Board considers hiring a consulting firm to aid it in presidential search

Even though BGSU's presidential search is officially over, the Board of Trustees approved $30,000 to hire a presidential search firm to assist it in the search for a new president.

The board of trustees will continue to pay for the presidential search firm even though it is still searching for a new president. The search process will be paid for by the board through its budget.

The board of trustees will also continue to pay for the presidential search firm even though it is still searching for a new president. The search process will be paid for by the board through its budget.

The board of trustees will continue to pay for the presidential search firm even though it is still searching for a new president. The search process will be paid for by the board through its budget.

Leontis presented with the 1994 Outstanding Young Scientist Award

Dr. Nicholas Leontis, chemistry, has been presented with the 1994 Outstanding Young Scientist Award by the American Chemical Society for his accomplishments as a young chemist. Leontis was honored for his work in the field of organic chemistry and for his contributions to the understanding of chemical reactions at the molecular level. Leontis is known for his research on the development of new synthetic methods for the construction of complex organic molecules.

The award, which is given annually by the American Chemical Society, recognizes outstanding contributions by young chemists who have made significant contributions to the field of chemistry. Leontis is the first chemist from BGSU to receive this honor.

Leontis is currently an assistant professor of chemistry at BGSU, where he teaches courses in organic chemistry and conducts research in the area of organic synthesis. He received his Ph.D. in chemistry from the University of California, Berkeley, in 1992, and was a postdoctoral fellow at Harvard University before joining the BGSU faculty.

Leontis was recognized during the annual dinner at the American Chemical Society meeting in St. Louis, Missouri.

Before joining the University faculty in 1993, Leontis completed his graduate studies at Ohio State University. He has also conducted research at the National Institutes of Health and the University of Washington.

The Outstanding Young Scientist Award is given annually by the American Chemical Society to recognize outstanding contributions by young chemists who have made significant contributions to the field of chemistry. The award is sponsored by the American Chemical Society and is open to chemists who have received their Ph.D. within the past five years.

The award recognizes outstanding contributions by young chemists who have made significant contributions to the field of chemistry. The award is sponsored by the American Chemical Society and is open to chemists who have received their Ph.D. within the past five years.

Leontis presented with the 1994 Outstanding Young Scientist Award

Dr. Nicole Leontis, chemistry, has been selected as the 1994 Outstanding Young Scientist Award by the University chapter of the American Chemical Society. The Outstanding Young Scientist Award is given to an American Chemical Society member under the age of 35 for meritorious contributions to the scientific and technical development of the chemical profession. Dr. Leontis received her Ph.D. from the University of Wisconsin-Madison in 1993 and joined the University's faculty in 1994. She is currently working on new reactions to test the limits of how energy moves from one part of a molecule to another in living organisms. Her work could have significant implications for the development of new drugs and therapies.

Leontis was recognized during the organization's annual dinner held Feb. 10. He was given a plaque and then made a presentation about his research work.

Before joining the University faculty in 1993, Leontis was a post-doctoral research associate at the National Cancer Institute in Bethesda, Md. He also worked as a research associate in the Department of Biophysics at the University of Colorado in Boulder. In 1995, he became an assistant professor of chemical and biological sciences at the University of Wisconsin-Madison.

Leontis received his Ph.D. in chemistry from the University of Wisconsin-Madison in 1993 and his B.S. in chemistry from the University of Wisconsin-Madison in 1991. He is currently working on new reactions to test the limits of how energy moves from one part of a molecule to another in living organisms. His work could have significant implications for the development of new drugs and therapies.

**Classified Employment Opportunities**

**positions available**: Investigator, research assistant, research core technician, lab technician, statistical assistant, and other positions.

**APPLICATION DIRECTIONS**: Interested individuals must submit a letter of application, including a curriculum vitae, and at least three letters of reference to the chair of the search committee.

**SALARY**: Commensurate with qualifications and experience.

**APPLICATION DEADLINE**: November 15, 1993.

**FACULTY/STAFF POSITIONS**

**THE FACULTY/STAFF POSITIONS are as follows:**

**Selected positions available:**
- Administrative assistant: Responsible for scheduling, clerical duties, and other administrative tasks.
- Research assistant: Conducts research under the guidance of a faculty member.
- Laboratory technician: Assists in the operation of laboratory equipment.
- Data entry clerk: Enters data into a computer system.

**APPLICATION DIRECTIONS**: Interested individuals must submit a letter of application, including a curriculum vitae, and at least three letters of reference to the chair of the search committee.

**SALARY**: Commensurate with qualifications and experience.

**APPLICATION DEADLINE**: November 15, 1993.
