HUFFMAN, RINGENBERG, STAMM ARE SOLOISTS

Sunday afternoon, April 4th, the Men's Gymnasium will be the scene of the annual spring concert of the University Concert Band. The Concert Band differs from the Marching Band in the type of music played, and in the personnel. Its membership is made up of selected players from the Marching Band as well as qualified men and women students who enjoy concert band experience.

Sunday's concert includes a band transcription of the famed "Boleter" by Ravel which has been widely played by symphony orchestras in this country. Also to be heard is "On the Trail," a descriptive number composed by Ferde Grofé. "Over My Shadow," a descriptive number composed and arranged by Mendelsohn, "Bolero" by Ravel which has been used by the University Band for many years. Notice is made of the presence of a woodwind quintet and clarinet trio which has been developing and improving steadily since it was organized a number of years ago. Meeting the symbolically held twice a month, at which problems are discussed that concern all of the sororities. The Council's purpose is to promote a spirit of cooperation and friendliness among the individual sororities. We feel that it does accomplish this with a degree of success.

Professor Emeritus of Biology

Edwin Lincoln Moseley was born at Union City, Michigan, March 29, 1865; attended public elementary schools; graduated from Union City, Michigan High School in 1880 and while being under the admission age to the University, he spent a fifth year in high school; graduated from University of Michigan in 1885 with such a conspicuous record that he was awarded the A. M. degree at the end of four years of study. He joined the St. Louis Scientific Exposition in 1887 under the leadership of Professor Joseph B. Steele. He is a fellow of the American Association for the Advancement of Science and has served as Secretary and President of the Ohio Academy of Science. He has produced "Trees, Stars, and Birds," "Our Wild Animals," and "Other Worlds," three successful publications. He is also the author of several important monographs and many articles that have been published in the leading scientific periodicals. He has traveled extensively abroad and in our own country.

Professor Moseley has devoted his life to teaching and is an active campus organization which has been developing and improving steadily since it was organized a number of years ago. Meeting the symbolically held twice a month, at which problems are discussed that concern all of the sororities. The Council's purpose is to promote a spirit of cooperation and friendliness among the individual sororities. We feel that it does accomplish this with a degree of success.

TRIO, TREBLE CLEF ENTERTAIN

The Treble Clef Club, under the leadership of Adagio Cantabile, Mildred J. McQuitty, and the Woodwind Trio, composed of John Huffman, Ray Morning, and Philip Gillette, gave the following chapl program Wednesday.

I—Sacred Songs
Trust in the Lord—Handel Lift Thine Eyes—Mendelssohn
Children's Prayer—Humperdinck
Angels Over the Field We're Flying—Old French Carol
II—Woodwind Trio
Triop. Op. 87—Beethoven
1. Allegro Cantabile
2. Adagio
III—Secular Songs
The Snow—Eggar Flying, Singing Bird, Fly Away—Eggar
Violins—Miss DeVerna, Mr. Huffman
IV—Woodwind Trio
1. Elegia from Sonata No. 4—Mozart
2. Tempi di Balle—Scarlatti
3. Lament of the Virgin—Molloy
Selected Songs
From the Land of the Sky Blue—Napoleon High
When I Grow Too Old To Dream—Arranged by J. P. Kennedy
Alma Mater—Arranged by J. P. Kennedy

Council Raises Standards for Pledges

The Inter-Sorority Council has been very busy lately revising its constitution. One important step has been taken in setting a definite point average that will require of all pledges. Hereafter no sorority can pledge a girl who does not have a 2.2 average and she must maintain the average as long as she is in the sorority. It is the goal of the Inter-Sorority Council to set an ever higher standard and live up to the existing standard at all times.

You may not hear much directly of the Inter-Sorority Council but it is an active campus organization which has been developing and improving steadily since it was organized a number of years ago. Meeting the symbolically held twice a month, at which problems are discussed that concern all of the sororities. The Council's purpose is to promote a spirit of cooperation and friendliness among the individual sororities. We feel that it does accomplish this with a degree of success.

BANQUET FOR E. L. MOSELEY

Professor Edwin L. Moseley was honored at a banquet served at Shatell Hall, Tuesday, March 30, 1937. The banquet was in honor of Prof. Moseley, first Emeritus Professor of Bowling Green State University and Mr. Moseley's 72nd birthday. During the meal instrumental music was furnished by the Misses Riley and LaVern of our music department. The crowning attraction of the program was the special birthday cake adorned with 72 candles which was placed before Mr. Moseley who blew them out with a smile. Prof. Crawford, serving as toastmaster introduced the speakers of the evening. The first was Prof. Williams who gave Mr. Moseley's life history of many accomplishments. Following Mr. Ralph A. Schaller, biology critic teacher in the Junior High School and former student of Prof. Moseley spoke of the scholar's appreciation of the internationally known man.

Next Mr. Crawford unraveled the portrait of Prof. Moseley painted by a friend while the professor was in Florida recently. This portrait has been presented by anonymous donor to the University.

Following the unveiling Dr. Otis gave Mr. Moseley a portfolio of testimonial letters from former students. In answer to the evening's presentation Prof. Moseley spoke and announced his dream for western Ohio. What he now has in storage which he has not in storage yet. As a result of this, the professor has been presented by anonymous donor to the University.

As a collector of botanical specimens, Prof. Moseley has no peer in Ohio. A few years ago he was given the exclusive responsibility for collecting plants, discovered by all Ohio collectors ranging from 1889 to 1930, and as I recall, over 100 plants. He is a fellow of the American Association of Professor Moseley. His name is on the University's list of the most outstanding Doctoral Scholars for his contributions to the University.

I now turn from this stretch of geography to the life motives and objectives of
This could be collected by charging a ten cent admission. This may be unfair to increase activity fees for students who do not participate or are more active than we have had in the past. We should try to increase the activity fee, but not for the sake of just being active. The most important of these was a change in the dance program. The dance money that is raised by the fraternities, sororities and various other organizations would make a total of $285. The money needed is $50.00. The money needed is $50.00. The main reason for this is that it is not fair to just raise the activity fee for those who do not participate. The increase in activity fees is not fair to the students who do not participate. The increase in activity fees is not fair to the students who do not participate.
On Thursday night, March 18 Prof. Hayward and the critic teachers took their student teachers at Ridge Street school to see the show, "When You're in Love". Afterwards they went to the Nookery for refreshment.

The volley ball season has started. Games are being organized around the school. They will start the first Tuesday after vacation, March 30, and continue for eight weeks.

"The trouble with most reading material is that it contains too many words and too little thought."—Win. Feather.

"Some people use language Expressly thought—to conceal thought—and others instead of thought."—William Feather.

The trouble with a fat man is his daily doesn't—Regina Leader.

Another good thing about telling the truth is that you don't have to remember what you said.

"A little experience is a dangerous thing, too much is absolutely fatal."—Robert Burns.

If the reader is a great teacher himself he may well become ecstatic over the possibilities. Emerson said he would travel ten miles any time for a new idea. He thinks of any achievement comparable to that of passing on to another mind a great truth of nature or principle of human relations in a way that will cause it to penetrate into the realm of appreciation and remain there forever. If you know anything more wonderful, what is it?

Within the past few days there has come into my hands a collection of letters from Professor Moseley's former students. I might in this address pay tribute to Professor Moseley's ability as a teacher, but I would not be able to portray it so exactly and forcibly as do the testimony found in these (Continued on page 4, col. 1)

MOSELEY HONORED

(Continued from page 3, col. 5) letters, I hope to have time when I have finished this ad-

advertisement to read a few selections from these letters. But here and now I should like to say in a

sentence or two what I have always admired in him.

I would continue to emphasize before prospective teachers of those not yet masters of the

subject that they undertake to teach. It is this: Mastery of subject-matter is the sure sure

ness of teaching and it should not be the only prerequisite to the Latin phrase before a col-

umn. It means an indis-

pensable condition. I say it with-

The third essential of the ef-

ficient life in one's contribution to

progress. In this field of en-

deavor, Professor Moseley ranks

among the best of the scholars of

his day. I can take time to give

only one illustration. For near-

ly a century, the people living in the vicinity of Canalta, Ohio, have been stricken at intervals

with a disease called Trembles.

It is not over-estimating the pioneer efforts of Professor Moseley in this field to recognize

his work as a distinct contribution to the public welfare. The prevalence of milk sickness extend-

ed to many sections of the Unit-

ed States. There need not be a

reoccurrence of this serious mal-

ady anywhere, if the health

authorities and public take this

precaution.

Another achievement illus-

trative of Professor Moseley's

influence upon the improvement

of conditions in the freshwater

fishing industry is worthy of a

particular mention. Professor

Moseley is an authority on

freshwater fish. When David

Jordan and the International

Fish Commission were planning

several years ago, Dr. Jordan

wired me some days before their

arrival to arrange for Pro-

fessor Moseley to join his party in their study and investigation of conditions

in Sandusky. Thus Dr. Jordan,

the leading authority of his

time on freshwater fish, sought

Professor Moseley's assistance in the important work of his

Commission. This again was a

fine tribute to Professor Mose-

ley's service to a great inter-

national problem.

In my professional experience, Professor Moseley was a

front in the public school

or university world, but if in

popularizing his department in a community, Professor

Moseley did in Sandusky.

To follow this, I should like to

explain in this respect.
