**An International Journal of Personal Services,  
Programming, and Administration**

## Visions in Leisure and Business

There is a growing demand for information about leisure and business processes that apply to personal services, programming, and administration. Leisure is those services and activities engaged in during time that is free from duty or obligation. It is a vehicle that helps the individual change his life, thereby, making a more positive contribution to his organization and society.

VISIONS IN LEISURE AND BUSINESS is an interdisciplinary umbrella that seeks to improve delivery systems. Business processes in the leisure service industry are different because they are based upon freedom of decision as well as supply and demand. The purpose of the journal is isolation and integration of those business processes that relate to the leisure service industry. Leisure and its associated services have a unique impact upon the business institution, especially in its ability to act as a catalyst to improve the individual and his/her environment. This journal will help to improve and broaden current theory and applied methods through stimulation of ideas among traditional and nontraditional aspects of the leisure and business institution.

VISIONS IN LEISURE AND BUSINESS will not compete with existing journals, but act as a complement to fill the void between the application of leisure sciences and business processes. The first step is the exchange of ideas to give direction to the development of a comprehensive framework for the better application of information. There have been eight conceptual categories identified where professionals need information:

The success of the journal depends directly upon interaction among professionals and their contributions.

There is an unprecedented demand for leisure and only through better management and the application of business processes will the current demand be met by an expanding industry. The application of sound leisure and business principles is one way to control future development of the leisure institution so that it will have a major positive impact on society.

# Introduction

## INTRODUCTION

BY

DR. THOMAS C. BARNHART

In this issue of Visions in Leisure and Business, the family receives justice in importance and value in the recreational services equation. Dollars and cents are not the most important determinants here, but relationships, values and pleasure are placed on a greater plane of recognition. We have professionals that are concerned that the vanishing open spaces and playgrounds in our communities are being turned into single adult athletic complexes and that profit must not be the overriding concern when planning to serve the public with leisure based activities. It is with pride that I edit this edition of Visions, and I trust that it will provide a new thrust for the positive ideals that recreation professionals stand for: recreational balance, quality and opportunity.
