**Dr. Eriksen**

**‘Distinguished’ faculty to be recognized**

Acting Provost Eriksen announced Monday plans for the university to recognize achievement in research and teaching through the designation of “distinguished professor.”

The proposed plan for the recognition would allow for the appointment of two distinguished professors each year.

One award would be given to a faculty member, while the other would be given to a senior who has achieved outstanding national and/or international recognition through research and publication in his or her discipline.

The second distinguished professorship would go to a faculty member selected by the rank of professor whose achievement as an effective teacher or in his or her discipline or in interdisciplinary fields deserves special recognition.

Dr. Eriksen said the selection process for the two awards would be rigorous and included in a proposal which he will submit to the appropriate councils, the president, and the Board of Trustees.

“I feel it is important that additional opportunities to those already offered shall be provided. We need to give our size to further recognition to the accomplishments of outstanding faculty,” he said.

“I hope that the establishment of these distinguished professorships will provide additional means for honoring outstanding contributions by our faculty in the very important missions of teaching and research.

“It should be made clear that this proposal will not change the status or the continuation of our awarding the University Professorship to outstanding faculty for extraordinary achievement within the criteria of that award.”

Dr. Eriksen, in closing his remarks to introduce new deans and department chairmen to those new to Bowling Green this year.

He updated the status of the university’s efforts to improve the general education curriculum which was led by the Task force coordinated by Beth Casey in the College of Arts and Sciences.

He said that the task force has completed a two-year review of general education curricula to determine what core of courses it is hoped will provide for the opportunities in general education course work to enhance and improve their skills and understanding.

“This fall, I will appoint a University-wide task force to work with all colleges to articulate the general education requirement in a uniform and coherent manner and to the task of assessing the progress of students in their development of skills and understandings.

“Hopefully, a new General Education Bulletin will be available next summer to provide students with a comprehensive guide and a clear picture of all general education courses by category.”

Dr. Eriksen noted that Ramona Corder, administrative assistant to the institutional report which will be the basis for the University’s formal review next year by the North Central Association.

He highlighted progress which has been made in the past semester calendar, adding that it is one of many improvements made for 1981-82 and that all changes will be updated to the benefit of all students and priorities including:

- Integrity of the classroolm for both students and faculty.
- Quality in academic programs.
- Recognition of excellence in faculty performance and achievement.
- Support for the professional development of faculty, and
- Commitment to the academic mission of the University.

It won’t be business as usual at the University this year.

Faced with the greatest financial uncertainties and pressures of its 71-year history, Bowling Green will undergo some significant changes, Interim President Ferrari told about 1,200 faculty and contract staff at the opening general session Monday (Sept. 21).

Dr. Ferrari told the faculty and staff that the session serves as an occasion to “shape the future of the University.

- There are many signs that Bowling Green Campus is passing an attractive learning environment.
- Our fall enrollments of $1,250 per student in 1979-80 to $1,900, and our facilities and grounds are in excellent condition.
- The standardized test scores of freshmen continue to rise.
- New additions to the faculty bring outstanding scholarly and teaching competencies.

“Accomplishments of continuing faculty and professional staff deserve high praise,” he said.

But, he added, “Amidst these positive indicators of a stimulating academic community, signs are evident of a heightened sense of anxiety about the possible implications for the future of the University because of Ohio’s financial crisis.

These pressures do not originate from a diminished productivity or competence in faculty or staff. They come from a transformed state economy. The University’s support from the state has suffered in direct proportion to the fall-off in tax revenues.”

Dr. Ferrari reviewed the budget problems which plagued Bowling Green in 1981-82 when $2.5 million in state support was cut from the University’s budget and added, “Unfortunately, last year’s budget problems did not end on June 30.

“We begin this new academic year at Bowling Green (as do all other public institutions in Ohio) with state support actually lower than it was two years ago.

“Moreover, state support has declined 26 percent the past three years—from $1,250 per student in 1979-80 to $1,902 in 1981-82—even though the total cost of educating each student has increased.

“Salary increases for faculty and contract staff, although well below our plans of last winter and spring, and escalating electricity charges over which we have little control, are the only budget increases approved at this time by the Trustees for 1981-82.

“Our current financial condition can be summarized in this way: Institutional expenses anticipated for 1981-82 exceed anticipated revenues by at least $1.3 million. We are encouraged by the governor’s budget statement on Sept. 8 in which he described the financial peril of public colleges and universities and proposed major subsidy increases for the state. If supplemental subsidies exceed our minimum need expenses, funding priority will be:

- New buildings and equipment
- News to faculty and contract staff, Library and computing support, and selective operating budget support. If subsidies would be increased beyond the limits necessary to fund our priorities, the Trustees would be in a position to consider fee adjustments for the future.

However, we are mindful that legislative leaders are cautioning against any quick adoption of either the governor’s proposal or an alternate compromise for this fall,”

Dr. Ferrari said this year will be one of crucial importance to the short- and long-term health of higher education in general and Bowling Green in particular. Ohio’s Inter-University Council of Presidents and Trustees has described the year in which public universities will be engaged in critical balancing act between maintaining high quality and suffering severe deterioration.

Bowling Green’s economic future, he said, is directly related to the revitalization of Ohio, and such revitalization will not come overnight, he added.

“We do not have the luxury to wait out the current storm. We cannot afford to be complacent and to think a sudden change in public opinion or legislative action. We are a University of considerable strength and we must do our work thoughtfully but decisively to maintain and enhance the academic integrity and fiscal soundness of the institution.

“In making a break with customary budgeting practices, we need to recognize that, in order to survive, we cannot be business as usual.”

---

**Dr. Ferrari announces 10-point plan for change**

Interim President Ferrari, Acting Provost Eriksen and Senator Chair Richard Ward delivered their annual “state of the University” addresses at the opening general session for faculty and contract staff on Monday (Sept. 21). They were joined by an address by Bruce Johnson (left), an outstanding representation student representing the Student Government Association, who announced five recipients of Faculty Excellence Awards.

Dr. Ferrari announced a 10-point plan for change to an opening general session for faculty and contract staff on Monday (Sept. 21). They were joined by an address by Bruce Johnson (left), an outstanding representation student representing the Student Government Association, who announced five recipients of Faculty Excellence Awards.

---

**Dr. Ward**

**Communication is remedy for stress**

Communication is Richard Ward’s remedy for the stress that he thinks plagues all faculty members.

Dr. Ward, management, is the 1981-82 chair of the Faculty Senate, and he used the opening general session for faculty and staff on Monday (Sept. 21) to highlight the role the Senate can play in guiding the University through a period of change.

Noting that the University is in the process of selecting a new president, converting to an early semester calendar and preparing to be a North Central Association, he said:

"These are unprecedented times and require us to look toward the future with our continuing budgeting and planning committees suggest to me that the University cannot avoid a year of intense debate concerning a very fundamental issue. What kind of University do we wish to become?"

He added that the University has an inextricable need regarding the role of administrative officials, students, as they will be paying record-high fees this year and they will expect quality education in return.

"I fear that students will become increasingly restive as what we offer special circumstances as an excuse for our own lack of initiative.

"My remedy for stress is communication. In the coming year, I believe that we need to extensively and rigorously communicate to make students and administrative officials aware that the University is undergoing a period of change.

"As new developments arise, we must be able to express our concerns, our recommendations, our questions and doubts to the administration, and we must also be aware of what the University should become.

"We are especially fortunate to have at BGSU an administration that believes in the consultative model of leadership.

"Faculty Senate meetings and the possibility of making full use of all the channels of communication have been the goal of the Academic Charter, including...Faculty Senate."
University must act now to gain control of its destiny.

Dr. Ferrari said recent meetings with the Faculty Senate Executive Committee, directors of academic programs and the search committee for Personnel Manager Jim Hot have helped put the University on notice that it is facing some hard choices this year. "We have a new spirit of awareness of the fact that the University must act now to gain control of its destiny," he said. "For the first time in recent memory, I am urging the university community to submit to me detailed plans for the next three years."

"Steps were also taken which saved $10,000 from the $50,000 in costs in the summer pre-registration program as 30 contract and classified staff voluntarily forgave their annual registration assignments. A new program giving clinic students the option of not registering for the summer leaves without pay resulted in savings of $4,000. New options for saving energy, to reduce electrical consumption in older buildings will continue. We will have begun in March, 1982. Intercollegiate athletics are being reviewed. Football and an intercollegiate sport was changed to a diurnal activity."

Hiring freezes, reduction in administration, and possible curtailment of renovation also saved University dollars, he said, with a $40,000 saving in the $100,000 that was cut from various auxiliary budgets, including the Union, Health Center, Student Recreation Center and intercollegiate life programs.

"I believe that we can be truly equitable to respond in new ways to those challenges affecting the University's financial vitality, stability, academic integrity and operational effectiveness."

"The potential for meeting longer term challenges and preparing for them is greatest pressing agenda for 1981-82. The budget cuts must be made with the understanding that our condition of financial exigency that will ensure the vitality, stability, academic integrity and operational effectiveness of our programs and to the costs of a university are three factors. Not with our current and prospective students.

"We believe that the University can obtain sufficient funds to achieve our goals through the planned details by Dec. 1 that would not have a vigorous program of external fundraising. This will be targeted to our highest priorities and as a result of the possible discontinuance of selected programs and services over the next three to five years."

"I do not call for a plan to deal with a condition of financial exigency that I must the legislature will not cause, that we move more boldly to attract outside support and even more efficient and effective ways of conducting the business of the University."

"In light of what has been done and needed, I am proposing to the Board the following as plans for action and action that I believe is amost a high priority this year:

1. for the first time to ask the Long Range Planning Committee, chaired by Paul Hass, economic consultant, to provide parallel, duplicative or complementary services to the Board. I will be asking the Board to consider this in their spring meeting.

2. Efforts now underway to consolidate and reorganize various offices, departments and services will provide parallal, duplicative or complementary services to the Board. I will be asking the Board to consider this in their spring meeting.

3. Suspecting that some course changes, I will be asking the President's Panel, a representative group of faculty, students and staff, to advise the college of student life and to provide recommendations for improving the quality of services with an eye toward greater economy of operation.

4. Intercollegiate athletics has the focus of considerable national and local attention. On our campus, studies of the academic performance of athletes and opportunities for women in the University's athletic programs were completed last year. The findings of these studies are encouraging, and detailed reports will be shared with the academic community in the near future. However, escalating costs of athletic programs and the academic and ethical aspects of contemporary intercollegiate Athletics has Bowling Green has a rich tradition in athletics, and long-term cuts have been made to continue that tradition. Our philosophy continues to be based on the excellence in athletics as we do in all other areas of the University. A balanced intercollegiate program builds spirit and adds among students to the University and the community and is consistent with the goals of a residential University. These benefits should neither be overstated nor exaggerated as we continue to search for ways to improve the University's financial condition.

"However, selective reductions in the academic program over the next three years are necessary. I have asked the director of athletics, in consultation with the coaches and the University Intercollegiate Athletics Committee, to develop a policy that will reduce costs and provide a plan for a better but higher quality intercollegiate athletic program.

"In this period of budget stress threatens the morale of faculty and staff. One factor contributing to such stress is the pressure to which there is perceived to be fairness and accountability and work expectations and equity in the distribution of resources. Instructional academic operating budget allocations are two of the most important of any college or university. Within the next week I will be announcing the appointment of a special faculty advisory committee to review detailed assistance, staffing and funding information. I will ask the committee to recommend criteria to ensure that institutional and departmental equity in the context of teaching and scholarship.

"The ten agenda items I have outlined for 1981-82 may strike some of you as overly ambitious. After all, we are already swamped with the press of University business in teaching, research and public service. Many of us will be spending time on the calendar compression effort and on preparing reports to be used in the next year's accreditation reviews by the North Central Association, The American Association of University Professors, and the College of Arts and Sciences Committee. And we must do many. We need to complete the three-year development plan for the University for the next five years."

"What must not and will not change is our firm commitment to excellence in teaching, scholarship and public service.

"However, I wish to emphasize this morning's addressing to the student body and to suggest our policies for gaining control of our destiny. The University is poised to find itself a future shaped almost totally by external forces. In the new year, we are about to experience a financial crisis. Further delay will only make it much more difficult to face the decisions ahead and the effects of those decisions will be more costly.

"There is no point in action as though there were no crisis or in easy solutions. I am confident, however, that with our determination we will have the will to withstand the current and future economic storms.

"We cannot discuss our agenda today, but must remember that a university is the society's final instrument in the search for truth and for the development of our students' exercise creativity and to support them each other and to help all to our goal: the balanced education of Bowling Green State University, especially in the years to come.

Copies of Dr. Ferrari's speech are available in the president's office.

**Faculty & Staff**

**Grants**

Susan Arpad, women's studies, $14,970 from the Ohio Program in the Humanities to fund a television program that will tell the story of "The Great Black Swamp." This year in Ohio.

The program will be aired on WBGU-TV and will be made available to the public on videocassette along with a discussion guide.

Don Bright, business education, $51,229 from the Division of Vocational Education, Ohio Dept. of Education, to fund the 1981-82 program of teacher education in business and office education in accordance with provisions of the state training plan.

David Chillow and Ann-Marie Lancaster, computer science, $3,000 from Owens Corning Fiberglas Corp. to purchase a microcomputer.

Jeanne C. Danielson, humanities, Finland, $5,000 from the Joint Program in Fish Art and Culture, a program of the Ohio Arts Council and the Ohio Program in the Humanities, to sponsor a three-week program, "Meltin' East and West: Finland and Area Arts and Humanities," during May, 1982.

Lavern Dillon, business education, $12,347 from the Division of Vocational Education, Ohio Dept. of Education, to provide the full-time services of a state supervisor for special services in distributive education.

Larry Dunning, computer science, $2,935 from the University of South Florida to study ways of decreasing and eliminating computer system errors caused by changes in computer technology and architecture.

David Eisses and Patricia Reed, education, $159,943 from the Ohio Dept. of Education to continue educationally designed effort to achieve compliance with new state standards for teacher-education institutions in the state.

Richard Frye, Upward Bound, $9,905 from the Ohio Dept. of Education to conduct a summer student service program through Upward Bound. He also received $7,285 from the National Alliance of Business, Inc., to fund wages for students in an Upward Bound employment program designed for economically disadvantaged Blacks, and $5,408 from the Division of Vocational Education to continue activities designed to meet the needs of area teachers.

Leroy Groeber, education, $11,000 from the Division of Vocational Education, Ohio Dept. of Education, to contract a state supervisor for special services in vocational education to home economics. He also received $2,313 from the U.S. Office of Education to assist with training of teachers in home economics. He also received $2,272 from the Division of Vocational Education to continue activities designed to meet the needs of area teachers.

Gerald L. Saddlemire, college student personnel, $1,000 from the Ohio Dept. of Education to assist the college with instituting a program for fall development.

Lowell Schipper and Michael Doherty, psychology, $1,280 from the National Cancer Society to study an anti-tumor drug and how it works. He also received $1,500 from the BGSU Foundation to fund two summer, 1981-82 internships in the chemistry department.

Patrick Smith, emeritus, psychology, $1,500 from the Ohio Dept. of Education, to sponsor a one-week training program in the MacroDosis system.

Richard Venne, psychology, $1,000 from the BGSU Foundation to fund a training program in the MacroDosis system.

Ron C. Woodruff, biological sciences, $36,056 to pursue research on animals as they relate to four unique factors.

William V. Worch, emeritus, psychology, $1,000 from the U.S. Office of Education, to assist with the U.S. Office of Education to continue activities designed to meet the needs of area teachers.

The Anderson Foundation provided two additional grants totaling $31,493 to support research and teaching efforts in the arts and humanities.

**Departments, programs have new chairs and directors**

Twenty University faculty members have been promoted to professor, effective Sept. 15. They are among 44 members of the faculty to be promoted this year.

Also promoted to associate professor were Judith Kuehl, history; John Lowes, biological sciences; Edward Marks, music performance studies; Patricia Reed, educational curriculum and instruction; James Oates, economics; Michael Pearson, marketing; David Pope, music performance studies; Conrad Pritsch, educational foundations and inquiry; Klaus Schuster, German; Robert Schuller, English; and Daniel Tutolo, educational curriculum and instruction.

Promoted from assistant to associate professor, also effective Sept. 15, were Don Bickel, biological sciences; Patricia Buckwell, music education; Kathleen Campbell, home economics; Thomas Dentz, Firelands, natural and social sciences; Carmen Dvorak, continental languages; Edward Ficus, special education; Gilbert Friesie, marketing; Ann-Marie Lancaster, computer science, and Colleen Mandell, special education.

Also promoted to associate professor were James McKenzie, history; Michael Pearson, marketing; David Pope, music performance studies; Conrad Pritsch, educational foundations and inquiry; Klaus Schuster, German; Robert Schuller, English; and Daniel Tutolo, educational curriculum and instruction.

Promoted from assistant to associate professor, also effective Sept. 15, were Don Bickel, biological sciences; Patricia Buckwell, music education; Kathleen Campbell, home economics; Thomas Dentz, Firelands, natural and social sciences; Carmen Dvorak, continental languages; Edward Ficus, special education; Gilbert Friesie, marketing; Ann-Marie Lancaster, computer science, and

Feeling ‘stuck in the mud?’

Exercise is quick ‘achievement therapy’

The building is called the Student Recreation Center, but in reality the center is as much a facility for faculty and staff as it is for students.

Terry Parsons, center director, is hopeful that staff and faculty, employees this year will take advantage of the programs and facilities offered.

Dr. Parsons estimated that only 15% of the 8600 full-time faculty and staff are members of the Rec Center, and as a physical education instructor, he would like to see that percentage increase.

Discussing the Rec Center as “perhaps the finest total recreational facility in the entire Midwest,” Dr. Parsons cited the center’s offerings: two pools, 14 handball courts, three squash courts, a nine-mile jogging track, four basketball courts, a combatives dance room, a room devoted solely to golf and another used for both golf and archery, two exercise rooms, women’s and men’s saunas, a pro shop and an activity center for fencing, ping pong, basketball and gymnastics.

For a small investment ($31 a quarter for faculty and staff, $15.50 for spouses) employees under the age of 18, the returns in physical fitness and well as entertainment, are great, Dr. Parsons said.

Physically, exercise aids

Columbus Day is University work day

Monday, Oct. 12, is Columbus Day, but it will not be a holiday for University employees.

Columbus Day, one of three floating holidays, will be observed this year on Friday, Nov. 27, the day after Thanksgiving.

Oct. 12 will be a regular work day for all employees.

Meeting to answer

TELCOM questions

The University’s TELCOM telephone system will be explained to new faculty and staff and anyone else with questions about the service at two orientation-discussion sessions next week.

One meeting is scheduled from 3-4 p.m., Monday, Oct. 5, in the Tow, Room 5, in the Economics Education Building.

Another will be held at the same time and place on Tuesday, Oct. 6.

Questions about the utilization and services of the TELCOM system will be answered at the two information sessions.

Feb. 1, 1983

Weight loss, lowers blood pressure and heart rate, and reduces a risk in a more efficient cardiovascular system, he explained.

But Dr. Parsons believes the physiological benefits of a continuing exercise program far outweigh the physiological advantages. He explained that exercise heightens diert awareness, enables individuals to better manage their stress, adds a balance to life, helps individuals sleep better, and acts as a source of “achievement therapy,” providing a quick sense of accomplishment unlike most of our daily activities.

He recommends an exercise regimen which all individuals engages in a minimum of 25 minutes of vigorous exercise at least three times a week.

For this reason they feel they must “get back at it” or who merely need an incentive to exercise regularly, the Rec Center is offering several fitness programs this fall.

Rec Center sports full schedule

The Student Recreation Center will offer a variety of programs for students during the fall quarter.

The programs, which range from learn-to-swim classes for children to seminars on weight control and stress management, begin today (Sept. 29) and continue through Oct. 5 in the Rec Center office.

The full schedule of upcoming programs:

AQUATICS PROGRAMS (Learn to Swim)

- $5 - for adults, $3 - for children.

Children's: Waterbabies, Wed. 9:30-10 a.m.
Saturday 9:30-10 a.m.
Saturday 10-10:30 a.m.
Saturday 10-11:30 a.m.
Beginning - Saturday 9:30-10:30 a.m.
Advanced Beginners - Saturday 9:30-10:30 a.m.
Adults - Monday 7-8 p.m.

cia-Aerobics - Noon -1 p.m., Tuesday, Thursday, T.O.N.E.
N.E., Noon - 1 p.m., Monday, Thursday, Friday, Slimnastics - 6-7 p.m., Monday, Wednesday, 7-8 p.m., Thursday, 2-3 p.m., Wednesday, 2-3 p.m., Thursday Family Facility, Nov. 14, 27.

Registration for the Family Fun Day will continue until the week of the programs.

In cooperation with The Well, the Rec Center also will offer a series of “Life Seminars” during fall quarter. Registration for the seminars begins today and continues through Oct. 2. Cost for members to attend one or all of the seminars is $5.

Following is the seminar schedule:

“Introduction to the Series-What’s It All About” - 7 p.m. Tuesday, Oct. 5, Golf Room. Session led by Terry Parsons, Steven Feinberg, Counseling and Personnel Development.

“Workout Trips to Rec Center” - 7 p.m. Tuesday, Oct. 5, Golf Room, led by Terry Parsons, Steven Feinberg, Counseling and Personnel Development, and Karen Fletcher, Student Recreation Center.

“Weight Control/Weight Loss,” 7 p.m. Tuesday, Oct. 5, Golf Room, led by Stephen Dunn, sports counseling, and Dr. Barbara Oer, physical education and recreation, and Joyce Oen, a student majoring in exercise science.

“Behavior/Attitude Will Change,” 7 p.m. Tuesday, Oct. 13, Golf Room, led by Donald Deffose, psychology.

“Aerobic Conditioning,” 7 p.m. Tuesday, Oct. 13, Golf Room, led by Terri Credit, health, physical education, and recreation.

“Aerobic Dance,” 7 p.m. Wednesday, Oct. 14, Golf Room, led by Judy Klessel, health, physical education and recreation.

“Weight Control Follow-up,” 7 p.m. Tuesday, Oct. 20, Golf Room, led by Jim Hodge, health, physical education and recreation.

“Depression and Loneliness,” 7 p.m. Tuesday, Oct. 20 Golf Room, led by Ann Marie Hight, psychology.

“Behavior/Attitude Will Change,” 7 p.m. Wednesday, Oct. 21, Golf Room, led by James McKenzie, health, physical education and recreation.

“Aerobic Conditioning,” 7 p.m. Tuesday, Oct. 20, Golf Room, led by Terri Credit, health, physical education, and recreation.

“Aerobic Dance,” 7 p.m. Wednesday, Oct. 21, Golf Room, led by Judy Klessel, health, physical education and recreation.

“Weight Control Follow-up,” 7 p.m. Tuesday, Oct. 27, Golf Room, led by Jim Hodge, health, physical education and recreation.

“Depression and Loneliness,” 7 p.m. Wednesday, Oct. 28, Golf Room, led by Dr. Barbara Oer, physical education and recreation.

“Stress Management,” 7 p.m. Tuesday, Nov. 3, Golf Room, led by Jim Hodge, alumni and development.

“Weight Training,” 7 p.m. Nov. 4, Golf Room, led by Tom Waytish, athletics.

Employee handbook has new pages

The classified employee handbook, “BGSU & You,” has been updated. Revised pages have been sent to all offices and departments for distribution by supervisors to all full-time classified staff.

Employees should insert these revised pages into their handbooks. Questions may be directed to Personnel Support Services, 372-2225.

Committee links classified staff, personal office

Images of Age, a national exhibition of scientific art, sponsored by artists over the age of 50, through Oct. 18, McAllister Center. Hours are 8 a.m. to 5 p.m. weekdays.

25th Anniversary of the Architecture of Northeastern Ohio, an invitational exhibition devoted to the art of building design and construction, Oct. 20, Galleries 1 through 4, Arts Gallery, School of Art, Gallery hours are 8:30 a.m. to 5 p.m. weekdays and 11 a.m. to 5 p.m. on Saturday and Sunday.

Monday, Sept. 28

“Schools in Citrus Documentary,” Take in a presentation of a multimedia affairs producer and reporter at WBSU-TV, in talks with legislators, school administrators, parents, and students about the education system in Florida, 7 p.m., Room 5, Memorial Union.

Tuesday, Sept. 29

Dr. Gerhardt Flot, deputy director of the Visions Institute for Co-operative Economic Studies, will speak on “Inequities of the Economic Development of the East Coast” at 7 p.m. in Room 251 Education Building. The address is part of the Economics Colloquium Series.
