Five Buildings Scheduled In Expansion Program

With the first two units of the university building expansion already well underway, campus construction is being accelerated to hasten completion of the five buildings projected under the building program.

Two defense courses, one in woodworking and one in general machine shop, have been set up so that students may apply their new skills to actual work, the classes are open to any enrolled student between the ages of 17 and 24. Professors in the department of business education in the university auditorium today at 10:15 as the major student dramatic offering of the summer term. Dr. Kenneth B. Haas, registrar, is personally acquainted with many leading European universities and has done summer study in England, and at William and Mary college.

German Economist Appears Today On First of Summer Programs

Dr. Gerhard Schacher, German economist and economist, will lecture in university auditorium today at 10:15 as the major student dramatic offering of the summer term. Dr. Schacher, who will be the director.

Tryouts for parts in the cast will be held beginning this week and those interested are requested to register today and tomorrow on sheets posted on the bulletin board in the Well. Anyone enrolled for the summer term may register for a part in the comedy. The cast of nine consists of five males and four females.

C. P. T. Course To Be Offered

A Civilian Pilot Training course will be offered this summer and is open to summer students, according to Prof. J. I. prophet, of the appointment of Mr. John W. Bunn, director of the student flying program on this campus.

At cost to the student other than for physical examination and insurance, the program offers 72 hours of ground school training and 30-45 hours of flight training at the Findlay airport. Students between the ages of 17 and 26, who have had one year of college training, are eligible. Males only will be accepted for the summer program.

Ground school classes, held at the university, will be conducted at night, Flight Instruction at the Findlay airport will be in the daytime. Practically all transportation will be furnished the student if desired. At the end of the summer course close today and may be made in the office of the Provost.

Many university students, including many who had completed the flying course since it was inaugurated here under government supervision last year. A number who received their first flight training here are now in government flying services.

Conference On Reading Convenes Here On July 7

The problem of teaching reading is being considered at a six-day conference of educators of northwest Ohio to be held on the campus July 7 to 12.

W. P. Jordan, director of the university's Extension Service, is chairman of the conference for classroom teachers, supervisors, and teachers which has been an outgrowth of an investigation into the problems of teaching begun under the direction of the deans of the five Ohio state universities. The conference, similar to the one to be held here will be the first of a series of such annual conferences.

Among visiting lecturers and panel leaders will be Miss Ruth (Continued on page 3)

The Building Program...

Expansion of this university, which is rapidly coming of age, will be much in evidence this summer to students who will have a ring-side seat for a building program which never again will radically change the established campus skyline.

Five new buildings, either now under construction or scheduled to be started before fall, will rise on vacant campus spots. Almost over night, with a suddenness that makes returning "old grud" heads swim, have new building spouts as a result of the administration's intensive campaign to provide for a growing student body that is taxing existing university buildings to the breaking point.

Housing facilities for girls, one of the most pressing problems, is being solved by a combination series of four small dorms along Thurlow avenue. Eventually the dormitories will include a large dormitory so that the total capacity will accommodate most of the girls registered in the fall.

The hospital unit will provide students with 1941 facilities for medical care and will relieve anxious parents when John and Mary are ailing.

As union building officially the "Falcon's Nest," will provide a long needed campus relaxation spot, which promises to be the most popular meeting place for students and alumni.

On the horizon is a new science building and a new chemistry building, definitely a project of the future, Dr. Prout announces that plans already are being made.

Well-Rounded Growth...

The building program is a manifestation of the remarkable development that this institution has undergone in recent years, all of which has been an outgrowth of the almost unbroken series of developing the student enrollment for several years.

Educationally the university has found that with its increasing responsibilities and growing population, it needs to take large steps in step with mounting student enrollment. New courses and new degrees during the long session would be established subjects have been reworked and revitalized. Social and honorary organizations have increased in number, and new traditions already are evolving from the new and thriving growth.

But What Of The Future?

The year 1941 is a question mark to most individuals and most institutions and certainly to this university, as well as all other educational institutions.

Bowling Green State university by construction has been an organism, a natural one stimulated by artificial and fancy promotion, but has come demands placed upon her by her constituencies—the people of northwestern Ohio. The new administration is called upon to face efficiently, and if she is now to continue to serve and function properly, the administration must have continuing student body enrollment near the level attained this year.

Bowling Green State university's enrollment problem will not be solved completely if every student who is on the campus now and who has been here for over two years doesn't return. Every returning student and students alike have known him only as "Steve."

However, even this friendly term doesn't deserve all the credit. With a smile, he is a friend. Probably not one student ever fails to yell a cheery "Hi, Steve!" when they see the reticent student as he passes along usual rounds. Steve knows probably fifty per cent of the student body name and his popularity is such that he has an "insulting" acquaintance, the retired coach, with most of them.

In the interest of this university regulations, Dr. Stevens has been chasing couples out of dark corners of the campus for they smother at it. As Steve himself expresses it, "I don't like to see the boys smoke a hard-boiled cup. I like kids, and I like to have them smoke.

Steve has never had much trouble with real crime,burglar and thieves. Once, about ten years ago, two men gained entrance to the building program, and tried to break into the business office, all they did was go around the noise and went to investigate. He saw the two shadows. They were a bit violent, but they fired just one shot in Steve's general direction and fled. The bullet just missed Steve and shattered the door glass in the main entrance.

And then there was the time the usual wooden stadium caught on fire. Steve was attending his usual early morning rounds and, passing the bleachers, thought he smelted something funny. However, he attributed the smell to his own smoking operation, all he did was go toward the noise and go. He then started to wash the fire from a bucket with a water. This "cigarette fire," by the way, is being regretted, the university regulations prohibit smoking in the buildings.

Steve, who works from 10 at night until 6 in the morning, is never lonely. After 12 years of touring the campus in the wee small hours, he knows where he can find companionship. Sometimes he drops in at the drama workshop backstage, and chats with some of the technical crews, all the while in preparing a University Players production. If he is not there, he goes to the dormitories. Students still working, although dead on their feet, the old guys who don't like to be a 'meanie'; I'm not a hard

Summer Riding Activity Planned At University Stables

Facilities of the university's Heddon School of Riding will be open to summer students. Mr. H. G. Hedden, director of the school, has announced.

Rapidly developing into one of the leading university riding schools in the country, the Heddon Fund is unique in that it is located directly on the campus and has available for students suitable trained and blooded saddle horses which is equal to that owned by many exclusive private stables.

A horsemen's magazine of national circulation will feature the university's riding program with an illustrated article in the July issue. Out-of-state advertisements for admission will be given every Wednesday of the summer session with the exception of the last week.

Next week Dr. Mary E. Woolley, president emeritus of Mount Holyoke college and one of America's leading women educators, will lecture.

Mrs. Woolley, professor emeritus of economics at Yale university, and a former editor of the Chicago City Opera company, will lecture on music department head, was announced earlier in the year, to close the administration of the department and the registrar's office. Mr. C. D. Perry, university registrar for 18 years, retired at the close of the term and his place is taken by Mr. John Runin who has been assistant in the office.

Resignations after long terms of service bring changes in the music department and the registrar's office.

An announcement of the reappointment of Prof. Tunnelle, who has become a member of the faculty group and new duties to some present members of the staff.

Bristol, Milwaukee State Teachers college; Miss Eloise Remswey, Wayne university; Dr. Wilba Roseboom, Dr. Samuel Kuschner, Dr. Laura Zirnbauer, and Prof. H. W. Nisonger, all of Ohio State university; Dr. Dewey B. Stults, University of Iowa; Prof. J. Garber Drushal, Illinois university; and Wilfred E. Blinkley, Ohio Northern university.

The special lecture will be given by Ray Fernando Alcgate, assistant in the office. Mr. C. D. Perin will participate in the more rapid developing of its board of trustees.

The usual reasons. Even though the flag is up for everyone a chance to express his choice of any pound rock up a steep hill, they will be open by consulting the Mr. Cox.

A Man With Slippery Fingers

was carrying a forty pound rock up a steep hill, when the rock slipped away and broke into four pieces.

The problem is to find the weight of any piece, if they are of such weights that they cannot be weighed (the correct weights), by the use of a simple balance, weigh any simple numerical weight between 1 and 40 inclusive—that is, 1, 2, 3, 4, 5, 6, etc.

There is a simple solution. As a reward for super - cerebrating, Harvey's will award the one with the first correct answer his choice of any dinner on the menu.

High School Students To Come For Second Speech School

High school students of Ohio are being offered the opportunity of "going to college" for five weeks this summer when Bowling Green State University throws open its campus for the Summer Speech of Speech which begins June 22.

Modeled after similar schools conducted by a few of the country's leading universities, this speech school will offer high school students and college seniors who have been active in some phase of speech or dramatics all the facilities of the university speech department for this "graduate" course.

Director of the school will be Prof. Elden T. Smith of the speech department who inaugurated the summer course last year. Others on the staff will be Miss Helen Heisegardner, dramatics arts teacher at Sandusky High School, B. E. Kennedy, Bowling Green university senior and an outstanding debater, who will assist with debate. Included in the curriculum will be courses in speech fundamentals, dramatics, public speaking and debating. Of the many activities of the three-and-a-half week session, one of interest to high school students is the course in film making, first scene of which were made at May Day exercises this spring. Prof. Elden T. Smith is head of the production of the film which will tell the story of a student's year at the university.

The film will be edited, titled, and will be shown to alumni groups, senior classes, Parent-Teacher associations, service club programs and the like. It will take one year to complete the filming of the picture and it is hoped that the film will be ready for showings at next spring's graduation.

Guest Instructors Augment Summer Staff

(Continued from page 1)

at Temple university, will conduct courses in the department of business education during the latter part of the summer session. Dr. Aspbaugh, a native of Ohio and holder of three degrees from Ohio State university, also is a national authority on business education.

Dr. Wilbur A. Yaacov, who will teach in the department of education, is elementary principal at Euclid, Ohio, and is chairman of the executive committee of the Ohio Policies Committee of the Ohio Education Association. His doctorate is from Columbia university. For six years he was superintendent of schools at Harrington Park, New Jersey.

The summer history staff will be augmented by Dr. Raymond W. Bollin, who, for the past 12 years on the history faculty at Ashland college, Dr. Bixler has taught at Western State Teachers college, and has written extensively, especially in the field of South American history.

Dr. Wilfred E. Blinkley, professor of history and political science, Ohio Northern university, will offer courses in political science. Dr. Blinkley, who has studied at Ohio State, Harvard, and Chicago universities, is the author of "The Powers of the President" and has a text in political science.

Color Film Used To Show Student Life

Life on the campus of Bowling Green State university is the subject of a feature movie being filmed on the campus this spring. Prof. Elden T. Smith is head of the production of the film which will tell the story of a student's year at the university.

The film will be edited, titled, and will be shown to alumni groups, senior classes, Parent-Teacher associations, service club programs and the like. It will take one year to complete the filming of the picture and it is hoped that the film will be ready for showings at next spring's graduation.

The picture will be filmed by W. E. Singer, Dr. W. E. Heideman and Ivan E. Lake and will be recorded on 16mm television film. The movie will be presented in story form with a plot and will follow four students through the year's activities in all phases of college life.

Student loads are Kenneth Rothliebergarter, of Lima; Virginia Patterson, Bowling Green; Joe Conrad, Canton; and Joan Norsworthy, Elyria.

First Units In Building Program Are Started

(Continued from page 1)

fully equipped hospital and infirmary unit with a 60 bed capacity. It will be complete with X-ray and surgical equipment, and will house the offices of the university physician which now are located in the men's gymnasium.

The top floor of the building temporarily will provide dormitory space for 50 girls until such time as the infirmary unit grows the capacity of the lower floors.

The time interval which, according to law, must exist between signing of the appropriation bill and letting of the contract can be shortened, construction on the health building and the two small dormitories cannot begin before Fall. Attempts are being made, however, to have this technicality waived, according to Dr. Yaacov, President Prouty, so that a permit construction to begin this summer will not block the program for all the units are completed.

An American Problems course for upperclassmen will be conducted by J. William Miller, teacher of social studies at Sylvania. Mr. Miller has done graduate work at Ohio State and Dukes universities and during the past summer participated in the Workshop on Teacher Education project conducted by the two state universities.

Prof. J. G. Druhal, professor of speech and coach of debating teams, Capital University, is added to the speech faculty.
