Bowling Green State University--1959

The '60s

University growth exceeded all expectations

Following is the conclusion of a brief history of Bowling Green, which was created as an institution by the state legislature in 1910. The history has been prepared by Stuart Givens, designated by the Board of Trustees as the University historian.

Sixty-six years have passed since Bowling Green State Normal School, with a faculty of 10, admitted its first students—all 304 of them.

During that interval, the school has been served by seven presidents and has grown to an on-campus enrollment of 16,502 and 723 faculty. The growth has been gradual, with a marked acceleration during the 1960s.

The inter-war period of 1918-1941 saw the emergence of a university in both name and structure.

In 1928-29 when slightly more than 950 students were enrolled, the state legislature approved the change in name of Bowling Green State Normal School to Bowling Green State College and authorized the College to grant a baccalaureate degree. With that authority, the Board of Trustees approved the creation of a College of Liberal Arts.

Six years later, the legislature authorized a further name change to Bowling Green State University. The trustees followed that action with the formation of a College of Business and approval of a limited master's level graduate program. Thus, organizationally, by 1941 Bowling Green was a university.

Those years between 1918 and 1941 were a period of gradual growth. The student body increased from roughly 300 to 1,600 with a concomitant facul-

ty increase from 23 to 85.

An interesting change in the mix also occurred. In 1919, men composed 14 percent of the enrollment, but by 1941 nearly half the student body was male. In 1919 only one faculty held a doctoral degree, but by 1941, 55 of the 85 faculty were Ph.Ds.

The 20 years from 1941 to 1961 were of sporadic and general growth. Bowling Green, along with many other schools, experienced the veterans' bulge of post-1945. After a drop to 842 students in 1943, the student body soared in 1949-50 to 4,648 with a faculty of 233. A decline was experienced in the early 1950s to the 3,221 of 1953. Slowly, then, enrollments began to rise to 6,229 in 1960-61.

While enrollments doubled in the 1950s, instructional fees also increased two-fold, but the number of faculty increased only slightly. This made possible the significant salary increases that occurred under President McDonald.

In 1950 the top salary for a professor was \$5,500. In 1952 it increased to \$7,000, and by 1961-62 it was \$15,000. This same period of relatively slow total faculty growth saw a tripling in the number of faculty with a doctorate (21 percent to 61 percent).

Since 1960, the complexion of the University has changed dramatically. These changes reflect the emphasis on higher education that emerged along with the post-war baby boom and the changing nature of the economy. A quick survey of various statistics illustrates the point.

The student body has grown from

6,229 in 1960 to this year's 16,502. The student body of 1960 was in three undergraduate colleges and included slightly more than 300 in graduate programs. Today's students are enrolled in five undergraduate colleges, and approximately 1,500 are graduate students.

One trend did reverse during this period. By 1960, men outnumbered women, but in the early 1970s, admissions became sex-blind and the ratio reverted to one reminiscent of early days.

The 1960s saw the development of eight doctoral programs and the awarding in 1963 of the first Ph.Ds. It is interesting to note that the first two recipients of Ph.Ds from Bowling Green were a black male and a woman.

Other indications of the growth since 1960 are manifested in the faculty. It has grown from 254 (61 percent Ph.D.) to the current 723 (73.6 percent Ph.D.). The campus physically during this time increased from 731 acres and 61 buildings to more than 1,200 acres and 92 buildings.

One other aspect of the growth is reflected in the more than doubling of students' total yearly costs to attend. Finally, faculty compensation increased from \$15,000 for a professor in 1960 to the 1979 average of \$28,994.

The Bowling Green envisaged by the founders 70 years ago does not exist today. Instead, a large, complex, major regional university has arisen with a size and potential that far exceed any of the founders' expectations.

Student wages up 17 percent

The minimum wage for students employed at the University will be increased from \$2.65 to \$3.10 an hour effective June 23, according to Ellen Kayser, assistant director of financial aid and student employment. The raise will be reflected in paychecks issued July 18.

Kayser said all students will receive a 17 percent across-the-board pay increase of 45 cents per hour above their current rate.

The new University wages comply with federal minimum wage standards which took effect Jan. 1. State universities had been exempted from those federal guidelines and were required to pay instead 85 percent of the minimum wage.

However, the U.S. Senate and House of Representatives are currently considering legislation which would require universities to pay the federal minimum wage to student employees, and Bowling Green has acted in anticipation of approval of that legislation, Kayser said.

Although the wage increase may present some problems for employers of students, Kayser said those employers who have shown a commitment to hiring students will continue to do so. She said she does not foresee a decrease in the number of students who secure University jobs because of the wage increase.

Kayser did say, however, that the employment situation may be complicated by a 17 percent reduction in federal Work-Study funds for 1980-81.

Those funds, which increased 115 percent from 1978-79 to 1979-80 and this year totaled \$715,000, helped cushion a 35-cent an hour wage increase that took effect last June.

The Work-Study Program pays 80 percent of eligible students' wages, while hiring departments need pay only 20 percent.

Provost Ferrari cautioned budget administrators to carefully consider the overall implications of the student wage increase in order to prevent severe curtailment of student employment on a University-wide basis.

Dr. Ferrari noted that although auxiliary areas such as food services will feel the pressure of the increase in student wages, those areas which receive funding from the educational budget, including the Library, will be most affected. He explained that the increased cost of student employment in the academic areas was not reflected in student fee increases for 1980-81 but was considered when rates for room and board were set.

He added, however, that the wage increase is appropriate if the University is to avoid exploiting its student employees.

Dr. Stoner receives Fulbright Award

Ronald E. Stoner, physics, has received a Fulbright award under the Mutual Educational and Cultural Exchange Program to lecture in theoretical physics at the University of Sri Jayawardenapura in Sri Lanka during the 1980-81 academic year.

A Faculty Improvement Leave will supplement Dr. Stoner's award.

While in Sri Lanka, Dr. Stoner will teach classical, quantum and statistical mechanics to third and fourth year bachelor of science degree candidates at the University of Sri Jayawardenapura.

Dr. Stoner, who has chaired the physics department since 1976, joined the Bowling Green faculty in 1965.

Technical writing program earns national recognition

Although only slightly more than a year old, Bowling Green's graduate degree program in technical writing has already brought national recognition to the University, according to Martha Eckman, director of the graduate program in technical communications.

Eckman said the program has experienced "overwhelming success" since its inception in February last year and is widely recognized by pro-

fessionals and industry because of its proficiency in training students and also because of the marketability of its graduates. It is the only program of its kind in Ohio and five surrounding states.

Eckman noted that one audio-visual exhibition, created and presented by a graduate technical writing student, earned an award of achievement in national competition this spring. The 10-minute presentation was in com-

petition with corporate entries from Kodak and Chevrolet, she added.

More impressive, Eckman added, is the program's 100 percent placement rate. She said the majority of the graduate and undergraduate students in the technical writing program have been successful in securing internships at such major corporations as National Cash Register in Dayton, Diebold in Canton and Sundstrand in Rockford, Ill.

"Last fall one of our undergraduates was hired full time by Bell Research Laboratories in New Jersey and his employers were so pleased with his work that they have now begun recruiting on campus. Since then, we have placed an addi-

tional two students with them," she said.

Eckman said that although Bell Research Laboratories is the first corporation to recruit technical writers on this campus, the program is gaining an impressive reputation for its highly qualified graduates and she expects more companies to begin recruiting in the near future.

The technical writing field experienced its greatest period of expansion after World War II during the "technology boom," Eckman said.

Nearly 75 students are enrolled in technical writing classes this quarter, including 14 full-time at the graduate level, Eckman noted. She attributes the surge in interest in the field to the attractive financial and personal rewards a career in technical writing can offer.

"Jobs in this area are practically falling out of trees," she said. "The demand for a student with technical writing skills is drastically increasing."

According to Eckman, a person with an undergraduate degree who has basic comprehension of graphics and computer science and can effectively write scientific and technical copy can expect a starting salary of \$15,000-\$17,000 a year.

Eckman, who will retire in June, said she has hopes for the approval and initiation this fall of an undergraduate technical writing degree program.

"We have no formal undergraduate program on the books as yet," she added. "But our course enrollments have been increasing at a four-fold rate since 1974 and there is a definite need to provide more extensive technical writing training to those interested students."

Civil service staff eligible for dental, vision care benefits

Full-time civil service employees will be enrolled in a dental and vision care insurance program, effective no later than Nov. 1.

President Moore announced the addition to the fringe benefit package of the University's classified staff at the May 23 meeting of the Board of Trustees.

The University will absorb the entire cost of dental and vision care coverage for all eligible employees. The employees will have the option of purchasing identical coverage for their dependents at 50 percent of the total cost.

Provost Ferrari, who said the average salary increase for Bowling Green's civil service employees will be only five percent this year, indicated that the insurance package will be purchased for classified employees in an attempt to ease their current financial pressures.

Dr. Ferrari said the University con-

tinues to urge the state legislature to enact salary increases for civil service employees.

The dental program will provide 100 percent reimbursement of charges for preventive and diagnostic services; 80 percent reimbursement for general and restorative services; 50 percent reimbursement for prosthodontic and orthodontic services. All but orthodontic services have a maximum per person, per year benefit limit of \$750.

The vision program will provide reimbursement for vision examinations, lenses and frames provided once every 24 months on a maximum dollar schedule.

Payments for contact lenses will be provided on a maximum dollar schedule with the amount dependent upon whether the lenses are necessary for vision or purchased for cosmetic reasons.

Conferences showcase University

Keeping current with rapidly changing knowledge and technology has become a major concern of professional people, according to William McMillen, director of conferences in the Office of Continuing Education, Regional and Summer Programs.

"The professions need training and Bowling Green has the faculty members with the expertise and connections to provide it," McMillen said.

He added that his office wants to increase its contact with faculty and staff who can act as liaisons with their societies or as professional consultants in arranging on-campus conferences.

McMillen said he believes that faculty better their professional standing and enhance the reputations of their departments or programs when they become involved in hosting a conference. In addition, conferences showcase the University and its facilities, he said.

During the past year, the conference program has worked with University personnel from medical technology, gerontology, business, financial aid, the Library and registrar's office to plan conferences on topics as diverse as "Improving the Student Selection Process in the Medical Professions" and "Materials Requirement Planning."

And the conference program is continually looking for new faculty and staff with professional society affiliations who would like to bring members of their groups to campus for a learning session, McMillen said.

A one- or two-day on-campus conference requires three to six months of planning. Resource personnel must be secured, brochures designed, printed and mailed and on-campus arrangements completed.

McMillen noted that a large number of support services become involved when arranging any conference. "We always receive excellent cooperation from the Union, food services, duplicating, parking services and a lot of other people on campus," he said.

Michelle Chenault, medical technology, has worked with McMillen more than a year planning a series of workshops for medical technologists and other health care professionals.

The most recent workshop, held on campus April 11 and 12, attracted approximately 30 participants from as far away as Kentucky and featured resource personnel from New York and New Jersey.

According to Chenault, the seminars are really a service to the professionals in northwest Ohio because continuing education is essential in the health area and offering that education in Bowling Green makes it geographically (and financially) attractive.

Chenault added that hosting conferences is excellent advertising for Bowling Green and its medical technology program.

Any faculty or staff with an interest in developing a professional continuing education program with the conference program's assistance should contact McMillen or the assistant for conferences, Donna Dacus, for additional information.

Research opportunities available in Guam

A new area for research and program development has been opened to Bowling Green faculty.

Dirk Ballendorf, director of the Micronesia Area Research Center at the University of Guam, recently visited Bowling Green to explore the possibility for collaborative research and development arrangements to mutually benefit the two universities.

Dr. Ballendorf's visit to Bowling Green was arranged largely through the efforts of Joseph Kivlin and Jerry Wicks, sociology.

Dr. Wicks, who spent two weeks at the University of Guam last winter as a computer consultant, said Dr. Ballendorf's visit was designed primarily to initiate a relationship between the two universities and to test sentiment on the possibility of a faculty exchange program.

Dr. Wicks said cooperative research ventures would be to the advantage of both Bowling Green and Guam universities because Guam has a favored status for governmental funding of research projects and Bowling Green has the resources to write grant proposals and the faculty to actually carry out the research.

In essence, he said, Bowling Green faculty would increase their chances of securing funding for research by cooperating with the University of Guam. At the same time, the University of Guam would benefit from the research and the expertise of Bowling Green faculty who would spend time teaching and/or researching in the Western Pacific.

The University of Guam is chartered to service the entire Western Pacific island area and operates three research centers: Marine Biology Laboratory, Water Resources Research Center and the Micronesia Research Center (with a social and behavioral science emphasis).

Faculty with research proposals and an interest in helping to develop a relationship between Bowling Green and Guam universities should contact Ronald Etzel in the Research Services office for assistance or further information.

Graduate students receive funds to present professional papers

Professional development awards to present papers at national conferences were granted to 19 graduate students during the winter quarter.

Recipients of the awards were:

Ronald Ross, popular culture, to present a paper on "Regeneration Through Near-disaster: The Airplane Crisis Film" at the national Popular Culture Association Convention in Detroit;

Anne L. Hoff, psychology, to present two papers, "Are Females Less Lateralized for Language?" and "Some Recently Suggested Right Hemisphere Specialized Functions Tested in a Split-brain Patient" at the International Neuropsychological Society Convention in San Francisco;

Tina M. Beranbaum, sociology, to speak on "Capital Punishment: Issues and Evidence" at the American Academy of Criminal Justice Sciences meeting in Oklahoma City;

Kevin C. Webb, communication disorders, to present a paper on "Evaluation of a New Tape Recording of the Synthetic Sentence Identification Test" at the Ohio Speech and Hearing Association Convention in Dayton;

Bonnie M. Barkley, speech communication, to speak on Frederic William Wile - Political Analyst NBC/CBS, 1923-1938" at a meeting of the history division of the Broadcast Education Association in Las Vegas;

Frank L. Carollo, popular culture, to present a paper on "A Television Formula of the Seventies" at the Popular Culture Association Convention in Detroit;

Lynn Burkholder, special education, to present a paper on "An Investigation of Special Education Teacher Perception of Problems Resultant from Implementation of P.L. 94-142" at the International Conference on Exceptional Children in Philadelphia;

D. Adam Hammer, American culture, to speak on "Changing American Attitudes Toward Europeans" at the Third International Conference on Popular Culture in Winchester, England;

Elizabeth Kryder, history, to speak on "Art for Identity: Gertrude Stein's Use of Public and Private Literature" at

a conference on American Women in the Arts, 1880-1980, in Pittsburgh;

Jamie M. Myers, education curriculum and instruction, to present a paper, "To Teach SQ3R or Underlining: Does the Research Support Either or Does Only the Student Know?" at the Virginia Polytechnic Institute and State University Reading Conference on "Assisting the Academically Deficient College Student" in Blacksburg, Va.;

Karol L. Kelly, history, to speak on "The Hotel Tremont: An American Cultural Contribution" at the annual meeting of the American Culture Association in Detroit;

James Von Schilling, American culture, to speak on "The New Communications Technology and Personal Growth" at the Popular Culture Association/American Culture Association Convention in Detroit;

Jane Caputi, American culture, to speak on "Fashion and Fascism" at the Popular Culture Association/American Culture Association Convention in Detroit;

Tim Race, popular culture, to present a paper on "What Have Sports Illustrated?" at the Poplar Culture Association/American Culture Association Convention in Detroit;

Michelle Kuebbeler, popular culture, to speak on "Trudeau's Doonesbury as the Eternal Hippie" at the Popular Culture Association/American Culture Association Convention in Detroit;

Robert Duran, speech communication, to present a paper on "If a Theory of Human Communication Exists..." at the Eastern Communication Association Convention in Ocean City, Md.;

Susan L. Fuller, college student personnel, to present papers on "Needs Assessment Based on Developmental Theory" and "Planning a Meaningful C.S.P. Practicum: A New Model" at a meeting of the American College Personnel Association in Boston;

Barry Alcock, college student personnel, to speak on "Needs Assessment Based on Developmental Theory" at a meeting of the American College Personnel Association in Boston.

Faculty

Grants

Don Bright, business education, \$400 from the Ohio Dept. of Education to conduct a one-day conference for in-service teachers on "Mainstreaming—Implications for Business Education."

David Elsass and Patricia Mills, education, \$349,183 from the Ohio Dept. of Education to complete teacher-education redesign in the College of Education.

William Grant, American studies, \$2,100 from the Ohio Historic Preservation Office to engage Bowling Green graduate students in conducting an historic resources inventory of Fayette, Ohio.

Ron Marso, continuing education, regional and summer programs, has received \$108,352 from the Ohio Dept. of Education and \$7,160 from participating schools to conduct institutes and workshops for in-service teachers.

Topics for the workshops include procedures and strategies for meeting the needs of gifted students; mainstreaming and individualization of instruction; strategies for minimizing teacher stress; teacher effectiveness; classroom management, and problem solving.

Participating schools include Erie, Huron, Hancock, Van Wert and Ottawa county districts, the Midwest Local, Lima City and Port Clinton schools.

Floris Wood, library, \$3,731 from the Wood County Manpower Dept. to continue funding of a clerk's position in the Library periodical cards withdrawal project. The funds are provided under Title VI of the Comprehensive Employment and Training Act.

Publications

Loreto P. Alonzi, economics, "Policy Implications of Bank Repurchase Agreements," to be published in Volume IV of the "Journal of Economics."

William D. Baxter, biological sciences, and **William R. Bowen**, University of Arkansas, the second edition of "Experimental Cell Biology," an integrated laboratory guide and text published by the Macmillan Publishing Co. The text reviews major facts and concepts of modern cell biology and integrated laboratory experiments illustrate relative phenomena.

Robert Byler, journalism, "Marimba Ragtime," in "The Mississippi Rag," May, 1980.

The article describes innovative concerts by the Ragtime Marimba Ensemble in Bowling Green's College of Musical Arts. "The Mississippi Rag" is the leading publication in the field of traditional jazz and ragtime.

David Groves, health, physical education and recreation, "Life Skills Education: A Concept Framework," in the "College Student Journal." He also authored "Music as a Vehicle for Life Enrichment and Expanded Content for Special Audiences" which was published in the spring issue of "Adolescence."

Margaret Ishler, education curriculum and instruction, co-authored a chapter on "Developing Desirable Teaching Behaviors" in the "New Directions for Teaching and Learning" sourcebook. She collaborated with Richard E. Ishler, Emporia State University, in writing the chapter.

Nora Liu, health, physical education and recreation, "Europe: Three River Rumble," in the December, 1979 issue of "Physical Education Quarterly" published in Taipei, Taiwan, Republic of China.

James McKenzie and Robert Gill, health, physical education and recreation, "Rainy Day Tennis," in the February issue of "Journal of Physical Education and Recreation."

Recognitions

William D. and Sharon R. Baxter, biological sciences; **Ruth K. and Kenley Inglefield**, music composition/history, and **Marilynn Wentland**, speech communication, have been appointed Danforth Associates by the National Advisory Council of the Danforth Associate Program.

They are among 405 persons in colleges and universities throughout the United States invited to participate in the program.

Associates work directly with students

on a personal basis in an effort to improve student-faculty relations and to strengthen the teaching-learning process.

Richard W. Bowers, health, physical education and recreation, has been elected vice chairman of the board of the American Heart Association, Northwestern Ohio chapter. This is his second year in that office.

T. Richard Fisher, biological sciences, has been elected to a one-year term as president of the 2,000-member Ohio Academy of Science.

The organization works to stimulate interest in the sciences, promote research, improve instruction, disseminate scientific information and recognize high scientific achievement.

Membership is open to anyone interested in the sciences and includes those employed by research laboratories, universities, technical institutes, elementary, junior and senior high schools, associations and museums.

Benjamin N. Muego, political science, was elected to the executive committee of the Southeast Asia Council of the Association of Asian Studies during the most recent AAS annual meeting in Washington, D.C. His term will expire in 1982.

Phillip O'Connor, English, has received the 1979 "Nancy Dasher Award" given annually to the state's best fiction writer by the College English Association of Ohio.

Dr. O'Connor won the award for his novel, "Stealing Home."

Presented April 18 at the CEAO annual meeting in Columbus, the award carries with it two identical plaques citing the achievement of the winner, one for Dr. O'Connor and one for the University's English department.

Audrey L. Rentz, college student personnel, received the "Outstanding Research Award" at a recent meeting of the American College Personnel Association in Boston.

The award was presented for the department's project, "Significant Influences on Student Behavior," directed by Dr. Rentz and begun at Bowling Green by the late Harold Marquardt.

Gerald Rigby, criminal justice, was reelected delegate-at-large to the executive committee of the Ohio Council on Higher Education in Criminal Justice at a meeting April 25 at Cuyahoga Community College in Parma. This is his second year on the committee.

The OCHECJ is composed of representatives from 33 institutions of higher education in Ohio with criminal justice programs and others interested in criminal justice.

George Seifert, education foundations and inquiry, has been named to the committee of examiners for the Advanced Education Test offered by the Education Testing Service. He is one of five educators selected for the committee.

Isaac Sequeira, ACLS Fellow in the popular culture department and professor of English at Osmania University, India, has been invited to lecture at the East-West Culture Learning Institute, East-West Center, in Honolulu July 3-8. He will speak on popular culture in America and India.

Adrian R. Tio, School of Art, was a delegate to the regional conference of Foundations in Art: Theory and Education, the national organization concerned with issues in the teaching of foundation-level courses in studio art and art history. The one-day conference was held at Eastern Illinois University, Charleston, Ill.

Marilyn Wentland, speech communication, has been elected to Alpha Eta, the national honor society for allied health professions.

I. Clay Williams, health, physical education and recreation, has been chosen vice president-elect for the health division of the Midwest district of the American Alliance of Health, Physical Education, Recreation and Dance. The Midwest district includes seven states.

Presentations

Loreto P. Alonzi, economics, presented a paper on "Risk Aversion Bank Portfolio Choice and the Use of Federal Funds" at

the Midwest Economic Association meetings March 27-29 in Chicago.

He also presented a paper on "Repurchase Agreements in Bank Portfolio Management: Consequences for Monetary Policy" at the Eastern Economic Association meetings May 8-10 in Quebec.

Gerald Auten, economics, presented a paper on "The Elasticity of the Federal Income Tax" at the March meeting of the Missouri Valley Economics Association in Memphis.

Cary Brewer, registrar, presented a paper entitled "An On-Campus Communication Network" at the College and University Machine Records Conference May 5-7 in Salt Lake City.

Ernest A. Champion, ethnic studies, chaired and moderated the first plenary session of the African Literature Association Annual Meeting April 9-12 at the University of Florida, Gainesville.

During the session authors James Baldwin and Chinua Achebe discussed "Defining the African Aesthetic."

V. Michelle Chenault and Jerry A. Holmberg, medical technology, presented a workshop on "Teaching Psychomotor Skills" at a meeting of the Ohio Society for Medical Technology April 29-May 3 in Cleveland.

They will present a similar workshop at a national meeting of the American Society for Medical Technology in June.

Holmberg also will present a paper on "Skill Assessment in Medical Technology" at the national meeting.

Virginia Eman-Wheelless and Kathi Dierks-Stewart, speech communication, spoke on "The Reliability and Validity of the BSRI as a Measure of Sexual Identity" at the Eastern Communication Association Convention April 24-26 in Ocean City, Md.

At the same meeting, **Tim Stephen and Donald Enholm**, speech communication, and **Howard Markman**, psychology, spoke on "The Operants of Intimacy: A Q-Factor Analysis of 32 Intimate Relationships."

On April 29 Dr. Eman-Wheelless presented a workshop on communication skills for affiliates of the Hancock County CETA program.

She moderated a program on "The Self and Other in Interpersonal Communication: Top Four Competitive Papers" at a meeting of the Central States Speech Association in Chicago at which time she ended her term as chair of the communication theory panel of the CSSA.

Donald Enholm, speech communication, spoke on "The Relationship World Index: An Instrument for the Measurement of Symbolic Interdependence in Developing Intimate Relationships" April 12 at the Central States Speech Association convention.

James L. Galloway, placement services, spoke on "Future Trends in College Placement" at the annual Two-Year College Placement Association meeting April 24-25 at Owens-Technical College.

He also spoke on "Career Opportunities in the 80s" May 2 at Anthony Wayne High School in Waterville at a meeting sponsored by the Waterville Chamber of Commerce.

Bonita Greenberg, speech communication, presented a workshop on "Enhancing Children's Oral Language Skills" in March at the third annual Early Childhood Conference, "Communicating with Children."

She also spoke on "Communication Techniques for Better Interaction" in April at a meeting of the Ohio Association of Young Children in Toledo.

Herbert Greenberg, speech communication, spoke on "Tinnitus" at a meeting of the Ohio Hearing Aid Dealers Association April 25 in Columbus.

Mearl R. Guthrie, business education, spoke April 11 at a meeting of the Georgia Business Educators Association in Atlanta.

He also spoke April 12 to the Ohio Business Teachers Association in Cincinnati and on April 23 to the National Secretaries Association.

Howard Gutnick, speech communication, spoke on "Consonant Discrimination as a Function of Presentation Level in Hearing-Impaired Listeners" at the annual meeting of the Acoustical Society of America April 24 in Atlanta.

William D. Hann, biological sciences and program director of medical technology, spoke on "Advanced Degree

Programs for Medical Technologists" at the May 1 meeting of the Ohio Society for Medical Technology in Cleveland.

Dr. Hann also participated in a panel discussion on the topic.

At the fifth annual meeting of the Society of Armed Forces Medical Laboratory Scientists at San Antonio, Tex., he presented a paper, "A New Blood Cell Separation Method Used in the Study of Patient Antibody Development Against Lymphocyte, Neutrophil and Erythrocyte Antigens Following Transfusion."

The paper, authored by **Judy Adams**, medical technology, Dr. Hann and Peter Lau, Medical College of Ohio, was the culmination of three years' research.

Stephen Hood, speech communication, spoke on "Working with the School-Aged Stutter" at the Central Ohio Special Education Regional Resource Center April 18.

He also presented a workshop on stuttering therapy at a March meeting of the Lucas County Public School Clinicians, and presented a similar workshop in April at the Eastern Central Ohio Special Education Regional Resource Center in New Philadelphia.

Melvin Hyman, speech communication, spoke April 10 to faculty and students in the speech pathology and audiology program at Temple University on "New Approaches to Spastic Dysphonia."

David J. Hyslop, business education, spoke on "Motivating Students by Applying Learning Principles" at the Ohio Business Teachers Association annual convention April 15.

Mildred Lintner, speech communication, presented a paper on "A Modern Clothing Theory Approach to Costume Design" at the spring meeting of the Ohio Shakespeare Society May 3 in Columbus.

Joseph Mancuso and Dion Stewart, geology, led a field trip for 30 geology majors to the Upper Peninsula of Michigan May 2-6.

Following the trip, Drs. Mancuso and Stewart attended the 26th annual Institute on Lake Superior Geology at the University of Wisconsin at Eau Claire where Dr. Mancuso presented a paper on "Geology and Uranium Potential of the McCaslin Range, Wisconsin."

Robert L. Perry, ethnic studies, organized and chaired a session on "Criminal/Juvenile Justice and Minorities" at the North Central Sociological Association Meeting May 1-3 in Dayton.

Patricia W. Remington, ethnic studies, participated in the session, speaking on "Pilot Ethnographic Study of a Juvenile Referee Court System: Discretionary Justice."

Charles Rich, geology, led a field trip to Sheldon's Marsh State Nature Preserve east of Sandusky on May 3.

The field trip was one of the activities planned for participants in the annual meeting of the Ohio chapter of The Nature Conservancy hosted May 2-4 on the Firelands Campus.

Marian Ronan, research services, spoke on "Strategies for Increasing Faculty Activity in External Funding for Women's Studies, Women's Programs and Women's Equity" at the Midwest meeting of the National Council of University Research Administrators May 1 in Cincinnati.

William L. Schurk, library, was invited to participate in a panel discussion on popular American performing arts at seminars April 24-25 at the Smithsonian Institution's Museum of History and Technology.

James D. Stuart, philosophy, chaired a session on "Perception and Knowledge" at the American Philosophical Association meetings April 25 in Detroit.

Antony van Beysterveldt, romance languages, presented a paper on "A Socio-Literary Interpretation of the Feminist Debates in XVth Century Spain" at a session on "The Feminist Debate in Castilian Literature" at the Fifteenth International Congress of Medieval Studies May 1-5 in Kalamazoo.

Nancy Wygant and Susan Brush-Harr, Counseling and Career Development Center, presented a program entitled "A New Twist to Career Planning: Student Contracts" at the national convention of the American College Personnel Association April 26-30 in Boston.

Fayetta Paulson, residence life, assisted them in their presentation.

1980-81 ACADEMIC CALENDAR

Summer Quarter

June 23, 1980 (Monday) - Classes begin at 7:30 a.m.
 July 4 (Friday) - Holiday, no classes
 July 25 (Friday) - First term ends
 July 28 (Monday) - Second term begins at 7:30 a.m.
 Aug. 29 (Friday) - Summer Quarter ends
 Aug. 30 (Saturday) - Commencement

Fall Quarter

Sept. 24, 1980 (Wednesday) - Classes begin at 7:30 a.m.
 Nov. 26 (Wednesday) - Thanksgiving recess begins at 7:30 a.m.
 Dec. 1 (Monday) - Classes resume at 7:30 a.m.
 Dec. 8 (Monday) - Examinations begin at 7:30 a.m.
 Dec. 11 (Thursday) - Fall Quarter ends
 Dec. 13 (Saturday) - Commencement

Winter Quarter

Jan. 5, 1981 (Monday) - Classes begin at 7:30 a.m.
 Feb. 16 (Monday) - No classes
 March 17 (Tuesday) - Examinations begin at 7:30 p.m.
 March 20 (Friday) - Winter Quarter ends
 March 21 (Saturday) - Commencement

Spring Quarter

March 30, 1981 (Monday) - Classes begin at 7:30 a.m.
 May 25 (Monday) - Holiday, no classes
 June 9 (Tuesday) - Examinations begin at 7:30 a.m.
 June 12 (Friday) - Spring Quarter ends
 June 13 (Saturday) - Commencement

Board of Trustees

Twelve faculty who will retire this year were granted emeritus status by the Board of Trustees at their May 23 meeting.

Receiving the appointments were William Alexander, music education; Hanns Anders, chemistry; Frederick Eckman, English; Martha Eckman, English; Robert Innis, School of Technology; David Krabill, mathematics/statistics and computer science; F. Lee Miesle, speech communication; Beatrice Morton, English; John Paul Scott, psychology; Irene Skinner, home economics; Olin Smith, psychology, and Raymond Yeager, speech communication.

The trustees re-elected Albert E. Dyckes, Columbus, as president of the Board. Frazier Reams Jr., Toledo, was elected vice president and Richard Edwards, University vice president, was elected secretary.

In other business, the trustees approved receipt of grants and contracts totaling \$423,224 for the month of April, bringing year-to-date total receipts for sponsored grants and contracts to nearly \$9,260,000.

The trustees also heard a report which established total spring quarter enrollment at the main campus, Firelands, off-campus centers and abroad at 17,245.

'Dracula' to launch playhouse season

Huron Playhouse, the educational summer theater program operated by the School of Speech Communication, has announced the playbill for its 1980 season, to run July 8-Aug. 16.

In its 32nd season, the playhouse will open with "Dracula," one of the great thrillers of all time, July 8-12.

Comedy comes next when the theater company will present "California Suite," Neil Simon's tale of the misadventures of California

When/Where

Women's Chorus, 3 p.m. Sunday, June 8, Kobacker Hall, Musical Arts Center.
Electronic music by student composers, 7:30 p.m. Monday, June 2, Bryan Recital Hall, Musical Arts Center.

News Review

Dean Eriksen receives placement service award

John G. Eriksen, dean of the College of Arts and Science, received the Karel S. King Service Award at the 17th annual "Falcon Hunter Picnic and Reunion" sponsored by the Placement Services office May 16.

Also honored at the get-together were three persons who were presented with "Recruiter of the Year" awards.

The annual service award, which is named for Miss King, who worked 13 years in the placement office before leaving the University in 1974, is given in recognition of outstanding service to the placement office and the University.

The top three recruiters were selected by seniors who have participated in 8,500 interviews this year with 870 recruiters from the fields of education, business and health and community services.

The business award was presented to Van Lazaroff, district manager for Moore Business Forms, Inc. of Southfield, Mich.

James Capital, director of personnel for the Mentor Public School system, was selected as the top education recruiter.

Richard L. Daley, supervisor for the Lucas County Court, Juvenile Division, was named the recipient of the first Joseph K. Balogh Health and Community Services Recruiter of the Year Award. The award, which will be an annual presentation, is named for Dean Balogh who will retire in June.

Offset press donated to School of Technology

A four unit Web press, typesetting equipment and platemaking operation, valued at more than \$400,000, have been given to the School of Technology by an anonymous donor.

The printing system, which was unpacked and assembled two weeks ago, will make Bowling Green's visual communications technology program one of the best equipped in the country, according to Barry Piersol, chair of the program.

"Only about three other schools in the country have the type of technology and equipment that we now have. This equipment will be a tremendous boost to our instructional program," he said.

He added the equipment will be incorporated into six current courses and could allow for development of several other

tourists, to be staged July 15-19.

"Fiddler on the Roof," musical theater at its best, will be produced July 22-26.

Agatha Christie's "The Mousetrap," which has been running more than 25 years in London, is scheduled July 29-Aug. 2.

Comedy returns the following week with "Same Time Next Year," Bernade Slade's long-running Broadway hit about a love affair which takes place once a year for two decades. The play will be presented Aug. 5-9.

Concluding the 1980 season will be the ever-popular musical "Cinderella" on Aug. 12-16.

All performances will begin at 8 p.m.

Advance ticket information can be obtained by writing to Huron Playhouse, 312 South Hall. A bargain book, good for admission to five of the Playhouse's six productions this summer, is available for \$14.

courses which previously could not be offered.

The equipment also will enable the school to offer professional seminars and workshops, Piersol said.

'Senior Challenge' expected to top goal

University seniors have pledged more than \$37,500 in the 1980 Senior Challenge drive, topping 75 percent of the \$50,000 goal.

James Hodge, director of deferred giving in the Office of Alumni and Development and adviser to the seniors, labeled this year's drive "the most successful program we have ever had."

He added that the amount of money collected is the highest percentage ever for the month of May and that the pledges per year far exceed those of any previous fund drive. Beginning this year, pledges will be paid over a three-year period following graduation instead of five years as in the past.

Because only June, 1980 graduates have been contacted to date in the fund drive, Hodge said he is convinced the \$50,000 goal will be topped when all pledges have been made. Students who graduated in August, December and March will be asked to contribute to the fund drive during the summer.

One-third of all funds collected will be used for a Class of 1980 Park, to be located between Harshman and Kreischer Quadrangles near Peregrine Pond.

Another third will be used for the Class of 1980 scholarship, designated to an upperclassman based on leadership and service to the University.

The final third will be allocated to the academic department or program of the graduating student's choice.

Student to speak at philosophy conference

Senior William Keith of Rocky River was one of only four students in the state invited to present a paper at the Ohio Undergraduate Philosophy Conference May 17 in Columbus.

Keith's paper, "Art Theory: Formal and Historical Perspectives," was selected for presentation from numerous papers submitted by undergraduate students at colleges and universities in Ohio.

He plans to pursue graduate studies in Bowling Green's master of arts degree program in applied philosophy.

Chemistry major wins national competition

Michael Sponsler, a sophomore chemistry major from Perrysburg, has been awarded two summer research fellowships in national chemistry competition.

Sponsler is one of six students, selected from more than 500 applicants on the basis of academic achievement, to receive a Polymer Chemistry Undergraduate Summer Scholarship sponsored by the Procter and Gamble Co. through the American Chemical Society's Division of Polymer Chemistry.

The cash award of \$1,000 will enable Sponsler to conduct eight weeks of research at Bowling Green this summer under the direction of Douglas Neckers, chemistry.

Sponsler also has been awarded third prize in national Polymer Science Awards competition sponsored by the polymer science department at the University of Akron.

That award carries a \$50 cash

stipend and a \$1,000 summer research fellowship in the polymer science department at the University of Akron. Sponsler has declined that fellowship in order to accept the Procter and Gamble award.

William Treat named to Library position

William Treat has joined the Library staff as assistant director for technical services.

In his new position, Treat is responsible for the general supervision and coordination of the Library's technical services administrative departments, including bibliography, cataloging, serials, purchasing and systems and procedures.

He received a bachelor of science degree in business administration from Miami University in 1968 and in 1973 earned a master of library science degree from Kent State University.

From 1969-72, Treat was a computer programmer for the U.S. Air Force Logistics Command at Wright-Patterson Air Force Base. Before coming to Bowling Green, he directed the automated systems control group at Cornell University Libraries, a position he had held since 1973.

John Ellis receives education alumnus award

John Ellis, executive deputy commissioner for educational programs with the U.S. Office of Education, received the first College of Education "Alumnus of the Year" award May 20.

The award was initiated by the College to honor alumni exhibiting outstanding professional performance of public service in the field of education.

The recognition includes a citation as well as a Peregrine Falcon limited edition lithograph by wildlife artist John Ruthven. In addition, a \$300 scholarship in honor of the "Alumnus of the Year" is to be presented annually to a College of Education student. This year's recipients were Teresa and Lisa Grigsby, twins from Lima who are social studies majors.

Dr. Ellis, a 1953 graduate, has served with the Office of Education since 1957. He will leave Washington in June to assume the post of superintendent of the Austin City Schools in Texas.

Faculty, staff tapped for ODK

Two faculty members and an administrator have been inducted into the University's circle of Omicron Delta Kappa, national leadership honor society.

Gerald Saddlemire, chair of the college student personnel department; Richard Mathey, music education, and Larry Weiss, director of alumni activities in the Office of Alumni and Development, were honored by the society May 30.

Fifteen students also were tapped for membership.

Monitor

Monitor is published every two weeks during the academic year for faculty and staff of Bowling Green State University. Deadline for the last issue of the year, June 9, is Tuesday, June 3.
