CALL FOR PAPERS!

International Journal of Aquatic Research and Education

The National Swimming Pool Foundation and Human Kinetics are pleased to announce the February 2007 launch of the *International Journal of Aquatic Research and Education* with this call for papers. *IJARE* is dedicated to advancing the knowledge and practices of aquatic professionals worldwide. As a peer-reviewed quarterly journal, *IJARE* has the unique mission of disseminating basic and applied research in broad areas of noncompetitive aquatics along with practitioner-oriented information to foster best practices among aquatic professionals. Articles will report original aquatic research, as well as information related to aquatic education and instructional practices, use of aquatic facilities and technology, aquatic health and safety practices, and factors surrounding and influencing aquatic participation. Subscriptions will include both print and electronic formats.

IJARE invites submission of original research studies as well as professional articles in the form of experiential reports, clinical and observational studies, reviews of literature, and editorial statements of opinion as judged by the editorial board to be of interest and value to the aquatic profession as well as to meet the *IJARE* mission.

About the Editor

The editor is Stephen J. Langendorfer, Ph.D., associate professor of Kinesiology, Bowling Green State University (Ohio). He specializes in aquatics, motor development, and measurement. Dr. Langendorfer's line of research, a unique blend of aquatics and motor development, examines how aquatic movements change over time from a developmental perspective. He has published numerous articles and co-authored *Aquatic Readiness: Developing Water Competence in Young Children*. He is widely recognized for his varied consulting contributions to aquatic agencies worldwide. He received the Golden Whale Award from the Commodore Longfellow Society and the Paragon Aquatic Award for his contributions to aquatics.

EDITORIAL MISSION AND SPECIFICATIONS

The *International Journal of Aquatic Research and Education* (*IJARE*) publishes original research reports on people's use of aquatic facilities and participation in noncompetitive aquatic programs. The journal also publishes informative articles about the teaching and learning of aquatic knowledge and skills. The journal does not publish articles about nonhuman aspects of aquatics or on issues concerned with improving performance in competitive aquatics sports such as swimming, diving, water polo, and sailing.

IJARE invites submission of research reports that study the following:

- Health and safety of people's participation in all types of aquatic activities
- Aquatic technology, including facilities, equipment, and supplies
- Participation in aquatic activities, including the factors influencing participation and the consequences of participation for various populations
- Instruction of aquatic knowledge and skills

In the Research section articles are reviewed by the editorial board and are accepted or rejected based on their appropriateness to *IJARE*'s editorial mission and their adherence to appropriate scientific methods.

In the Education section *IJARE* publishes nonscientific articles about the teaching of aquatic knowledge and skills. These articles may take the form of experiential reports, clinical and observational studies, reviews of literatures, and editorial statements of opinion. These articles are reviewed by the editorial board for their perceived contribution to the understanding and teaching of aquatic knowledge and skills.

IJARE will be published according to the following specifications:

- Frequency: 4 issues per year
- Pages per issue: 96–120, plus cover
- Page size: 6" × 9"
- Print production: two-color cover, one-color text, and perfect bound
- The journal will be simultaneously published in electronic and print form. Subscribers to the electronic form will be able to access all back issues and search all issues for specific content.

AUTHOR GUIDELINES

The *International Journal of Aquatic Research and Education* (*IJARE*) invites the submission of original manuscripts on research *and* educational articles focusing on people's participation in noncompetitive aquatic programs, the use of aquatic facilities, and the teaching and learning of aquatic knowledge and skills. The journal typically does not publish articles about nonhuman aspects of aquatics or on issues concerned primarily with improving performance in competitive aquatics sports such as swimming, diving, water polo, and sailing.

In the Research section we are interested in research reports that study health and safety of people's participation in all types of aquatic activities; aquatic technology including facilities, equipment, and supplies; participation in aquatic activities, including the factors influencing participation and the consequences of participation for various populations; and instruction of aquatic knowledge and skills

In the Education section *IJARE* publishes practitioner-oriented articles about the teaching of aquatic knowledge and skills. These articles may take the form of experiential reports, clinical and observational studies, reviews of the literature, and editorial statements of opinion or position statements. All manuscripts are reviewed by two or more reviewers and members of the editorial board for their perceived contribution to the field.

Authors preparing manuscripts to be submitted for review and publication in *IJARE* must adhere to the guidelines published in the *Publication Manual of the American Psychological Association* (5th ed., 2001). Copies are available in most academic libraries (inquire at the reference desk) and can be purchased in most bookstores. Authors also are encouraged to refer to past issues of the journal for concrete examples of the style to be used for citations and references, as well as for various types of articles.

Submitted manuscripts should be original works not previously published or simultaneously submitted to another journal. Authors submit electronically via Manuscript Central at http://mc.manuscriptcentral.com/hk_ijare. Authors can also reach the Manuscript Central Web site through a link on the Human Kinetics Journals Web page: http://www.humankinetics.com/products/journals, clicking on the *IJARE* link. First-time authors will create an account by following the directions on the Manuscript Central page. No print manuscripts or e-mail attachments can be accepted.

Writing Style: Manuscripts should be written in the first or third person using the active voice. Writing should be concise and direct while avoiding jargon and abbreviations except those that are commonly recognized in aquatics (such as using WSI to refer to water safety instructors). Manuscripts should be written in standard English. Lead authors who are nonnative English speakers should seek the assistance of a colleague or collaborator experienced in writing for English-language scientific journals. Manuscripts must be carefully proofread before submission. Failure to follow these basic writing-style guidelines may result in your manuscript being returned by the Editor, unreviewed.

Including Multimedia: Because IJARE will be published in both print and electronic (online) versions, potential authors are encouraged to consider including digital media (digital video and photos) as part of their reports. In the near future, the electronic version of the journal will be able to present digital images and video.

Figures and Tables: In graphs, use black and white only, no shading or color. Keep labels proportionate with the size of the figure on the journal page, which is 4.5 in. wide. Digital images should be 300 dpi at full size for photos and 600 dpi for line art. Format tables in the table function of your word-processing program rather than aligning columns in text with tabs and spaces or using text boxes.

For questions about the appropriateness of potential manuscripts or the submission process, contact *IJARE*'s Editor, Steve Langendorfer at ijare@bgsu.edu.
