Monday, Feb. 14
Guest Lecture, "Of Women in Urban and Rural Areas," 4:30 p.m., Faculty Lounge, Union.
Faculty Senate, 1-702, McFadden Hall.
Racism in the United States, 4-6 p.m., Center for Community Engagement, Moore Hall.
Catastrophic Health Insurance, 4-6 p.m., Center for Community Engagement, Moore Hall.
Student Union Board, 5:30-7 p.m., Cusimore Room, Moore Hall.

Tuesday, Feb. 15
Open Faculty Senate Meeting, 3-5 p.m., Tall Hall, Union.
"Science and Technology in the Classroom: Teaching and Learning Strategies for Enhancing Student Engagement and Retention" by John P. Sullivan, 12:30 p.m., Library, Dening Hall.
Classroom Teaching Techniques, 4-6 p.m., Center for Community Engagement, Moore Hall.
Financial Aid Workshop, 4:00 p.m., Office of Student Financial Aid.

Wednesday, Feb. 16
"Who are the Christians in China?" by Dr. Robert Law, 12:30 p.m., Guest Lecture, Glass Hall.
Banking 101, 2-5 p.m., parking services, Carver Hall.
Women's Basketball, 5:00 p.m., Bowling Green Convencion Center.
Graduate Admissions Workshop, "Getting Started on the MBA," 5:00 p.m., Moore Hall.

Thursday, Feb. 17
"Getting Started on the MBA" is scheduled for 3-5 p.m., Center for Community Engagement, Moore Hall.
Women's Basketball, 5:00 p.m., Bowling Green Convencional Center.
The Troubles with Phil," 7:30 p.m., Moore Hall.

Friday, Feb. 18
Auditions, "The Sleeping Beauty," 4:30 p.m., Center for Mass Communications.
"Getting Started on the MBA" is scheduled for 3-5 p.m., Center for Community Engagement, Moore Hall.
Women's Basketball, 5:00 p.m., Bowling Green Convencional Center.
COMMENTARY

Editor, the Advisor:

The BGSU United Way campaign is in progress. We want to thank everyone who has contributed so far. Your generosity will be greatly appreciated by the people your gifts will help.

If you have not made a contribution, there is still a very real challenge remaining in this year's campaign. Please consider our appeal on behalf of people in need in our community and the surrounding area.

The United Way and agencies funded by the United Way of Northwestern Ohio. Its administrative costs are deducted from your gift.

I invite you to call me at 372-3475 if you have any questions on the campaign or on how to make a contribution.

Thank you for your consideration.

Dean Mahany, Chair, 1994 BGSU United Way Campaign

Leontis presented with the 1994 Outstanding Young Scientist Award

Dr. Leonard Leontis, chemistry, has been awarded the Outstanding Young Scientist Award by the American Chemical Society. The award is given annually to a scientist under the age of 35 who has made outstanding research contributions in a specific field of chemistry, according to a national competition.

Dr. Leontis was recognized during the award luncheon at the 1994 ACS National Meeting in Chicago. He is a graduate of the University of Illinois at Urbana-Champaign and was employed by the National Institute of Standards and Technology prior to joining the faculty at BGSU.

Leontis is currently working on new catalyst systems for the conversion of one type of nitrogen oxide into another. His work has the potential to lead to the development of new materials for use in the production of nitrogen oxides, which are important in the production of certain types of chemicals.

Dr. Christopher Morris, philosophy, was also selected as an Outstanding Young Scientist for 1994. Morris is currently working on a project involving the development of a new model of rationality. This model will be used to help students understand the nature of rationality and its role in decision-making.

Leontis and Morris will each receive a $2,000 check and a commemorative medal. They will also be invited to speak at the ACS National Meeting in Chicago.

Dr. Robert C. Woodruff, physics, was selected as the Outstanding Young Scientist for 1995. Woodruff is currently working on a project involving the development of a new method for detecting anomalies in large datasets. This method will be used to help researchers detect anomalies in large datasets more quickly and accurately.

Woodruff will receive a $2,000 check and a commemorative medal. He will also be invited to speak at the ACS National Meeting in Chicago.

Editor, the Monitor

The BGSU United Way campaign is in progress. We want to thank everyone who has responded positively. Your generosity will be greatly appreciated by the people your gifts will help.

If you have not made a contribution, there is still a week remaining in this year’s campaign. Please consider our appeal on behalf of people in need in our community and the surrounding areas. Funds raised will benefit members of the United Way agencies funded by the United Way of Northwest Ohio. No administrative costs are deducted from your gift.

I invite you to call me at 322-2745 if you have any questions on the campaign or on how to make a contribution.

Dean Mahy, Chair, 1994 BGSU United Way campaign

OPEN HOUSE

Announcements of research and other awards

She said that there will be "awards of excellence" in research, teaching and service. The awards will be presented by the provost, the dean of the faculty and the dean of the graduate school, respectively. The awards will be given to faculty members who have exhibited outstanding performance in their respective areas.

TRUSTEES

Thomas J. Losi, chairman of the trustees, said that the expenses were increased for the 1993-94 fiscal year because the budget was raised from $51 million to $57 million. The budget was increased by $6 million to $7 million, respectively. The increase in budget is due to the increasing cost of operations and the need for additional facilities.

The trustees also approved the appointment of new faculty members and the promotion of existing faculty members. The new faculty members are selected by the provost and the dean of the faculty. The promotion of existing faculty members is made by the provost and the dean of the faculty.

GRANTS

Trustees grant promotions and tenure to 31 faculty members Feb. 11

Promotions and tenure were approved for 31 faculty members at the Feb. 11 Board of Trustees meeting. The promotion of the faculty members is based on their performance and contributions to the college.

CSC

From the front

Charles E. Stock, Ph.D., Provost, and Dr. Robert D. Barr, vice president for academic affairs, announced the opening of the Center for Student Development in the Student Union Building.

President James E. Brown, Ph.D., announced that the Center for Student Development will be open to students 24 hours a day, seven days a week. The Center will provide a variety of services to students, including counseling, academic assistance, and financial aid.

PHOTOGRAPHY

Pat Kitchen (left), public safety, Jacques Dailey, president, John Dittert, public relations, and Dr. Steven L. Fink, director of the Office of Communications, were present at the announcement.

FACULTY/STAFF PUBLICATIONS

Lowell E. Whitehead, computer services, reported that the college's computer network is currently running at 90% capacity. The network is used by students, faculty, and staff for a variety of purposes, including access to online resources and the college's internal network.

Miller, assistant professor of communication, and Whitehead, reported that the college's computer network is currently running at 90% capacity. The network is used by students, faculty, and staff for a variety of purposes, including access to online resources and the college's internal network.

Leontis presented with the 1994 Outstanding Young Scientist Award

A. Leontis, professor of chemistry, was presented with the 1994 Outstanding Young Scientist Award at the 1994 BGSU Chemistry Department's annual fall meeting. The award is given to an outstanding young scientist who has made significant contributions to the field of chemistry.

Leontis was recognized during the awards ceremony and then made a presentation about his research.

Before joining the University faculty in 1986, Leontis was a postdoctoral fellow at the National Institute of Health in Bethesda, Md. He received his Ph.D. in chemistry from the University of Cincinnati in 1980 and his B.S. in chemistry from the University of Dayton in 1977.

Leontis' research focuses on the development of novel uses for the 1994 Outstanding Young Scientist Award.

Chaver's hopes to visit more institutions:

Director brings new ideas to Project Search program

When Lisa Chaves became the new director of Project Search in 1978, she knew she had a hard act to follow, she says. The program's popular first director, was leaving to get tough.

But Chaves has not chosen to play it safe. "I'm going to go for new and creative ways to work with Project Search," she says. "I want to work with Hispanic and Native Americans in the University's School of Education to help attract some people to the program, and about 150 are funded through scholarships or assistantships.

"Retention also is a big part of what I do," Chaves says. "We're trying to avoid the dropping out of the system."

So the theme is to develop new mentor programs, she says. At the University, there will be two programs to do the job.

Borrowing from other libraries is now as easy as stroke of a key

Students and faculty new to can borrow from other university and college libraries in Ohio is already on their computers. Need a book or magazine that is only available from another institution? No need to request the book, buy it, or ask the library to purchase it.

Wide online borrowing within the OhioLINK consortium of public and academic libraries is now a reality. OhioLINK officials repeated the sale of Regents on Feb. 13. The system has contracted with a commercial delivery package company called Fines Express Inc. to deliver books and materials.

The service invokes the scope and quality of networking, saving and effort and delay associated with traditional interlibrary loan, OhioLINK officials say. "Our goal is to provide a paper library tool that supports the essential content," says Jeffery OHan, OhioLINK's executive director.

The project was initially proposed in 1991. The LINK executive director Tom Sander said the service at one time was a "one of the more exciting aspects, and certainly the most complex. We're certain the development of the ability to know what you have and what you need, to be able to use that information, to add to that information, all very new and certainly a lot of effort.

"And certainly in the high school and the college and university systems, we have found that people are involved in a lot of different schools and the ability to find stuff and to use the other resources is a wonderful thing," Sander said.

"We're searching for a lot of these things through the other resources, and we can find the same book under the title of 'ABC' or 'XYZ,'

"We're doing our part by cataloging books, and we're doing it at each of the other libraries."

"We're finding that the system is working very well, and people are getting to use it," Sander said. "I think it's going to be a real advantage for students and researchers in Ohio.-
