Visions in Leisure and Business

**An International Journal of Personal Services,
Programming, and Administration**

Visions in Leisure and Business

There is a growing demand for information about leisure and business processes that apply to personal services, programming, and administration. Leisure is those services and activities engaged in during time that is free from duty or obligation. It is a vehicle that helps the individual change his life, thereby, making a more positive contribution to his organization and society.

VISIONS IN LEISURE AND BUSINESS is an interdisciplinary umbrella that seeks to improve delivery systems. Business processes in the leisure service industry are different because they are based upon freedom of decision as well as supply and demand. The purpose of the journal is isolation and integration of those business processes that relate to the leisure service industry. Leisure and its associated services have a unique impact upon the business institution, especially in its ability to act as a catalyst to improve the individual and his/her environment. This journal will help to improve and broaden current theory and applied methods through stimulation of ideas among traditional and nontraditional aspects of the leisure and business institution.

VISIONS IN LEISURE AND BUSINESS will not compete with existing journals, but act as a complement to fill the void between the application of leisure sciences and business processes. The first step is the exchange of ideas to give direction to the development of a comprehensive framework for the better application of information. There have been eight conceptual categories identified where professionals need information:

The success of the journal depends directly upon interaction among professionals and their contributions.

There is an unprecedented demand for leisure and only through better management and the application of business processes will the current demand be met by an expanding industry. The application of sound leisure and business principles is one way to control future development of the leisure institution so that it will have a major positive impact on society.

Subscription inquiries should be sent to: Appalachian Associates, 615 Pasteur Avenue, Bowling Green, Ohio 43402.

INTRODUCTION

This is the second of two issues devoted to the Resort and Commercial Recreation Symposium. The basic theme through the two issues has been the maturing of the industry and the development of the sophisticated consumer. The purpose of this second issue is implementation and outcomes.

The 21st century will be a time in which significant change will occur in the profession. As the 21st century begins, this is a time to reflect upon the profession and the important elements that will shape it. The implementation and outcome issues are the factors that will influence the quality of programs and services delivered to consumers.
