Youngstown universities to exchange views on a calendar modification with faculty and study on the 1981-82 academic year. The proposed change, which has been scheduled from the original group possible change and rejected the idea of another at 7:30 p.m., in the Grand Ballroom of the University Union. The Ad Hoc Committee on Calendar Change has scheduled five regular meetings during the first two weeks of March. According to Dwight Burlingame, dean of libraries and chair of the calendar committee, the report will make a recommendation, based upon the information gathered, that the early semester calendar is or is not feasible or advisable at this time. The written report will be reviewed by the committee as a whole at a meeting March 12 and will be forwarded to Provost Ferrari by March 15. He will turn submit the committee's recommendation to both Academic Council and the Faculty Senate for further debate. Dr. Burlingame emphasized that no decision has been made within the committee whether to recommend an early semester calendar. "We simply are looking at the positive and negative aspects of such a plan," he said. Provost Ferrari also affirmed that no decision has been made at this time with respect to a calendar change. "We will await the findings of the Committee on Calendar Change," he said. "We are making no plans to implement a change now." He stressed that both the Faculty Senate and Academic Council will review the committee's findings extensively and that faculty, staff and students will have input in the final decision.

According to Dr. Burlingame, more than 100 people in the University community are involved in the calendar study. Members of the ad hoc committee are Daniel Tutolo, education curriculum and instruction; Bonita Greenberg, speech communication; Julius Kosek, Firelands; Virginia Marks, music performance studies; Robert Patton, applied statistics and operations research; James Stuart, philosophy; Milford Lougheed, education; Fayetta Paulsen, residence life; Joanne Guyton, Medical College of Ohio, and Milford Lougheed, professor emeritus of geology. The 17 subcommittees are chaired by members of the ad hoc committee but are comprised of numerous people from the University.

"We have made every effort to find a place for everyone who wants to be included on the committees," Dr. Burlingame said. Those subcommittees are studying the impact of calendar change on athletics; off-campus and non-traditional students and programs; clinical experiences; student teaching; cultural events; relationships with the Medical College of Ohio and Student Government Association; Graduate Student Association; summer school and international programs; curriculum revision; pedagogy; Firelands; employment opportunities and placement; laboratory study in the sciences; admissions and student recruitment, and community relations.

The hospitality industry, one of the fastest growing businesses in the country, is constantly in need of trained management personnel. That is where Bowling Green State University will fill the growing need with Bowling Green this quarter to offer a 10-week series of seminars on "The Hospitality Industry: Today, Tomorrow," which is being offered one hour of credit. More than 20 companies are expected to participate in a 10-week series which has been planned to serve both Bowling Green students who are looking for jobs and the participating firms who are looking for qualified, trained personnel. Last year, Bowling Green sponsored an informal, informational seminar for students about the job market in the hospitality industry. Representatives of four companies were invited to campus to talk about their businesses and met individually with students to present job opportunities for almost every student at the University. Whether they are in marketing, accounting, management or hotel economics, public relations, sales, recreation or chemistry," Dr. Williford said. He added that the University's existing program in food service management is being expanded to prepare students to enter almost any facet of the hospitality industry ranging from airlines catering to food product development and sales. Revisions in courses and the development of new classes for the program are being modeled after recommendations from industry representatives.

Changes will include a greater emphasis on applied courses, such as those in food chemistry, microbiology and food sanitation, as well as additional courses in business administration.

Dr. Williford said the University also is attempting to develop a cooperative work program with representatives of the hospitality industry to provide students with on-job training while still in school. According to Dr. Williford, there is no other four-year academic program like Bowling Green's in northwest Ohio and there are few others in the state. The redesigned program would enable students enrolled in area two-year programs to transfer to Bowling Green or if they desired a bachelor's degree in the field, Dr. Williford added. "We feel that through years of training and cooperative work programs, we can turn out a more refined product. And the industry people we've talked to have been very excited about it," Dr. Williford said.

A BOOMING INDUSTRY--The hospitality industry, which includes food service, restaurant and hotel management, is one of the fastest growing businesses in the United States today. Its rapid growth has resulted in a need for well-trained management personnel. Meeting that need has become a goal of the University as it expands its food service management program and offers seminars to students about the job market in the industry. In Bowling Green alone, there are more than 70 restaurants which employ anywhere from 15 to 75 people.
Record freshman class represents state, nation

The typical freshman at Bowling Green this year is an Ohioan who earned a 3.1 cumulative grade point average during his high school career, scored 1200 on his ACT entrance exam and finished in the top 20 percent of his high school graduating class.

"Although several of these "average" freshmen may actually exist on campus, the class, in reality, includes students from 25 states other than Ohio and 92 men and women who were either valedictorians or salutatorians in their high schools.

Numbering 3,695, it is the largest freshman group ever at Bowling Green. Approximately 20 percent of the class was ranked in the top 10 percent of their high school classes.

The University has annually attracted a large number of students from the Cleveland area. This year's freshman class is no different—650 students from Cuyahoga County are enrolled.

The class includes 215 students from Wood County and 270 students from Lucas County.

Frank Baldanza, a University Professor of English, is accustomed to an audience when he talks.

His usual audience is students, but since he has ventured into the world of radio, he now speaks to an unseen public, and that aspect of his new undertaking is probably the most difficult, he says.

Dr. Baldanza is producing and announcing a weekly radio program for WGTE-FM. The program, devoted to the art song in Europe and America, is titled "The Song is Art" and airs Tuesdays at 10 p.m.

"It is difficult talking to a microphone," Dr. Baldanza said. "You have no feedback from listeners. When I am teaching, even if my students fall asleep, I have an audience. I try to find things to make my program "zing," but I have no idea if they are working because I can see no visible reaction.

Preferred parking incentive to carpool

Faculty, staff and commuters who have organized into carpools will have access to "preferred parking" spaces, according to the Parking Services office.

Those spaces will be in Lots A, E, H and N for faculty and staff and in Lots 1, 2, 3, 5, and 15 for commuter students. Signs designating the spaces will be erected as soon as carpoolers have registered with Parking Services.

To be eligible for the preferential parking, three or more people who have current vehicle decals can exchange those for a special carpool sticker. A transferable permit will be issued for the car operating the pool at any given time and that entitles vehicle to park in the selected spaces.

Parking Services has established a carpooling hotline where information about the program and the names of people interested in carpooling will be available. This hotline number is 372-2779.

Frank Baldanza, University Professor

Dr. Baldanza discovers radio is unseen challenge

Frank Baldanza was asked by the station manager to do a program on the art song. After he wrote asking why more attention was not devoted to the song on regular programming.

Music has always been of great interest to Dr. Baldanza and he explained it is not too different from the English literature which is his specialty. "The art song is actually very close to literature," he said.

"The words of many of the songs are poems set to music. It is interesting to see how the poetry and music interact."

His desire to emphasize music literature and the role of the composer rather than the performer is central to Dr. Baldanza's method of programming his art song program.

Dr. Baldanza said he thoroughly researches a composer before compiling a program of his music, attempting to find some anecdotes which will make that composer come alive for the listener. He also spends a great deal of time collecting recordings for the programs and translating works recorded in foreign languages.

His research is made easier, he said, by the cooperation he receives from other faculty at the University.

Although this is his first experience in radio broadcasting, Dr. Baldanza said his work thus far has been sufficient to convince him that he loves the job.

Dr. Baldanza said he has received a number of compliments on the program. "Although one of his goals in producing the show is to acquaint music students with the literature of the art song, he also delights in reaching shut-in and nursing home residents."
Ohio Grants

$9,000 Educational Television Foundation to deal with schools and communities written and reported by sixth grade

25 plant Resources to research approximately

benefit the scientific community and citizens of Ohio.

Margaret Tucker, Northwest Ohio Educational Television Foundation, $50,000 from the Northwest Ohio Educational Television Foundation, to continue funding wages and fringe benefits for a clerk in the Library Faculty, and $5,750.85 from the Wood County Manpower Dept. to continue funding wages and fringe benefits for a photo laboratory technician in the Center for Archival Collections.

Richard Wright, Center for Archival Collections, $10,865.30 from the Wood County Commissions to continue funding wages and fringe benefits for a photo laboratory periodical cards withdrawal project.

The council's primary purposes are to secure more private sector jobs for the economically disadvantaged and to attract greater support from private business in all aspects of local employment and training activities for persons under the Comprehensive Employment Training Act (CETA).

Robert Hansen, speech communication, has been appointed chairman of the Cleveland chapter of the United States Institute of Theater Technology.

Robert Fisher, biological sciences, $25,000 from the Ohio Dept. of Natural Resources to research approximately 275 plants species.

His work will be submitted to the Ohio flora Committee of the Ohio Academy of Science for publication to benefit the scientific community and citizens of Ohio.

Michael Fitzpatrick, WBOU-TV, $9,000 from the Northwest Ohio Educational Television Foundation to produce and televise 25 editions of "News Six," a series of newscasts dealing with schools and communities in northwest Ohio. The broadcasts are written and reported by sixth grade students from school districts in the area.

Margaret Tucker, Northwest Ohio Educational Television Foundation, $50,000 from the Ohio Dept. of Education, which will enable members of NWOETV to purchase equipment to improve their reception and service. The member schools are required to match funds they receive from the state.

Flora Wood, library, $6,750.85 from the Wood County Library Manpower Dept. to continue funding wages and fringe benefits for a library periodical cards withdrawal project.

Richard Wright, Center for Archival Collections, $10,865.30 from the Wood County Commissions to continue funding wages and fringe benefits for a photo laboratory technician in the Center for Archival Collections.

Mickey Cochrane

Soccer field named for Cochrane

The University's soccer field has received a name. In a resolution Thursday by the Board of Trustees, the field was designated Cochrane Field in honor of Mickey Cochrane, School of Health, Physical Education and Recreation.

Cochrane was head coach of the University's soccer and lacrosse teams from 1964-1978, when he retired from coaching. According to James Lesljq, director of athletics, it was Cochrane who helped Bowling Green's soccer and lacrosse teams to positions of national prominence.

Last August, Cochrane was one of four men selected by the ex-Bowling Green National Soccer Coaches Association of America to participate in a soccer coaches' training trip to Brazil.

European Organization for Nuclear Research.

Melvin Hymas, speech communication, "Index to Speech, Language and Hearing," co-authored with Paul Placke, Case-Western Reserve University; Patricia Krizos, Akron University, and John Black, Ohio State University.

The book is a comprehensive, coded inventory of research in the fields of the speech, language and hearing sciences.

Dr. Hymas also has co-authored an article on "Efficiency of Teacher Identification and Referral of Children with Voice Disorders" which will appear in the spring, 1980 issue of "Ohio Journal of Speech and Hearing."

Alex Johnson, special education, and Carol Cartwright, Pennsylvania State University, "The Roles of Information and Experience in Improving Teachers' Knowledge and Attitudes about Mainstreaming," in the winter, 1979 issue of "Journal of Special Education."

Presentations

She also presented a paper on "Francisco Brines and Claudia Rodriguez: Two Recent Approaches to Poetic Creation" at the Nov. 8-10 annual meeting of the Midwest Modern Language Association.

Richard Burke and Melvin Shelley, educational foundations, and inquiry, spoke on "Examining the Process in Educational Psychology Classroom" at a meeting of the Midwest Association of Teachers of Educational Psychology at Kent State University.

Virginia Eman, speech communication, chaired a session on pedagogical issues dealing with women's studies at the annual convention of the Southern Communication Association Nov. 10-13 in San Antonio.

Karlin Sandell, speech communication, presented a paper on "Perceived Functions and Effects of Television for the Individual and Society: A Preliminary Study" at the same meeting.

Denise Trauth, speech communication, spoke on "The Pacifica Case: The Supreme Court's New Regulatory Rationale for Broadcasting," and Allen White, speech communication, presented a paper in a panel discussion on staging Shakespearean plays, during which he presented a paper, "The Director's Perspective."

Virginia Eman and Kathi Dielsk-Stewart, speech communication, presented a research seminar on "Conceptualizing and Measuring Sexual Identity" for women's curricular sponsored by the Women's Studies Program.

Herbert Greenberg, speech communication, presented a paper on "Low Level Acoustic Reactive Thresholds" at the annual meeting of the American Speech-Language-Hearing Association in Atlanta.

Severe weather policy announced

Faculty, staff and students are reminded that the decision to cancel classes in the event of severe weather rests with Provost Ferrari. Dr. Ferrari will communicate any decision to cancel classes to faculty, staff and students through Campus Fact Line (372-2445), WBOU-FM (88.1), WFAF-AM (680) and local radio stations WJKO-FM, WFOB, WOHO, WSFP, WCWA, WLQR-FM and WFIN. WBOU-TV (CH. 57) and the three Toledo television stations, Ch. 11, 13 and 24, also will be notified.

Every effort will be made to notify these media by 7 a.m. the day of any closing. If an afternoon storm necessitates the cancellation of evening classes, the above-mentioned media will be notified.

Though classes may be cancelled, employees should not assume that cancelling work schedules, all University employees are expected to report to their job assignments even though classes are not being held.

If classes are cancelled, there are many functions that must be continued, such as serving meals, providing heat and light for University buildings, maintaining services in the Health Center, removing snow from parking areas and sidewalks and other essential duties.
United Way campaign nets total of $38,540
The University's United Way campaign fell short of its $47,500 goal by nearly $9,000 according to Dr. Johnson, applied statistics and operations research, who coordinated the fund drive this year.
The amount collected represented only 82 percent of the goal set by the United Way for the University.
Dr. Johnson said the drive netted $38,540, compared to last year's $41,980.
Only 375 faculty and staff contributed to the campaign this year.

Omicron Delta Kappa taps 17 new members
An alumnus, an accounting instructor, three administrators, 11 undergraduates and author James Baldwin were tapped Nov. 30 for membership in the Bowling Green circle of Omicron Delta Kappa, a national leadership honor society.

Lawrence Smith of Cleveland television personality, was the alumnus selected for membership.

Administrators tapped were Wayne Conlin, residence life, Jerry Richardson, placement services, and Gardner McLean Jr., news and photo services.

Honor society selects ‘Faculty of the Year’
Dr. Johnson, speech communication, Donna Fricke, English, and Park Leathers, accounting and management information systems, was the faculty member chosen.

The four were selected by the ALD executive committee from 29 faculty nominated by the society's members.

University Foundation names officers, members
The University Foundation, Inc., a non-profit organization designed to seek and manage private gifts to the University, has elected five new officers for the coming year and named 10 new board members, including a faculty representative.

Jack Packard, president of corporate relations for Owens-Illinois in Toledo, has been elected president, and William Primrose Jr., president of The Dickey-Grabler Co. of Cleveland, was elected first vice president, and J. Warren Hall, vice president of Cleveland's National League Bank, was named vice president.

The new treasurer is James Dillingham, controller for the Marathon Oil Co., Findlay.
James Hof, vice president for alumni and development, was elected director; and Bowling Green, was named to the board.

Appointed to a four-year term on the board was faculty representative Harvey Donley, accounting and management information systems.

James Baldwin, internationally-acclaimed author, has left Bowling Green, but he will return.

Baldwin said a university should teach students how to think.

As a writer, Baldwin said he is appalled by students' inability to think and express their thoughts.

"Grading papers was frightening," Baldwin said. "I had to deal with what the student was trying to say and disregard how he was saying it. He added that it is impossible to teach students how to write if they do not know how to think.

Baldwin blamed the students' weaknesses on television and the political structure of the education system which he said, reflects the "disorganization of government."

"Television boils your brains in a cauldron," he said. "It does not oblige you to do anything deeply--to do anything for yourself.

Social work program earns national accreditation
Although still in its early years, the social work program at Bowling Green has come of age.
The five-year-old program, which is one of approximately 220 full-time students and is housed in the College of Health and Community Services, has been accredited by the Council on Social Work Education, the national accrediting agency for all graduate and undergraduate social work programs.

According to Evan Bertsche, director of the program, it is highly unusual for a five-year-old and only 20-30 years ago the program included courses in ethnic studies, law, computer science, psychology and sociology.

Bertsche credited quality faculty and curriculum, including a required social work internship, as central to the program's excellence.

Bowling Green has developed working relationships with more than 30 social welfare agencies to provide "hands-on" experience for students in the program. Each of the program's full-time faculty also has worked extensively in the field.

In addition, the core curriculum of the program includes courses in ethnic studies, law, computer science, psychology and sociology.

"The accrediting body looks to see that students get a realistic view of social work practice," Bertsche said, adding that Bowling Green students are required to complete 30 hours of volunteer work in a social service agency before declaring a social work major at the University.

Students admitted to the program are required to complete 200 hours of actual social work practice during their senior year.

Bertsche said that the social work program's goal is also due largely to the efforts of Joseph K. Balogh, dean of the College of Health and Community Services. "Without him, there would be no program," Bertsche said, adding that Dr.

Baldoveh has supported the social work program since program began in sociology department.

Bowing Green's social work program is on the general social work program, although a number of graduates opt to pursue a master's degree.

"An undergraduate degree in social work is a relatively new concept," Bertsche said. "For many years social work was considered strictly a graduate-level field.

Those graduates who go directly into practice find jobs in hospitals, senior citizen programs, juvenile courts and correctional facilities, mental health clinics and alcohol abuse programs and rehabilitation programs.

"Our graduates who want to work can find jobs if they are willing to be mobile," Bertsche said.

Television destroys reality, and that is devastating.

He added, "It is up to a university to teach students so real that students can learn how to think--how to communicate and be real to other people.

"If we are not real to one another, then we are not real to other people, and that trust is the basis for morality, which the University stands for.

Although he had no time to devote to his literary pursuits while in Bowling Green for the quarter, Baldwin intends to better plan his time when he returns to the University in 1981 so that he can teach and write.

"As a writer, I am very lucky," he said. "At my age (70), you are really just beginning."

Baldwin, who has written 18 books, including five best-sellers, said he probably won't complete another book before he is 60.

"The last book ("Just Above My Head") took more than four years," he said. "It was out of an idea the next book will be. You get your ideas from interactions with other people," he said. "You get ideas from your true past--those things that really happened to you. And you get your ideas from trying not to be too frightened of life.

When/Where
Exhibits
The works of Kathryn Jenkins, James Baldwin and G. William Skaggs, paintings, drawings, prints and sculpture, will be on display at University Gallery, School of Art. Gallery hours are 8 a.m. to 5 p.m. Monday through Friday and 1-5 p.m. Saturday and Sunday.

The works of Adrien and Valerie Tio, sculuptor and painter, through Feb. 1 at Alumni Gallery, Mietet, Bryan Recital Hall. Gallery hours are 8 a.m. to 5 p.m. weekdays.

University Prints, never before displayed, will be on exhibit daily 2-5 p.m. through Feb. 22 at McFall Center Gallery.

Music
Creative Arts Youth Orchestra, 3 p.m. Sunday, Jan. 13, Kobacker Hall, Musical Arts Center.

Jazz Lab Bands, 8 p.m., Thursday, Jan. 17, Kobacker Hall, Musical Arts Center.

"The Magic Flute," Opera Workshop production, 8 p.m. Friday, Jan. 18, and 7 p.m., Sunday, Jan. 20 at Bryan Recital Hall, Musical Arts Center.

Symphony Orchestra, 3 p.m. Sunday, Jan. 20, Kobacker Hall, Musical Arts Center.

Symphonic Band, Band Reading Clinic, 8 p.m. Friday, Jan. 25, Kobacker Hall, Musical Arts Center.

Concert Band I, Band Reading Clinic, 11 a.m. Saturday, Jan. 26, Bryan Recital Hall, Musical Arts Center.

Bernard Linden, viola, 8 p.m. Saturday, Jan. 26, Bryan Recital Hall, Musical Arts Center.

Brass Quintet, 3 p.m. Sunday, Jan. 27, Bryan Recital Hall, Musical Arts Center.

Jerome Rose, piano, 8 p.m. Sunday, Jan. 27, Kobacker Hall, Musical Arts Center.
