RUSSIAN ART THEATRE CREATION
COLORFUL AND SCINTILLATING

IVAN MARKOFF
PRODUCES "THE TOYS"

"Les Jou-Jous," probably the most outstanding chapel program, was the last chapel to be held in the old auditorium.

"Les Jou-Jous" (The Little Novelties) is a Russian Art Theatre production, patterned after the style of the European Variety Theatre which combines all of the theatre arts into a colorful and scintillating stage spectacle. The elaborate costumes and scenery add a definite note of originality and artistic beauty.

Ivan Markoff, the creator of "Les Jou-Jous" is an actor, dance master and director who made his first public appearance at five and has appeared in over two hundred plays, operettes, and ballets, touring with famous groups and having his own concert group. It required nearly two years to fully develop this production.

"Les Jou-Jous," with its intimate combination of the finest traditions of the famous "Ballet Russe" and the gay and intriguing "Chauve-Souris" made a totally unique and individual production.

The artists acting as actors, mime and dancers portrayed in exquisite detail, characterizations of comedy and tragedy in pantomimes, dramatic sketches, dances and ballets. The scenery with its design created especially to depict the character and mood of each act added to the interest and variety of the program.

Maglott Leads Wesleyan Group

A group of young people met last Sunday night at the Methodist church and had a very interesting discussion on "How Do We Show Our Patriotism." The meeting was lead by Don Manders. A motion very enlightening to those assembled.

The next meeting will be Sunday, Feb. 28. The meeting will be in charge of Mr. Hawer and the topic for discussion will be "Cleaning Our Own Doorstep."

FINANCE COMMITTEE OF HOUSE
VISITS UNIVERSITY CAMPUS

Many good performances were given when Major Bowes and his Amateur Night was presented for Quill Type members. After the usual business of the club was out of the way a clever program was given with Willard Bird as Major Bowes.

The first amateur was Layton Bryon who offered two piano solos, "To a Wild Rose" and "Italian Love Call." Betty Dilinger then read an educational paper entitled "Are You Worth Hiring?"

Paul Cramer, accompanied by Ralph Meyers on the guitar, played "Golden Slippers" on the harmonica. They got the goin' (an alarm clock) but were given a second trial to redeem themselves.

The last entry was Don Ditter in an imitation of Ben Bernie (youn people and girls) with cigar and all. This was a very clever presentation.

Included with the business of the club were arrangements and appointment of committees for our annual Quill Type dance to be held in April.

Testament League

Watch us and see us grow. Members of the Pocket Testament League are planning good things for the future. Any one who missed our discussion group last Thursday night really missed a good time. Ask those who were there. We en joy frank discussions on problems concerning students. One evening during the first semester we had approximately 30 present. Let's beat that Thursday day night, March 4. We meet every other Thursday night from 7 to 8 o'clock.

We're planning special music and good speakers. Watch for the posters and announcements on the bulletin board. Let's get our class and roommates to see if we can't have at least 60 there March 4. If you would like to come out and share one of our fine meetings with us, we couldn't keep you away from the rest of our meetings.

Let's everybody turn out and join in our plans for the spring.

LIBRARY STATE COLLEGE BOWLING GREEN, OHIO

RUSSIAN ART THEATRE CREATION
COLORFUL AND SCINTILLATING

INVITATION TO A DANCE FOR ALL

All of those bashful people (and those not so bashful) should come and learn to Folk dance. It is really a fun and incidentally it is good for the figure. You say you don't know how? That doesn't matter at all. In fact it is a good reason why you should learn.

Last weekend we did Hungarian and Cossack dances from Cossack dances. Next week we shall do something different, including German dances.

Come out and dance and then you will have an inspiration to study.

WESTMINSTERS TO HAVE BIG DAY

Sunday will mark the observance of "Christian Education Day" in the First Presbyterian Church. Dr. E. P. Westphal, as the Board of Christian Education, Philadelphia, will preach at the worship service on the topic, "The Greatest Peril in Our World Today and Its Cure."

"How the Bible was Transmitted from Age to Age" will be the topic of the lecture by Dr. A. B. Rhemas at the Westminister Club Hour. This will be number 3 in the course on the origin of the Bible which has been attended by students in such large numbers.

The lecture and discussion will be followed by another "Presbyterian Mothers' Night" reception so popular with the student group. Dr. Westphal will be a great and students will have an opportunity to meet him during the course of the reception.

Critic teachers in the Training School have been busy starting the student teachers in their work.

If you happen to get a job during 1927, just remember there are plenty of people figuring out ways to take it from you.

The people who blame yesterday for what happens today are on the wrong trail.
Our Policy...

Various people, on the staff and otherwise, have asked, "What is the editorial policy of the News?" They seem perturbed by the fact that controversial opinions are presented in this column, sometimes simultaneously. They believe that a newspaper should take a definite stand on every question and refuse to note, editorially, the opposing viewpoint.

We are perfectly willing to agree inasmuch as the ordinary newspaper is concerned—but a college newspaper performs a somewhat different duty. First, there is no other competitive or conflicting paper on or off the campus. Therefore it behoves us to present both sides of a controversy so that the problem will be understood. Secondly, the paper exists as much as the medium of student opinion as anything else; again, then, it must present both sides. Thirdly, we desire to thus obtain the average student's confidence and cooperation; we prove to him that we have "no ax to grind" except as is for the good of the paper, cooperation; we prove to him that we have "no ax to grind" except as is for the good of the paper, cooperation; we prove to him that we have "no ax to grind" except as is for the good of the paper, cooperation; we prove to him that we have "no ax to grind" except as is for the good of the paper.

For the benefit of those who wish to know the source of an editorial, usually if it is not signed it has been written by a member of the staff (though it may also be some other person who wishes to remain anonymous.) A signed editorial speaks for itself and is usually the product of someone not on the staff.

If the students feel that this or any other policy of the paper is wrong or unsatisfactory, the staff would be glad to know of it. Written criticisms will be given serious consideration.

Notice!

Will the person who received the wrong tan raincoat at the Valentine dance please report to Grace Bextor. The rain coat is still unclaimed. A dark green coat belt and a pair of black oversoles are also unclaimed. I am in the Social Kitchen at four on Fridays and my address is No. 2 Shatzel Hall.

Anything can go to bed at night, but it takes a man to get up in the morning.

SAD STORY!

Oh! This life is terrible! Why do I have to live? Why can't everyone be dead? I really must be one of the small number that are alive. Because it would be "life" and I must live life. I must be shoved about—picked on—not even allowed to sleep on Saturday morning. My grades are terrible. Half of the girls in the dorm come in and say loudly in the most surprised tone, "Are you still asleep?" I must smile and offer them a seat with the invitation to talk to me. Finally, in despair, I give up the attempt to sleep and crawl from my cocoon and clothes myself according to convention laws.

The dinner bell sounds. That roommate of mine forgets to leave a seat for me and of course the only remaining place would be between two fat, desperately, detestable people. I am bored by their talk. The food is terrible and I am unable to eat.

As if my roommate had not enough black marks against her, she forgets it is her turn to clean the room and goes unannounced to the show with the town "kiddies." While she laughs hilariously I sweep and labor to change our room from a pig pen to a respectable study room.

I know I'm silly for noticing this, but I can't help it if I do. You would too if you had a test in math staring you in the face and both chemistry and history to get. And that isn't all—I've a theme to write for English. If you can decipher a subject which I can write—you're a better one than I am. No— I can't think of anything but dying. I can't die so I'll have to live—to smile if I can, but all is a-bloom. Smiling like a grinning hyena I'll have to comment on the weather. I'll have to be an actor on this horrid stage of life.

Sour? Say roommate—if everyone treated you as they do you'd be sour, too.

STUDY OPINION

Business is better, the boom is booming, more young men have jobs. After it, however, it may be there will be less necessity for the CCC. If and when such a condition arrives how fine it would be for a vast group of young men, should our Uncle Samuel donate the use of the CCC physical plant here in Bowling Green, for a cooperative dormitory for men under the administration of Bowling Green State University.

THE 7 PERCENT

We have 6 percent of the world's land area and 7 percent of its people. But that 7 percent has 32 percent of the world's rail mileage, 58 percent of its telephones, 36 percent of its developed water power, 76 percent of the world's automobiles—enough so that every man, woman, and child under the flag, 150,000,000 Americans, could climb into these cars and all ride on rubber at the same instant of time, a nation on wheels, a miracle of achievement in which bureaucrats played no part. The rubber that goes into the annual production of tires would make a tire that would go around the world, 6,000 miles to spare—a rubber-tired planet, if you please! When Stalin or Hitler or Mussolini do half so much, it will be twice as much as they have done! This little 7 percent of the world's population has 44 percent of its radios; produces 60 percent of the world's petroleum, 48 percent of its copper, 43 percent of its pig iron, 47 percent of its steel, 58 percent of its coal, 68 percent of its cotton, 25 percent of its sugar, 33 percent of its coal. Of the commodities it does not produce, this little 7 percent of the world's population goes out into the world's market and buys 60 percent of its rubber, 20 percent of its coffee, 75 percent of its silk. This 7 percent of the world's population has 46 percent of the world's total wealth; and far more than half the wheels that turn this planet, from locomotive drivers to the wheels in millady's wrist watches on American soil. In the worst year of the worst depression of our history 32,000,000 out of 32,000,000 American boys and girls of school age stayed in public schools. And on the point of security for old age this little 7 percent has $108,000,000 of protection on the lives of 64,000,000 Americans, more security than all the rest of the world put together.—S. B. Petengill.

SOLDIERS

World's standing armies now total about 7,600,000 (exclusive of navies), against 5,000,000 before World War I. Including navies, this total is 8,200,000, an increase of 1,700,000 since 1913. European countries include 3,900,000 men under arms, against 3,600,000 in 1913-14. The new totals include only permanent armed forces, but not, for instance, U. S. National Guard, British territorial troops or the large semi-military organizations of Germany, Italy, and Russia—the latter two countries boasting a militia of 430,000 each.

ANNOUNCEMENTS

Thursday, Feb. 19—Y. C. A. and Y. W. C. A., 7 P. M.
Thursday, Feb. 19—No Peace Study Group Meeting
Thursday, Feb. 25—Basketball Game, Kent here
Friday, Feb. 26—Williams Hall
Monday, March 1—Emerson Literary, 7 P. M.
Monday, March 1—Staff Meeting, 8 P. M.

Miss Vivian Crum is planning a reception for all faculty members and their wives on Friday, Feb. 26, in one of the studios of the Practical Arts building.

Young people today are alike in many respects.

Don't race trains to crossings.

If it's a tie you lose—Bill Holman.

Many a person has lost a friend by attempting to be funny at his expense.

No use to holler when you get into deep water. Keep your mouth shut and swim for all you are worth.

Stars

Once God laughed—his silver laughter
Ripped down the velvet night, broke upon the moon's sharp crest

In myriad points of light.

—Elinor Lounsberry

Whispering Rain

It comes ... it goes, Louder, softer, Speeds and slows A steady throng— A fairy's drum! Quiet, cleansing rain Upon the window pane.

It moves my feet In restless beat, Sweet and low— Shift and go The call of rain On the window pane.

Hissing, soft and strangely sweet, The song of tires on the street. Still sweet and low, Shift and go That odd refrain— Rain ... rain ... rain On the window pane.

Ernest Badenoch

DELHI

M. Reed Shelley, twenty-two years of age, is a junior in the College of Business Administration, majoring in accounting. Reed was born and reared at Mendon, Ohio. During the summer months when he is not in school he tours the country with race horses and he is greatly interested in horses. I guess we could say Shelley has "horse sense."

Reed aspires to become an accountant upon his graduation in 1938. As for his social life among the women, he is one of the eligible Delhi's.

Shelley is house-chairman and keeps the boys from doing anything that would work a wrong upon the fraternity or the general well being of the group. Reed is a good worker, sensible, and a swell friend to have. The fraternity is fortunate to have him as a member.

P. S. Reed is an ex-type-setter during his high school days.

More about the Delhi House personnel next week—please remember to look for it.

FRESHIE SEEKS A-I ETIQUETTE

(Continued from page 1, col. 3)

Bob went to Ohio State the past year and invited us down for a dance. Jean was some girl! I surely was thankful for the "no-break" dances because during all others, I continually was having to say, "Certainly", in reply to a tap on my shoulder not the little question "may I break?"

Yes, fellows—I was green, but I've been learning—oh, Bob! Where's he now? He was graduated a couple of years ago and now has a keen job, pretty good pay with a chance for promotion.

According to Christopher Morley, high heels were invented by a woman who had been kissed on the forehead.

LAS AMIGAS

We are thirty-one.

The Las Amigas sorority held its formal dinner and initiation at the Woman's Club on Tuesday night, Feb. 16, 1937.

Fifteen girls became active members. They are D'Netta Mason, Virginia Anne Frye, Virginia Frances, Rhoda Win-

ter, Allene Matthews, Mildred Wise, Alice Burkhardt, Kathryn Biery, Betty Geis, Ann Yackel, Glenna Kurts, Benish Crandall,

Wanda Buter, Wahnta Ker-

shner, and Isabelle Parker.

The name Virginia seems to be very prominent among us. We have five Virginia's.

Have you noticed Evelyn Cole-

well's bandaged forehead? We won-

38,500 Killed Last Year

Will You Be Next?

38,500 persons were killed in motor accidents in 1936. This is the high record. 1935 had a total of 37,000 killed. W. H. Cam-

non, managing director of the National Safety Council com-
mments: "Neither I nor any other safety worker will attempt to explain the 1,500 increase of deaths."

Many things contribute to this national calamity, but the general consensus of opinion specifies two outstanding factors:

1. Speed
2. Drunken drivers

Reputations wear out quickly when not taken care of.

Three reasons to spend a Little money in the Sewing Machine Department of the store:

1. No Surplus
2. Quality
3. Satisfaction

If all the people of the world enjoyed the American standard of living, there would be little talk of surplus production, because there would not be a surplus.

Never believe the worst you hear about anybody, and just as important, discount the best you hear.

PURITY

"The place where students gather"

FENDERS STRAIGHTENED

**AMERICAN POPULACE**

Size of the American family has been reduced to an average of approximately four persons. This is chiefly due to:

- Rapid decline in the birth rate: in 1890; every 1000 married women between the ages of 15 and 49 had 957 children under 5; in 1930, the same number of women had 642 children.
- Rapidly increasing divorce rate: in 1887, there were 5.5 divorces for every 100 marriages; in 1900, 7.3; in 1920, 17. Out of every 9 marriages now existing, 2 are likely to end in divorce. Most common among childless couples, divorces tend to increase with the number of childless families. Yet, the marriage rate has remained practically stationary since 1880, as did the average age of marriage.

Employment of women increased from 2,560,000 in 1880 to almost 11,000,000 in 1920 (from 14.7 per cent 22 per cent); the number of married women gainfully employed rose from 500,000 in 1890 to 3,000,000 in 1930 (from 1 per cent to 12 per cent).

If you have half an hour to spare, don’t spend it with some one who hasn’t.

Some of the plainest quarters are made ornamental by those who live in them.

Advertising pays. Toot your horn, somebody will bite.

People with little to say seldom keep quiet about it.

It’s not what you stand for that counts—it’s what you fall for.

**SCIENCE**

Social and economic responsibilities are neglected by physicists and engineers, according to voices from their own ranks. American Institute of Physics (N.Y. meeting, Oct. 31): "We are spending millions to build 200-inch telescopes to scan the universe and determine whether it is getting measurably smaller or inceasably greater. All of which seems brilliantly useless when you consider the millions who craved afford decent homes because none of our great minds have ever been focused on the basic everyday problem of human shelter."

American Association of Engineers (Conference at Peoria, Ill., Nov. 18): Engineers are well grounded technically but have been lacking in measuring their services and progress in terms of long-range economic planning. Schools of engineers should introduce social and economic subjects into curricula.

Success comes in cans; failure in can'ts.

Correct this sentence: "I intend to be independent in my old age, in a few years I am going to begin saving my money."

**SNIPS**

Ed Wynne says "I'd rather marry 200 pounds of curves than 100 pounds of nerves."

It isn’t well power that a girl needs nowadays, but won’t power.

Nowadays a woman looks in to a mirror, to be sure her hat isn’t on straight.—Boston Herald.

College viewpoint—It isn’t the girl that counts, it’s what she stands for.

Sign in taxroom: "What Foods These Morsels Be?"

Happy is the mosquito who can pass the screen test.

Some cause happiness wherever they go; others whenever they go.

Children aren’t happy with nothing to ignore, And that’s what parents are created for.—Ogden Nash

She’s just a pretty baby, who loves to go buy, buy.—H. C. Witwer.

**FOUL SHOOTING NOT SO FOUL AS HAGEMEYER, CLINGMAN ARE TIED**

All the teams in the intra-mural league took part in the foul-shooting contest. Each team was allowed to pick five men, to shoot for them. Each man shot 25 times. The five men’s total free throws were totaled and a team score taken to pick a winner. The Five Brother team won with a total of 87.

In coordination with this we picked the individual who had the highest score. Hagemeyer of the Five Brothers team and Dan Clingman of the Sheirmyer Row’s tied for first place with 23 free throws out of 25 tries. This tie will be broken next week when these boys will try again.
