A WEEKLY PUBLICATION FOR THE BOWLING GREEN STATE UNIVERSITY COMMUNITY

JANUARY 20, 1997

Consultants offer suggestions for sustaining aerotechnology program

If there is a will, there is a way. When it comes to the future of the College of Technology's aerotechnology program, Thomas Erikson, dean, has been saying that for almost a year.

In late December, two consultants brought in to examine the prospects for the currently discontinued program said basically the same thing.

If the program is to continue and be successful, the University is going to have to step up to the plate financially and improve conditions in a number of areas. That is the opinion of Glen Nemecek of Oklahoma State University and Michael Kroes of Purdue University, who were on campus for two days in mid-December.

Charles Middleton, provost and president for academic affairs, said he was "pleased with the report and the clarity of its recommendations." Discussions about the program's future have been initiated and Erikson has developed a proposed plan of action. Middleton said he hoped a decision can be made within the next two weeks.

The report, issued on the last day of the year, said that Bowling Green has a solid program and it has a number of qualities which could be used to maintain its success and competitiveness. These qualities include a strong curriculum, the expertise and enthusiasm of the faculty, staff and students, the location of the University, the location of the airport in relation to the University and the proven success of the program based on its job

placement record.

"BGSU's regional and national reputation and recognition provide a great advantage in student recruitment and placement," they added.

But the duo also listed four areas that need improvement.

First, the University needs to cancel the program's existing debt (or establish a long-term payback schedule), which is estimated at more than \$70,000. It will also need to establish a method of financing the program, which does not rely as heavily on flight fees as a source of income.

Second, a commitment to enhance recruiting efforts will need to be made. "Generally, an aerotechnology student population of approximately 150-160 students divided between flight and management programs is considered the minimum enrollment for justifying the facility and resources necessary for delivering a quality program," the report said.

Third, at least one additional faculty member, which could be a tenure-track program director, will need to be hired.

And fourth, renovating the Technology Annex is a must. If done, it will improve both the learning environment and the recruiting efforts.

The team also said the city and county would need to provide additional support for the program, including adjusting the current airplane fuel fee structure.

In conclusion, the pair wrote. "We

Three new provost's associates bring expertise to enhance variety of areas

Three faculty have been selected to perform special assignments in the provost's office. Charles Middleton, provost and vice president for academic affairs, announced Jan. 15.

Ann Marie Lancaster, computer science, has been appointed to an 18-month assignment that will include issues related to developing technical services on campus. Networking the residence halls; creating ways to use technology in instruction; examining how technology fees can best be utilized to enhance access to computer technology for students, faculty and staff, and working on Project 2000, which is developing procedures for setting the proper date on computers following 1999 are among the issues toward which Lancaster will direct her attention.

She will relinquish her duties as chair of the computer science department, but will continue to teach and do research on a half-time basis.

Bruce Edwards, English, and Deanne Snavelly, chemistry, will work with undergraduate instruction, enrollment, curriculum, advising and registration issues during the spring semester. The

appointments are quarter-time and each will continue their normal assignments, but on a reduced level.

The Provost's Associate appointments are part of an initiative to utilize the special talents of faculty who want to become involved in administrative projects that are vital to the University's efforts to become a premier learning community, Middleton said.

"I'm delighted to find three talented and energetic faculty colleagues to work with me, the deans, the chairs and others in enhancing the overall quality of the University," he added.

Lancaster became chair of the computer science department in 1984 and since then has guided its rapid growth and development into a reputable academic program. She has been a strong advocate of Bowling Green's transformation into a technological campus. She has also been active in campus governance, serving as Faculty Senate chair and receiving the 1988 Faculty Distinguished Service Award.

Snavelly, an associate professor of chemistry, joined the faculty in 1985 and has compiled an impressive teaching and

Clinical psychology program receives maximum reaccreditation from APA

The Department of Clinical Psychology has been reaccredited by the American Psychological Association, this time for seven years.

"The association recently increased the possible term of accreditation from five to seven years, so we were one of the first to get the new term," Douglas Ullman, director of the program, said.

The department was visited by teams from the APA last summer which evaluated eight aspects, or "domains" of its functioning. The department scored high in every area, Ullman said. The evaluators commented that Bowling Green has successfully made the transition from a more traditional program to one with "more focused tracks," he added, adapting to the rapid

developments in mental health care over the past 50 years.

"The clinical faculty are clearly an important and valued component of the psychology department and they have clear responsibilities for determining the direction of the clinical program," the APA report stated. "In summary, the program does an excellent job of preparing (its) students for entry levels of practice, research and teaching."

Bowling Green's clinical psychology program, which includes about 60 graduate students and 10 clinical faculty, has three concentrations: clinical child psychology, community psychology and behavioral medicine, which deals with psychological factors associated with physical disorders such as hypertension.

Back-to-school rush

Karen Sternberg (right), a part-time employee helping with the beginning-of-semester rush, sells books to Jessica Porterfield (left), a freshman. The University Bookstore extended its hours last weekend, including Sunday, to accommodate returning students. According to John Buckenmyer, bookstore director, the staff served more than 200 customers over the two days. The bursar's, registrar's, housing, financial aid and parking services offices all opened their doors Sunday to serve students.

Meth named director of public events for College of Musical Arts

Deborah L. Meth, an arts administrator from New York City, is the new director of public events and assistant to the dean of the College of Musical Arts.

Deborah Meth

She will be responsible for public outreach activities of the college, duties which include managing and directing more than 400 public performances annually by faculty and students, planning and producing the Festival Series and overseeing the Summer Music Institute and Creative Arts Program. Meth also will be involved in planning special events for donors and friends of the college.

H. Lee Riggins, dean, noted that Meth brings to Bowling Green "all the prerequisites to take us to a higher level of arts presentation. She has extensive experience in arts management, all of the managerial skills needed to work effectively with people and the energy, stamina and interest necessary for promoting the arts in northwest Ohio."

For the past year, Meth was a

publicist for Agnes Brueau and Associates in New York promoting such artists as Chanticleer and the Brooklyn Philharmonic.

From 1987-95, she was manager of educational and symphonic licensing for the American Society of Composers, Authors and Publishers in New York. There she negotiated national contracts with industry leaders and representatives of national service groups and marketed ASCAP license agreements to music users in addition to handling other duties, including making sure performances of copyrighted music were licensed for lawful public performances.

From 1984-87 she worked for ICM Artists Ltd. in a variety of roles, assisting in managing classical musicians' tours and engagements and coordinating artists and conductors' rehearsals, recordings and performances.

A native of Long Island, N.Y., Meth earned a bachelor's degree in vocal performance in 1975 from Ithaca College in Ithaca, N.Y. She is a member of the American Symphony Orchestra League, the Association of Performing Arts Presenters, Chamber Music American, Chorus American and the International Society of Performing Arts Administrators.

Aerotechnology

continued from page 1

believe that given the current financial situation, funding and staffing levels, a suspension of enrollment was a reasonable and appropriate step. To simply lift the enrollment suspension and return to the previous operating procedures will not provide BGSU with a quality aerotechnology program.

"Although we believe BGSU has the components necessary to deliver a quality program...we think this course of action should only be pursued if the University is willing to commit the required resources."

Workshops offered to faculty, staff on technology in teaching, learning

As part of the Center for Teaching, Learning and Technology's mission to assist faculty in the use of technology in pedagogy, weekly workshops in such topics as using Powerpoint, using online discussion groups and file transfer protocol, creating web pages and scanning images have been scheduled for now through April. The workshops

Provost's associates

research record. She has received grants to fund her continuing study of understanding the factors which control the rate of chemical reactions.

Edwards, a professor of English, who came to Bowling Green in 1981 is a specialist in rhetorical theory and composition teaching. His research and writing has been well-received by reviewers. He developed the computer-assisted component of the General Studies Writing Program and served as the department's graduate coordinator.

are free and open to all faculty and staff. Weekly listings will appear in the *Monitor* calendar. Attendees should have a BGNet account, established at least 48 hours prior to the workshop. For the workshops on creating web pages, attendees will need an account on the University Infoserver. For reservations, call 2-6898.

Everything has its place as Robert Graham (front), Mark Barnes (right), assistant archivist, and graduate student Jim Mapes place some of the vast holdings of the Institute for Great Lakes Research on shelves in their new home on the sixth floor of Jerome Library.

Great Lakes center returns to Jerome

Bowling Green's Institute for Great Lakes Research has moved back to the main campus and is now located on the sixth floor of Jerome Library.

Since 1986, the institute, which has one of the nation's largest collections of Great Lakes shipping materials, has been housed in a University-owned building at the Owens-Illinois Research Park in Perrysburg.

Robert Graham, institute archivist, said the primary reason for relocating is to enable increased use of the materials by Bowling Green students and faculty. "It is more centrally located with the rest of the library's collections and our materials complement those in the Center for Archival Collections," he said. In fact, persons wanting access to the institute's holdings will have to go through the CAC on the fifth floor.

In addition to faculty and students, historians, divers and modeling enthusiasts are among the institute's main users.

Since the opening of the Northwest Ohio Regional Book Depository earlier this year in Perrysburg, materials used infrequently by Jerome Library patrons have been moved to the off-campus storage facility. Some of the space created in the main library on campus as a result will be occupied by the institute, Graham explained, adding that high-density shelving will be used to hold the collection.

The institute's collection includes thousands of photographs, manuscripts, books, newspaper clippings, reference collections, ship logs, diaries and artifacts related to ships that have sailed the Great Lakes. Approximately 250,000 oversized architectural ship drawings, which are among the institute's less frequently used materials, will remain at the Perrysburg site, Graham noted.

The institute's hours are from 8:30 a.m.-4:30 p.m. Monday through Friday. The new phone number is 2-9612.

MONITOR

Monitor is published weekly by the Office of Public Relations for faculty and staff of Bowling Green State University. The deadline to submit material is 5 p.m. Tuesday, the week before publication.

University Vision Statement:

Bowling Green State University aspires to be the premier learning community in Ohio and one of the best in the nation. Through the interdependence of teaching, learning, scholarship and service we will create an academic environment grounded in intellectual discovery and guided by rational discourse and civility.

Did You Know?

Bowling Green State University received the second highest ranking among doctorate-granting graduate psychology programs in Ohio in ratings released by the National Research Council. Only Ohio State University received a higher ranking among state schools offering doctoral degrees in this field. In its study, the NRC looked at the quality and effectiveness of more than 3,600 doctoral programs in 41 fields at 274 universities across the United States.

Ribeau, students set town meeting to discuss Ohio school funding policies

Students from the Dean's Advisory Council in the College of Education and Allied Professions and President Sidney Ribeau are producing the first in a series of BGSU town meetings, to be aired on WBGU-TV27.

Inspired by the PBS documentary "Children in America's Schools with Bill Moyers," the meeting will address the topic of inequities in school funding in Ohio. The PBS special takes viewers on a tour of Ohio's schools, illustrating the vast differences among city, rural and suburban schools. According to producer Jeffrey Hayden, who holds an honorary degree from Bowling Green, he chose Ohio for the documentary because the state has the largest discrepancy in state per-pupil spending, ranging from \$3,088 to \$13,752 per student, per year.

The broadcast will be aired Thursday, Jan. 23 at 8 p.m. during Ribeau's weekly program. In Erie County, viewers may see the entire program on the Cablesystem's channel 27. Live feeds are being planned from 101 Olscamp Hall and the Firelands campus. Audience members in the two remote sites can present on-air questions and comments, relayed to Ribeau with the help of Les

Stemberg, dean of the College of Education and Allied Professions at Olscamp, and R. Darby Williams, dean of Firelands College, at Firelands. Television viewers may also call, fax or email in their responses.

"Children in America's Schools" will air during the first hour of the broadcast, followed by a panel discussion on school-funding policy. The eight panelists include Laura Martin, BGSU senior and state president of the Ohio Student Education Association; Cynthia Beekley, educational administration and supervision; Bill Phillis, executive director of the Ohio Coalition for Equity and Adequacy of School Funding; state representatives Randy Gardner and Jack Ford; Gary Keller, superintendent of Sandusky County schools; Sylvia Washburn, who was named Teacher of the Year by the Walt Disney channel in 1990, and Penelope Getz, president of the advisory board of the Wood County Educational Service Center.

Among those helping University faculty, staff and students plan the event are Doug Garman, director of the Wood County Educational Service Center, and Larry Busdeker, Hancock County superintendent of schools.

Bingman awarded Fulbright to study learning and memory in Spain

Verner Bingman, an associate professor of psychology, left for Spain earlier this month, the recipient of a prestigious Fulbright Scholarship.

Verner Bingman

Through July he will be a guest lecturer at the University of Seville, teaching graduate and undergraduate classes in neuroethology and the neurobiology of learning and memory.

In addition, he will be conducting research at Seville's biophysiology laboratory, one of the top research centers of its kind in Europe.

Bingman's most recent research has focused on determining which areas of the brain are used to process spatial information and store spatial memories, such as distance and direction. He uses homing pigeons in his experiments.

In Spain, he will be working with Dr. Cosme Salas, director of the Seville laboratory, who is conducting similar experiments with fish. Bingman said he hopes his work with Salas will give him new insights into his research which he

can apply when he returns to Bowling Green.

The author of more than 40 journal articles, he has made more than 25 presentations at both national and international conferences and workshops.

He is a member of the Society for Neuroscience, Sigma Xi scientific research honor society, the Animal Behavior Society and the American Ornithologists Union.

Bingman earned his doctorate from the State University of New York at Albany. Before joining the University faculty in 1989, he taught at the University of Maryland and at the University of Pisa, Italy.

Bingman is the third faculty member this year to be named a Fulbright Scholar and one of more than 60 Bowling Green faculty members to be honored since the program began in 1946.

During the fall semester, Fiona MacKinnon-Slaney, professor of higher education administration and student affairs, taught at Beijing Normal University, China. This semester, Dr. Ellen Berry, associate professor of English and director of the University's women studies program, is teaching and conducting research at Charles University in Prague, the Czech Republic.

Survey to assess job satisfaction on campus

All Bowling Green State University employees will be distributed a confidential survey on Feb. 1 designed to assess their feelings about their jobs and their work environment.

The idea for the project came from Faith Olson, education and allied professions, who is also a doctoral student in higher education administration and vice chair of classified staff council. Upon reading the report from last year's Focus on February groups, when it was suggested that such an evaluation would aid in the implementation of the University's new, circular organizational structure, Olson decided to pursue this research as part of her doctoral work.

She is working with a team of doctoral students from the departments of educational administration and supervision and higher education administration to conduct and collate the results of the survey. The survey has been endorsed by President Sidney Ribeau and Provost Charles Middleton.

Results will be made available to the University community and the administration.

University logo finalists on display

Two dates have been scheduled for the campus community to see and comment on the proposed logomarks currently being developed for the University. The Graphics Standards Committee, appointed earlier this year by President Ribeau, has set 4 p.m., Jan. 28 and 7 p.m., Feb. 5 as open sessions for people to learn more about the project of creating a new logo and graphic standards for the University. Both sessions will be in Jerome Library's First Floor Conference Room.

An updated logomark and guidelines for its use will be the initial steps in the University's efforts to create printed materials that have a consistent visual appearance that clearly represents Bowling Green.

Three faculty retire in January

Richard Bowers, HPER, Michael Moore, continuing education, international and summer programs, and Robert Perry, ethnic studies, retired effective Jan. 1. All three will continue their service to the University under the supplemental retirement plan.

Bowers, an expert in exercise physiology, came to Bowling Green in 1969. As director of the University's Human Performance Laboratory, a position he held until 1986, and later as fitness director at the Student Recreation Center, he has conducted assessments and prescribed exercise regimens for hundreds of students, athletes and faculty. He also has studied the effects of exercise in temperature extremes and issued safety guidelines.

Bowers co-edited the fourth and fifth editions of *The Physiological Basis of Physical Education and Athletics*, a popular textbook, among other books and research articles. In 1971 he was elected to the Board of Trustees of the American College of Sports Medicine and was one of only a few people certified by the college as a program director. Since 1995, he has served as director of recreational sports.

Moore was the founder and the only director of Arts Unlimited, an aesthetics education program that links the University to primary and secondary schools in northwest Ohio. Begun in 1980, it is affiliated with New York's Lincoln Center and has won numerous awards for the excellence of its achievements.

Moore has developed a national reputation as a consultant in arts education programs.

He came to Bowling Green in 1965 as an assistant professor of history. He taught and published on a wide variety of topics including the Gilded Age, American economic history and the history of higher education. In 1979 he served as acting assistant dean of Firelands College. He was co-founder and first chair of the Ohio Faculty Senate from 1969-74 and in 1971 was voted ODK's Faculty Man of the Year.

Perry, who earned bachelor's and master's degrees from Bowling Green in 1959 and 1965, respectively, returned to campus in 1970 to direct the Ethnic Studies Center, which later achieved departmental status. The only person to have held the position of chair in ethnic studies, he worked to improve racial balance in the University's course offerings and to bring diverse cultural experiences to the campus. In 1972 he was instrumental in initiating a major and minor program in black studies.

Perry, an authority on gang behavior, has helped organize the department's annual Ethnic Studies Conference, which has had such keynote speakers as authors Alex Haley and James Baldwin. He was honored in 1994 with the top award of the National Association of Ethnic Studies, the Charles C. Irby Distinguished Service Award for his dedication to teaching ethnic studies.

Kane diploma

Roberta Kane, office services, looks at the diploma that was awarded Jan. 10 posthumously by the University to her daughter, Julie, who was scheduled to graduate in May. Calling the occasion "an extraordinary set of circumstances" and something the University wanted to do to honor Julie's accomplishments, President Ribeau presented the bachelor of science degree in education to the Kane family, which also included, Julie's father Robert, her brother and grandparents. Also taking part in the brief ceremony were Veronica Gold, education, and Les Stemberg, dean of the College of Education and Allied Professions.

Calendar

Monday, Jan. 20

Holiday. All offices will be closed and no classes will be in session in observance of Martin Luther King Jr. Day.

Walk for Peace, 6:30 p.m., beginning at Saddlemere Student Services Building, to Prout Chapel. In honor of Martin Luther King Jr. Speaker: Rev. Charles Scott. Reception immediately following in Alumni Room of University Union. Sponsored by Alpha Phi Alpha and the Office of Multicultural Affairs.

International Film Series, *Tadellusser und Wolff* (1975), directed by Eberhard Fechner (in German with English subtitles), 8:15 p.m., Gish Film Theater. Free.

Tuesday, Jan. 21

Classified Staff Council meeting, 9 a.m.-noon, Taft Room, University Union.

Faculty Senate Meeting, 2:30 p.m., Assembly Room, McFall Center.

Film Perspectives on Colonialism Series, *How Tasty Was My Frenchman* (1971), directed by Nelson Pereira dos Santos (in Portuguese with English subtitles), 7:30 p.m., Gish Film Theater. Free.

Wednesday, Jan. 22

A Tribute to Martin Luther King Jr., 10 a.m.-noon, Jerome Library Conference Room. Sponsored by Libraries and Learning Resources Multicultural Affairs Committee. Reporter Eddie B. Allen Jr. discusses his 1995 series in *The Blade*, "America in Black and White." For more information call 2-7897.

Computer workshop, 2-4 p.m., 207 Oiscamp Hall, "Using Powerpoint," an overview of the basics of using digital slides/visuals as teaching aids, free to all faculty and staff. Sponsored by the Center for Teaching, Learning and Technology.

Cafe Conversation, 3-5 p.m., at La Maison Française. Conversation in French, free coffee and cookies.

Men's Basketball hosts Miami, 7 p.m., Anderson Arena.

Theatre production "The Meeting," 7:30 p.m., Lenhart Grand Ballroom, University Union, a fictional meeting between Martin Luther King Jr. and Malcolm X. Sponsored by

Office of Student Activities. Free.

Thursday, Jan. 23

Television Program, "President Ribeauro & Company," 8 p.m., WBGU-TV. Topic: Town meeting on school-funding policies.

Dance Performance, University Performing Dancers, 8 p.m., Eva Marie Saint Theatre. Tickets \$5 at the door. For more information call 2-6918.

Lenhart Classic American Film Series, *Abbott and Costello Meet Frankenstein* (1948), directed by Charles Barton, 9 p.m., Gish Film Theater. Free.

Friday, Jan. 24

Hockey hosts Lake Superior, 7 p.m., ice arena.

Dance Performance, University Performing Dancers, see Jan. 23.

Saturday, Jan. 25

Women's Swimming hosts Miami, 11:30 a.m., Cooper Pool-SRC.

Men's Tennis hosts Illinois-Chicago, 1:30 p.m., Laurel Hill (Toledo).

Women's Basketball hosts Toledo, 1:30 p.m., Anderson Arena.

Men's Swimming hosts Miami, 3:30 p.m., Cooper Pool-SRC.

Dance Performance, University Performing Dancers, 2 and 8 p.m., see Jan. 23.

Monday, Jan. 27

International Film Series, *Tadellusser und Wolff*, see Jan. 20. A continuation of the previous week's film.

Continuing Events

Art Exhibition, MFA/MA in Art Alumni Exhibition, through Saturday, Feb. 8, Dorothy Uber Bryan Gallery, Fine Arts Center. Sponsored by the School of Art, the College of Arts and Sciences, the Graduate College, the Medici Circle and the Presidents Club. Gallery hours are Tuesday-Saturday, 10 a.m.-4 p.m., Sunday, 2-5 p.m. The gallery will close at 3 p.m. on Saturday, Feb. 8.

ASC discusses performance review

At its meeting on Jan. 2, Administrative Staff Council heard an update from Donna Wittwer, University benefits manager, and discussed progress on the new performance-evaluation form being developed for administrative staff.

Wittwer told council the University has just renegotiated a two-year contract with Blue Cross/Blue Shield. No significant changes were reported, but there is a clause in the contract stating that the University may cancel the policy if such changes do occur.

Employees can now make changes at any time to their tax-deferred annuities, which previously could be done only once a year. The benefits office will monitor the number of changes made to determine if limits need to be set.

The state has now mandated that the University select a managed-care organization by Feb. 15 for workers-compensation recipients. A committee is working on this, including administrative staff members Wittwer, Dan Parratt, environmental health and safety, and Josh Kaplan, health services.

Council gave comments and suggestions about the performance-evaluation

form on which the performance appraisal committee has been working. Judy Donald, continuing education, said the committee, which began meeting in the fall of 1995, is made up of representatives from all vice-presidential areas. Its aim is for the form to be in use for the new fiscal year 1997-98. Training for all staff will be critical to the success of the evaluation process, she said. Bryan Benner, interim director of human resources, said all administrative staff would go through training sessions. These sessions are tentatively planned for March and April.

Council members voiced several concerns about the form and the process, notably whether merit will figure into the appraisal process and how merit is to be defined. Benner stressed that the committee has not been charged with determining merit issues.

Council members also were curious about how the appraisal will be used; for example, if it is designed to help employees move through their salary range. Another major concern was that employees are not being consistently evaluated across campus.

Windless Sails

Melissa Carozzi (left), Jennifer Weitz (center) and Cynthia Clark (right) rehearse under the direction of Deborah Tell, artistic director of the University Dancers. The group's annual performance will feature 18 dancers in seven pieces of contemporary ballet and modern dance. Performances will be held in the Eva Marie Saint Theatre Jan. 23-25. Photo by Doyle Phillips

Employment

FACULTY:

Instructor - applied statistics and operations research. Temporary, full-time position. Call 2-2363. Deadline: Jan. 24.

Assistant professor or instructor of biology - Firelands. Full-time probationary or temporary faculty. Call 419-433-5560 or 1-800-322-4787. Deadline: Feb. 1.

Assistant/associate professor - international business and accounting. Call 2-2767. Deadline: Feb. 1.

Assistant professor - public health administration. Full-time, tenure-track position. Call 2-8242. Deadline: Feb. 1.

Assistant professor - mathematics and statistics. Full-time, tenure-track position. Call 2-2636. Deadline: Feb. 1.

Assistant professor - sociology/demography. Full-time, tenure-track position. Call 2-2294. Deadline: Feb. 1.

Assistant/associate professor - communication disorders. Call 2-6031. Deadline: Feb. 1.

Assistant professor - social work. Full-time, tenure-track position. Call 2-2441. Deadline: Feb. 1.

Assistant professor/instructor - industrial technology - applied sciences, Firelands. Full-time, temporary position. Call 419-433-5560 or 1-800-322-4787. Deadline: Feb. 3.

Assistant professor/director of communication arts technology - English, Firelands. Call 419-433-5560 or 1-800-4787. Deadline: Feb. 3.

Assistant professor and director of business management technology - applied sciences, Firelands. Call 419-433-5560 or 1-800-322-4787. Deadline: Feb. 3.

Senior vice provost for academic affairs - office of the provost/vice president for academic affairs. Call 2-2915. Deadline: Feb. 10.

Vice provost for undergraduate affairs and dean of undergraduate students - office of the provost/vice president for academic affairs. Call 2-2915. Deadline: Feb. 10.

Assistant professor - music education. Full-time, probationary position. Call 2-2181. Deadline: Feb. 15.

Assistant professor - gerontology. Full-time, tenure-track position. Call 2-2326. Deadline: Feb. 28.

Assistant professor - computer art (1-2 positions). Tenure-track position. Call 2-2786. Deadline: Feb. 28.

Assistant professor - drawing. Tenure-track position. Call 2-2786. Deadline: Feb. 28.

Assistant professor - geography and environmental studies. Tenure track position. Call 2-2925. Deadline: March 1.

Assistant professor (preferred, all ranks considered) - architecture/environmental design. Call: 2-2437. Deadline: March 10.

ADMINISTRATIVE STAFF:

Director of recreational sports (V-084) - division of student affairs. Deadline: Jan. 24.

Aquatics assistant (V-094) - recreational sports. Deadline: Feb. 3.

Monitor editor (V-002) - public relations. Deadline: Feb. 14.

Supervisor of mass spectrometer facility (V-092) - chemistry. Deadline: Feb. 15.

For Sale: Minolta 3150 copier and cabinet. \$500 or best offer. Please contact Patricia Prezkop, Department of Applied Statistics and Operations Research at 2-2363.
