Bowling Green State University

Volume 2 Number 2 October 23, 1978

Admissions efforts assure 'full house'

Despite decreasing enrollments on many college campuses throughout the country, Bowling Green State University last year had more than 6,800 applicants for 3,500 places in this fall's freshman class.

John W. Martin, director of University admissions, said he expects the healthy enrollment trend to continue because Bowling Green State University is an easy product to sell.

There are many reasons why Bowling Green has been successful in attracting students, Martin said. Among the most frequently mentioned are a quality faculty and outstanding programs, the comparatively low cost both for residential and off-campus living, the University's location and the sensitivity of the administration to the needs of students.

In the past four years the staff has been responsible for several innovative recruiting programs.

'Preview Day' Nov. 4

Coming Nov. 4 is the University's annual "Preview Day," scheduled in conjunction with Parent's Weekend. Martin said the day is designed to give prospective students a close look at what Bowling Green State University can offer them.

In the morning, representatives from all academic departments and student organizations will set up booths and displays in the Grand Ballroom to answer questions and distribute general information. At the same time, campus tours will leave the ballroom at frequent intervals.

In the afternoon, students and their parents who participate in the Preview Day will have the opportunity to view the BGSU-Ball State football game.

That evening, Gabe Kaplan of "Welcome Back Kotter" will perform in Memorial Hall.

Last year more than 2,000 prospective students and their parents took part in the "Preview Day" program.

Martin said another admissions program which has been successful is "Phone Power," through which trained undergraduate students call high school seniors who have been admitted to the University to answer their questions and provide support. Martin said the "Phone Power" program was designed to keep in touch with students once they are admitted.

Once admitted, students also are placed on the admissions mailing list, receiving materials throughout the year to keep them interested in Bowling Green. One of the mailings is a newsletter, "Campus Views," produced for the admissions office by the University publications staff.

Panel to study

In the near future, Martin said he hopes to begin implementation of suggestions compiled by an Ad Hoc Committee on Admissions Policy, formed last fall to help determine a direction for the admissions staff. The committee will be studying admissions procedures all this year. Marketing and retention are two of the committee's primary areas of consideration.

The formation of a stronger Alumni Admissions Committee is another admissions office goal, Martin said. Through this program alumni would be contacted and asked to either submit

names of potential students or meet with students who already have expressed an interest in Bowling Green. Martin said such a program already exists but needs strengthening.

Perhaps the major admissions responsibility, however, lies in the high school relations program, through which professional personnel from the University visit high schools and participate in

"College Night" programs.

Statistics tell story

Martin noted that during the last academic year personnel from the admissions office contacted 15,065 interested students and their parents, visited 190 high schools, participated in 80 "College Night" programs and overall had contact with students from 773 different

high schools in the country.

Martin said despite the size of the University campus his staff has no trouble conveying to most of these prospective students the "We Care" atmosphere. "The sense of community and cooperation makes it easy to show students that we do care," Martin said, adding he believes that will be a key aspect in continuing to attract students to the University.

Preview Day

Representatives from all academic departments and campus organizations will participate in the University's annual "Preview Day," one of several programs which have been instrumental in maintaining continued high enrollment at Bowling Green.

Non-traditional students vital to University

Making the university experience more comfortable and attractive for students 25 and older has become a high priority for Bowling Green State University and similar institutions throughout the country.

As the number of 17- and 18-year-olds declines nationwide, universities are looking to these "non-traditional" students to ensure continued high enrollment.

With 1,058, or approximately six percent, non-traditional students (those between the ages of 25 and 60) reported on the Bowling Green campus at the beginning of fall quarter 1977-78, Bowling Green lags behind the national enrollment average of 20 to 30 percent non-traditional students.

Edieann Biesbrock-Didham director of the Division of Continuing Education at the University, suggests, however, the number of non-traditional students at Bowling Green is high enough to indicate the University is following national trends. In the past 10 years, the University has shown a marked increase in enrollment of "late starters" or those who simply seek a new occupational direction or academic challenge.

Dr. Biesbrock-Didham indicated at least 10 percent of the total student body is non-traditional this year.

The downtown Center for Continuing Learning is the University's prime agent for reaching the older student, Dr. Biesbrock said. The center attempts to serve as a "bridge" between the non-academic world and the structured University system. It is an entry place for adults who desire to return to college.

"Coming here (to the University) is

almost like traveling to a foreign country," Dr. Biesbrock-Didham noted. She explained the non-traditional student faces different problems than the recent high school graduate.

To ease initial fears, the University offers a "So You Want to Go Back to School" course, covering use of the library among other practical aspects of a university career. Also offered are study skills refresher courses, reading classes and some personal interest programs, including those on self-awareness and assertive training.

Also offered to the non-traditional student through the Center for Continued Learning are interest tests, career counseling and job forecasts, which help the older person returning to school obtain a long-range view of what the job picture will be when he finishes school, perhaps in five to 10 years.

A large part of the University's role in keeping the non-traditional student on campus involves building upon his present skills, Dr. Biesbrock-Didham indicated. Testing is offered to exempt students from college requirements of the basis of on-job training.

Courses offered through the Continuing Education division are geared to student interest. Sue Crawford, director of the Center for Continued Learning, noted courses are designed after talking with other non-traditional students about their concerns and goals. The staff also attempts to keep abreast of general interests when deciding course offerings.

Attracting the non-traditional student to the University campus, however, is not easy. Although

students come from all parts of north-west Ohio, Crawford said there are people who do not read a daily newspaper who are not reached by the center.

While the majority of people served through the Center for Continued Learning and enrolled in the University are between the ages of 25 and 40, an increasingly large number of senior citizens, older than 60, also are taking classes through the University SAGE program. These students are permitted to take any University course tuition-free, on a space available basis.

Among friends

Bowling Green City patrolman Ted Barber is at home among friends on the University campus, despite an age difference of several years. Barber is one of more than 1,500 non-traditional students enrolled at Bowling Green. He is a criminal justice major.

Gone but not forgotten

Former faculty involved in campus activities

A traditional homecoming will launch campus activities this year for the University's retired faculty and staff.

Just one year ago, the retirees were incorporated into the Alumni Association as associate members. Until that time, when they retired, faculty and staff were not formally associated with the University, according to April Hill Harris, coordinator of University Alumni Involvement Programs.

A combination of factors, however, kept the association's most recently inducted members from being as active as they could and should have been last year, Mrs. Harris said. The bad winter and subsequent migration South forced cancellation of several planning meetings and events.

Mrs. Harris said she hopes for good participation in the homecoming festivities Saturday and continued interest in other programs planned for the coming year.

The retirees' Homecoming Committee, chaired by Beryl M. Parrish, Amy R. Torgerson and Alice Schocke Wall, has sent special invitations to members of the

group, urging them to participate in the Saturday events.

The reception at the Alumni Center from 9 a.m. to noon for alumni and friends is the first scheduled activity.

"When alumni return to campus, they want to see their former professors, so we are particularly urging these former faculty members to attend this event," Mrs. Harris said.

They also will be given special seating at the annual all-alumni ala carte luncheon in the main dining hall of Harshman Quadrangle. A shuttle bus will then take them to the stadium.

"We also are encouraging them to attend the champagne candlelight dinner and dance at the Grand Ballroom because it is always such a nice affair," Mrs. Harris said.

The Homecoming Committee is one of five planning groups organized within the retired faculty group. Others include a Welcoming Committee, responsible for honoring new retirees at the annual spring banquet sponsored by the Alumni Association, and a Memorabilia Committee, which will be responsible for

collecting and organizing documents and other items of historic interest. Displays will be set up in the Alumni Center as items become available, Mrs. Harris said, indicating she already has several things for display.

The fourth committee will deal with special events, which Mrs. Harris said she hopes will include a holiday excursion and some weekend outings.

Weather permitting, the Luncheon Committee will resume planning once-a-month luncheons for the group in the Alumni Center. Last year, before the winter problems hindered the programs, the group had one luncheon and travel speaker.

"We hope to be able to schedule speakers and programs on topics of interest at all the luncheons," Mrs. Harris said.

Mrs. Harris said keeping the retirees active on campus is a vital service. Almost all of the 115 retirees on the Alumni Center mailing list reside in Bowling Green, but very few make regular visits to the University, she said.

As associate members of the Alumni

Association, the retirees now, however, receive all alumni mailings and are entitled to participate in the Alumni Association tours, which are "good travel bargains," Mrs. Harris said. Retirees also are being featured on a regular basis in the Alumni Magazine.

Mrs. Harris said the retirees seem to be active individuals.

"Many times when we try to plan activities, we find they are just too busy to participate," she said. But she added the committees will still do their best to plan a full, active program for the group.

Staff Update

A backlog of summer appointments at the University has resulted in belated announcement. Following are several which were not included in the first edition of Monitor:

Mark Asman, chair of accounting and management information systems.

Cary Brewer, registrar.

John J. Buckenmyer, director of the University Bookstore.

John Deal, administrative assistant to the dean in the College of Musical Arts during fall and winter quarters, 1978-79.

Richard Eakin, vice provost for institutional planning and student affairs.

Ronald M. Marso, coordinator of 1979 summer sessions.

Charles Means, vice provost for educational development.

Thomas H. Misuraca, adviser of the University Union Program.

Robert Patton, chair of applied statistics and operations research.

Jon Piersol, acting dean of the College of Musical Arts during fall and winter quarters, 1978-79.

P. Thomas Tallarico, acting director of graduate studies in the College of Musical Arts during fall and winter quarters, 1978-79.

Duane Whitmire, assistant to the registrar.

Jordan 'tries to keep young'

At a slender, dignified 90, William Jordan lectures constantly.

Other persons are inspired by his remarkably active retirement—painting, reading and music composition occupy most of his time—and his carefree approach to life.

"Life will be worthwhile if you do your best," says Jordan, "and your best is usually better than you think."

Jordan came to Bowling Green as business manager in 1925, when the University was a normal school. Earlier, he had been principal and superintendent of schools in Barnsville for seven years.

A native of Greenville, he earned his bachelor's and master's degrees at Ohio State University.

Jordan advises others to "keep active in something they like to do—writing, painting, travel, fishing or golf—but keep active in something."

In spite of his positive philosophy however, Jordan sees much wrong with society.

"I think America has gone too far in the materialistic world," he says, "and has left spiritual values behind—not only religious values, but great ideas. People should spend their time thinking, building up their minds, building up their spiritual lives as individuals."

"People are all tied up with the idea of making money," says the educator. "They're involved in building up the material world by whatever means are necessary. I think one should live for others, rather than selfishly living for oneself."

"I tell people that when they reach 99, then they should be very careful about their health," he jokes.

The retired professor still lives in the Troupe St. home he built in the 1920's. His watercolors, along with photographs of his family are hung on every wall of the spacious bungalow.

Jordan has a son and a daughter, eight grandchildren and two great-grandchildren. They are scattered around the world, from Berlin to Hawaii.

"I have tried to keep young," he says. "I just love young people. If you accept people with different ideas and different ways of living, you will keep young in mind and spirit."

At Bowling Green, Jordan became dean of men and then director of extension classes. In 1943 he left to become assistant superintendent of Army Red Cross camps. In 1946 he joined the faculty to teach educational psychology and later, secondary science education.

He was popular among students and colleagues at the University and at his retirement in 1958 he was honored, along with three other professors, at a dinner party in the University Union. Last spring, he was named an honorary alumnus of Bowling Green for his contributions to the University community.

"I had the time of my life," Jordan says of his years teaching at Bowling Green. "I knew if I lectured, the students would forget most of what I said. So I had demonstrations."

Jordan says teachers have a responsibility to stimulate their students to think and believes students at Bowling Green are independent thinkers. He compares them with other

undergraduates at schools where he has taught.

"Other students seemed to respect teachers more," he says. "Students here question things the teachers say."

"I'm amazed when I talk to young people," Jordan says. "They think on a high level. Youth are much more intelligent than they used to be."

Comparing students of the 1960s with those of the 1970s, Jordan says, "For a while, I thought young people had really misconstrued freedom, interpreting it as the right to do as they pleased. Now they seem to have settled down and found values. There's a better balance. Some seem to be complacent, but I guess there are enough sharp ones carrying the load."

Bill Jordan

More companies in tax shelter

Following action by the Board of Trustees, the University's optional tax deferred annuity program has been expanded.

The board's action took effect July 1 and permits additional companies the opportunity to enroll employees in the "tax shelter" system.

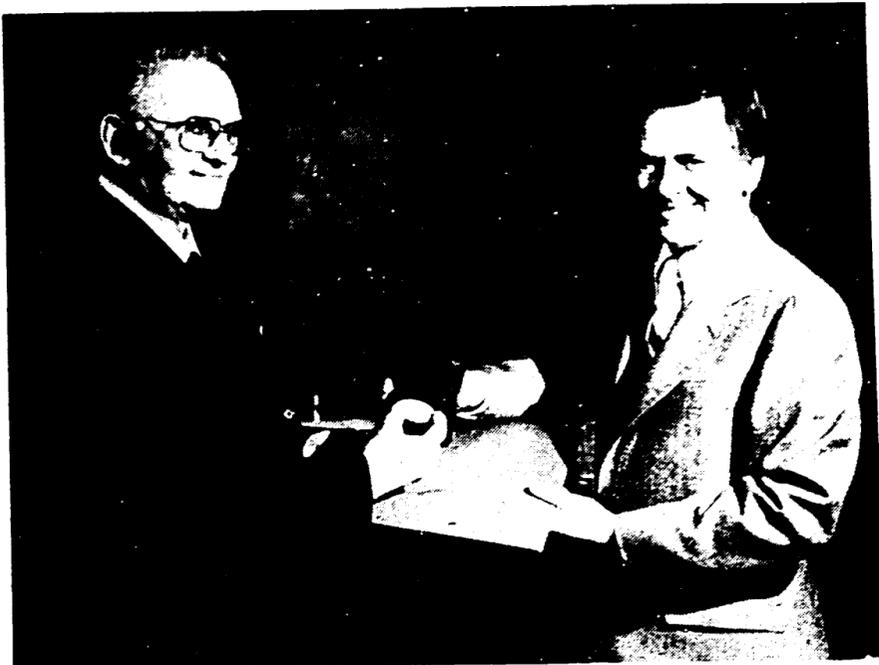

Since 1970 University employees have been provided the opportunity to participate in an optional tax deferred annuity program. This program permitted an employee to "shelter" a portion of his salary through payroll deductions for annuity contracts purchased from one of three approved insurance carriers.

The approved carriers were Aetna Annuity Insurance Company, Teachers Insurance Annuity Association-College Retirement Equities Fund and State Teachers Retirement System.

The new open program, according to Susan Caldwell, University program planning manager, permits additional companies to be approved if they obtain a minimum of five bona fide annuity applications from University employees and meet established criteria which are compatible with the University payroll procedures and requirements of the Federal Internal Revenue Code.

Under the revised open program, University employees may be contacted by several insurance companies to explain their respective programs, whereas in the past such solicitations were restricted to approved carriers.

For further information concerning the tax deferred annuity program, contact R.H. Meister, insurance administrator, Room 16, Shatzel Hall, 372-2112.

Distinctive honor

University President Hollis A. Moore received the Gold Medallion, one of the highest academic awards given in Austria, at a special luncheon Oct. 9. Professor Dr. Erwin Sturzl, a faculty member at the University of Salzburg, Austria, presented the award on behalf of the University. Dr. Sturzl directs the 10-year-old exchange program between Bowling Green and the University of Salzburg.

President stresses international study

Increased emphasis on international studies by both faculty and students was urged by University President Dr. Hollis A. Moore when he was honored Oct. 9 with the presentation of a Gold Medallion from the University of Salzburg, Austria.

The medallion was presented for his and the University's commitment to international education.

Presented by Professor Dr. Erwin Sturzl, a faculty member at Salzburg and one of two directors of the Bowling Green program in Austria, the award is one of the highest academic honors given in Austria. Dr. Sturzl received an honorary doctor of humane letters degree from Bowling Green last spring.

Dr. Moore pointed to a "healthy increase" in enrollment this fall in the University's study abroad programs but said, "I would like to see our programs abroad expanded... There must be a way we can profit from the experience of our faculty and students, particularly those who have lived outside the United States."

"We hope to have more programs such as the highly successful one last spring quarter (to be repeated in 1979), when 76 students from Nantes, France, came to Bowling Green to study American business," Dr. Moore said. He also noted the 184 foreign students enrolled at Bowling Green this fall constitute "one of our most valuable resources as we seek to foster on this campus the global attitude which will be a requirement for living in a highly multicultural and interdependent

world..."

Dr. Moore warned that this country is in danger of becoming too provincial at a time when world society is "wired together so tightly that a short circuit can fry us all."

Noting the need for change, Dr. Moore indicated every University course should, ideally, include an international component. He lauded faculty members who have spent time in other countries, as they are "better able to bring a global perspective to course work than others." "Faculty exchange programs are, therefore, extremely important," Dr. Moore said.

The president concluded his remarks with his definition of "global attitude," which he said was an essential concept for understanding.

"The person with a 'global attitude' would... understand the similarities as well as the differences between societies and be aware there is much to be learned from each one. Such a person would be free of prejudice and would firmly reject stereotypes... (he) would also realize that each nation's problems... are, in varying degrees, the world's problems..."

Dr. Moore also pledged that the University of Salzburg and Bowling Green State University will continue their cooperative relationship, trying to respond "in meaningful fashion to the world's desire for peace through enlightenment."

Faculty

Grants awarded during the summer to the Bowling Green faculty were too numerous to include in their entirety in the first issue of Monitor. Following are some of the remaining recipients. Not all acknowledgements have yet been reported. They will appear in the next issue of Monitor.

Grants

Kenneth M. Alvares and Robert M. Guion, psychology, \$24,306 from the City of Chicago for continued research into the selection of police officer candidates for the Chicago Police Department.

Don Bright, business education, \$49,385 from the Ohio Department of Education to renew a grant providing training for teachers in business and office education and \$2,500 from the Ohio Department of Education-Vocational Education for a mid-year conference for the 75 vocational and business education supervisors in the state.

Duncan A. Buell, computer science, \$6,700 from the National Science Foundation to investigate the connection between two differing algebraic structures.

Dwight Burlingame, library, \$3,906 from the Office of Education, Department of Health, Education and Welfare, to provide support for the acquisition of library resources including books, periodicals, tapes and audiovisual materials.

T. Berry Cobb, research services, \$7,300 from the National Science Foundation to increase the number of practicing scientists who are members of ethnic minority groups.

Bruce H. Wade will hold this award at Bowling Green during 1978-79. His field of study is sociology.

Richard Crang, biology, \$12,700 from the Paint Research Institute to continue research in the destruction of paint films. The results of the study could help inhibit disfigurement of painted surfaces through applied paint chemistry.

Ron L. Fadley, speech, \$70,354 from the Office of Education of the Department of Health, Education and Welfare, for a five-year project to expand cooperative education at Bowling Green. The project will serve as a model for cooperative education at other educational institutions.

Kenneth V. Green business education, \$51,441 from the Ohio Department of Education to renew a grant providing training for vocational education teachers; and \$3,750 from the Ohio Department of Education for a technical workshop for distributive education teacher coordinators.

Robert Guion, psychology, \$7,500 from ARMCO Foundation for a continuing

program of research on validity generalization.

William D. Hann, biology, \$49,772 from the Public Health Service of the Department of Health, Education and Welfare to support Bowling Green's Medical technology program.

Gary Heberlein and William Baxter, biology, \$18,400 from the National Science Foundation for purchase of lab equipment to conduct quantitative experimentation in the laboratories of a three-course sequence required of all biology majors and minors.

Donald P. Hinman, speech, \$890 from the National Association of Broadcasters to study successful productivity of sales personnel in small market radio stations. The results will be available to interested radio station managers.

Richard Howard, biology, \$26,215 from the National Science Foundation to study variation in lifetime reproductive success between individuals, using bullfrogs at the E.S. George Reserve of the University of Michigan. The study will test existing theories of sexual selection and is important in investigating the effects of ecological, morphological and behavioral factors on the amount of variation in lifetime reproduction for this species.

William B. Jackson, Environmental Studies Center, \$862.50 from Rowa Ltd. to supplement a public service grant in which the Environmental Studies Center will evaluate a potential rodenticide produced and supplied by Rowa Ltd., Bantry, Ireland.

Dr. Jackson also received \$2,250 from Mobay Chemical Corp. to provide for a student's field evaluation of the effectiveness of a chemical repellent applied to grapes during their last week of ripening to reduce bird damage. Field work will be concentrated in the vineyard areas between Port Clinton and Vermilion and on Bass Island.

In addition, he received \$2,000 from ICI Americas, Inc., to allow continuation of research with experimental rodenticides.

Daniel J. Kuna, special education, \$54,252 from the Office of Human Development of the Department of Health, Education and Welfare for support of graduate assistants in internships. The program should serve to bring about greater community awareness of the needs of the handicapped.

Study abroad is student travel bargain

Interest in study abroad programs at Bowling Green has increased this year to include 85 students, compared to 58 last year.

The total includes 33 students in Austria at the University of Salzburg, 32 in Spain, affiliated with the University of Madrid, and 14 in France at Poitiers in Tours. Two students also are in Brazil, two in Germany, one in Japan and another in Korea.

The three largest programs, administered through the College of Arts and Sciences, involve students of all majors, according to Dr. Lenita Locey, director of the study abroad. Last year, students in France included pre-med, business and broadcasting majors, she said. She added that the majority of students who go abroad are not language majors.

"Students elect to leave the country because they want to broaden their educational experiences," Dr. Locey said. They do, however, have to fulfill certain

minimum language requirements.

While the tradition has been "junior year abroad," Dr. Locey said many students now are traveling in their sophomore years. "We prefer that because when they return they can use their language skills and enroll in comparative courses," Dr. Locey said. Ideally, a student who intends to study abroad at some point in his University career should indicate his intentions during his freshman year, according to Dr. Locey.

Financially, Dr. Locey said she believes the University's study abroad program is "one of the best bargains around." For just a few hundred dollars more than regular University cost, the programs entitle students to tuition, room and board and pay all student fees at the foreign institution.

Students do, however, pay their transportation to and from the United States and spend extra dollars traveling while abroad. "But for a year of travel

and studies, it's still a pretty good buy," Dr. Locey said.

Academically, Dr. Locey said she believes students who go abroad fare approximately the same as they do on their home campuses. In some instances, they are segregated and are not asked to compete with students who have spoken and studied the language their entire lives.

The study abroad programs are not new to Bowling Green. Cooperation with Spain is in its 14th year, France, 13th year, and Austria, 11th year.

Through the years, interest in the programs has increased and decreased with no apparent reason, Dr. Locey said. She added, however, she thinks present interest is growing. Enrollment in the Spanish program reflected a 15 percent increase this year.

As director of the study abroad program the past three years, Dr. Locey has attempted to stimulate interest both at Bowling Green and at other institutions in

the area. The on-campus directors for individual programs, Dr. Michael Locey, Dr. Antonio Buron and Dr. Margie Gerber, recruit students, act as "troubleshooters" while the students are abroad and conduct orientation meetings. Dr. Locey described the directors as the "lifeline" to and from the participating institutions.

Although students remain abroad for varying lengths of time, Dr. Locey said all return with similar feelings.

"When they return to this campus they find their experience abroad has changed their whole lives," Dr. Locey said. "They have a different outlook on their own culture and basic ideals. Studying abroad is a very important part of their education."

Dr. Locey said the students share one other common feeling. "Always the first question they ask when they return is 'How can I get back?'" Dr. Locey said. "They almost always find it is easier to return than it was to go the first time."

Sealing the brick

Kreischer Quadangle is currently undergoing "tuckpointing" and resealing of bricks on the exterior. The project is one of several preventive maintenance plans scheduled this year. The maintenance is necessary, according to Norman H. Bedell, director of technical support services at the University, because mortar between the bricks is constantly eroding. The Kreischer project, funded through student fees, is expected to cost \$175,000.

Building maintenance is ongoing project

Repairing existing buildings on the Bowling Green campus is expensive, but letting repairs go is even more costly.

So says Norman H. Bedell, director of technical support services at the University, who indicated there never seems to be enough money to do everything that needs to be done.

Building maintenance is an ongoing process, and with a limited amount of funding, "the major job is to stand back, look at the buildings and say, 'Which one needs repaired the worst?'" Bedell said.

Funds for building upkeep at Bowling Green come from several sources, Bedell explained—student fees, the physical plant's building repair budget and state capital improvement funds.

Residence halls are auxiliary buildings and repair funds for these must come from student fees. No state money is used for auxiliaries, Bedell said.

Repair funds for auxiliary buildings are requested from and approved by the Board of Trustees and are usually allocated from reserves. For example, \$175,000 was approved earlier this year for the "tuckpointing" and resealing of Kreischer Quadangle, he said.

"The mortar between the bricks erodes," Bedell said, "and we must replace the mortar and apply a water-proof seal."

Kreischer residence hall is undergoing this process now and Prout and Offenhauer will also be done this year, Bedell said.

He added the funds for construction of the Recreation Center come from student fees because it is considered an auxiliary building.

Funding for upkeep of educational and general buildings comes from other sources.

Minor day-by-day maintenance is funded from the physical plant's building repair budget. "If it is routine maintenance, that budget will handle it," Bedell said.

"Anything that will cost more than \$25,000 is considered major maintenance," he said, and must be funded by another source—state capital funds.

"Capital funds are used for new buildings and major repairs," Bedell said, adding that the renovation of Moseley Hall is an example of capital funding at work.

However, a problem exists when a job is not big enough to classify for capital funding, but is too expensive for the building repair budget, he said.

The library steps are a good example of this situation. The mortar under the steps is coming loose and needs replaced, but "we just can't do it" with our budget, he said.

"If we don't get the money, we can't do the job," Bedell said, but there is "no source of money I can go to to take care of major repairs (that do not qualify for capital funding)."

A solution to the library problem has been to temporarily brace the steps with wooden supports, he added.

Energy-related renovation has been another major concern of maintenance, Bedell said.

Quite a large amount of dollars has gone into "energy conservation kinds of things," he said. For example, the entire control system for heat and air-conditioning in the Union has been changed.

Plans for maintenance projects in the near future include work on Overman Hall and Phase II of Moseley Hall. The work will involve renovation, as well as energy-related maintenance.

When and Where

Exhibits

Prints, paintings and graphic designs by Perrysburg artist Edward Rihacek, 2 to 5 p.m. daily Oct. 23 through Nov. 22, McFall Center Gallery.

Art Show, 8-10 p.m. Friday, Oct. 27 and 10 a.m.-12 p.m. Sunday, Oct. 29, Commuter Center.

"Four from Kent," traveling exhibition of works by four Kent State University graduate students, through Nov. 12, Fine Arts Gallery, School of Art, 8 a.m. to 5 p.m. weekdays, 2 to 5 p.m. Saturdays and Sundays.

"Watercolors by Virginia Zafirau," Nov. 1-30 during business hours, Alumni Gallery, Alumni Center. Free.

Special events

Homecoming Parade, 10 a.m. Saturday, Oct. 28, starts at WBGU-TV station on Troupe Street.

Gabe Kaplan, comedian, Parents Day Show, 8 p.m. Saturday, Nov. 4, Anderson Arena. Tickets, \$8, \$7, \$5, from the Alumni Center. Limited numbers are available.

Music

The Sartory Trio from Ohio State University, guest recital, 8 p.m. Tuesday, Oct. 24, Recital Hall, College of Musical Arts. Free.

The Lucktenberg Trio, performing on historic keyboard instruments and antique strings, 8 p.m. Thursday, Oct. 26, Recital Hall, College of Musical Arts. Free.

"Music in the Main," University Symphony Orchestra, 3 p.m. Sunday, Oct. 29, Main Auditorium, University Hall. \$2 adults, \$1 students.

Edwin Betts, trumpet, 8 p.m. Sunday, Oct. 29, Recital Hall, College of Musical Arts. Free.

Woodwind Quintet, 8 p.m. Monday, Oct. 30, Recital Hall, College of Musical Arts. Free.

Saxophone ensemble, 8 p.m. Tuesday, Oct. 31, Recital Hall, College of Musical Arts. Free.

David and Ann Pope, piano, 8 p.m. Wednesday, Nov. 1, Recital Hall, College of Musical Arts. Free.

Theater

BGSU Theater: Reader's Theater production of "Women in Literature" by Lois Cheney, 8 p.m. Oct. 26-28, Joe E. Brown Theater. 50 cents.

"The Fantastics," University Cabaret Theater, 9 p.m. Oct. 27-28, Holiday Inn, Bowling Green.

Artist Series: Great Lakes Shakespeare Festival production of "What Every Woman Knows," 8 p.m. Tuesday, Oct. 31, Main Auditorium, University Hall. \$3 adults, \$1 students.

Television

"U.N. Day Concert 1978," The American Symphony Orchestra, 9 p.m. Tuesday, Oct. 24, WBGU-TV, Channel 57.

"F.Y.I.: Tax Reform," (on the tax revolts of the American middle class through their voting habits (in the fall elections), 8 p.m. Sunday, Oct. 29, WBGU-TV, Channel 57.

Films

"Schloss Vogelod," 1921 German film, 8:30 p.m. Tuesday, Oct. 24, Room 105 Hanna Hall. Free.

"Nibelungen," German film from 1923-24, 8:30 p.m. Tuesday, Oct. 31, Room 105 Hanna Hall. Free.

"Mark Twain Speaks," a one-man theatrical performance by William Morse, 1:30 p.m. Wednesday, Nov. 1, Commuter Center, Moseley Hall.

Sports

Hockey, BGSU-Miami, 7:30 p.m. Friday, Oct. 27, Ice Arena.

Football, BGSU-Central Michigan, Homecoming game, 1:30 p.m. Saturday, Oct. 28, Doyt L. Perry Stadium.

Hockey, BGSU-New Hampshire, 7:30 p.m. Friday, Nov. 3, Ice Arena.

Hockey, BGSU-New Hampshire, 7:30 p.m. Saturday, Nov. 4, Ice Arena.

Football BGSU-Ball State, Parents Day game, 1:30 p.m. Saturday, Nov. 4, Doyt L. Perry Stadium.

Cross Country, Mid-American championship, 11 a.m. Saturday, Nov. 4, golf course.

Update

Last November the trustee--appointed Ad Hoc Police Review Panel submitted a list of recommendations to be implemented into the University police department. Since then the department has been overhauled and a new director named. Many of the suggestions already have been incorporated into the department and others are scheduled within the next year.

"We have assigned each of the Ad Hoc Panel's recommendations a number or letter of priority," said William Bess, director of Campus Safety and Security since July.

"When funds become available, we anticipate implementation of 100 per cent of the suggestions." Target date for completion is fall quarter of 1979-80, Bess said.

Completed to-date are 17 of the panel's 35 recommendations. They include the renaming and restructuring of the department, new emphasis on service, a new weapons policy and codes of ethics and conduct.

"We're getting away from military titles such as lieutenants and sergeants. Instead we have associate directors, field supervisors and police officers," Bess said. Special attention is being devoted to increasing student participation.

Manpower, which dwindled drastically when the Ad Hoc panel submitted its recommendations, is gradually returning to normal, with 15 currently on the staff. An additional 21 students also have been hired. Plans are to hire more officers and a second associate director.

Programs which will be ready as soon as funds are available include student clerical positions and officer training programs.

"I can sense a positive change of attitude in the student body," Bess noted, "and I also can sense changes within the department itself. Officers recognize the need for change, support it and want to get the job done."

Monitor

Monitor is published every two weeks during the academic year for faculty and staff of Bowling Green State University:

Editor: Linda Swaisgood
Editorial Assistant: Vicki Nonnamaker
Change of address notices, and other information should be sent to:
