Reactions vary on student wage increase

Most students are jubilant about an hourly on-campus wage hike which will take effect June 25. However, departmental employers of the students, who are facing 10-15 percent budget cuts next year, say the pay increases may present problems.

Mona Pugh, director of residence dining, said campus food operations employ about 1,000 students, each 10 hours a week, during the nine-month school year. The raise, which varies from 15-35 cents an hour depending upon student job classification, will cost food operations an additional $3,500 a week, she said.

"We will have to be better managers," Pugh said. "We'll combine some jobs if we can, eliminate some a year Bowling Green received $330,000 to supplement student wages; next year $715,000 will be available.

Two honorary degrees to be awarded June 9

Two honorary degrees and a Distinguished Alumnus Award will be conferred at spring quarter commencement at 10 a.m. Saturday, June 9, in Perry Stadium.

In the event of inclement weather, two commencement ceremonies will be conducted in Memorial Hall.

Students in the Graduate College, College of Musical Arts and College of Education will receive diplomas at 10 a.m. Students in the College of Arts and Sciences, College of Health and Community Services, College of Business Administration and Firelands College will graduate at 2 p.m.

A decision on whether to hold the exercises indoors or outdoors will be made at 8 a.m. on June 9.
Faculty Senate

Faculty Senate began to look at the issue of long-range planning at its May 29 meeting.

David Roller, chair, said the Senate Executive Committee has approved formation of a new University Planning Committee, an Advisory Committee on Long-Range Planning, to replace the current General Faculty Planning Committee. Dr. Roller said the new committee will be formed if it is approved by President Moore.

Stuart Greens, history, introduced a motion that a committee of senators be formed to assist with the review of new and旧 Senate committee of the University and to make recommendations to the Senate or the Senate for action on filling those positions. His motion was referred to the SEC for refinement.

The Senate did, however, pass a resolution favoring Senate input into policies and procedures which will not involve only faculty, but also administrative and classified staff positions.

Senator endorsed a continuing energy conservation program for the University in the future events enacted during 1977-78. Such a program could result in savings of over $400,000 per year, according to Mr. Goff, the Government Administration officer and representative to the Senate with the request.

Dr. Roller announced that a University-wide energy conservation committee already had been commissioned by President Moore. Thomas B. Cobb, a assistant provost for research, will chair that committee. He will name the other members at a later date.

In other action, the Senate passed a policy statement regarding the use of student evaluations of faculty. The new policy makes student evaluations an option, but not a mandate, in the assessment of teacher abilities by academic units.

Senate also approved a faculty maternity-paternity leave policy which includes several options for arranging departmental leave.

The options include scheduling a maternity leave without pay for the faculty member; having a colleague cover missed classes establishing a schedule in which the faculty member would have time within a quarter to attend to the expected birth.

The policy also states, "Maternity-paternity time is to be arranged on mutually acceptable terms by the faculty member and his-her chair. When such an agreement is in place, either or both may use sick-leave time to attend to the temporary disability occasioned by childbirth."

Frank Baldanza, English, recognized retiring faculty, noting that several who will be leaving in June have been "pillars of the University."

New chair sees "no growth planning" as major issue for Faculty Senate

I've been in the Senate a long time," says Thomas Kinney, English, who will chair the group next year.

Dr. Kinney will bring to the 12 years experience in the Senate as well as knowledge gained while serving as Senate secretary (1969-68) and as a member of various Senate committees. He also has served on both the Publications and Humanities Degree committees at the University.

As Senate chair, Dr. Kinney said he hopes to involve that body in a number of University issues, including implementation of faculty communication on campus, goal-setting and long-range planning.

"We are going to have to start planning for some kind of a no-growth university," he said. "We must be involved in the priorities of spending and staffing." Dr. Kinney told the Senate at a meeting May 1 that the University should also concern itself with faculty development in light of the tight money situation.

"I don't know if faculty on the whole are dissatisfied about their pay, but there is no possible deterioration of morale in the enthusiasm that hitherto was avoided by expanding programs and opportunities," he said.

"Since Bowling Green has had a relatively high teaching load, it seems an appropriate area with which to concern itself. Perhaps we need a University-wide or college-wide agency which can help individual faculty members improve their instruction, all the more so in light of the Senate's work.

Business program brings executives to campus for student seminars

Students discover what it's like in the "real" business world thanks to the University's Executive-in-Residence Program.

The program, started in 1977 in the College of Business Administration, brings business executives, usually Bowling Green alumni, back to the University to teach BA 461 each spring quarter. This quarter 18 executives were scheduled to speak.

William Hoskins, International business, stressed that Bowling Green's program is unique because nearly all speakers graduated from the University.

This aspect of the program raises the students' confidence level; it "gives an emotional, personal attachment (to the speaker) and also lets students know that people from BG make it as well as those from anywhere else," Dr. Hoskins said.

Open to any graduating senior with a business background, the class is a "good opportunity to give students a chance to ask specific questions of the people who have been successful in business," he added.

According to Dr. Hoskins, the program encompasses two areas. First, the speaker explains what it is like in business—a "how-I-got-where-I-am" type of discussion.

Next, the speaker gives the students an overview of the course he or she takes to be a successful career. The remainder of the session is devoted to questions and answers.

"Students have a chance to test what they've heard in a classroom setting against what they've heard from business," Dr. Hoskins said.

He explained that speakers are selected from the Alumni Advisory Board for the College of Business Administration.

"The alumni spend their own time and money to come and talk to the students," Dr. Hoskins said, adding that many return year after year.

This year, several of the speakers who visited campus included Nick Mileti, president, Cleveland State University; Charles Schoeppler, chairman, Chase Manhattan Ltd. of London, and John W. Stinson, president, U.S. and Canadian Sales, The Boeing Company.

Swihart, who graduated from Bowling Green in 1949 with a B.S. in business administration, is a marketing executive who helps students meet the key elements of a successful marketing campaign for the Boeing Company production line. He also discussed the marketing strategy for the various commercial aircraft products that Boeing produces, including the 707 and the 707-seat 747.

Dr. Green said he thinks the Executive-in-Residence program works very well because it gives students another view of the working executive and it gives the students knowledge and experience beyond the textbook.

Swihart has made two visits to campus for the program. He said he takes the time to come back to Bowling Green from Seattle because he wants to help make students better employees.

"It's also my little bit to help repay Bowling Green for giving me the opportunity to be able to go out in the business world and become an executive," Swihart said.

His advice to business students; "I would emphasize that they should try to work as hard as they can to establish themselves; to get as broad a coverage in the company as they can and not limit themselves to their major field of study.

Swihart also shared the "Professional Manager's Code," a code for employee relations with the boss. The code says simply that an employee should go to his boss and "state the problem, make a recommendation, get a decision, and get out."

Science featured in summer exhibit

Everything from laser beams and fruit flies to birds and fish tanks will be displayed this summer in McFall Center Gallery.

"The Sciences: Departments of Biology, Chemistry, Physics and Geology," will be on exhibit from 8 a.m. to 5 p.m. weekdays, July 1 through the first week of October.
Grants

James H. Blisland, John J. Bollman, Harold Flinchum, journalism, $1,500 from the College of Business Administration's summer grant program to aid in a pilot study to develop a methodology for predicting future curricular needs of journalism education.

Don Bright, business education, $400 from the Ohio Department of Education to sponsor a one-day in-service teacher conference on "Improving Methods of Vocational Teaching."

David Fulton, computer science, $1,890.40 from the D.S. Brown Co., North Baltimore, to continue computer operations research with the firm. The Jackson center science department helped the D.S. Brown Co. install a minicomputer to serve its needs and continues to provide assistance with the functioning of the equipment. The grant funds a graduate assistantship for research with D.S. Brown Co.

Gale Halpigh, biological sciences, $300 from the American Society of Mammalogists to study the social factors affecting reproduction in deer mice.

Harry Hoemann, psychology, $50,561 from the Public Health Service, Dept. of Health, Education and Welfare, to research communication skills in deaf children.

William B. Jackson, environmental studies, $5,000 from the Ohio State University Research Foundation to continue identifica
tion and control of lake Erie nearshore sediment and fish stomach samples. Dr. Jackson also received $2,185 American Chemical Society, R. Bergman, educational research, for a project to study the use of Chempar rodenticides and Chempar Chemical Co., to continue research with experimental deer mice.

Richard Lineback, philosophy, $8,000 from the National Endowment for the Humanities for the philosophy Documentation Center. The Center will process articles and books published in English in countries other than the United States and will publish a four-volume bibliography of the material. The bibliography also will be recorded in a computerized information bank.

Recognitions

Gerald B. Bergman, educational foundations, has been engaged by Phi Delta Kappa Educational Foundation, Inc., to prepare a manuscript on teaching of the creation-evolution controversy. The foundation will publish the article.

James H. Blisland, journalism, has been named as a "Facuity Member in Mass Communication" by the Bowling Green chapter of Kappa Delta Rho, an honorary journalism fraternity.

Dwight F. Burlingame, dean of libraries, has been elected vice president-president-elect of the Academic Library Association of Ohio. His term of office will begin July 1.

Virginia A. Eaman, speech communication, has been elected 1979-80 chair of the Communication Theory Interest Group for the Central States Speech Association.

She was elected at the 1979 CSSA Convention in St. Louis, where she also chaired a program presentation.

Willard Fox, educational administration and supervision, has been appointed to a newly-formed state advisory committee on administrator training. The committee will examine current training programs for administrators and will develop a process for reviewing the standards for administrator certification by the State Dept. of Education.

James R. Gordon, journalism, has been inducted as the first member of the Bowling Green School of Journalism's new "Hall of Fame."  

The Hall of Fame was established this year by the Bowling Green chapter of Kappa Tau Alpha, national journalism honor society. The purpose of the Hall of Fame is to recognize professional excellence in mass communication by University journalism alumni. One member will be chosen each year.

Gordon received his award from James H. Bisland, KTA adviser, at a ceremony May 25 during which eight School of Journalism seniors also were inducted into the honor society.

Vincent Mabert, management, has written a paper, "An Encoder Date System for Buring Systems at Chemical Bank," which was selected as the best paper presented or published by the American Institute of Decision Sciences in 1978.

Jo Anne Martin-Reynolds, educational curriculum and instruction, has been elected vice president of the Ohio Association for Supervision and Curriculum Development.

She has written an article on "Split Screen Videotaping" which has been accepted for publication in the Association for Supervision and Curriculum Development "Journal" in October or November.

Beatrice K. Morton, English, has been appointed a regional judge for the 1979 National Council of Teachers of English Achievement Awards in Language Arts Program.

She will judge writing samples of high school seniors who have been national honorable mention for the awards by their high school instructors.

Walter O'Donnell, visiting professor of management, has been elected to the executive committee of the College of Management Philosophy in the Institute of Management Science. He also has been selected to present a paper on "Some Philosophical Issues in Management Sciences" at the ORSA/TIMS Conference in Honolulu, Hawaii.

Gerald Rigby, criminal justice, has been elected to the Executive Committee of the Ohio Council of Higher Education in Criminal Justice.

The council is comprised of representatives from 31 in-
Faculty.

Mathematics Convention in Boston April 16-21.
At the same meeting, D. Thomas Hayes, educational curriculum and instruction, spoke on "Innovative Activities for the Gifted and the Underachiever."—an introduction to Mainstreaming.

William Speer, educational curriculum and instruction, spoke on "Prequisites for Computational Skill."

Paul Parnell, English, presented a paper on "Sentimental Tactics in Termanology," at the May 5 convention of the Johnson Society of the Central Region at Northwestern University.
He presented the same paper at the Northeastern Society for Eighteenth Century Studies Convention at the University of Massachusetts.

Maurice J. Seryngy, art, presented a paper on "Participatory Observer in the Studio Classroom: A Triangulated Approach" at the May convention of the American Educational Research in Art Education April 16 in San Francisco.
The National Committee was a part of the 19th National Art Education Association Convention.

Dr. Seryngy’s paper examined innovative strategies for the study of classroom life and instructional behavior.

Elizabeth Stimson, educational curriculum and instruction, chaired a special session on "Our World’s Children: How Are They Faring?" at the national conference of the Association for Supervision and Curriculum Development in Detroit.

Richard Wright, Center for Archives Collections, spoke on "Eleven Edmund Fitzgeralds." at the May 15 meeting of the Circumnavigators Club in Detroit.
He described a 1913 storm which sunk 11 freighters on the Great Lakes.

On May 9, Dr. Wright spoke on "The Changing Hemit of the Ladies of the Lake, or, An Evolutionary Profile of Great Lakes Freighters." at the Center for Great Lakes Studies at the University of Wisconsin at Milwaukee.

Paul D. Yon, Center for Archival Collections, spoke on "Bowling Green’s Center for Archival Collections: Role in Regional/Local Studies" at the ninth annual convention of the American Culture Association in Pittsburgh.
At the same meeting, Ted Lifberg, librarian for "A Part," spoke on "The Changing Hemit of the Ladies of the Lake, or, An Evolutionary Profile of Great Lakes Freighters." at the Center for Great Lakes Studies at the University of Wisconsin at Milwaukee.

The National Endowment for the Humanities awarded a $220,000 grant to Bowling Green, enabling the philosophy department to develop a master’s degree program in applied philosophy.

The philosophy department began revamping its graduate curriculum to stress applied philosophy and began developing a graduate degree program in social services agencies, business, government, legal services and international law.

The rationale of the program is to prepare graduates for jobs outside the realm of higher education.

The NEH grant, awarded for a three-year period, will fund projects related to the expansion of the humanities curriculum for philosophy students.

According to project director Louis J. Kutzer, philosophy director, Bowling Green’s philosophy program is "unique in the humanities and philosophy programs:"

"Traditionally," he said, "master’s degree programs have prepared students for PhD programs or prepared them to teach in junior colleges.

Since the mid-1970’s there has been a dramatic decline in the quality and quantity of applicants to traditional master’s degree programs in philosophy because there are no jobs in colleges and universities,"

Dr. Kutzer said.

Bowling Green’s philosophy department critically reviewed its offerings and opted to revamp the graduate curriculum.

Grants, contracts top $6 million mark
For the second year in a row, the University has topped the $6 million mark for grants and contracts awarded during a one-year period.
Grants awarded to the University during April totaled $34,000, bringing the year-to-date total to $1,052,079.

Provecto Ferrari called the $6 million total "a tribute to the quality of work done at the University."

"I think the total reflects the maturity and stature of the research being done by our faculty and staff, and it should be a matter of enormous pride for all those associated with the University," Dr. Ferrari said.

Grant to fund philosophy program
Rec Center launches summer season June 4

Summer-long passes to the Student Recreation Center are now available to faculty and staff at the cost of $29. The passes will be good from June 4 through Sept. 2.
A special program of indoor and outdoor activities has been planned during the summer months. Mini-courses and workshops in racquetball, squash, tennis, and gymnastics will be offered. Three programs also are planned for the Cooper Pool, including basic swimming, gymnastics and "water babies." Golf tournaments also will be part of the Center’s summer program, with competitors vying for the President’s Cup (low gross) and the Provost’s Cup (low net).
Faculty and staff also may join with students and community members in a Community Unity Sports League featuring softball, basketball and tennis teams.

Also planned are several “Family Night” activities at the Recreation Center pond. Other programs to be offered include movie, concert and field trips.
For further information about the summer programs, call 372-2000.

News Review

Firelands to offer weekend business program

Firelands campus will offer a Weekend College beginning next fall to meet the needs of the non-traditional student.

The Weekend College will include the master of business administration degree program and the Firelands College business management technology program.

The program will enable students who are employed during the week to complete degrees without interrupting their work schedules.

To arrange the curriculum, Firelands College Alayne P. Adams has worked closely with Karl Vogt, dean of the College of Business Administration, and Edwin C. Bomei, director of graduate studies in business.

Joanne Smith directs Creative Arts Program

Joanne Smith, former coordinator of the beginning piano program for children in the music department at the University of Toledo, has been appointed director of the Creative Arts Program at Bowling Green.

Robert Glidden, dean of the College of Musical Arts, which includes the Creative Arts Program, announced the appointment. Smith has already assumed her duties.

The Creative Arts Program, established in 1965, annually attracts more than 600 youngsters between the ages of 3 and 18 from throughout northern Ohio. The program offers both individual and class instruction in a variety of musical instruments, as well as classes in dance and art.

Placement office honors Provost Ferrari

Provecto Ferrari received the 1979 Karol S., King Award at the 17th annual "Falcon Hunter Picnic and Reunion" recognition day May 15.
The award is presented annually in recognition of service to the University Placement Office, which sponsored the recognition day.

Miss King was a member of the placement office staff from 1961-1974.

Antony van Beysvarne, romance languages, "Estudio comparativo del teatro profano de Lope de Vega y del de Guzmán de Encina" in the Winter, 1979 issue of "Revista canadiense de estudios hispanicos."

John Huffman, journalism, and Denise Trump, speech communication, "We’re A U of BFAe".
