# Rural Police Crime 2005-2017

Chloe A. Wentzlof Philip M. Stinson John Liederbach

Bowling Green State University

Academy of Criminal Justice Sciences
March 17, 2023

Support for this project was provided by the Wallace Action Fund of Tides Foundation. This research was also supported in part by the Center for Family and Demographic Research, Bowling Green State University, which has core funding from the Eunice Kennedy Shriver National Institute of Child Health and Human Development (P2CHD050959).

# Background

- American policing confronts an immediate crisis of legitimacy.
- Lack of official data about law enforcement misconduct exacerbates this issue.
- Literature about police misconduct is heavily reliant on studies limited to larger cities or jurisdictions – mainly focused on *urban* policing.
- Most police agencies operate within non-urban jurisdictions.
- The goal of our study is to utilize unique nationalscale data to describe crimes committed by *rural* police officers.

## Urban vs. Rural Policing

- Officer behavior varies across different types of communities.
- There exists core differences between the tasks of urban and rural policing.
- Police-community relations vary across urban and rural jurisdictions.
- Smaller police agencies often found within rural jurisdictions are more concerned with crime prevention and community-oriented service activities than are urban police agencies.

## Data

## Henry A. Wallace Police Crime Database

The Police Crime Database includes summary information on 15,200 criminal arrest cases from the years 2005-2017 involving 12,465 individual nonfederal sworn law enforcement officers, each of whom were charged with one or more crimes. The arrested officers were employed by 4,499 state, local, and special law enforcement agencies located in 1,781 counties and independent cities in all 50 states and the District of Columbia.

## Purpose

The purpose of the Henry A. Wallace Police Crime Database is to **improve policing** and **inform the public** about crimes committed by nonfederal sworn law enforcement officers across the United States.

#### **Table 1. Defining Rurality** (*N*=15,200 cases of police crime)

| Table 1. Defining Rurality (N=15,200 cases of police crime)                                 |        | (0/)   |
|---|--------|--------|
|   | n      | (%)    |
| Urban/Rural Continuum County Code   |        |        |
| County in Metro Area of 1,000,000+ pop.   | 8,097  | (53.3) |
| County in Metro Area of 250,000-1,000,000 pop.  | 3,102  | (20.4) |
| County in Metro Area of fewer than 250,000 pop.   | 1,603  | (10.5) |
| Non-Metro County with Urban pop. of 20,000+, Adjacent to Metro Area                         | 736    | (4.8)  |
| Non-Metro County with Urban pop. of 20,000+, Not Adjacent to Metro Area                     | 289    | (1.9)  |
| Non-Metro County with Urban pop. of 2,500-19,999, Adjacent to Metro Area                    | 746    | (4.9)  |
| Non-Metro County with Urban pop. of 2,500-19,999, Not Adjacent to Metro Area                | 372    | (2.4)  |
| Non-Metro County Completely Rural or less than 2,500 urban pop., Adjacent to Metro Area     | 125    | (0.8)  |
| Non-Metro County Completely Rural or less than 2,500 urban pop., Not Adjacent to Metro Area | 130    | (0.9)  |
| Level of Rurality   |        |        |
| Metropolitan County   | 12,802 | (84.2) |
| Non-Metro County  | 2,398  | (15.8) |

# Conclusions

- The criminal arrest cases of rural officers are significantly different than those of urban officers.
- Multivariate analysis revealed the outcomes of criminal arrests of law enforcement officers may be more complex than we initially expected.
- It is likely that our data do not show the full story of rural police crime. Our data only capture criminal arrest cases. Any crime/misconduct handled informally are not included in our data.
- Unique methodology of examining police crime is needed due to the lack of official data. These methods produce significant findings further proving the need and importance of data and research about this topic.
- Our study shows the importance of examining community-contexts of police crime/misconduct.

# Thank you!
