University to give honorary degree to managing director of Shakespeare Festival

Joseph Steven Cohen, an alumnus of the University and new managing director of the Tennessee Shakespeare Festival, will receive an honorary doctor of arts degree in May.

University officials said that the new director has become a permanent part of the University's student life at the festival. As such, he will be recognized for his contributions to the University's "public life" as he is awarded the degree. The festival was held in May of this year and marked the beginning of the University's "paradigm shift" in student life at the Tennessee Shakespeare Festival.

Rentser recognized by WICI with a 1994 Woman of Achievement Award

Terry Rentser, journalist, is a recipient of a 1994 Woman of Achievement Award. The award was presented to Rentser on Feb. 17 in the Student Union.

Rentser, who joined the department of journalism at the University in 1986, is head of the public relations department in 1988. She was named associate professor of American journalism in 1990.

Active with students as an advisor to the student newspaper, she was also a student member of the Board of Directors. She also served as the president of the Student Senate and the Student Life Committee. She earned her bachelor's degree in journalism from the University of Akron and her master's degree in journalism from the University of Delaware.

Faculty named to posts in arts and sciences

Several faculty members in the College of Arts and Sciences have been given new assignments or have been appointed to new positions.

Dr. Charles J. Cronin, dean of the College of Arts and Sciences, has been assigned a new position in the administrative office of the college. Dr. Ray Laussie will be appointed as assistant dean in the College of Arts and Sciences, effective Aug. 17. His term will end July 31, 1994. Dr. Roger Anderson, initially appointed as assistant dean of the political science department, has been appointed to a new position in the political science department.

In addition, Cronin said Dr. Gawn, queen of the social sciences, has been appointed as assistant director of the School of Education. He will also act as the assistant dean for research, and Dr. Maier will be appointed as assistant director of the School of Education, effective July 1 through June 30, 1995.
Like microwave and MTV, Internet has become part of American society. And like those two, it has been created in the home and transported to America at a rapid pace. Its growth has been so much the same that the Internet itself has become a metaphor for the entire technological revolution of the past two decades.

Within the last five years, Internet has become a part of American pop culture. It has been featured in television commercials, magazines, and even books. It has become a common topic of conversation, and many people now use it on a regular basis.

Unfortunately, there is a lack of information about the Internet's impact on the workplace, and many people are unsure of how to use it effectively. In this article, we will explore the various ways in which the Internet can be used to improve productivity and efficiency.

The Internet can be used to improve communication and collaboration among employees within the workplace. It allows workers to easily share documents and ideas, as well as to access information quickly and efficiently. This can lead to increased productivity and innovation within the organization.

Another way in which the Internet can be used to improve the workplace is through the use of virtual teams. This allows employees to work together from different locations, regardless of physical proximity. This can be particularly useful for organizations that have employees in multiple locations or that require employees to travel frequently.

In conclusion, the Internet is a powerful tool that can be used to improve communication, collaboration, and productivity within the workplace. By exploring the various ways in which the Internet can be used, we can better understand its potential impact on the workplace and use it to our advantage.

PROBABILITY TESTS

We need to test only those populations which show promise. Students in this sample test were not representative. Students in their sample are not representative of the student population, which is poor.

Sawyer noted that the University has conducted a number of studies to determine the effectiveness of various teaching methods. The studies have been conducted in a variety of settings, including traditional classroom settings, online courses, and hybrid courses.

In conclusion, the Internet is a powerful tool that can be used to improve communication, collaboration, and productivity within the workplace. By exploring the various ways in which the Internet can be used, we can better understand its potential impact on the workplace and use it to our advantage.

The author of numerous journal articles and book publications, Middlen is also a member of the American Association for the Advancement of Science, the American Chemical Society, the American Institute of Physics and the Environmental Mutagen Society. He is also the past president of the Sigma Xi Research Society. Middlen received his bachelor's degree in chemistry from the University of Toledo in 1988.

ODK initiation planned

Omaha Delta Kappa leadership society will hold its annual spring initiation Friday, April 26. Faculty, student members and alumni are invited to attend the event that begins at 4 p.m. in Prout Chapel and concludes at 6 p.m in the annual Retired Faculty and Administrative Luncheon at noon. ODK initiation ceremonies will commence at 4 p.m. in Prout Chapel with President Middlen presenting the Master Key to the new class for induction. The key will symbolize the entrance of the new members to the organization and will be a firm reminder of the ODK's commitment to the University and its students.

It's that time of the year again; summer hours to start at the University May 9

University summer hours will begin May 9 and Friday, August 5. The hours, which apply to the University's main campus, will be in effect through Friday, August 20, 1:30 p.m. to 5 p.m. Monday through Thursday; 8 a.m. to 4:30 p.m. Friday. The summer hours will be in effect through Thursday, August 20, 1:30 p.m. to 5 p.m. Monday through Thursday; 8 a.m. to 4:30 p.m. Friday.

Friday, March 2

The Fielding is open Monday through Friday. There will be no additional hours that would be worked on those days. Therefore the work schedule for Thursday, June 28, will be 8 a.m. to 4:30 p.m. with no lunch.

The Fielding's campus, switchboard/receptionist coverage will be from 8 a.m. to 4:30 p.m. during the summer hours.

Mason makes sure the state legislators in Columbus don't forget BGSU

When the legislature is in session, Mason is called on to speak to legislators on the importance of higher education. For Mason, representing BGSU means educating legislators on the important role of education. Says Mason, "It's probably the most important thing we can do for higher education. We get the required attention that's due us."
