Two-time Fulbright winner to study in Korea

Kawashima plans to study rural governing history

Winning a Fulbright Scholar Award can be just as sweet the second time around. Dr. Fujiya Kawashima, history, should know. He will be returning to South Korea in August to conduct research just as he did when he won his first Fulbright in 1980.

Once again, Kawashima will be delving into his area of specialization, the social-cultural-local history of the Choson Dynasty, Korea. His project, "Aristocratic Localism in the Confucian Monarchy: The Local Yangban Association in Andong during the 17th and 18th Centuries," will allow him to study the educated ruling class in power at that time.

He said the goals for the study are to uncover Korea's rich local history and aristocratic local leadership in the so-called centralized Confucian monarchy and bureaucracy of the late Choson dynasty. He will analyze local documents available in the Andong area, mainly two important 17th century rosters of the local yangban association, an elite group of socially and culturally prominent people. He will also conduct personal interviews with descendants of the prominent local yangban in Andong, which, he added, will help him better understand the governing structure that existed in those centuries.

In addition, Kawashima will be analyzing local rosters to determine how the yangban worked in Confucian monarchy. The local rosters are somewhat like a modern U.S. Rotarian dub, he said. Only certain families are listed and it is these families who informally ruled the area, maintaining self-rule under a magistratic form of government.

Korea places great importance on birthright in local government, but the Chinese influence of a centralized and bureaucratic central government created an environment that was a balance between China and Japan, its neighbors to the west and east, respectively.

Korean scholars must know the Chinese system of bureaucracy and the native system of aristocracy, Kawashima said.

The 17th and 18th century Choson dynasty in Korea was both Confucian and aristocratic. Although neo-Confucianism was the universal ideology adopted as the state orthodoxy, a nativist belief that the superior people were necessarily born of superior blood and kinship ties remained unchanged.

Aristocratic localism refers to a strong regional movement for group identity and solidarity among the elite families in the countryside who were bound together by their common beliefs, customs and kinship ties, Kawashima said. While yangban could not be disassociated from the Confucian bureaucracy, its status was determined less by educational merit, such as passing civil service examination, than by birth, marriage and other factors.

Kawashima will be studying rosters dated 1615 and 1645 he discovered in 1988 while doing research in Korea. He also will gather information about clan affiliation, marital ties and ancestral backgrounds from personal interviews with more than 300 descendant.

Russell named interim dean

Dr. Ronald L. Russell, associate dean of the College of Education and Allied Professions, has been named interim dean of the college beginning Aug. 21.

Russell will replace Dr. Roger V. Bennett, who resigned and plans to return to full-time teaching.

"Dr. Russell knows the college well and has a long record of outstanding service to it," said Dr. Eloise E. Clark, vice president for academic affairs. "We know we can count on his leadership as he guides the college during our search for a permanent dean."

Russell became a member of the University faculty in 1978, when he was appointed chair of the home economics department (now applied human ecology department). He served in that position until 1992, when he was named associate dean for academic programs in the College of Education and Allied Professions.

In August, 1984, he returned to full-time teaching. He served as coordinator of graduate studies in home economics from January 1985 until 1988, when he was appointed acting director of the School of Health, Physical Education and Allied Professions, also known as PEAP.

Continued on back
Nine instructional grants awarded to faculty

Nine faculty members have been awarded instructional improvement grants for projects designed to lead to demonstrable improvement in pedagogical skills and that would have a positive effect on student learning.

Receiving the grants are: Anna Belle Bogner, music education, $800 for "Application of Music Technology in Group Piano Courses — A Software Library of 3.5" disks for Use with New Yamaha Music Sequencer Equipment"; Greg DeNardo and Marilyn Sbrode, both of music education, $350 for "Applications of Music Technology in the Methods Used for Teaching Music to Special Learners"; Joseph Frazado, geology, $1,000 for "Enhancing GEOL 403/GEOL 404 Laboratory Experiences"; and Sudershan Jelley, technology systems, $700 for "Construction Management and Technology Instructional Improvement Fund".

Also, Charles Onasch, geology, $450 for "Development of Honors Laboratory Course in Environmental Geology"; Charlotte Scherer, EDCl/dinical Materials for Teaching in Special Education, $450 for "Materials in the Green Manor nursing home." Harrington was named emeritus of education. died July 7 in Bowling Green, including dean of the College of Education. He served in many capacities during his career at Baldwin Wallace College and was a member of the college's faculty for more than 20 years.

William E. Harrington

Dr. William E. Harrington, 75, a professor emeritus of education, died July 7 in Bowling Green Manor nursing home. Harrington retired in 1982 after 23 years as a member of the University faculty. He served in many roles during his career at Bowling Green, including dean of the College of Education from 1962 - 1965. Harrington was named program area coordinator for the specialized education unit in the college's Agenda for Action. He later returned to the district office as acting associate dean for one year.

He was a graduate of Baldwin Wallace College and received his master's degree from Ohio State University and his doctorate from Western Reserve University. Harrington was active in numerous professional organizations, serving as secretary of the Northwestern Ohio Educational Research Council and as a member of Rotary International, the Ohio Education Association and the American Education Research Association. Memorials may be made to Baldwin Wallace College, the First United Methodist Church or United Parkinson Foundation, 360 W. Superior St., Chicago, IL 60610.

CSC offers scholarship

Application forms for the annual Classified Staff Council Scholarship are now available to classified employees and their dependents. The scholarships are awarded at the annual classified staff convocation held in the fall.

Public auction slated

The University will have a public auction July 25 beginning at 10:00 a.m. at the old paint shop storage building, located off Troupe Street. Information may be obtained by contacting the inventory management at 372-2121.

Summer travelers are cautioned on cholera

Summer is the season University staff members travel, with many going abroad for research or leisure purposes. The Department of Health and Human Services has issued some special notices this year to help keep travelers healthy.

People going to Peru, Ecuador and Colombia, including Lima, Cuzco and the Galapagos Islands should be aware that cholera is affecting those countries. A small number of cholera cases have been reported in Chile and in Brazil.

Several cases of cholera in U.S. travelers to South America have been reported and cholera cases in the U.S. have also been reported. Cholera is brought back from South America in travelers' baggage. Since cholera is associated with poor sanitation, the risk of cholera to travelers following normal tourist itineraries has been exceedingly low in other cholera epidemic areas.

The usual precautions to avoid travelers' diarrhea should be observed closely. It is particularly important to avoid raw or undercooked seafood, including oysters, to avoid food and beverages from street vendors, to avoid uncooked vegetables and fruits (unless peeled by the traveler), to avoid ice and beverages and to drink only boiled water or bottled carbonated beverages. Travelers should avoid fruit that could not bring back

Travelers develop severe watery diarrhea during or in the week following travel in epidemic areas should seek medical attention immediately.

The vaccine for cholera confers only brief and incomplete protection and is not recommended. There are no cholera vaccines for entry or exit into South American countries or the U.S.

"Learn more about cholera, call the international travelers' hotline and listen to the outbreak menu at 404-332-4559, which is available for 24 hours a day, seven days a week. For persons traveling to Saudi Arabia, the requirements for the forthcoming Haj season are as follows: All travelers to Saudi Arabia, any part of which is infected by yellow fever, are required to produce a valid yellow fever vaccination certificate, in accordance with the country's normal requirements.

SAS modules available

SAS modules are available for IBM PC/AT and PS2 models 50 and above, with 640K RAM and at least a 20MB hard disk. Computer Services has several copies of a few SAS modules already licensed. Departments and faculty wishing to acquire PCSAS can join with the existing license and the campus SAS modules fairly inexpensively (approximately $35 for each module per year). For more information, please contact Dale Schroeder at 372-2002.

Kawashima from the front

Families. Information about 17th and 18th century Yangban can be gathered from interviews with the descendants because it is common to know more than 30 maternal and paternal generations of their ancestors.

Through this project, Kawashima wants to challenge the prevailing notion that has been implicit in modern history in modern North Korea that the Yangban was secondary to and a deviation from the "true" yangban who served in the government as bureaucrats or as members of the civil administration as magistrates in the countryside. He will return from Korea in December. He plans to spend the spring of next year working on his work with his previous research and will make presentations on his findings.

Russell from the front

Education and Recreation. He remained in that position for two years, until his appointment as associate dean for personnel and budgets in August, 1990.

Russell is a graduate of Florida Southern College. He earned master's degrees from Emory University and University of Mississippi, where he also completed his doctoral degree in human development and family studies. Shaking Green in 1978, he served on the faculty of Texas Tech University.

CIFS, one of the first phases of Project-90, went on line as scheduled July 1 when the first purchase order came off the printer at the purchasing office. On hand for the first order were from left: Royce Edby, an employee of American Management Systems helping to implement CIFS; Ron Lancaster (standing), director of Project-90; and George Knauss, purchasing. More than 200 University employees have undergone CIFS training.

Identification needed

All outgoing UPS and freight cartons must now contain the new Area/Org Numbers. The object class identification will need to be identified by the sending department. If no object classification is designated, Inventory Management will use $560 - Freight. Information concerning rates for UPS/Freight may be obtained by calling Inventory Management at 372-2121.

Hiring workshop offered

Personnel services and the psychology department have developed an integrated workshop designed to teach both new and experienced managers how to prepare for and conduct an effective and legal selection/recruitment interview. The workshop will be conducted in four short sessions scheduled during the fall semester. Participants will be videotaped conducting short practice interviews for individual review and critique, providing a unique opportunity to improve successful completion of the workshop.

The series is scheduled to begin in mid-September with pre-workshop assignments distributed during late August. Individuals interested in enhancing their proficiency in selection techniques and able to participate in the four-part workshop are strongly encouraged to register. Enrollment is limited. Persons interested in learning more about the content of the workshop may call Sam Ramirez of personnel services or Dr. Bill Balzer, psychology. To register obtain information about scheduling contact Ruth Milliron or Laura Gazarek at 372-8421.

CIF offers scholarship

Application forms for the annual Classified Staff Council Scholarship are now available to classified employees and their dependents. The scholarships are awarded at the annual classified staff convocation held in the fall.

For more information about scholarship criteria or to obtain an application, contact Nancy White.
