SUMMARY

Audio tapes are used to improve the quality of the travel experience. They are also used in an instructional capacity. The focus, as with so many activities in relation to programming, depends upon individual effort and his/her creative ways to use the leisure resources available. Creativity and self-directed programming shift the debate about public/private issues to a personal level. The individual's ability to use the resources available is the critical element that determines the outcome of the experience. Much of the effort has been placed upon providing the opportunity and not upon developing the leisure skills of the individual.
