INTRODUCTION

This issue of VISIONS IN LEISURE AND BUSINESS calls attention to the critical issues of the 21st century. The common thread of these articles is administrative skills and processes that relate to infrastructure. Each of these articles suggests that an integrated systems approach that involves public/private collaboration is necessary to achieve more comprehensive and effective service. The need is for a client based system that recognizes the ever-changing sophistication of the consumer. The focus must be upon rapidity of change.
