Revitalized curriculum planned

General education to undergo committee scrutiny

A General Education Task Force organized in January by John Eriksen, dean of the College of Arts and Sciences, has defined its mission and set about revitalizing general education at the University.

Dr. Eriksen was commissioned last fall by Provost Ferrari to spearhead general studies reform and develop a general studies curriculum that provides skills and understandings complimentary to major and professional programs.

In his remarks to faculty at the opening convocation for faculty and staff Sept. 24, Dr. Ferrari said, "We have permitted our general education and group requirements to develop in a largely ambiguous, unplanned and, I fear, undistinguished way. To some extent, we have sacrificed depth and breadth in general education for narrow departmental concerns."

Dr. Eriksen reported on the status of the task force, and of general education at Bowling Green at a meeting of Academic Council April 2.

Composed of arts and sciences faculty, the task force will monitor and review the general education program at the University.

To accomplish that task, the committee will work closely with departments as it re-examines the goals, functions and priorities of the general education program. Dr. Eriksen said there is a need to make the general studies curriculum stronger and more coherent, as well as to renew emphasis on the importance of teaching the courses and make their role more intelligible to students.

In the next year, the committee will review all courses presently offered as general education and determine if they articulate the basic learning skills and understandings defined as essential to general studies last year by the Academic Council.

Courses will then require the approval of the arts and sciences dean before they can be offered as general studies in the revitalized curriculum to be offered beginning in 1981-82.

This quarter the committee is developing guidelines for departmental course development and review. The task force also is reviewing the skills identified as basic to general education by the Academic Council: speaking and

listening; computation and mathematics; reading and writing; critical thinking and values analysis.

A review of all present humanities general education offerings is scheduled during fall quarter next year, with science general education to be examined during winter quarter, 1981, and social science general education to be reviewed in spring quarter, 1981.

The committee will disband in June, 1981, if work is completed on target, and the new general studies curriculum will be implemented in 1981-82.

Dr. Eriksen, who said Bowling Green is considered a leader in the area of general education, cited the University's efforts in the 1970s as indicative of its long-term commitment to general studies.

During that decade Bowling Green introduced the Little College, Humanities Cluster College and a science cluster which was dropped after two years.

In addition, the University established the University Division of General Studies in 1974-75 to monitor its general education mission, and conducted numerous studies of its general education offerings.

"Work on general studies is an accumulative process," Dr. Eriksen said. "Although there are no simple answers and there is no single formula for success in improving the general education offerings, we have the benefit of being able to review our past efforts as well as the opportunity to improve our strategies."

Dr. Eriksen cited two major problems with general education as it presently exists at Bowling Green.

"The basic problem with many courses is that they tend to function as introduction to the major of a discipline rather than as general courses reflecting development of skills and outcomes within the context of disciplinary subject matter," he said.

"Another problem with general education courses is that they have been frequently identified as merely 'distribution' requirements. In this case, students and faculty alike will consider these courses to be without logical connection and courses to 'get out of the way.'"

Dr. Eriksen pointed to the organizational format of the University as one obstacle to achievement of a meaningful general education core but said, "The fact remains that if we must change our structures to achieve our general education objectives, we will not be successful. The clue to development of a successful program in general education rests not primarily with the format, but with the attitudes of faculty toward the mission and role of general education in the baccalaureate curriculum."

Summer building temperatures set at 78 degrees

Working conditions for University employees may be somewhat uncomfortable again this summer as a result of the Federal Department of Energy's "Emergency Building Temperature Restrictions" issued last summer and recently extended through Jan. 15, 1981.

The restrictions require buildings to be cooled to no lower than 78 degrees during the air conditioning season and heated to no more than 65 degrees during the heating season.

Charles Coddling, director of the physical plant, said the University will continue to comply with the federal regulations and support all energy conservation efforts.

He added that a campus-wide energy task force chaired by Thomas B. Cobb, vice provost for research and graduate studies, continues to monitor the impact of the regulations on the University community.

Gary Heberlein named Graduate College dean

Gary T. Heberlein, chair of the biological sciences department since 1976, has been named dean of the University's Graduate College and vice provost for research, Provost Ferrari announced today.

Dr. Ferrari said Dr. Heberlein will begin phasing into the position immediately and will assume full-time responsibilities in the Graduate College July 1.

Dr. Heberlein succeeds Elmer Spreitzer, who has been acting dean since the resignation of John LaTourette July 1.

Dr. Heberlein's selection as graduate dean concluded a four-month national search conducted by a Search and

Screening Committee composed of graduate faculty and students.

Dr. Ferrari said Dr. Heberlein received the highest recommendation from the search committee, which selected five candidates for final interviews for the position.

"Dr. Heberlein is a scientist of national and international reputation in his scholarly work and he has demonstrated very able administrative leadership in the biological sciences department which has an excellent master's and doctoral program," Dr. Ferrari said.

"His philosophy and views on graduate education in the coming decade are consistent with the goals and potential of the University," he added.

A graduate of Ohio Wesleyan University, where he received his bachelor's degree, and Northwestern University where he earned both the master's and doctoral degrees, Dr. Heberlein has done post-doctoral work at the State University of Gent in Belgium.

He chaired biology departments at New York University and the University of Missouri before coming to Bowling Green in 1976.

At the graduate level, he has directed numerous Ph.D. and post-doctoral theses.

At the University of Missouri he was a member of the Graduate Council and Graduate Faculty Standards Committee.

GARY T. HEBERLEIN

Political science student receives Truman Scholarship

A Bowling Green political science student has been selected to receive the prestigious Harry S. Truman Scholarship for 1980-81.

John Ishiyama, a sophomore from Parma, is the first University student ever to receive the award, which was presented to him at a ceremony Sunday (May 4) at the Harry S. Truman Presidential Library in Independence, Mo.

He was one of 50 students to receive the scholarship, given annually to one college junior from each of the 50 states. Nominees for the award must show outstanding promise for future government careers.

Ishiyama, who is concentrating

his studies in international relations, was recommended for the award by William Reichert, chair of the political science department and Bowling Green's faculty representative to the Truman Scholarship Foundation in Washington, D.C.

The Foundation is a permanent education scholarship program designed to provide opportunities for outstanding students to prepare for careers in the public service.

The scholarship provides recipients up to \$5,000 annually for four years of undergraduate and graduate work.

Faculty Senate

An early retirement plan proposed by an Ad Hoc Committee for Early Retirement has been approved by the Faculty Senate and will be forwarded to President Moore and the Board of Trustees for final endorsement.

The plan, supported by the Faculty Welfare Committee, was unanimously approved by the Senate, with one member abstaining, at a special meeting April 29.

According to Bette Logsdon, health, physical education and recreation and chair of the ad hoc committee created by the provost, the plan makes early retirement financially more attractive and takes nothing away from existing benefits. Dr. Logsdon said the plan was designed for faculty and contract staff with a minimum of 10 years at the University and who have attained age 55.

Martha Eckman, English, another member of the committee, told the Senate at an earlier meeting that no existing plan at any other institution is better than the one proposed for Bowling Green.

The plan has been developed to include five parts:

- Guaranteed post employment for five years or to age 70, depending on which is attained first, with 1/4 salary for 1/2 employment, and salary to increase yearly at the same rate as continuing faculty and staff;

- Counseling services for retirement and career-change alternatives;

- Fee waivers for retirees and dependents;

- Payments for accrued vacation and sick leave, and

- A formula-based retirement account to be expended by the University on benefits selected from a "cafeteria plan."

The amount placed in the retirement account is to be determined by a formula based on the age of the retiree, the salary of the final contract, the years of service at Bowling Green and the total years of service the retiree is eligible to purchase from STRS or PERS before retiring officially. Benefits to be included in the plan are paid-up life insurance, paid-up annuity and purchase of PERS/STRS credit for which the retiree is eligible.

Dr. Logsdon told the Senate that the option to take cash payment from the account does not exist for tax reasons.

The proposal, as approved by the Faculty Senate, is an option for faculty and staff and is not to be used by the University to generate pressure on faculty and staff to retire, Dr. Logsdon said.

Early retirement does represent a cost-savings to the University if faculty who choose to retire before the mandatory age of 70 either are not replaced or are replaced by a person with a lesser salary, Dr. Logsdon said.

At the same time, she noted, the proposed plan will give faculty a way to enter into dignified, financially attractive retirement should enrollments decline to the point that the administration is required to dismiss tenured personnel.

The Office of the Provost has complete information on the plan recommended by the Senate. Dr. Ferrari said a new committee will be formed to implement the plan if it is approved by Dr. Moore and the trustees.

Members of the ad hoc committee which drafted the proposal were Richard Conrad, computer services; Paul Nusser, treasurer; Myron Chenault, institutional contracts; David Elsass, dean of the College of Education; Robert Keefe, health, physical education and recreation; Paul Mueller, finance and insurance; Eckman and Dr. Logsdon.

In other action at the April 29 meeting, the Senate voted to recommend to Academic Council, President Moore and the Board of Trustees that consideration of an early semester calendar for 1982-83 be discontinued and that a quarter system academic calendar be retained.

Their vote reflected the opinion of the faculty as a whole who in a poll narrowly voted 267-266 to institute a calendar change.

Laboratory dedication includes open house

G. Robert Bowers, assistant superintendent of schools with the State Dept. of Education, will be the featured speaker at the May 8 dedication of the clinical laboratory in the College of Education.

Dr. Bowers will speak on "The Key to A Teaching Profession."

Dedication ceremonies, open to the entire University community, will begin at 3:30 p.m. in Room

Awards program to honor 114 outstanding high school juniors

President Moore will present one four-year full fee scholarship and a four-year half fee scholarship to two high school juniors at the sixth annual "Outstanding High School Junior Awards" program today (May 5).

The largest number of participating juniors ever, 114, will attend the banquet in the Grand Ballroom of the Union. Each student represents a northwest Ohio high school and will be eligible to receive a \$120 book scholarship during the freshman year should he or she decide to attend the University.

The students, from 16 area counties, were nominated by their schools on the basis of scholastic record, extracurricular activities and community involvement.

Final selection of the scholarship winners is based upon a 300-word essay and personal

interviews with the faculty, staff and student body.

The Undergraduate Alumni Association hosts the event.

Items still sought for spring auction

May 7 is the final day for contributing to the University's annual spring auction, scheduled May 17 in the storage building on South College Drive.

Arrangements for pick-up of items can be made by calling John Matthews or Kathy Phillips in inventory management, 372-2121.

All items turned over to inventory management will be declared surplus and will be made available to all campus departments.

Viewing of the items to be auctioned is scheduled from 10 a.m. to 2 p.m. May 8 and 9.

Monitor

Monitor is published every two weeks during the academic year for faculty and staff of Bowling Green State University. Deadline for the next issue, May 19, is Tuesday, May 13. Editor: Linda Swaisgood. Editorial Assistant: Kim Hoptry.

Board of Trustees

A 1980-81 educational budget totaling \$57,001,611 for the main campus was approved April 24 by the Board of Trustees.

The budget, which is seven percent, or about \$4 million more than the current year, includes an 11 percent increase in student fees. The trustees increased the instructional fee for undergraduate students by \$33 per quarter and the general fee by \$7 per quarter.

President Moore, who said the instructional fee hike was the largest in his 10 years at Bowling Green, urged the University community to consider it a "biennial increase," because undergraduate instructional fees did not rise last year despite increased expenses.

The \$57 million educational budget will include an expected carryover of \$431,000; \$33.7 million in state appropriations and subsidies; \$19.2 million from student fees and \$3.7 million from other types of income.

The carryover was largely the result of the work of the Ad Hoc Committee on Personnel Replacements which reviewed employee vacancies and authorized only essential replacements during 1979-80. The trustees' budget report states that similar salary savings are planned for in 1980-81.

Most of the budget increase this year will be used for faculty, staff and civil service employee salaries, enhancement of the Library and computer resources, and utilities. Money also has been allocated for student recruitment support.

Provost Ferrari said 10.4 percent salary increases would be given across the board to continuing faculty and administrative staff. In addition, a \$635,000 pool of funds has been set aside for promotions and merit increases. Graduate assistants are slated to receive a 10 percent salary increase.

Dr. Ferrari noted that classified staff step increases have been incorporated into the budget as well as funds for enhancements to the fringe benefit package for classified staff. He indicated that the University hopes the General Assembly reorganizes the necessity of additional salary increases for classified staff, especially in light of current inflationary pressures.

Dr. Ferrari said a four percent cut has been incorporated into the instructional subsidies income because of a likely reduction in state subsidies due to declining state revenues.

The budget reflects considerable resource reallocation, the trustees' budget report states, with faculty and staff positions valued at approximately \$250,000 shifted from arts and sciences and education to business administration, health and community services and musical arts. The budget provides for the overall faculty size to remain stable at 725 full-time positions.

The trustees' report also states that new and emerging programs in need of resource support, such as the honors program and environmental studies, will be funded through operating budget reallocations.

At the April 29 meeting of the Faculty Senate, Dr. Ferrari reported that the financial outlook for the University in the coming year is "not good" and that budgets remain tight, particularly in view of the anticipated state subsidy cut.

He added, however, that the amount of the subsidy cut, which may be between two and six percent, remains an uncertainty and it is possible that the cut will not equal the four percent which was factored into the 1980-81 budget.

In that event, he noted, the

trustees will adopt a revised budget and increase allocations to certain academic areas with the greatest need.

An educational budget for the Firelands branch campus of \$1,769,520 for 1980-81 also was approved. The current Firelands educational budget is \$1,587,750.

Firelands students will pay the \$33 per quarter instructional fee increase but their general fee will remain unchanged at \$34 per quarter.

In other action, the trustees approved general fee and related auxiliary budgets totaling \$6,730,127 and miscellaneous budgets which total \$8,785,643.

In his remarks to the trustees, President Moore noted that the University's projected goal of 3,600 new freshmen for 1980 has been realized from an application pool of 6,775.

He also announced that the Committee on Accreditation of the American Psychological Association has voted to continue full approval of the University's doctoral training program in clinical psychology.

Dr. Moore told the trustees that the University has received \$300,000 in state and federal funds to effect energy saving changes in the Business Administration, Math-Science, Psychology and Library buildings. The changes are expected to generate an estimated annual savings of \$133,000.

In an attempt to save additional energy dollars, the University is converting its large exterior lights from 4,000 watt mercury vapor to 800 watt high pressure sodium lamps. Dr. Moore told the trustees that the change, which will actually improve outdoor lighting, will generate a savings of \$26,000 annually. Additional lighting modifications are expected to achieve another \$30,000 savings each year, he said.

Faculty

Grants

Thomas B. Cobb, physics, \$19,200 from the U.S. Dept. of Energy to conduct a two-week general education workshop for junior high teachers of natural science, mathematics and social studies.

Participants, drawn from a 20-county area in northwest Ohio, will study energy production techniques, energy consumption patterns, regulatory and social policy issues and learn the consequences of various patterns of energy use.

William B. Jackson, environmental studies, \$25,530 from the Toledo Edison Co. to continue terrestrial monitoring studies at the Davis-Besse nuclear power plant. Dr. Jackson is studying the climate, soil and vegetation around the plant.

Dr. Jackson has also received \$11,316 from Toledo Edison to continue bird strike monitoring at Davis-Besse and \$1,200 from the Chempar Chemical Co., Inc., to test selected chemicals.

G. James Pinchak, business education, \$5,150 from the Division of Vocational Education, Ohio Dept. of Education, to conduct a technical workshop in southwestern Ohio for occupational work adjustment (OWA) teacher coordinators in the Dayton area during spring and summer, 1980.

Emphasis will be placed on the development of practical teaching strategies and creation of appropriate instructional materials for use in the OWA classroom.

Pinchak also received an identical grant to conduct a workshop for OWA teacher coordinators at Bowling Green during spring and summer, 1980. Emphasis will be placed on development of practical management strategies and creation of appropriate materials for use in the OWA program.

Gerald L. Saddlemire, college student personnel, \$8,000 from Urbana College to assist the institution with developing a program for academic and curricular enrichment.

Bowling Green will provide consultation services in the areas of core curriculum and competency, academic advising, course and program development and evaluation, student monitoring procedures and expansion of campus services to off-campus sites.

Donald Scherer, philosophy, \$887 from the Ohio Program in the Humanities to fund a community forum at which Gary Jones, Taft Fellow at the University of Cincinnati, will speak on the rights of the mentally incompetent.

At the same conference, Richard Wright, University of Toledo, will present a philosophical commentary on Dr. Jones' paper.

Clarence Terry, student development program, \$5,770 from the Toledo Area CETA Consortium to conduct an educational training program for approved participants in the Toledo area CETA program.

Ralph Zuzolo, speech communication, \$1,500 from the Northwest Counseling and Job Placement Center to produce three 20-second public service announcements aimed at the target populations of handicapped individuals, business and industry, and human service-oriented consumer groups.

Publications

Gerald Bergman, educational foundations and inquiry, "The Suicide Rate Among Psychiatrists: Why Not Lower?" in the winter, 1979 issue of "Psychology," a quarterly journal of human behavior.

Dr. Bergman also has written "Infant's Rights: The Issue of Licensing Parents," published in the winter, 1980 issue of "Journal of the Canadian Society for the Prevention of Cruelty to Children." The article is based in part upon a book-length manuscript which Dr. Bergman recently completed on the issue of parent licensing.

Another article by Dr. Bergman, "Uso di Metodi Biblici Nel Trattare Problemi Emotivi," has been included in the March, 1980 issue of "La Nuova Creazione."

His article "Does Academic Freedom Apply to Both Secular Humanists and Christians?" has been published in the February, 1980 issue of "Impact."

The March, 1980 issue of "Vision, Journal of the National Educators Fellowship," includes an article by Dr. Bergman entitled "Are You an Active Listener?"

Theodore Berland, journalism/sociology, "The quiz that will help you understand why you overeat," in the April issue of "Mademoiselle."

Dr. Berland also authored "Drop-In Dentistry" in the May-June issue of "Science '80."

Thomas Dence, natural and social sciences, Firelands, "A Lebesgue Decomposition for Elements in a Topological Group," in the "International Journal of Mathematics and Mathematical Sciences."

John L. Huffman, journalism, and **Denise M. Trauth**, speech communication, "Toward a Theory of the First Amendment Rights of Children," to be included in "Communications and the Law," published by Earl Coleman Enterprises, Inc.

Robert Joynt, special education, has completed a series of video tapes and audio cassettes on "Child Growth and Development from a Christian Perspective." The series was produced in the studios of the New Directions Evangelistic Association, an interdenominational, interracial, non-profit organization.

Mercedes Junquera, romance languages, translations of Spanish poems by Gloria Fuertes in the winter, 1980 issue of "Sackbut Review."

Sally Kilmer, home economics, "Early Childhood Specialists as Policy Makers" in the February, 1980 issue of "Education and Urban Society."

Robert A. Kocis, political science, "Reason, Development and the Conflicts of Human Ends: Sir Isaiah Berlin's Vision of Politics," in "The American Political Science Review," March, 1980.

Maurice I. Mandell, marketing, the third edition of "Advertising," a text published by Prentice-Hall.

Past editions of Dr. Mandell's text have been used in several hundred schools and colleges in the United States and around the world.

Jack Nachbar, popular culture, and **Mark Gordon**, a graduate assistant in popular culture, "Currents of Warm Life: Popular Culture in American Higher Education," published by Bowling Green's Popular Press.

The book represents the first attempt to measure popular culture studies on a national level.

David Ostroff, speech communication, "Potential of Cable Television in Covering Local Government" in the winter, 1980 issue of "Feedback."

He also has co-authored an article, "Station License Revocations and Denials of Renewal 1970-1978," which is included in the winter, 1980 issue of "Journal of Broadcasting."

Janis L. Pallister, romance languages, the translations of 12 fan poems by Paul Claudel in "Mr. Cogito," winter, 1979-80.

David G. Pechak, biological sciences, "High Voltage Electron Microscopy of Chytridiomycetes Hyalines (Chytridiales)," in volume II of "Micron."

Dr. Pechak also co-authored with **Reginald Noble**, biological sciences, and **Keith Jensen**, USDA Forest Service, an article on "Ozone Effects on the Ultrastructure of the Chloroplasts from Hybrid Poplar Leaves" in volume II of "Micron."

Frances Povsic, library, "Poland-Children's Fiction in English," "The Reading Teacher," April, 1980.

Deanna Radeloff, home economics, has edited "Flannel Fun," a collection of flannel board patterns and presentation techniques published by the Ohio Association for the Education of Young Children.

Joan Repp, library, "AACR 2: the 'new' code - how, why and so what," in "AACR 2 and Its Impact on Libraries," a publication of the Ohio State University Libraries.

The article is based on a presentation made at the annual meeting of the Academic Library Association of Ohio in October 1979.

Paul D. Yon, Center for Archival Collections, will be a member of a panel discussing archival training in the state of Ohio at the spring meeting of the Society of Ohio Archivists April 25 at Wittenberg University.

Recognitions

Bette Logsdon, health, physical education and recreation, has been appointed a Danforth Associate by the National Advisory Council of the Danforth Associate Program. Her appointment, for a six-year term, extends from June 1, 1980 to May 20, 1986.

As an associate, Dr. Logsdon will be eligible to attend three biennial conferences as a guest of the Foundation and may seek support of special activities on the Bowling Green campus from the Foundation's College Project Fund. The activities must be related to the improvement of teaching and learning and can be financed for up to \$2,000.

Virginia Marks, music performance studies, has been appointed senior piano adviser for the East Central Division of the National Music Teachers Association.

The division includes Ohio, Michigan, Indiana, Illinois and Wisconsin.

Presentations

Roger Anderson, political science, spoke on "The Ohio Alliance for Returnables: A Single-Issue Interest Group in Action" at the Midwest Political Science Association annual meeting April 25 in Chicago.

Thomas D. Anderson, geography, spoke on "Urban Agriculture in Toledo, Ohio: Preliminary Assessment" at the Association of American Geographers' national meeting April 13-16 in Louisville, Ky.

At the same meeting, **Joseph G. Spinelli** and **Bruce W. Smith**,

geography, spoke on "A Challenge for an Applied Geography Program: Cooperative Education vs. Internship."

Other members of the geography department attending the meeting were Joseph C. Buford, Stephen S. Chang, Ralph W. Frank and John W. Kunstmann.

Theodore Berland, journalism, spoke on "Writing Articles for Popular Magazines" at a workshop April 19 at Midland Hospital Center in Michigan. The workshop was co-sponsored by the American Medical Writers Association.

Robert K. Clark, speech communication, spoke on "Operating Higher Powered University Radio Stations Without NPR/CPB Affiliation" at the 26th annual convention of the Broadcast Education Association in Las Vegas on April 11.

Jane L. Forsyth, geology, presented a paper on "The Karst Landscape of the Bellevue-Castalia Region" at the annual meetings of the Ohio Academy of Science April 18-20 in Toledo. The paper was co-authored by John J. Tintera.

John Hiltner and **Bruce Smith**, geography and gerontology, presented a paper on "Assessing the Needs of Rural Elderly" at the 1980 annual meeting of the Association of American Geographers in Louisville, Ky.

Dr. Hiltner also chaired a session on "Resource Planning in the Third World" at the meeting.

Richard D. Hoare, geology, presented a paper on "Predation on the Pennsylvania Barchiopod Composita from the Vanport Shale in Ohio" at the annual meetings of the North Central Section of the Geological Society of America at Indiana University. The paper was co-authored by David E. Atwater.

At the same meeting, **Don C. Steinker**, geology, presented a paper on "Ostracode and Foraminifera Assemblages Associated with South Florida Coral Reefs" which he co-authored with P.E. Markowitz and B.R. Weis.

Margaret Ishler, **Donald Chase** and **Richard Horton**, education, presented papers and were session leaders during a recent conference on clinical and field experiences sponsored by the Ohio Study Council for Research and Evaluation in Teacher Education.

Dr. Ishler led a session on "Evaluating Early Field Experiences." Dr. Chase was the leader of a session on "Measuring the Impact of Field Experiences on the Instructional Programs of Cooperating Schools." Dr. Horton led a session on "Emerging Practices in Collaborative Agreements."

All three participated in a discussion on "Issues and Concerns in the Evaluation of Clinical and Field Experiences" at the conclusion of the conference.

Rex L. Lowe, biological sciences, was the keynote banquet speaker at the annual meeting of the Association of Pennsylvania State College and University Biologists April 25 at Edinboro State College, Edinboro, Pa. Dr. Lowe spoke on "Algal Indicators of Water Quality."

Virginia Marks and **Anne Fagerburg**, music performance studies, recently performed in a chamber music concert at Carnegie Hall in New York City. The concert was a memorial for internationally-known pedagog Nadia Boulanger.

In March, Marks appeared as official accompanist at the National Music Teachers Association Convention in Washington, D.C.

Concerts, exhibits scheduled during 'Arts Week' May 4-11

To focus attention on the contributions of the arts in the community, May 4-11 has been designated as Arts Week in Bowling Green.

Local arts groups are planning more than 40 events, including a series of noon concerts by high school musicians throughout the week in the courtyard of the Wood County Public Library; art exhibits; a concert by guitarist Anton Del Forno; a crafts fair and an open rehearsal of the forthcoming University Theater production of Shakespeare's "Anthony and Cleopatra."

The noon concert series at the Wood County Library will begin today (May 5) with a performance by the Bowling Green High School Madrigal Singers. The high school's Jazz Band will perform Tuesday; a high school instrumental ensemble will play Thursday and the high school chorus will sing Friday.

Also on Monday, poet Fred Eckman, co-founder of the University's creative writing program, will give a reading of his poetry at 8 p.m. in the Bryan Recital Hall of the Musical Arts Center.

On Tuesday, the University's Artist Series will present guitarist Anton Del Forno at 8 p.m. in the Bryan Recital Hall. Cartoon "star" Mel Blanc, the voice of Bugs Bunny, Porky Pig and other cartoon characters, will lecture at 8

p.m. Wednesday in the Union's Grand Ballroom.

Thursday's events will include a lecture at 5 p.m. in 111 South Hall by Paul Schneider, New York director of stage and television productions who is a director-in-residence at the University this quarter. At 7 p.m. Thursday, Schneider will conduct a rehearsal, open to the public, of the University Theater's forthcoming production of "Anthony and Cleopatra."

Bowling Green's Creative Arts Program will present 17-year-old pianist Hyun Suk Choi in an 8 p.m. concert at Bryan Recital Hall Friday. A native of Korea and a senior at St. Ursula Academy in Toledo, Miss Choi is a scholarship student of University artist-in-residence Jerome Rose.

Also on Friday afternoon and all day on Saturday there will be a crafts fair at the Student Services Building Forum. Craftsmen will demonstrate and sell their wares from noon to 7 p.m. Friday and from 9 a.m. to 5 p.m. Saturday.

The week's events will conclude Sunday with the opening of the 29th annual Student Art Show from 2-5 p.m. in the Fine Arts Gallery; a student woodwind quintet concert at 1:30 p.m. at the Wood County Library, and an 8 p.m. concert by the University's Jazz Lab Band in Kobacker Hall at the Musical Arts Center.

FINISHING TOUCHES—Cher Cultrona, a junior majoring in graphic design, readies her work for judging which will prelude the opening of the 29th annual Undergraduate Student Art Show at 2 p.m. Sunday, May 11, in the Fine Arts Gallery of the School of Art. The show, sponsored by the Alumni Association and Parents' Club, will continue through May 28. Nearly 400 works will be displayed. Gallery hours are 8:30 a.m. to 5 p.m. weekdays and 2-5 p.m. Saturdays and Sundays.

New Review

Bess receives SGA's Jerome Award

William R. Bess, director of Campus Safety and Security, received the William T. Jerome Award April 24 at a dinner in his honor.

The award is the highest honor given to a University administrator by the Student Government Association. It was established in 1974 to recognize outstanding contributions by administrators to the welfare

and betterment of students and is named for Bowling Green's former president who served from 1963 until 1970.

In making the presentation, out-going SGA president Michael Zinicola cited Bess for his efforts in establishing several SGA-sponsored projects, particularly the shuttle bus service and campus crime prevention program.

Dvora Krueger to direct art therapy program

Dvora Krueger, art, has been named director of the art therapy program within the College of Health and Community Services.

The new program, approved by the Ohio Board of Regents March 21, is the first of its kind at a state-assisted university in Ohio and will lead to a bachelor of science degree.

Krueger joined the Bowling Green faculty as an instructor of art in 1978. She has served as curriculum coordinator for

the art therapy program in its developmental stages.

From 1965-1973 she worked as an art curriculum specialist and teacher at Six Pence School for Learning Disabled and Brain-Injured Children in Columbus.

In 1973 she accepted a position as art therapist at the Buckeye Boys Ranch in Grove City, where she remained until she joined the Bowling Green faculty.

World skaters perform in cancer benefit

"International Stars on Ice," a skating exhibition featuring current World and Olympic team members from the United States and Canada, is scheduled at 8 p.m. Friday and Saturday, May 16 and 17.

The show, to benefit the American Cancer Society, will spotlight Bowling Green native Scott Hamilton.

Other performers include Lisa Marie Allen, second ranked women's figure skater in the

United States; ice dancing champions Stacey Smith and John Summers; Canadian dance champions Lorna Whighton and John Dowding and Canadian champion Heather Kemkaran.

Tickets, available at the Memorial Hall ticket office, are \$4 for all reserved seats.

The exhibition is sponsored by the University, University Skating Club and the Bowling Green Skating Club.

University Charities Board allocates \$4,800

The University's Charities Board, a student-operated organization which plans and coordinates charity fund raising events on campus, has distributed \$4,800 to 21 local and national charities.

Gregory DeCrane, director of student organizations and new student programs and adviser to the board, said a majority of the money raised this academic year came as a result of the annual Charities Board Bike Auction, which netted a record \$2,968.

Local charities receiving funds included the Wood County unit of the American Cancer Society, the Children's Resource Center, The Link, the

Northwest Ohio Hemophilia Foundation, Wood County Board of Mental Retardation, United Christian Fellowship Special Projects Fund, Wood County Heart Fund and Wood County Humane Society.

National organizations receiving money included the American Foundation for the Blind, CARE, March of Dimes, the United Negro College Fund, Project Hope, Oxfam America, the World Wildlife Fund and the Myasthenia Gravis Foundation.

In the past seven years, the Charities Board has distributed more than \$28,000 to various organizations.
