OBITUARIES

Antony van Beysterveldt

Dr. Antony van Beysterveldt, 69, professor emeritus of romance lan-
guages, died on Feb. 9 in Bowling Green Home.

A native of the Netherlands, Beysterveldt joined the University in 1969. He was an expert on the evolution of the affectionate cultur

Dr. Jankowski (2-2076).

March 15, 1983. Details will be announced in the local paper in the fol-

Lucy Easley

Attorney Lucy Easley, a former Univer-
sity employee, died Jan. 29 at the Hermitage Nursing Home in Findlay.

Walter Brooks Sr.

Walter Brooks Sr., 80, a former Univer-
sity employee, died Jan. 27 at the Hermitage Nursing Home in Findlay.

The graph above indicates the total external dollars (in millions) awarded to BGSU in fiscal year 1983-84. Of this amount, $19,900,000 was awarded in federal grants. The graph indicates that BGSU in 1983-84 received far more external funds from the National Science Foundation than from any other source.

A professor in the College of Engineering is one of the four faculty members who have been invited to attend the conference at NCA.}

NCA Team to be on campus next week, open meeting is planned

By Amanda Smith

Dr. John Williams, dean of the College of Engineering, said that the university is interested in having the faculty, staff, and students be invited to attend the conference to bring awareness to the issues.

"The conference is being held at NCA to bring awareness to the issues of faculty, staff, and students," Williams said. "We are very excited to have the faculty, staff, and students participate in the conference."
**NCA Team to be on campus next week, open meeting is planned**

By Jim Brown, Staff Writer

Staff, faculty, and students will be talking about the budget and the future of the Association of College and Schools of Business. The meeting will be held Monday at 7:00 p.m. in the University Center.

The meeting will be open for all students, faculty, and staff to attend. The purpose of the meeting is to discuss the current budget and how it affects the future of the college.

**Professor is recognized as most outstanding statistician of Bangladesh**

Dr. A. K. M. Ehsanul Salam, the European Union's first president, has been named the most outstanding statistician of Bangladesh. The award was presented to him by the Bangladesh Statistical Society.

The organization selected Salam due to his research, his teaching, and his contributions to the field of statistics.

**University System Committee**

The University System Committee, which is responsible for developing a system of unified governance for the University of Michigan, has held its first meeting of the year.

The committee is composed of representatives from each of the University's schools and colleges, as well as administrators from the central administration.

The committee's primary function is to develop a system of governance that is responsive to the needs of the University community.

**Red Center is exempt from new sales tax**

When Ohio implemented a new sales tax last year, the University of Michigan was able to receive a partial exemption. The new tax was passed to provide a financial incentive to businesses that are located in the state on the border of Michigan.

The Red Center, a research center located in Ann Arbor, is exempt from the new sales tax.

**Health and Safety**

The University of Michigan is reviewing its policies regarding health and safety.

The review is being conducted to ensure that the University's policies are up to date with the latest regulations and guidelines.

**AIDS CLASS**

The University of Michigan offers a course on AIDS for graduate students.

The course covers topics such as the biology of HIV, the spread of the virus, and the ethical and social implications of the disease.

**GRANTS AND CONTRACTS**

The University of Michigan is seeking proposals for grants and contracts.

The proposals will be reviewed by the University's Office of Research and Innovation.

**Family Leave**

The University of Michigan is evaluating its policies regarding family leave.

The University is considering changes to its current policies to better support employees who need time off to care for family members.

**Recruiting Zenith**

The Zenith Recruiting team is conducting a new study on job satisfaction.

The study will help to identify areas where the University can improve its recruitment and retention efforts.

**UPS rates increase**

The University of Michigan has received a notification from UPS regarding a rate increase.

The rate increase is effective January 1, 2023, and will impact the University's shipping costs.

**Weekend travel**

The University of Michigan offers weekend travel options.

The travel options are designed to help employees who need to travel during the weekend.

**Travel to Beijing**

The University of Michigan is interested in exploring travel opportunities to Beijing, China.

The University is considering a potential trip to Beijing in the fall of 2023.

**Non-tenure faculty**

The University of Michigan is considering changes to its policies regarding non-tenure faculty.

The changes could include increased support for non-tenure faculty and improved opportunities for professional development.

**Recruitment at the University of Michigan**

The University of Michigan is actively recruiting new staff and students.

The University is seeking candidates who are passionate about the University's mission and who are committed to excellence in their work.

**Trends in Online Learning**

The University of Michigan is monitoring trends in online learning.

The University is analyzing data to identify areas where online learning is effective and areas where improvements are needed.
School of Technology believes total quality management benefits all

Rush is Mr. Fixit when it comes to campus vacuums

In a basement repair shop at the University's south campus, a third-year Ohio State University chemical engineering student has a simple solution for one of the most vexing problems on a campus of millions: the vacuum cleaner. For years, campus maintenance workers have been trying to replace aging vacuum cleaners but have been hampered by not being able to get replacement parts. Now, a third-year student in the chemical engineering program has found a way to make reasonable repairs to existing models, and even take apart a new one to find the parts that work.

A student named Mr. Fixit, or Mark Green, as his name is pronounced, said he had been working on a project for his sophomore year in mechanical engineering and had been brainstorming ways to solve the vacuum cleaner problem. He had heard about a similar project at another university, but he decided to try to find an answer on his own. He said he had been using a vacuum cleaner for about a year and a half and had been trying to get it to work for quite some time. He had also heard about other problems with other vacuums and decided to try to find a solution.

Green said that he had found a way to replace the motor, which is the most expensive part of the vacuum cleaner, by using a new motor that he had bought at a local store. He said that he had been able to replace it with the new motor and that it had worked perfectly.

Green also said that he had been working on a way to make the vacuum cleaner quieter and more efficient, but he had not been able to find a way to make it work yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.

Green said that he had been working on the project for about six months and had not been able to find a solution yet. He said that he had been working on it for about six months and had not been able to find a solution yet.
