Two faculty members, an administrator and 24 members of the Bowling Green State University circle of Omicron Delta Kappa, the most prestigious national and honorary leadership honor society in the nation, were inducted into the society during ceremonies held Dec. 7.

The faculty members are Sherilyn Brown, division of intercultural services, and John Farver, geology. The administrator is Jannie Blake, an associate athletic director and senior woman administrator.

The students, all of whom are either juniors or seniors, were selected on the basis of excellence in one of five categories: creative and performing arts, social, service, religious and campus government, activities, scholarship, athletics, or professional. Brown received the Omicron Delta Kappa Award from the American Counseling Association in 1995 and the Friends of the University’s Libraries. Students and service awards in 1998. She is a member of Pi Lambda Theta International and the Professional Association in Education Honor Society.

Three chosen for induction into leadership society

Before coming to Bowling Green, she was the assistant director for all of campus compliance and the senior woman administrator for the University of Hartford for three years. She is a member of the Falcon Club, the Student-Activities Planning and the Coalition for Student Affairs. Omicron Delta Kappa was founded on April 15, 1915, at Washburn University and Lee University.

Summer study is a student advantage

Beginning in 2001, students who choose to stay on campus can benefit from the “BG Summer Advantage,” according to Executive Vice President Linda Dobb. By taking courses during the summer months, they can not only accelerate their progress toward a degree but also be eligible for a 30% discount on on-campus housing and, if they are graduating, a rebate on campus dining.

Local business owners, community members and the police have also been of much help. The Cops On Campus program, in which teams of trained, radio-equipped officers patrol the university five nights a week, has proven to be a significant deterrent to the problem.

Research has shown that the current rate of rape is at least 15 cases per semester or who attend at least one summer session are most likely to graduate on time, Dobb said.

A wide variety of courses can be offered when campus buildings are open, and several courses can be offered in a variety of formats. Judy Donald, director of the Office of Continuing Education, said that the university can offer courses in a variety of formats. Judy Donald, director of the Office of Continuing Education, said that the university can offer courses in a variety of formats. Summer advantage

degrees. More departments are beginning to schedule courses on a yearly rather than a two-semester basis," Donald said. She provides departments a five-year history of summer offerings and student interest to help them plan their schedules. Using this information, Roger Thibault, associate dean for resources and planning in the College of Arts and Sciences, has identified several departments as the focus of the summer offerings. These include biological sciences, psychology, interpersonal communication, telecommunications and computer science.

“Our goal is to offer a diversity of courses in both the major and non-major areas of these departments,” she said. “We want to show students that there are lots of good things happening and lots of good courses during the summer.”

In addition, she hopes to recruit faculty to pilot a program that would allow students to take any of four general education or basic required courses through a series of videotapes and email communication with faculty. The core he is most interested in for this year are Sociology 101, Philosophy 101, Arts & Sciences 250 and Mathematics 115.

Faculty who participate will receive significant compensation, Thibault said.

There are also potential benefits to BGSU from an enhanced summer schedule. A statewide goal of Ohio for higher education is that students should graduate in a timely manner, and institutions that are successful in achieving this may receive additional funding.

Another boon to the University is that undergraduate summer courses take some pressure off fall course offerings and help the institution better utilize its space during traditionally "off months.

President to hold United Way fete

Please join the celebration hosted by President Sidney Ribeau and the BGSU United Way team to thank everyone who contributed to the success of this year's United Way campaign. The festivities will be held from 4-6 p.m. on Wednesday (Dec. 13) in the McFaul Center Gallery.

The campaign will continue until Dec. 31. Donations can be sent to JoAnn Kroll, campaign manager, 300 Saddleme Building.

Tech grants awarded campuswide

University technology grants have been awarded to about 120 faculty and staff members with creative ideas for using technology. The grant program is designed to encourage use of the infrastructure being built via BSGSupermet.

A listing of grant categories and recipients is on the Web at www.bgsu.edu/bsgsupermet, under "Progress Report."
