Library needs faculty input on preparation of scholarly journals

Kaplan impressed with council's attitude, efforts

Claireford Science in its original form for salary recommendations reported in the Jan. 27 issue of Classified Staff. The new form was implemented, he said, because the attitude of the council has remained optimistic and energetic.

The council continues to gather matching funds for the council's work with student personnel from BGSU, Ohio Association of College Administrators, Counselors and Educators, the University College and Hispanic Outreach.

On each student received an award for a competition the BGSU team defeated Lawrence State (combined score of 8,660). One of the universities participated in an international debate.

Kaplan continued: "The council has accomplished some of its goals. If it's going to be successful, it must do more. It's been rewarding to work with the council and to see the progress they've made."
Wood Lane Music Project benefits University students, too

Several times each week, four University students travel to Wood Lane School to conduct classes for special learners. According to program director Dr. Gregory Dukes, music, the Wood Lane Music Project gives students a chance to share their musical passions, to develop other music classes outside the University environment.

The project provides one graduate and three undergraduate music education students to plan and conduct music classes. It also allows these students to pursue their special interests in music, as well as to develop their music teaching skills.

According to Dukes, Wood Lane students participating in the program continue to work with special education students. Undergraduates receive valuable experience and go through the experience of being chosen for the program. Dukes has observed that the Wood Lane students are able to work with the Wood Lane students for an extended period of time.

"We try to keep the program as consistent as possible," Dukes said. "We have seen that by involving students from the same program, the students benefit from the program in numerous ways. Wood Lane students range from 10 to 21 years old, are working to make music a part of their lives, and to use music to express themselves."

The donation, given by the University Union, provides funding for a graduate student as project supervisor, several undergraduate volunteers and teaching materials.

The program encourages music education majors to become involved in other ways as well. Several times each semester, University students accompany Wood Lane students on music classes or concerts to connect students on campus.

Effects of climate to be explored during Mayfield Distinguished Lecture Series

Drastic long-term climate changes that will have a profound impact on the evolution of organisms become a focal point of the upcoming Department of Geology Distinguished Lecture Series. The Department of Geology will sponsor talks focusing on the effects of climate change during the 2006-2007 Distinguished Lecture Series this fall, according to Professor at Johns Hopkins University will present a series of talks focusing on the effects of climate change on organisms.

Dr. Robert A. Byers, a professor of biology at Johns Hopkins University, will present a series of talks focusing on the effects of climate change on organisms. Byers will discuss how changes in temperature and precipitation are affecting the distribution and abundance of species, and how these changes may impact the evolution of organisms. He will also discuss the potential impacts of climate change on human populations and ecosystems.

Despite the uncertainty surrounding the extent and rate of climate change, these lectures will provide a valuable opportunity for students and the public to learn more about this important and timely topic. The lectures are open to the public and will be held in the lecture hall of the Department of Geology.

Wood Lane Music Project benefits University students, too

Several times each week, four University students travel to Wood Lane School to conduct classes for special learners of all ages. The students, under the supervision of a music instructor, provide music classes outside the University environment.

The program provides a great many benefits for students interested in music education. Undergraduate students interested in music education have the opportunity to work with special learners in a real-world setting, gaining practical experience in working with diverse populations.

The program also provides a valuable opportunity for University students to gain experience in working with special learners. Undergraduate students have the opportunity to work with special learners in a real-world setting, gaining practical experience in working with diverse populations.

Kaplan - Film for the Future

In a move to educate the public about the importance of climate change, the Kaplan Center for Public Policy and the Wood Lane Music Project have partnered to create the Film for the Future. The film, which will be shown to the public at the Wood Lane Music Project, will educate viewers about the current state of the climate and the need for action to address climate change.

The film will highlight the latest scientific research on climate change and the potential impacts of climate change on human populations and ecosystems. It will also feature interviews with experts in the field of climate science, as well as personal stories from individuals who have been affected by climate change.

The film for the Future is a valuable opportunity for University students to gain experience in working with diverse populations. Undergraduate students have the opportunity to work with special learners in a real-world setting, gaining practical experience in working with diverse populations.

Health care task force continues exploration of insurance options

Although no decisions have been made concerning the Department of Health Care Task Force, the University continues to explore potential solutions to the problem of rising health care costs. The task force is currently considering a range of options, including the establishment of a university-wide health care plan, the implementation of cost-sharing mechanisms, and the exploration of alternative health care delivery models.

The task force is currently considering a range of options, including the establishment of a university-wide health care plan, the implementation of cost-sharing mechanisms, and the exploration of alternative health care delivery models. The task force is expected to release its final recommendations in the spring of 2007.

International Film Series. "Stones." 7:30 p.m. Thursday, Feb. 6. Part II of the series. "Stones." 7:30 p.m. Thursday, Feb. 6. Screening at the University Union.

Faculty Senate. 2:30 p.m. Assembly Hall. "Music, Race, and Ethnicity in Graduate Education." 2:30 p.m. "Music, Race, and Ethnicity in Graduate Education." 2:30 p.m. Assembly Hall.

Median committee releases findings, recommendations
The findings and recommendations of a median committee that looked into student charges surrounding a police report of an Aug. 31 Phi Beta Sigma fraternity dance have been released. The median committee recommends that the University of Kentucky Student Senate convene on Nov. 10 to review the incident and to consider whether to recommend any formal actions against the fraternity. The median committee also recommends that the University conduct a formal, transparent investigation of all incidents involving Phi Beta Sigma fraternity at the University.

Ice Arena to celebrate 25 years of serving the community, University
The ice arena staff will be on site to make the many people at the University who have said that the University is the "Heart of the community." The "Iceanette" will also be available on Nov. 10 to provide an opportunity for the public to enjoy the ice arena for free. The "Iceanette" will be open from 10 a.m. to 5 p.m. and will close at 8 p.m.

3:30-4:30 p.m.

OTOBURY
James O. Zimmerman
James O. Zimmerman, a Bowling Green, Ohio, native, will offer the keynote address at the University of Kentucky's 2012 Health Care Reform Conference, "Health Care Reform: The Kentucky Way." Zimmerman is a professor of policy studies and sociology at Bowling Green State University, and is a former member of the Kentucky House of Representatives. His presentation will focus on the challenges facing Kentucky's health care system and the need for reform.

In clean food, water too much to ask?

"Clean Food, Clean Water: The Fight for a Better Human Right" will be held from 3:30-4:30 p.m. on Feb. 11 at the UK Agriculture Building. The event will include a panel of experts discussing the importance of clean food and water, as well as how to ensure that access to these basic necessities is equitable and affordable. The event is free and open to the public.

Owensboro Community College, Kentucky, and surrounding areas will host a series of lectures and panel discussions on the importance of clean food and water. The lectures will take place on various dates at different locations, including the UK Agriculture Building and Owensboro Community College. The event is free and open to the public.

Bowling Green, Ohio, Feb. 11 - The University of Kentucky's 2012 Health Care Reform Conference, "Health Care Reform: The Kentucky Way," will be held from 3:30-4:30 p.m. The conference will focus on the challenges facing Kentucky's health care system and the need for reform. The event is free and open to the public.
