Smith, director of the Fund for the Improvement of Secondary Education, Washington, D.C., discussed the distinction between liberal arts and vocationalism in her keynote address at the annual values conference sponsored by Faculty Senate on April 7.

Theme of the conference was "Toward a More Humanistic Vocation." Events during the day-long program included an introductory lecture on scientific humanism by Roger Piak, prof. of physics, a panel discussion on the value of work, and approximately 40 seminars on vocational values.

In her address, entitled "The Liberal Arts and Vocationalism: The False Dichotomy," Dr. Smith noted what appeared to be a growing polarization between liberal arts and vocationalism, due to the economic crunch, job market, and increasing government support of vocation-oriented studies.

"Vocationalism has traditionally been seen as a cousin with somewhat less prestige by liberal arts people," she said. "However, the friction is not between liberal arts and vocationalism, but rather education for general purposes and education for specialized purposes," she said. "It has only been the last 10-15 years that we've heard so much about vocationalism, but erosion of the humanities and liberal arts began long before that, with increased emphasis on specialization."

Dr. Smith said specialization intrudes upon general education.

"We no longer know what general education is," she explained. "We've made non-specialized curriculum totally elective and moved away from an agreed-upon common core."

She referred to the issue as a "nice-to-know vs. need-to-know controversy."

"We must argue that general education is not only nice-to-know, but a need-to-know," she maintained. "It is suicide for an educational institution to make that kind of a distinction."

Dr. Smith's address was given to about 100 persons in the Main Auditorium of University Hall.

About 50 persons remained in the auditorium for the panel discussion, which was moderated by Robert Savage, vice president of the University's Board of Trustees.

The four panel members were selected with an eye toward the variety of avocational pursuits they represented, according to J. Robert Bashore Jr., prof. of English, and Ramona Cormier, prof. of philosophy, who co-chairs the panel.

Panel members, in addition to Mr. Savage, were Anita Ward, also a member of the Board of Trustees; William Emmerton, former Olympic track star and author and lecturer or lifetime physical fitness; and Dominic Labino, internationally-known glass artist and craftsman from Grand Rapids, O.

Mr. Emmerton addressed the audience with his concerns for physical fitness and maintained that a person who is physically fit will also be able to think better, learn better, and have a happier attitude toward life.

"The real shortage of energy is the shortage of physical energy," he said. Mr. Emmerton is currently employed by the Marathon Oil Co., Findlay.

Mrs. Ward talked about the humanizing values of volunteerism -- an avocation she began in the 1940s.

"At that time, a woman with three small children was expected to stay at home," she said, "but I found that challenging ideas were scarce."

"A democratic social system depends to a high degree on the volunteerism of its members," she said. "It is also a personally-satisfying growth mechanism."

Mr. Labino traced his background from his first position as an instrument maker to his last job as director of research at Owens-Illinois in Toledo.

"Glass-blowing was a hobby," he said. "It just grew and grew, and now I have objects in museums around the world."

"One avocation became his vocation when he resigned from his position at O-I.

"Now I'm associated with museum people and historical societies," he chuckled.

Mr. Savage is president of Savage and Associates, a Toledo insurance company, and a former councilman and vice mayor of the City of Toledo.

He told the audience he felt the key to a humanistic vocation was maintaining your perspective and a sense of humor.

"When it comes right down to it, we are not all that important," he said. "We are just keepers of talents that someone else gives us."

"In order to be able to 'work for the fun of it' one must decide at an early age what he wants to accomplish on this one trip through life," he said.

"But cautious about picking your goals," he added, "because you'll probably achieve them."

---

Moore addresses Faculty Senate

President Moore told members of Faculty Senate on April 6 that there was reason for optimism concerning the future.

"I'm not pessimistic about next year, or the year after," he told senators. "Many of the problems we are facing are the result of one-time-only events -- like the civil service pay raises and agency-wide cuts by the governor."

Dr. Moore said he expected additional funding would be coming through the State Department of Education for teacher education redesign. He also said that work was underway to recover administrative costs of Federal student aid programs.

The increase in outside funding was also cited as cause for optimism.

"During the recent Alumni Center fund drive, seventy per cent of all people who donated had never given a dime since their graduation from this University," Dr. Moore said.

The president also spoke in support of construction of the Student Recreation Center. Plans for the building were approved by the Board of Trustees at the March 31 meeting, and the financing plan for the facility was approved by the Ohio Board of Regents March 19.

"We're facing a period of hard times financially, and to some people it may not seem like the appropriate time to fund a Student Recreation Center." Dr. Moore said, "but it all turned on one factor:

"We are also operating in a period of competition for students. The fact is, anything you offer to a student, you offer at the same time you offer to any student has a right to expect when choosing to attend a residential university."

Dr. Moore also said the administration was analyzing more data than ever before concerning the admission and retention of students.

"We are looking for possible changes in our policies and timetables," he said.

He also noted that the ongoing exigency studies were not a cause for alarm.

"When we discuss the possibility of financial troubles, there's a tendency to consider it a prophecy," he said. "These studies are more like a fire drill. They are done not because we think there is going to be a fire, but because we want the fewest number to get hurt if the remote possibility does occur."

---

Senate debates course dropping

Concern for a possible loss in state subsidies caused members of Faculty Senate to table action that would shorten the amount of time allotted to a student for enrollment.

At its April 6 meeting, Senate was presented with a recommendation that the final date on which a student can drop a course (without penalty) be 14 calendar days following the official date that quarter classes begin.

Currently, a student has 21 calendar days to decide whether to drop a course.

Thomas Anderson, assoc. prof. of geography and chairperson of the Academic Policy Committee which drafted the recommendation, said the 21-day policy is a carry-over from the semester system.

"The recommendation is made in an effort to reduce the period of fluctuation in course enrollments," he explained.

Several senators questioned the impact of such a ruling on the enrollment report presented to the Ohio Board of Regents. Called the "14-day report," it is usually prepared 14 calendar days after the start of classes. The report is the basis for establishing the number of full-time students and the proportionate state subsidy.

"If we cause students to jump out of courses sooner -- it may result in a loss of funding," one senator said.

The action was tabled, after considerable debate, so that more information could be gathered from the registrar's office.

"If Smith is a correct decision to make," Dr. Anderson said, "but I don't think there is a very real difference."

According to Cary Brewer, director of registration, the shortening of the period for dropping would have very little effect on the enrollment report. State subsidies are based on the reports given for fall and summer quarters, he said.

The issue will be brought back to Senate in May, along with other recommendations from the Academic Policy Committee concerning policies for the recording of W-P and W-F and the practice of the audit system.
Education faculty gain experience in the field

The State Department of Education's new regulations for teacher-training institutions place a strong emphasis on field experiences for prospective educators. At Bowling Green, College of Education faculty have an opportunity for field experiences, too, through the college's Extension Programs.

Ron Marso, vice dean of the college and director of Extension Programs, is responsible for recruiting faculty members each quarter to staff extension courses offered at ten different locations.

His office offers both graduate level courses and in-service programs throughout northwestern Ohio — some of which are held on other college campuses. "We have an agreement with Ashland, Bluffton, Defiance, Findlay, Heidelberg and Ohio Northern through the Northwest Ohio Consortium," Dr. Marso explained. "It prevents competition that would result if we were to offer a course that is already available at the other institution."

According to Dr. Marso, off-campus programming by universities was discouraged by the Ohio Board of Regents until a year ago. "We are now encouraged to make our services available to the general population," he said. "Funding for and policy in regard to off-campus programming has changed to reflect this view."

Through extension programs and the Northwest Ohio Consortium, Bowling Green cooperates with its neighbors in more effective programming. "These off-campus courses are taught by approved faculty and meet the needs for higher education."

"But another goal of Extension Programs is placing our faculty in the field," Dr. Marso said. "Each course is taught by an approved member of our graduate faculty."

Most of the courses offered in Extension Programs are approved by practicing teachers. "Teaching classes of this type gives our faculty the chance to apply theory to a real classroom," Dr. Marso said. "These students have field experience every day. They can immediately do what they have learned, and they can also come back the next week and say, 'No, that wasn't work in my classroom. It's a real challenge.'"

Recruiting faculty to go out into the field has been a problem for some time, but Dr. Marso has a good recruiting technique. "I ask them to teach just one course for me," he explained. "And if I can get them to do it, they're hooked by the challenge. Next time, they're back wanting another assignment."

Dr. Marso noted that the quality of extension courses is often questioned, but maintains that off-campus programs are just as good, if not better for certain types of field-oriented subjects. "Each course is taught by an approved member of our graduate faculty," he said. "Faculty members that are good on campus are just as good off campus. I can't see them being any less conscientious or professional because a building or a room number is different."

Extension Programs also develops special courses to meet the needs of specific schools. "We use an existing course, because generally we find the objectives and goals are sound," Dr. Marso explained. "But through demonstrations, studies and applications of the theory, the course can be made to meet the unique needs of a particular group or school."

"I'm not just traditional things, but I'm for effectiveness," he added. "Last year, we had more unique programs than we had courses from our regular curriculum."

Courses may also be altered by spreading them out over an extended period of time, or even an academic year instead of a 10-week quarter if that is a better way of meeting the needs of the students in the field. "This allows both professor and students to examine theory, develop strategies, and try them out and modify them — all during a single course," Dr. Marso explained.

This year, approximately 30 courses are being offered in this way, with an enrollment of 15 to 30 students in each. In addition, about 40 regular courses are being taught through the extension programs current enrollment of about 1,500 students.

In addition, about 40 regular courses are being taught through the extension programs this quarter, with a total current enrollment of about 1,500 students.

Dr. Marso has been director of Extension Programs for the past three years, and during that time the office staff has grown from two to a crew of 16 people.

"When I first started here, the phone didn't ring for three weeks," Dr. Marso recalled. "So I started calling people like school superintendents, and asked them how Bowling Green could help them solve their problems. They almost dropped the phone, but now we can hardly keep up with their requests."

Dr. Marso admits that some courses cannot be taken off-campus. "A research course needs the University Library," he explained. "We do have reciprocal library agreements with members of the Consortium, and we can take some books to the site, but we cannot provide many of the services and courses offered on the main campus. Consequently, the students still must come to the campus to complete degree requirements."

He noted that extension courses get teachers involved in professional development who might not otherwise have pursued additional education. "In fact, approximately 3,000 new graduate students have been admitted to the graduate college through the efforts of Extension Programs during the past three years," Dr. Marso noted.

"A recent study funded by OBOR showed that 80 per cent of the elementary and secondary teachers in the state had not had any professional development experiences over the past five years," he said. "Through our program, they are offered this opportunity, and many continue to work toward their masters degrees."

Back Bickelhaupt

David L. Bickelhaupt, prof. of finance and insurance at Ohio State University, is one of 13 candidates for a vacant seat on the State Teachers Retirement Board. Stuart Givens, chairperson of Faculty Senate, urged faculty to vote for Mr. Bickelhaupt in this month's STRS election, since he is the only candidate from higher education.

Dr. Givens noted that, at the present time, no member of the board represents the interests of higher education. Current board members and the other 12 candidates for the vacant seat on the board, are all teachers or administrators in public school systems.

Genevieve Slang, secretary of the Senate, noted that it would take a full turnout of faculty members at all state institutions of higher education to ensure Dr. Bickelhaupt's election. Ballots were distributed by mail this month and must be returned to STRS for tabulation by May 3.

Bryan resigns Trustee post

As Ashel G. Bryan has resigned as a member of the University's Board of Trustees to accept an appointment as trustee of the Medical College of Ohio.

Mr. Bryan's term on the Bowling Green board was due to expire next year and he would not be eligible for reappointment.

Mr. Bryan is president of the Mid-American National Bank and Trust Co. He is a graduate of Bowling Green, a former president of the Bowling Green School Board, and served as chairman of the University's Board of Trustees from 1972-75.

His appointment to the board of the Medical College is to complete the unexpired term of Charles B. Stockel, who resigned Dec. 31.

The term runs until May, 1977.

Grant workshop open to faculty

"Proposal Writing: An Overview" will be the first of a three-part workshop in Grantsmanship conducted by the Office of Continuing Education. The workshop will be a grant-writing process to help individuals determine their needs, draft proposals and evaluate them.

Some of the objectives of the first workshop are identification of the agency's needs, strategies for aligning needs with potential funding sources, guidance in preparing their proposals and analysis of current patterns of external funding.

The workshop invites faculty and non-faculty members in community services who are interested in learning the art of grantsmanship.

The first workshop will be held from 9 a.m. to 4 p.m. Friday, April 30 in the Ohio Suite of the Union. There is a $25 fee per person, which includes lunch.

For more information about the workshop contact Annie Clement, coordinator of academic program development, or Jim Brown, research assistant to the coordinator of academic program development.
Speech appoints intra-university advisory board

A 14-member Intra-University Advisory Board has been appointed by the School of Speech Communication. According to Delmer M. Hilyard, director of the school, the group was formed to advise the school concerning appropriate intercollege and intracampus thrusts and directions and the full use of instructional communication resources.

The board met for an orientation session on March 19. Members were selected by Dr. Hilyard’s advisory council from a list of nominees provided by the School of Speech Communication faculty. “Our faculty identified people they believed shared an interest in and commitment to communication,” he explained. “Selections were made with the intent of providing a diverse perspective.”

He said the board would write its own charge once it became better organized, but it is expected the members will provide advice on how speech communication can relate to other courses and activities at the University.

Dr. Hilyard serves as an ex-officio member of the board. Ten other members of the school’s faculty, including assistant directors and department and area heads, will also attend meetings.

“We will give us almost a one-to-one ratio, in which board members can be matched with faculty representatives with common interests, and the sharing of ideas could continue between formal meetings,” Dr. Hilyard said.

The board will meet again this quarter, and thereafter about twice each academic year. Members of the Intra-University Advisory Board are Lester E. Barber, assoc. prof. of English; Michael R. Ferrari, vice president of resource planning; Harold Fisher, assoc. prof. of journalism; Carl D. Hall, prof. of art; Harold L. Henderson, prof. of special education; Agnes M. Hooley, prof. of physical education and recreation; Amos B. John­ sen, director of the Office of Continuing Education, Michael T. Marsden, assoc. prof. of popular culture; David J. Pope, assoc. prof. of music; John R. Shuck, prof. of psychology; Jerry L. Stewart, director of the department of industrial education and technology; Aida R. Tojmez, prof. of sociology; James Webber, director of the Management Center, and Gary A. Woditsch, director of the CUE Center.

Writing lab open

University faculty members are encouraged to refer students with writing deficiencies to a newly-opened laboratory in Moseley Hall. The writing lab was opened by the Office of Academic Services to assist both undergraduate and graduate students in improving their writing skills.

According to Charles Means, vice provost for academic services, the laboratory is a free service. Students may be referred by their professors, or may come in independently.

The laboratory is voluntary and students do not receive academic credit for taking the class.

Laboratory supervisor is Donald A. Hesthesian, who formerly administered a similar program at Northeast Missouri State University.

The laboratory is located in Room 407 of Moseley Hall, and is open from 9 a.m. - 4 p.m. Monday through Thursday, and 9 a.m. – noon on Friday.

Class work will include a number of exercises to meet special needs of the students - vocabulary, spelling, organization or grammar. Students will be encouraged to spend at least two hours weekly in the lab.

More than a dozen volunteer student tutors will assist Dr. Hesthesian.

Dr. Means said the writing lab is “phase one” in the establishment of a whole group of services designed to help students improve all their communication skills. Proposals are now being drafted for similar laboratories in reading, listening and logic.

Faculty members who have students with writing deficiencies may obtain referral forms from their department offices.

Art exhibits open May 9

The 25th annual undergraduate art exhibition will open May 9 at the School of Art Fine Arts Gallery. The exhibition, juried showing of more than 400 works created by undergraduate students will be accompanied by an in­stitutional alumni exhibit in observance of the 25th anniversary of the student exhibition. Alumni works of art which have been chosen within the last year will be displayed in the University Library on the first floor. Many of the items will be for sale, as will the works of undergraduate students.

The undergraduate entries will be judged by the faculty of the School of Art in ten different classifications: painting, prints, drawing, watercolors, photography, glass, jewelry, fibers, ceramics and sculpture.

Entries for the undergraduate works will be $25 for first, $15 for second, and $10 for third. Honorable mentions will be awarded ribbons. The alumni art work will not be judged.

Both exhibits will run from May 9 through June 2. They are sponsored by the Alumni Association and the Parents Club.

Summer sports school offered

Thirty one-week camps in 14 different sports will be offered this summer during the University’s annual summer sports school, sponsored by the athletic department.

Most of the camps offer a full week of fun and instruction at a cost of $90 for those wishing to stay on the campus and $60 for commuting campers. Ten per cent discounts are available for children of Bowling Green alumni and employees.

Camps will be offered throughout June, July and August in athletic training, basketball for both boys and girls, cheerleading, golf, girls’ gymnastics, ice hockey, ice skating, soccer, tennis, track and cross country, volleyball and wrestling.

Highlight of the summer will be the special “Dave Wottle Olympic Middle Distance Training Camp” Aug. 8-13, led by Olympic gold medalist and Bowling Green graduate Dave Wottle and the PER coaching staff.

The University’s new head basketball coach, John Weinert, will direct the two-week basketball camp for boys beginning June 13. Bowling Green’s 1975-76 Summer Sports School is in its third year of operation. The 1976 season is expected to attract a total of 2,000 campers. For more information, enrollment forms, and brochures on the summer program, call Sports Information Office (225-1201) or write Summer Sports School, Athletic Department.

Appointments & Promotions

John Weinert, head basketball coach at St. Joseph’s College of Indiana, has been named to replace Pat Haley as head coach of Bowling Green’s basketball program.

Mr. Weinert was selected from more than 100 applicants for the position. The 43-year-old coach has been with St. Joseph’s for the past four years, producing a 72-29 won-loss record. His 1974 team won the NCAA Division II Midwest regional championship and his 1975 team posted the best record in St. Joe history, winning the Indiana Collegiate Conference regular season title and qualifying for the N-I-C tournament.

Before accepting the coaching job at St. Joseph’s, Mr. Weinert was head basketball coach, asst. football coach and head track coach at Ripon College. For the last eight years he has directed the Milwaukee Bucks Summer Basketball Camps at various locations across the country.

Mr. Weinert’s appointment at Bowling Green was announced by Richard Young, director of athletics, on March 21. The new coach and his wife, Shirley, are the parents of two daughters, Cindy, 19, and Kelly, 17, and a son, Buzz, 16.

Randy C. Brown has been appointed to the Office of Admissions staff. Mr. Brown is a graduate of Alfred University in New York. He previously worked as an intern in the Admissions Office of Bowling Green while studying toward his master’s degree in college student personnel and also served as an admissions counselor for Findlay College.

He succeeds Larry Glassmire who left the Admissions Office in January for a similar position at the University of California at Sacramento.

Dave Finley, asst. football coach at Western Michigan University, will replace Mario Bregonzio as football coach at Bowling Green.

Mr. Finley was tri-captain and offensive guard in 1970, won All-Mid-American Conference first-team honors.

See Hager, coordinator of women’s sports and director of women’s intramurals in the physical education and recreation department, has been named acting asst. athletic director for the intercollegiate athletic department.

Her appointment, effective until July 1, is the first step in a reorganization of the intercollegiate athletic department to encompass all men’s and women’s varsity sports. Formerly, women’s competitive sports were administered by the PER department.

At asst. athletic director, Miss Hager will coordinate nonrevenue sports programs.
Newsmakers

Charles Codding, director of the physical plant, was a speaker at an IBM press conference in New York City March 17. Reporters from 32 newspapers, trade journals and technical publications attended the meeting, which featured three case histories of computerized power management. Mr. Codding gave a 20-minute slide presentation on the University's use of an IBM system 7 computer in monitoring the air-handling systems of 30 campus buildings. In operation since July, 1974, the system has generated a total of $68,000 in savings or monies not spent. The press conference also included presentations by Lebanon Steel Corp., Lebanon, Pa., and Rich's Department Stores, headquartered in Atlanta, Ga.

Marie Hodge, asst. to the dean, College of Business Administration, and Teri Sharp, asst. director, News and Photography Services, co-authored an article that appeared in the March-April issue of Business Education World. Entitled "The Business Internship Program: Bridging College and Industry," the piece describes the business internship program at Bowling Green.

John Hiltner, Jr., prof., William A. Peterman, asst. prof., and Bruce Smith, assoc. prof. of geography, attended the 1976 annual meeting of the Association of American Geographers April 11-15 in New York City. Dr. Peterman presented his paper on "Planning small for big cities." Dr. Hiltner and Dr. Smith presented their paper on "Out shopping to a nearby metropolitan center...."

Richard L. Weaver, II, assoc. prof. of speech communication, had an article entitled, "Teaching Communication in the Continuing Education Program" published in the March issue of Adult Leadership, a monthly publication by the Adult Education Association of the United States of America.

Deanna Radeloff, asst. prof. of home economics, and Rosalind Charlesworth, assoc. prof. of educational foundations and inquiry and home economics, conducted a workshop entitled "Math Experiences for Young Children" at the University of Michigan in Ann Arbor on March 27.

Betty Legdon, prof., and Sally Parent, asst. prof. of the department of physical education and recreation, held a physical education workshop March 20-26 for the Whittier Schools in Whitman, Mass. Along with four different workshop sessions, they also taught demonstration classes at six elementary schools in the system.

David G. Elms, dean of the College of Education, has been elected president of the Ohio Association of Colleges for Teacher Education for the 1976-77 academic year. The association includes 34 member institutions, both state and privately-funded.

Tom Stubbs, swimming coach for 13 years, was honored at the annual banquet of the College Swimming Coaches Association of America on March 24 in Providence, Rhode Island. Mr. Stubbs was recognized for his six years of service as a member of the NCAA Swimming Rules Committee. Last year, Mr. Stubbs served as head referee for the college division championships and chairman of the officials committee for the NCAA Division One Championships.

WBGU-TV received an honorable mention in the Corporation for Public Broadcasting's 1976 Local Television Program Awards for the station's local production of "The National Tractor Pull." The program featured highlights of the 1975 competition held at the Wood County Fairgrounds which drew a crowd of 60,000 people for the three-day event.

Ronald Coleman, assoc. prof. of art, will exhibit a one-man show at the Gallery One in Findlay. Coleman's show, his fourth at the gallery in 11 years, will feature his recent sculpture and photography work. The exhibit will be held through April 30, Sunday through Friday, 1-5 p.m.

Bowling Green's Educational Memorabilia Center has been the subject of articles in Ohio Schools and Bicentennial Times, a nationally-circulated publication of the American Revolution Bicentennial Administration. Both items were contributed by Teri Sharp, News and Photography Services.

Myron Chenault, coordinator of human resources and affirmative action, will appear on the "Minority Reports" program of WSPD-TV, channel 13, Toledo, on Sunday, April 23, to debate the issue of federal affirmative action regulations.

Mr. Chenault's opponent in the debate is George C. Roche, president of Hillsdale College, Hillsdale, Mich.

Dr. Roche and Hillsdale College have gained national prominence during the past year because of their defiance of Title IX regulations, concerning equal opportunity and sex discrimination.

Dr. Roche says the college has always had equal opportunity for minorities and women. The real issue, he maintains, is the university's right to remain free of governmental regulation.

Mr. Chenault, a former equal opportunity specialist in HEW's Cleveland Office for Civil Rights, will defend Title IX regulations.

"I believe that the only way change will come about is through federal government pressure," he says.

Robert Mazur

Robert Mazur, assoc. prof. of art, received the top award in the 4th Annual Tri-Kappa Regional Artists Exhibition at the Fort Wayne Museum of Art for his large acrylic painting entitled "Garden." Mr. Mazur was recognized with a $1,000 prize. His works have been exhibited in various one-man shows in Toledo, Cleveland and Michigan.

Honorable mentions were given to Ronald Bandy, and Thomas Hilty, both assoc. profs. in the art department.

Ramona Cormier, prof. of philosophy, spoke at the Ohio Philosophical Association Conference Saturday, April 3, held in Bowling Green. Dr. Cormier is president of the association. Thomas Attig, asst. prof. of philosophy, spoke on "They are you, a man teaching this course on the philosophy of feminism" and "Male instructors, neutrality and female studies."

Correction

John Boyer, acting director of the School of Journalism, was not interviewed by the search committee for permanent director of the School at a meeting of the committee on Jan. 12. A story in last month's Monitor (page 8) implied that an interview took place.
FDPIC sponsors workshop series

A series of eight workshops for faculty members is being presented during spring quarter by the Faculty Development Program Implementation Committee (FDPIC).

Leaders for each of the workshops are University faculty members, many of whom have completed research or study in a specialized area via a FDPIC grant.

A session on faculty leaves and exchanges was led by Ronald Storer, prof. of physics and FDPIC chairperson, on April 8.

William Peterman, asst. prof. of geography, was the leader of a workshop on classroom games entitled "Serious Learning with a Smile" on April 17.

Other sessions planned for the quarter are:

April 21 — "Observational Skills" by Margaret Faller, asst. prof. of education, Perry-Croghan-Harrison Room, Union, 2-5 p.m.

April 22 — "Audio-Tutorial: One Approach to Individualizing Instruction" by Larry Wills, assoc. prof. of education, Elliott Blinn, assoc. prof. of chemistry, and James Gordon, assoc. prof. of journalism, in the Capital Room, 3-5 p.m.

April 26 — "Use of Split Screen Videotape as a Feedback Mechanism for Improving Teaching" by Peter Wood, instructor in education, in the Ohio Suite of the Union, 6-8 p.m.

May 3 — "Test Construction: Use of Multiple Choice Items for More Than Recall" by George Seiffert, assoc. prof. of education, in the Dogwood Suite, Union, 3-5 p.m.

May 11 — "The Blue Pencil: How to Use It and Why (Editing Student Writing)" by Kenneth Robb, assoc. prof. of English, and David Hyslop, asst. prof. of business education, in the Alumni Room of the Union, 3-5 p.m.

May 22 — "Library Futures: Machine Readable Data Bases and Selective Dissemination of Information for Faculty Members" by Melville R. Spence, director of the University Library, in Room 122 of the Library, 9 a.m.-noon.

Plans for the workshop program were developed by a FDPIC subcommittee chaired by Angela Poulos, asst. prof. in the Library.

"The sessions were planned in response to faculty requests for opportunities to learn more about particular activities," Ms. Poulos pointed out. "In addition, it gives all faculty members an opportunity to make use of the talents and resources available on our own campus. All of the session leaders are Bowling Green people."

Faculty members interested in one or more of the workshops should contact Genevieve Stang, assoc. prof. of education, for reservations or more details. Attendance will be limited at some of the sessions.

Ms. Poulos noted that future workshops may be planned if there is sufficient faculty interest. Suggestions for future workshop topics should be directed to members of FDPIC.
