Bowling Green State University will again have over 1500 students enrolled for the first semester of this year, according to Registrar John W. Bunn. This represents a markedly slighter drop than at first expected.

This prospective total registration was compiled on the basis of applications from 1828 students, 211 of whom have been admitted, plus which may make it total, the head count will be as high as 1839, as opposed to last year's semester enrollment of 1845.

Record Breaks

The college record for the number of men and women, the enrol- lment in each college, the growth of departments will not be available, until the Registration Bureau has completed the extensive record keeping of the college. As enrollment in this university is at all times increasing, we expect that new records will be established in every department.
