Bee Gee News May 29, 1940

Bowling Green State University
Progress in the word for Bowling Green. In the current year, the University has taken great strides toward becoming an outstanding institution of higher learning and a center of cultural advancement.

For several years undergraduates and alumnus have been saying, "Give us a chance—some day Bowling Green will be the greatest of all American universities." Bowling Green has shown that she can hold her own with any comparable institution.

Fired with her youth, eager to take its place among the great, aspiring and progressive, and dignified, Bowling Green has emerged from its shell and is ready to face the world. This is Bowling Green's youth a well rounded education and professional training.

A few of the events during the past year that have marked Bowling Green as a progressive university and that have lost outsiders know that the walls of the former

FORMAL SCHOOL AND OUTING EVENTS ARE TAKING PLACE. THE RECORD BREAKING ENROLLMENT OF 600 FRESHMEN WITH TOTAL ENROLLMENT OF 4,500, CONFIRMS THE THOUGHT THAT BOWLING GREEN DEFINITELY HAS SOMETHING TO OFFER.

The 1940-41 year has completed last year's. The total number of buildings and classes was the greatest, but the physical equipment of educational plant was the greatest. These three great changes are noticeable only to passer-by. Internally the improvements have been as far reaching.

This year marked the initiation of magna cum laude and cum laude honors for graduates. A public function will be given to honor and improve the scholarship of the students. The five professors who have been teaching in the University for the past 25 years and who have been president of parts of the class will be given their diplomas and are honored for their services to the University and the students.

The new constitution of the University includes the following: There will be a new degree, the Bachelor of Science Degree in Education, which will be given to students who have completed a certain number of credit hours in the field of education and who have been recommended by the faculty. There will also be a new degree, the Master of Science Degree in Education, which will be given to students who have completed a certain number of credit hours in the field of education and who have been recommended by the faculty. There will also be a new degree, the Doctor of Education Degree, which will be given to students who have completed a certain number of credit hours in the field of education and who have been recommended by the faculty.

In a letter to the editor of the Bee Gee News, President F. J. Stagg praised the efforts of the students and faculty and stated that Bowling Green is definitely has something to offer.

The newspaper office in the Library, Frances Dodds and her staff for the literary work, to Jim Hunter, activities manager for the athletic work, and to Bill Cromer and his staff for the financial work. The new constitution of the University was adopted by the faculty of the University. The speech school will produce and present "Give us a chance—some day Bowling Green will be the greatest of all American universities." University looks forward to greater advancements under progressive policy of President F. J. Stagg.
believe that to be the bad effects of peace movements. It may be that they have more commonsense than I. But first with the fate of their nation; secondly because it makes no difference. A very particular interpretation of the undergraduate peer movement. All the President's Men," by Bob Woodward and Carl Bernstein, is one of those books in which the fate of our nation is brought to us during these years was the hot seat for mental health.

The college press early challenged this view. In a weekly column, Jolly Daily has always had the lead with an editorial which said in part: "But the jury is not yet out. We are not yet aware, that nothing is won by war. America be- lieves that there are many ways to settle disputes by dying on a battlefront.

"Some authorities say that at least half of the world's population now or in the future will fight in some form of war. ..." FDR seemed to be a self-centered worried about the outside world's problems. In the crisis of World War II, he became the national leader and made the American people believe that they could win the war. And he did. In the end, it was the American people who won the war, not FDR. The war was fought by the American people, not by a single man.

The next day's headline of the New York Times said in part: "The war is over..." And the war was over. But the war was not over for the American people. The war was over for the American people, but it was not over for the American people. The war was over for the American people, but it was not over for the American people.

During a year that was marked by numerous occasions
when the definition of success was far less than $16,000,000
and the house warming for the $166,000 women's building. Bowl-
ing was the year in which a new athletic achievement in the field of major sports was
recorded. The teams had the best season of their
short existence.

Ocker-men, Cagers
been organized gridiron teams at the
University. They recorded the fine
record of six wins, one defeat, and
one tie.

Bluffton College, whom they topped
by drubbing the Golden Flashes 34-0
in conference play. This was the first
time Madaras was second
in the state, gaining valuable ex-
perience for action the next year. The
in the state and conference ranks.

The only teams to beat the Falcons last year were the Findlay
and the Steller. The Findlay nine
scored two out of the three. The
and Orange, crowns and proved they will be great资产 to
the new, improved basketball team.

The only honor in the historic year was
the fourth place in the state-wide race,
the results were awarded Dorothy Bright, Alvira
Weckerly, and Helen Worstell.

Although the Falcon racket wield-
ers under the direction of Budd Cox,
showing of Ed Wellner and George
Kormazis won out after a strong
fighting the defending champs, the
Oberlin's cardinal-clad track-
prove they will be great assets to
the defense, and as might be pointed out, the
home-hooded star.

The only way to beat the Falcons last season was by
the decision of the thirty-nine, between
the Ohio Northern and the Findley
and Orange, crowns and proved they will be great assets to
the new, improved basketball team.
