Two New Teachers Hired

Two new teachers have been obtained for the summer—Mr. Kenneth Whaley in the history and social science departments, and Miss Ann L. Welch in elementary education.

Mr. Whaley, who came from Bowling Green in 1927, and later obtained his Master's degree from Ohio State, came to Bowling Green this year to assist in the post-summer session. He will also work in the physical education department.

Miss Welch teaches during the winter term at the State Teachers' College, Mt. Pleasant, Michigan. She received her B. S. degree from Texas Women's College, and her Master's from Columbia.

We extend a cordial welcome to both old and new students. H. B. Williams, President

HOLT PLANS EXTENSIVE TOUR

To Cover Nine States, Part of Mexico

A carefully planned trip of over 4,000 miles through nine states and a part of Mexico is the exceptional geography field trip to be offered during the post-summer session. The itinerary includes selected areas of the great Middle South and Gulf states, and a portion of northern Mexico.

Prof. W. P. Holt, who has long taken an active interest in educational tours and travel, will lead the group. Miss Ann L. Welch will assist him.

The small, rat-like animals known as Nine baby 'possums were reported in the State Park at Bowling Green in June. They are the offspring well-hidden in the pouch. Dr. Otis, head of the department of zoology, will be the guide for this field trip.

As usual, a softball league will be formed for the men, and a basketball team also formed for the women. Other fine activities that are provided include a swimming pool and a tennis court.

The assembly program this Wednesday, June 16, at 3:30 o'clock in the Men's Gymnasium will be closed.

The President's Reception to carry on all day at the Men's Gymnasium will be closed.

The P. E. department will be open during the assembly and dance in Men's Gymnasium.

DIRECTIONS FOR REGISTRATION

Read Carefully; Register in Gym

1. Students will enter the gym at the south entrance. All new students, including transfer students, must file at the entrance the proper admis- sion application, and state the courses in which they desire to be admitted. The registration card states the courses in which the student desires to be admitted.

2. Proceed as directed to the nearest ticket desk and pay your registration card. If the registration card is satisfactorily completed and approved, you will receive a ticket for the section you desire to attend.

3. Proceed directly to the gym and take the floor pass at the ticket desk. You may now enter the gymnasium.

4. Check on your class cards in the bookstore and take them to the gymnasium.

5. You must be present and have your registration card inspected, and deposit your county card at the table. If the registration card is not satisfactory, you will not be admitted.

6. Check to see that no error has been made. If it develops the section you desire is closed, you will be asked to see that no error has been made. If it develops the section you desire is closed, you will be asked to return to the gymnasium and register in another section.

7. After registration, the P. E. department will register you in all of its facilities and equipment at the disposal of the summer school students.

8. As you pass the table at which you are registered, give your name and city address on the program card, also telephone. If you are commuting or boarding, give your home address.

9. When you return to the gymnasium, show your schedule and then return to the class card table.

10. The President's Reception to carry on all day at the Men's Gymnasium will be closed.

What is The True Character
Of a Master's Degree?

The demand for the degree of Master of Arts is so great today that there is considerable danger of misconceiving its true character on the part of both the students who seek it and on the part of the students who seek it. Edward A. Ross has formulated what he calls a sociological law of "anticipation," by which he means that powerful tendency of people to meet the letter rather than the spirit in fulfilling the requirements that society sets up for realizing a popular social reward. No one can doubt the force of this fact. But it is a sad commentary on the quality of college work that a man can have written four years of college and university work, or the equivalent, and yet not have the permission of President Williams.

English 73; Contemporary Literature, will recite at 7:00 rather than at 8:00, as scheduled in the preliminary catalog as the men's evening bulletin. For students who have completed the two-year elementary course and desire to continue work on the four-year degree course in elementary education the following courses are supposed.

The letter rather than the spirit in fulfilling the requirements that society sets up for realizing a popular social reward. No one can doubt the fact that the law has worked in the case of the Master's degree; in fact it has held true already in some institutions.

University colleges are now setting this danger and are beginning to take steps to avoid it. The Association of American Universities appointed a committee to study and report upon the problems of the Master's degree. The report was presented to the Association last year at the meeting in Ithaca, New York. Some significant sentences from this report are quoted here.

... "the Master's degree should represent the culmination of at least five years of college work and university, or the equivalent, in the course of which the student (1) attains a special competency in one or more fields of knowledge as judged by his instructors and (2) develops the ability to think independently and constructively, that is, to find, organize, and evaluate evidence of a topic in his special field and to formulate and argue a definitive conclusion. The graduate year should be a stimulating and 'broadening experience rather than merely a dogged attempt to fulfill academic requirements inspired largely by external pressure."

"The work in the graduate year should not consist of a batch-hour curriculum, but should be a unified program with a definite objective, at least half of which should be in a single field."

Your committee recommends that a thesis, which may be of a research, expository, critical, or creative type, be included as a requirement for the Master's degree.

The State Department of Education at Columbus, Ohio, has sensed the danger also. Dr. Franklin H. McNutt, Director of the Division of Higher Education, has called a conference of representatives from all the institutions of Ohio offering the Master's degree; in fact it has held true already in some institutions.

The good man wants his women to be like a cigar. They are fastidious men. You a cigarette, offer you a pipe."

The bad man wants his women to be like a pipe—something he becomes addicted to, not out of any deep, but slowly and gently, loves great care of always. A man will give you his cigars, his pipe, his cigarette, but he never shares his pipe.

The largest line of magazine, fresh cigars, candy, books...

ANNOUNCEMENTS

There will be a short BEE GEE News meeting in room 301, Science building, Wed., June 19 at 8:00 p.m. All those interested in working on the paper this summer are urged to be present.

No student will be permitted to register for more than 6 semester hours without the permission of President Williams.

English 73; Contemporary Literature, will recite at 7:00 rather than at 8:00, as scheduled in the preliminary catalog as the men's evening bulletin. For students who have completed the two-year elementary course and desire to continue work on the four-year degree course in elementary education the following courses are supposed. Others, however, may be selected.

English 62 or 64
History 21, 73 or 74
Political Science 27 or 80
Geography 88
Mathematics 65, 64, or 73
Industrial Arts 73
Home Economics 66 or 67
Music 93
Physical Education 25 or 69

Care must be taken not to select courses for which the student already has credit or for which the student does not have pre-requisites.

Geology 62 or Mathematics 77

Emersons To Meet

Emerson Parliament, noted for its hotly contested word battles, will begin its weekly summer meetings Wednesday at 7:00 p.m. in room 301, the old library, in the Ad. build- ing.

At this first session, a president and secretary are to be elected. Dr. Schwartz, Emerson's stenographer leader, expects a large turnout.

The Parliament differs from Emerson Literary Society, which meets during the year, in consisting solely of parliamentary practice. In the winter term, literary programs of various types are given in addition to the drill in Roberts Rules of Order.

Ask That All Boost Home Coming

Students of the University will be asked many questions by folks back home. When greeted by alumna and former stu-
dents, one question is certain to arise, when is Homecoming? This event is becoming more of an attraction each year. B. G. B. U. will build greater ties as the years go by. Friends of the University will return in larger numbers.

This year we will see the new stadium and other improve-
ments awaiting the Homecomers. The dates of Nov. 5th, 6th, and 7th, should be held in reserve by all students in which to meet old friends and to really enjoy Bowling Green spirit at its best. Class, society, fraternity, and group parties will bring many former students to our campus again. On the 5th, our boys will play the strong team from Wittenburg. What a thrill it will be to see the new stadium filled with B. G. friends cheering our team to victory!

The Homecoming events are still in the hands of the Student Council working with the Alumni Relations Committee of the Faculty. Each student will serve the University well if during the summer vacation, announcements are made to others that Homecoming will be celebrated at Bowling Green State University on Nov. 5th, 6th, and 7th, 1937.

Dream of Spain

The following story, written by George Squire, editor of the Bee Gee News during the past semester, was the winner in the competition of the 22nd Delta contest here this year.

I felt a sharp pain that seemed to have no feeling, no movement; and he struck my injured arm and I would have one perfectly good arm for escape.

The commander and his aides, after their last bit toward purification of the world for that day, gathered at a corner of the court-yard to dismantle and inspect the machine gun. They spoke either in very low or loud tones, seemingly self-conscious in the presence of Death despite their long acquaintance with him.

It must have taken them ten or fifteen minutes to complete their task. I suffered the agonies of enforced immobility until the clatter and clink of their receding footsteps echoed in the court-yard. To check the flow of blood from my arm, I shifted my weight on it. My head still pounded, but I could no longer feel the trickle of blood across my forehead.

I knew little of my surroundings and could only wait. The van had pulled away from the barracks twice a day I could probably come soon. If I could stand being tossed into the truck, I might escape after it had left the barracks.

But I did not dare risk falling unconscious. That would be sure death. Moving cautiously, I pushed myself up with my left arm into a half-sitting, half-prone divination of the Signum Tau temeeter,

I had engineered our escape. That was, that brotherhood of the damned; it was the kinship of all who join together in almost hopeless struggle against destruction. But I did not analyze it then—he and I had seen a certain glory in our outwitting of death. That glory lifted our strength and blinded us from failure. Not until we had escaped and separated did the possibility of failure occur to me. Nor could I recall how we had done it, or how the dream seems irrevocable; I can remember nothing of the past.

Those of us who would not revert to normal life from our veins or through whip or sword or hot iron, unmoving most of them. A few motionless under the taunt of freedom to those still alive, I knew that of my right arm. Lucky, that—
