Vol. V No. 4

Bowling Green State University

October 12, 1981

One area of the new addition to the WBGU-TV building on Troup Avenue is being used to store some 2,900 films and another 2,000 cassette tapes which are used by the Northwest Ohio Educational Television Foundation. Jean Peterson, assistant to the director of learning services of WBGU-TV, is still busy organizing those cassettes, which have just been moved to the new building.

New facility eases station's, foundation's growing pains

Staff members of WBGU-TV and the Northwest Ohio Educational Television Foundation moved into new offices the last week of September, while maintaining, for the most part, "business as usual." The new facility is a 6,000-square-foot addition to the present television building on Troup Avenue.

The land for the addition has been leased to NWOETV by the University for 25 years at \$1 a year, with the facilities reverting to the University when the lease expires.

The new office building consolidates all the operations of the Foundation, including administrative offices, a tape duplicating center which serves elementary and secondary schools, and a film center, which previously had been located in an off-campus building.

A 3,500-square-foot area is occupied by the Foundation and includes a workroom, conference/previewing room, film cleaning area, office areas for eight staff members, shipping and receiving area, and an open space in the middle of the addition with racks for storing 2,977 films in the film center and 2,000 cassette tapes in the tape duplicating center.

Margaret Tucker, director of the Foundation, explained that the Foundation, especially the tape duplicating center with all its equipment and tapes, has grown so tremendously in the last few years that it was necessary to find a space large enough for all its operations. The staff and equipment formerly were housed in a 280-square-foot room in the TV building.

NWOETV is a non-profit corporation that contracts with WBGU-TV to broadcast instructional programming to elementary and secondary schools in northwest Ohio and northeastern Indiana. Tucker estimates that 150 schools or districts with 168,000 students will be enrolled in the Foundation this year. Last year, membership was 130

schools or districts with 160,000 students.

In the northern portion of the addition are offices for 11 WBGU-TV staff, including the learning services director, public information director, development staff, general manager, producer/directors and public affairs staff. A large conference room and three editing stations also are included in the new space.

Total cost of the construction was \$300,000, paid for by the Foundation and a leasing agreement by WBGU-TV with the Foundation for \$150,000 funded through the station's Community Service Grant from the Corporation for Public Broadcasting.

Pretty as a picture

Grounds tending is 'budding' business

Even before Jack Frost had laced the windowpanes, the University's grounds crew was hard at work painting an autumn picture on campus.

With more than 60 flower beds occupying a total of about two full acres, the grounds crew has been busy replacing summer flowers with fall counterparts and readying the campus for winter.

Grounds keepers have been picking up litter; trimming shrubs and trees; fertilizing the lawns; landscaping around the carillon tower, residence halls and Eppler complex; pulling weeds; striping parking lots and crosswalks, and doing all those other little tasks that make the campus the envy of many other universities throughout the state.

And while helping to make the campus a source of pride to all who are associated with it, the grounds crew is also saving the University money.

Randy Gallier, grounds supervisor, said very few of the flowers which decorate the campus are purchased. Most are cultured and tended in the University greenhouse which is supervised by Duane Haas. Last year, in fact, only four flats of seedlings were purchased for the entire campus. The other flowers were all nurtured from seed in the greenhouse or wintered from the year before.

And that's what has happened to many of the geraniums which were removed from pots around campus to make room for the more seasonal mums. Cuttings from the healthiest plants will be kept over the winter so that a fresh burst of color will be available next spring.

In addition, even though this year's mums have just been planted, Gallier said the grounds crew is already thinking of this time next year and is

saving cuttings from the best mums for next fall's planting.

The grounds crew also custom mixes fertilizers for the entire campus, including trees, shrubs and lawns. Landscaping is another function of the crew, which most recently completed the plantings around the carillon tower.

Grounds keepers also are responsible for irrigating the lawns, and they saved about \$110,000 at the Student Recreation Center by installing an irrigation system which operates with water from the Rec Center pond.

A sulfur well at the Library is used to irrigate lawns in the central campus.

In addition, it is the grounds crew which is responsible for trash pick-up across the campus, a task which usually is completed even before most faculty, staff and students arrive at the University each day.

And in the winter it is the grounds keepers who keep the snow cleared from sidewalks and parking lots. It is also the grounds crew which limes and mows the band practice fields and sets up chairs and bleachers for campus events, including graduation. Grounds keepers also tend the president's house, and the department offers advice and assistance with the purchase of indoor plants for offices.

With a staff of only 29 men, Gallier said the grounds keeping task is not an easy one.

As budgets have been cut, some things have not been done as frequently or as well, he noted, adding that the number of flower beds has been reduced, the grass is not fertilized as frequently, the weeds aren't pulled as often and the plants in the greenhouse don't receive the care they once did.

Where have all the flowers gone? Most of the geraniums on campus which were replaced with mums a few weeks ago have gone to the greenhouse where Duane Haas, caretaker, will nurture them through the winter in preparation for replanting next spring.

Faculty Senate

University administrators are financially more optimistic now than they have been at any time in the last 12 months, but the battle for dollars is far from over, according to Interim President Ferrari.

Dr. Ferrari told Faculty Senate at its first meeting of the year on Tuesday (Oct. 6) that the budget legislation approved by the Ohio House earlier this month and now before the Senate is encouraging for Bowling Green because it would provide some relief to the University's financial woes, but, he said, "It is still premature to speculate on what will happen to that bill."

He added that Bowling Green is continuing to curtail expenses, especially in the area of new hiring, and he noted that savings this fiscal year from the hiring freeze have totaled \$125,000 to-date.

A state bill for capital improvements, which includes money for several Bowling Green projects, is expected to be approved at about the same time as a budget bill, Dr. Ferrari said. The interim budget adopted by the state legislature in June will expire the end of this month.

Dr. Ferrari also detailed for the Senate members the processes which preceded the Board of Trustees' decision to convert to an early semester calendar. He said the Board had periodically discussed such a move in private and with former President Moore beginning in the summer of 1980 after the trustees received the report of the ad hoc committee on calendar change and subsequent recommendations from the Faculty Senate and Academic Council.

"The University's financial crisis and Dr. Moore's ill health forced the conversion issue to a back burner during winter and spring quarters (last year)," Dr. Ferrari said, adding that it resurfaced at the June meeting of the Board's Finance Committee and appeared in the form of a resolution at the July Board meeting.

Both Dr. Ferrari and Acting Provost Eriksen told the Senate that work toward the conversion is progressing well.

Dr. Eriksen also gave a preliminary enrollment report and said that headcounts this fall are down by about 320 from a year ago. That puts

the University on target for conforming to its mandated enrollment ceiling. The projected headcount enrollment is about 17,690, Dr. Eriksen said.

Members of the Senate approved three resolutions during the meeting.

One resolution will enable the Senate's Academic Policies Committee to make editorial changes directly related to the semester conversion in the Undergraduate Catalog without full Senate approval.

The Senate also passed without dissent a resolution calling for the Presidential Search and Screening Committee to disseminate "information which would not discourage the continued candidacy of qualified applicants," citing in particular the procedures and selection criteria.

That resolution was prompted by an announcement from the committee in September that all processes will remain confidential and no announcements of any kind will be made by the committee until a president is named next spring.

Frazier Reams Jr., president of the Board of Trustees, is chairing the search committee.

Senate also approved a resolution concerning student representation on University governance bodies and committees. The resolution was in response to a statement of student rights in the proposed student body constitution which details students' rights to be members with full voting privileges on decision-making and policy-making bodies in academic units, colleges and University committees which directly affect the welfare of the undergraduate student body.

The resolution states, "Faculty Senate notes that a categorical assertion of student rights to representation on all policy-making committees and groups is in implicit conflict with existing provisions of the Academic Charter... and with principles of due process in matters relating to tenure and faculty welfare. Therefore, Faculty Senate recommends against including automatic rights to membership on committees in any list of student rights at Bowling Green State University."

Committee named to study staff, budget allocations

Delmer Hilyard, a professor of speech communication, will chair a select committee of faculty which has been appointed by Interim President Ferrari to study staff and operating budget allocations throughout the academic area of the University.

The Select Faculty Committee on Academic Staffing and Budget Planning is to act in an advisory capacity, reviewing detailed enrollment, staffing and budgetary information and recommending criteria to ensure interdepartmental equity within the context of teaching and scholarly productivity; the support the discipline renders other disciplines in the institution; the projected student demand for the discipline, and instructional standards within the appropriate Ohio Board of Regents' funding models.

Dr. Ferrari said the members of the committee will be asked to recommend long-range procedures for reallocation of staff and funds. Those recommendations should ensure selected support for programs, departments and schools of demonstrated quality, he said.

Members, in addition to Dr. Hilyard, are Frank Baldanza, University

Professor of English; Orlando Behling, professor of management; David Glasmire, professor of music performance studies; Peter Hutchinson, professor of economics; Donald Kausch, professor of psychology; Bette Logsdon, professor of health, physical education and recreation; Martha Tack, associate professor of educational administration and supervision, and Stephen Vessey, professor of biological sciences.

Two members of the committee, Drs. Behling and Tack, are new to the University this year. Both have highly respected credentials from their former institutions, Dr. Ferrari said, and should bring a new and different perspective to the work of this group.

Dr. Behling joined the Bowling Green faculty as a full professor, coming from Ohio State University, and Dr. Tack was formerly affiliated with the University of Alabama.

The committee, which Dr. Ferrari said will be looking at individual areas while keeping the welfare of the total University in mind, is to issue a status report early in winter quarter.

Reports on the work of the group will be shared with the entire University community.

Friends and former colleagues of Gertrude Eppler (seated), emeritus professor of health, physical education and recreation, were among those who attended the dedication of the Eppler Physical Education Complex on Friday, Oct. 2. About 200 people were present for the dedication and reception which followed.

Eppler dedication was 'greatest day in her life'

Dedication ceremonies for the Gertrude Eppler Physical Education Complex were held Friday, Oct. 2, in the new all-purpose area of the building, constructed at the site of the former Natatorium. Eppler, who retired from the University in 1969 after chairing the women's division of the health and physical education department for 26 years, was on hand for the dedication.

"This is the greatest moment of my life," she told the nearly 200 people who gathered for the dedication. I want to thank all the people who worked with me, particularly the wonderful faculty in our department, which is not only the largest in the state, but also the best."

Eppler, who now resides in Sun City, Ariz., took the opportunity while in Bowling Green to reminisce about her years on campus.

"It's hard for me to believe this (activity room) is not a swimming pool," she said, and then she recalled the synchronized swim shows she had directed in the old Natatorium.

Eppler joined the Bowling Green faculty in 1941 when the student population was about one-tenth its present size. Frank J. Prout was the

University president who hired her.

Two years later Eppler was named chair of the women's division of the HPE department, and she started doing some hiring of her own. Under her direction, the original staff of three faculty grew to more than 20.

Many of those faculty are still teaching at the University or enjoying their retirement in the Bowling Green area. They are a closely-knit group, and their loyalty to Eppler has not wavered. The idea for naming the complex in her honor originated with those faculty.

She also recalled the early campus. "When I first came here, the Women's Building was the northeast corner of the campus.

"We taught everything," she continued, adding that she personally introduced courses in fencing and bait casting. The bait casting class was taught in Urschel Pond from a boat borrowed from the family of one of the students.

"I loved my job. I liked everything I taught, and I often came back to campus at night to teach," she said. "I didn't even think about my paycheck."

Preview, Parents days Oct. 31: Morning displays; evening fun

Prospective students will have the opportunity to sample all phases of University life when the Office of Admissions hosts its annual Preview Day from 9:30 a.m. to noon on Saturday, Oct. 31.

The event has been planned to coincide with the Alumni Association's Parents Day program, which will feature internationally acclaimed pianist and comedian Victor Borge. The Alumni Association is contributing financially to the Preview Day program this year.

Preview Day annually attracts some 1,500 visitors to the campus to examine displays and meet with representatives from academic departments and student organizations. Members of the faculty and student leaders will be in the Grand Ballroom during the morning to answer questions about Bowling Green and its programs.

Campus tours also will be conducted beginning at 10 a.m., and in the afternoon this year's participants are being offered complimentary tickets to the football game between the Falcons and Kent State's Golden Flashes. The tickets can be obtained from the admissions office through Friday, Oct. 23.

At 8 p.m. on Oct. 31, Victor Borge will perform a Parents Day Show in Anderson Arena.

A limited number of tickets are still

available in the following categories: \$7.50 reserved bench and bleacher seats and \$4 obstructed view seats.

Tickets for the Parents Day program can be purchased at the Alumni Center.

Geneticists to host Drosophila conference

Geneticists in the department of biological sciences will host the 1981 Midwest Drosophila Research Conference Friday and Saturday, Oct. 16-17, in the Alumni Suite of the University Union.

Lectures and the presentation of papers by researchers from throughout the Midwest are scheduled during the two-day conference, which will begin at 1 p.m. on Friday.

Among the Saturday speakers are Mark Gromko, biological sciences, and Mary Ellen Elbin, a graduate student in the department, who will give a presentation on "Sperm Wars: Studies on the Mechanism of Sperm Predominance" at 1 p.m.

A tour of the drosophila research facilities on campus is also scheduled.

Further information, including a complete program of events, can be obtained from Jong S. Yoon, biological sciences. The conference is open to anyone interested.

Faculty & Staff

Grants

Robert Anderhalt, geology, \$10,000 from the Ohio Sea Grant Program of the Ohio State University Research Foundation to study the composition of a Lake Erie sand body and to evaluate its potential reserves and suitability for use in the glass industry.

Grace H. Chickadonz, nursing, \$8,626 from the Dept. of Health and Human Services, a grant based on enrollment to strengthen existing programs and undertake innovative programs of nursing instruction.

George Clemans, chemistry, \$13,000 from the American Chemical Society-Petroleum Research Fund to study the structure and reactivity of the 2-nonbornyl cation.

Carmen F. Fioravanti, biological sciences, \$38,556 from the Public Health Service, Dept. of Health and Human Services, as the second year of a Research Career Development grant, which may be funded for an additional three years.

Dr. Fioravanti is conducting research on the metabolism of helminthic parasites.

Donald Kausch, psychology, \$12,800 from the Ohio Dept. of Mental Health to fund stipends for trainees who serve in mental health institutions or agencies.

Ann-Marie Lancaster and Gerald A. Jones, computer science, \$3,518.75 from Owens-Corning Fiberglas, Inc. for instruction of Owens-Corning employees in structured design and structured programming.

Gerald L. Saddlemire, college student personnel, \$12,350 from Urbana College. Dr. Saddlemire and University personnel will assist Urbana College with its development of student support services.

Winifred O. Stone, graduate college, \$134,400 from the U.S. Dept. of Education to implement objectives designed to enhance minority enrollment in the under-represented areas of biological sciences, communication disorders, business administration, psychology and mathematics.

Duane Tucker, WBGU-TV, \$203,852.26 from the Northwest Ohio Educational Television to continue instructional television broadcasts in 1981-82.

John van Duyn, special education \$9,152 from the MacArthur Foundation to conduct a three-week research seminar on the developmental and educational aspects of learning disorders and to develop an on-going interdisciplinary research program based on the results of the seminar.

He also received \$750 from the Children's Resource Center to support one graduate internship at the Wood County Children's Services Association during summer, 1981.

Presentations

William B. Jackson, environmental research and services, spoke on "Vertebrate Pests" at the International Integrated Pest Management Short Course June 24 at Purdue University.

Sally Kilmer, home economics, presented a paper, "Stimulating Social, Cognitive and Language Development of Infants and Toddlers," at the annual meeting of the Midwest Association for the Education of Young Children in Rochester, Minn.

She also chaired a research roundtable at the annual meeting of the Ohio Association for the Education of Young Children in Columbus.

Bevans Mabry, economics, and **Mary C. Mabry**, art, were two of only 12 academicians invited to a working conference on the economic impact of the arts sponsored by the Bell System and Cornell University in Ithaca, N.Y.

Dr. Bevans Mabry contributed to the workshop, "The Future of Corporate Involvement in the Cultural Industry." Mary Mabry contributed to a workshop, "Arts Management in Turbulent Times."

The Mabrys were among 120 representatives from state and national art councils, museum administrators, art foundations, government officials and corporate executives to attend.

Michael T. Marsden, popular culture, spoke on "Growing up with 'Gunsmoke': An American Experience," at the First International Conference on Television Drama June 26 at Michigan State University.

He also chaired a session on the development and cultural significance of "Gunsmoke."

Lee Meserve, biological sciences, spoke on "Thyroid Status and Stress Response" at a meeting of the natural sciences division of the College of St. Francis, Joliet, Ill.

Boleslav S. Povsic, romance languages, will preside at a session of the Fifth International Congress of Latin Studies in Trier, West Germany.

He will also give a lecture on Cicero's letters at Saarlandes University, West Germany, Oct. 19 and at the University of Louvain, Belgium, on Oct. 21.

Brownell Salomon, English, presented a paper, "Linking Shakespearean Text and Theatrical Texture in the Classroom," Aug. 5 at the Congress of the International Shakespeare Association in Stratford-upon-Avon.

John Paul Scott, emeritus, psychology, presented an invited address at four international conferences this summer.

He spoke at the International Society for Political Psychology in Mannheim, West Germany; the International Society for Research on Aggression in Boston, and the International Society for Research on Aggression in Strasbourg, France.

He also attended an Ethnology Conference in Oxford, England, Sept. 1-7 and presented an invited paper at the Miami Conference on Aggression Sept. 24-25 at Oxford, Ohio.

Larry J. Weiss, director of alumni activities, gave four presentations at a national conference on student alumni programs and foundations sponsored by the Council for the Advancement and Support of Education Sept. 8-10 in Lincoln, Neb.

Weiss' presentation topics were: How to Involve Students in Undergraduate Alumni Programs; How to Start a Student Alumni Program or Foundation; Service Programs and Fund-raising Activities, and The Role of Students in Decision-making and Financial Responsibility for Undergraduate Alumni Organizations.

Richard Zera, computer services, presented a paper, "Effective Project Control: A User and EDP Partnership," at the National College and University Machine Records Conference in Miami, Fla. He also was a featured speaker at the Midwest regional conference of Data Processing Management Association.

Recognitions

Anna Belle Bognar, music education, will chair the Ohio Music Teacher Association's Northwest Ohio District Fall Conference to be held Nov. 13 in Moore Musical Arts Center.

Jane L. Forsyth, geology, presented the keynote lecture at the Aquatic Education Workshop for Lucas County teachers Sept. 11-12 at Ohio State University's Stone Laboratory at Put-in-Bay.

Also at the workshop, Dr. Forsyth led a group on a geology/ecology field trip around South Bass Island.

Dr. Forsyth also presented the keynote address at a teacher workshop Sept. 25-27 at Camp Kern (YMCA) near Oregonia. She will direct a three-day geology workshop Oct. 23-25 at Mohican State Park and will speak at Heidelberg College's Sandusky Valley Conference on Heritage and Horizons Nov. 5.

Margit Heskett, emeritus, health, physical education and recreation, will teach modern dance technique and improvisation Oct. 3-10 at a workshop at Ascona, Lago Maggiore, Switzerland. She will also be in charge of two evenings of folk and square dancing at Ascona.

Edward Marks, music performance studies, this summer taught clarinet and coached small ensembles at the National Music Camp, Interlochen, Mich.

He also made a guest appearance as principal clarinet with the World Youth Symphony and performed a recital in Kresge Auditorium. The performances were recorded for later broadcast on National Public Radio.

Virginia Marks, music performance studies, this summer taught piano at the National Music Camp, Interlochen, Mich. She also performed several faculty recitals in Kresge Auditorium. These performances were recorded for later broadcast on National Public Radio.

Robert L. Perry, ethnic studies, was a

discussant on research papers concerning "Analytical Models of American Race and Ethnic Relations" at the 30th annual meeting of the Society for the Study of Social Problems Aug. 21-24 in Toronto.

Frances Povsic, library, was a consultant-evaluator of ethnic studies education materials produced from 1976-80 for the Social Science Education Consortium Aug. 17-21 and Aug. 31-Sept. 3 in Boulder, Colo.

Jerome Rose, artist in residence in the College of Musical Arts, was the artistic director of London's International Festival on the Romantics July 20-24.

At the festival he performed a duo recital with tenor Ernst Haeflinger and performed with The English Chamber Orchestra.

Paul Running, art, was commissioned by the Luther College board of regents to paint a portrait of Luther College President E.D. Farwell.

Karl Schurr, biological sciences and **Scott Belanger**, a graduate biology student, are recognized in the Aug. 1 edition of the Entomological Society Newsletter for their research documenting asbestos as an environmental pollutant for small crustacea and young fish.

Dr. Schurr will also present a seminar on his research on asbestos and aquatic pollution Oct. 24 at St. Charles Hospital in Oregon.

Joanne Smith, creative arts, is the new district chair of the Ohio Music Teachers Association.

She will present a paper on "Cooperative Implementation of Piano Practicum," co-authored by **Anna Belle Bognar**, music education, at the National Conference of Preparatory Schools of Music, Oct. 23-24 at The Eastman School of Music.

Publications

Jan Dommer, library, "Better Education Achieved Through Media," a curriculum guide for kindergarten through 12 published by Kraus Microfilm as part of a series entitled "Selected Curriculum Guides 1981." The guide was developed as part of a pilot project for library research skills.

Hoemanns' work with deaf persons has new international dimension

Harry Hoemann, psychology, who has gained for the University a national reputation in sign language teaching, has nearly completed a project which will benefit the deaf community of another country.

With his wife, Shirley, and two former students from the School of Art (Susan Beroske and Sharon Ames), he has developed a text of Brazilian sign language which should pave the way for improved services and education for the deaf people of Brazil.

To be published in December in Portuguese, the primary language of Brazil, the text will include a lexicon of Portuguese sign language done by the art students and explanatory chapters authored by both deaf and hearing people which will serve as an introduction to sign language and how it functions in the deaf community. A video tape which illustrates how deaf people adapt sign language for their daily use also accompanies the text.

It is the video tape which primarily differentiates the Hoemanns' text from the only previous manual on Brazilian sign language. The tape method of instruction was pioneered by Dr. Hoemann in a text of American sign language entitled "I Want To Talk," published last year.

Dr. Hoemann believes video tape recordings which illustrate actual sign use will set a standard for future texts on the sign language of any country because the tape shows practical use of the language.

With the tape, he said, learning sign language becomes more than just memorizing a set of pictures and meanings. It is understanding expressions, sentence structure and actual word choice.

He added that sign language, just as spoken language, varies with geographical boundaries.

The Brazilian sign language project, which began last May when Dr. Hoemann traveled to a school for the deaf in Porto Alegre to video tape conversations with several deaf people, is being funded by the Mill Neck Foundation of Long Island, which traditionally has been supportive of the Brazilian deaf school.

Dr. Hoemann has coordinated the project, and Mrs. Hoemann has been the project director, spending much of the past summer in Brazil while translating the video tapes, illustrating the text and supervising the work of the two students who drew the sign lexicon. The Hoemanns are co-editors of the resulting text.

The contributions of several hearing and deaf Brazilians and the expertise of Rev. Eugene Oates, who authored the only previous text of Brazilian sign language, also were vital to the project, Dr. Hoemann said.

The involvement of deaf people in the undertaking is especially significant, he added. "We don't want hearing people doing everything for the deaf. It is important for deaf people to have input into a project like this."

Dr. and Mrs. Hoemann have done two previous sign language texts which paved the way for the Brazilian project. Those texts on American sign language are used throughout the country, and Bowling Green's sign language program, which Dr. Hoemann directs, has become a model for other universities.

Video tapes also play a major role in sign language instruction on campus, and the courses are popular with students from all disciplines. This quarter 65 students are enrolled in Dr. Hoemann's course, which will be repeated during winter quarter.

In addition, the University offers workshops, credit and non-credit courses in American sign language for students with varying levels of proficiency.

At the heart of all the Hoemanns' efforts directed toward sign language education is a concern for the deaf community.

"We see our work as an opportunity to give deaf people a better future by giving hearing people a better way of learning to communicate with them," Dr. Hoemann said.

He is a member of the Sign Instructors' Guidance Network of the National Association of the Deaf and for the past 11 years has done extensive research comparing the communication skills of deaf children with similar skills in hearing children.

Dr. Hoemann worked with deaf persons in education and church work before becoming a psychologist.

News in Review

Guest artists to lecture, perform

Andrew White, one of the most versatile artists on the jazz scene today, and Rufus Reid, who has established himself as one of the finest bassists in the jazz world, will be featured artists at Jazz Symposium '81, to be sponsored by the University's Visiting/Minority Faculty Program and held on campus Oct. 27-Nov. 6.

The jazz symposium, designed to give music students an opportunity to hear and talk with leading jazz musicians, will include lectures, master classes, small group sessions and concerts. It will complement the College of Musical Arts' new jazz minor, approved by Academic Council last year.

Both guest artists will perform with the University's Jazz Lab Band at 11:30 a.m. Tuesday, Nov. 3. White and Reid also will perform in concert with Fred Hamilton, composition and history, and Randy Gelispie at 8 p.m. Thursday, Nov. 5, at Kobacker Hall.

White, a saxophonist, oboist, electric bassist, author and composer, will be on campus throughout the two-week symposium. Reid, the author of two bass method books and director of the jazz program at William Patterson College in New Jersey, will be on campus Nov. 2-6.

Employment Opportunities

CLASSIFIED EMPLOYMENT OPPORTUNITIES

NEW VACANCIES

Posting	Expiration Date: Monday, Oct. 19
10-19-1	Cashier 1 Pay Range 3 University Food Operations Nine-month part-time
10-19-2	Police Officer 1 Pay Range 27 Campus Safety & Security
10-19-3	Police Officer 2 Pay Range 28 Campus Safety & Security
10-19-4	Typist 1 Pay Range 3 Home Economics Nine-month part-time (Paid from external funds)

CONTINUED VACANCIES

Posting	Expiration Date: Monday, Oct. 12
10-12-1	Clerk 1 Pay Range 2 Student Health Service Nine-month part-time
10-12-2	Housekeeping Manager 2 Pay Range 27 Technical Support Services (Auxiliary)
10-12-3	Security Officer 2 Pay Range 25 Campus Safety & Security (Auxiliary)
10-12-4	Typist 1 Pay Range 3 Instructional Media Center Temporary part-time
10-12-5	Typist 2 Pay Range 4 Special Education Temporary part-time Grant funded to 6-82 (Paid from external funds)

5-6-A	Director of EM Facility Biological Sciences (2-2332) Feb. 1, 1982
10-12-B	President Send vita to Frazier Reams Jr., Chairman Presidential Search and Screening Committee Box 828 Bowling Green, Ohio 43402 Oct. 30, 1981

Hartung directs Firelands office

The admissions, financial aid and registration functions at Firelands College have been merged and are now under the direction of John P. Hartung, former director of registration.

Hartung, director of admissions and registration, is assisted in the admissions area by Linda Faber Smith.

Campus talk focus of luncheon series

A three-day "lunch 'n learn" seminar on communicating on campus will be offered Oct. 13, 15 and 20.

Raymond Tucker, speech communication, will lead the series, to be held from 12:05-12:55 p.m. in the Commuter Center of Moseley Hall.

Sponsored by the Office of Continuing Education, Regional and Summer Programs, the three programs have been entitled "Understanding Undercurrents - Communicating on Campus" and have been designed to help University personnel, especially secretaries, understand how people communicate.

Topics to be covered include:
Oct. 13-"The Rumor Mill Keeps Grinding Away!" including facts on how to keep rumors from starting and what to do if they are already spreading;

Oct. 15-"What Are They Really Saying?," including instruction on how to cut through a barrage of words to get to the hidden meaning of what people are saying;

Oct. 20-"Negotiate!," offering alternatives to rebelling on the job. The fee for University employees, including full-time faculty and staff and permanent part-time staff, is \$18 for the series.

Further information is available from the Office of Continuing Education, Regional and Summer Programs, 300 McFall Center (2-0181). The office is also sponsoring a one-session seminar on "Keys to Creative Conflict Management" to be held from 9 a.m. to 4 p.m. Oct. 23 in the Community Suite of the University Union.

James Wilcox, speech communication, will lead the session. Fee for University employees to attend is \$52.

Discounts among employee benefits

Employee discounts and/or special privileges are available at various recreational establishments through the personnel office.

Discounts are currently available to employees and their family members at the following locations:

Disneyland/Disney World
Greenfield Village and Henry Ford Museum
Opryland
Prestige Dining Club
Sea World (open year-round in Florida and California)
Westgate Dinner Theater.

Discounts for other activities, including Cedar Point, King's Island and Geauga Lake, are available during the summer season.

The discounts are available through the Toledo Industrial Recreational Employee Services (TIRES) council, to which the University subscribes.

More information about the discounts is available from Marcia Sweeney in the personnel office, 372-0421.

Insurance changes due this month

October is the annual "open period" for full-time University employees to enroll or make changes

in the Blue Cross-Blue Shield plan.

All full-time employees who are not enrolled as subscribers may apply during this month. Those full-time employees presently enrolled under a single contract who wish family coverage also may make that change during October.

All changes and new applications become effective Dec. 1, 1981.

Applications or changes can be made by contacting Russell Meister, Insurance Office, Room 10, Shatzel Hall, 372-2112 or 372-2113.

Run for fun—and money!

A "Falcon Fun Run" to benefit the athletic program at Bowling Green has been scheduled on Sunday, Oct. 25.

The "fun run" is a jog-a-thon designed to raise funds for the athletic department, but at the same time to give campus and community groups and organizations an opportunity to raise money for themselves.

Members of participating organizations will solicit sponsors to pledge money for each lap of the one-quarter mile Whittaker Track which they complete in an hour's time. Fifty percent of the money generated will be returned directly to participating groups. The remaining 50 percent will be credited to the athletic department.

Three one-hour runs are scheduled in the event, which will begin at 11:30 a.m. Interim President Ferrari, members of the University cabinet and members of the Board of Trustees are scheduled to run in one event.

Another event will feature the University's athletic teams, Greek organizations, residence halls, marching band and other campus groups. The third hour will feature community organizations. Further information about the event is available from Barb Brown, 372-2401.

Rec Center plans own 'homecoming'

The Student Recreation Center will host a "Homecoming Weekend" of its own as the University celebrates with its alumni Oct. 23-25.

During those days, all alumni will be admitted to the center for 50 cents each day, all day. Tours also will be given to anyone interested.

Faculty and staff who are alumni but are not members of the center are encouraged to attend.

The Rec Center also is still enrolling participants in four upcoming clinics.

Sign-ups, on a space-available basis, can be made in the Rec Center office for a squash clinic, Oct. 13, 11:45 a.m. to 1:15 p.m.; men's weight training clinic, Oct. 19, 4-6 p.m.; racquetball clinic, Oct. 21, 6-8 p.m., and handball clinic, Oct. 22, 4-5:30 p.m.

Graduate's research earns recognition

Anne Osborn, a graduate of the University's reading program, won third place in the 1980-81 annual thesis competition of the College Reading Association.

Osborn graduated in August, 1980, with a specialist in education degree.

Joseph S. Nemeth, educational curriculum and instruction, directed her specialist degree research, titled "Reading Methods and Materials for the Young Braille Student."

This award winners have been invited to present their research at the CRA conference Oct. 29 in Louisville, Ky.
