An Art to Craft

Carl Hall rebuilds one-of-a-kind plane

By Joseph LaSala

ART AND CRAFTS

GALLERY OF WOODWORKING

What is important was that this plane had its own unique characteristics, in that it was not a standard production model. The plane was the result of the efforts of a single individual, who wanted not only to restore the plane to its original condition, but to also improve it further. The result is a unique plane that is both a work of art and a functional object.

At 9:30 a.m. on Saturday, February 6, 1982, Carl Hall, an art student at the University of Michigan, presented his new plane to the audience at the University of Michigan, located in the gallery of woodworking. The plane, which was designed and built by Hall himself, was the result of a year's work in reconstructing an old model Air Mail A1 aircraft. Hall was very excited about his plane and was eager to share his passion with others.

Hall explained that the plane was originally built in the 1930s and had been used for a variety of purposes, including transportation and mail delivery. However, due to its age and wear, the plane was in need of repair and restoration. Hall said that he had spent many hours working on the plane, and was very proud of the final product.

The plane was made of wood and had a unique design, with a combination of both aesthetic and functional elements. Hall explained that he had taken great care in selecting the materials and colors for the plane, and had put a lot of thought into the design and structure of the plane.

Hall said that he was planning to sell the plane soon, and was looking for a suitable buyer. He hoped that the plane would find a new home and be loved and cherished by its new owner.

Hall was very grateful for the support and encouragement he had received during the process of building the plane, and was looking forward to sharing his work with others in the future. He was especially grateful to his family and friends, who had been there with him through thick and thin.

Hall's plane was a testament to his hard work and dedication, and was a source of pride for him. He was very pleased with the final product, and was excited to see what the future would hold. He was looking forward to the day when his plane would find a new home and be loved and cherished by its new owner.
Technology programs vital to Ohio industry

Student SME chapter 'outstanding in the nation'

Faculty forums scheduled as charter revision begins

Technology programs vital to Ohio industry

...new technology...according to each. It's a varying hours in an attempt to take advantage of such new and accountants - sales. Industry and the Society of Manufacturing Engineers (SME) has been selected by American Youth Publications, Inc., for its publication "How to Read and Write Microcomputer Communications," as the first such facility at an educational facility of the National Society of Professional Engineers...

Student SME chapter 'outstanding in the nation'

For the first consecutive year, Bowling Green's chapter of the Society of Manufacturing Engineers (SME) has been named "outstanding in the nation," one of only two chapters in the nation to receive this award for the second consecutive year. The chapter was founded in 1973.

Faculty forums scheduled as charter revision begins

Faculty was being urgently requested by the College Senate to help in the revision of the Academic Charter. Faculty Senate legislation was instrumental in having the entire institution's input on the charter. Direct toward specific proposals for charter revisions were made.

Reading expert writes new guide for principals

A new book by Dr. Robert L. Hiltscher, educational curriculum and reading consultant for the Ohio Department of Education, has been published. "The Principal's Guide to Improving Reading Instruction in the Classroom," was published by the American Library Association. It is the first book to be published by the Ohio Library Association.

Facility qualified for upgrade by Ohio University

Dr. Robert Hiltscher, in addition to his writing, Hiltscher has been an active member of the American Association of School Librarians, American Library Association, the National Council of Teachers of English, the American Association of School Librarians, and the Ohio League for Educational Improvement. He has also been a speaker at the American Library Association Annual Conference, the Ohio Library Association Annual Meeting, and the Ohio Reading Association Annual Meeting.

Reading consultant headaches conference

Reading consultant headaches conference. John Manning, one of the most widely traveled and respected reading consultants in the United States, will host an all-day Annual Childhood Conference, March 30, 11 a.m. to 3 p.m. in Carillon Hall. Manning’s address will be entitled, “The Reading Session.” Dining room, to be held on Monday, March 30, is scheduled for noon to 1 p.m. for the special meeting of the staff. Manning will provide administration and parents.

Fees for conferences are $5 per person for enrollment of one for four hours of graduate credit.

Susan Demar, educational coordinator, Bowling Green State University. Information is available from Demar.

Mon., Feb. 7

Classified Staff Advisory Committee

When new members are selected for the Classified Staff Advisory Committee, the committee will be increased by five. The decision to make the committee larger grew out of a request by Connie Winder, who chairs the committee, to have a larger group come as a result of a preliminary report to the committee by Charlotte Slawens, campus safety and security, who chairs a committee. Slawens is drafting a charter for the group. Recommended by the staff committee is that additional members be added to make the committee more representative of the campus. The committee must be at least as large as the unit served.

Sexton and Laura Enne have volunteered to serve on the committee. Sexton has been involved in the library program for many years. Enne is an assistant professor of the library science.
