Faculty, staff end long-time University careers

Two faculty from the College of Arts and Sciences, an administrative assistant in the Graduate College, and a professor from the College of Business Administration have concluded their full-time careers at the University, effective at the end of last semester.

Retiring were J. Robert Bashore, English; Carl W. Hallberg, biological sciences; Dorothy Bentley, Graduate College, and Harvey E. Donley, accounting and management information systems.

Dr. Bashore, who received his master's degree from the University in 1946, joined the faculty in 1948 as an instructor. He left the University for a brief time (1949-50) to accept a post as teaching assistant at his alma mater, the University of Wisconsin at Madison, returning to the English department faculty where he has remained since.

A specialist in both 19th century American literature and the pedagogy of teaching composition, Dr. Bashore also has devoted much of his time to the University Honors Program, re-instituting that program on campus in 1978 and directing it until 1981. He is a member of the National Collegiate Honors Council and plans to continue his association with the University Honors Program and with regional and national honors associations during his retirement.

He received a grant to conduct two summer institutes on teaching composition in 1986 and 1987, and he also served co-director and director of the Humanities Cluster, an interdisciplinary, team-taught program for freshmen, in 1975, 1976 and 1977-78. He was instrumental in developing the science, as well as honors seminars in the social sciences and humanities in 1980-81.

A member of numerous University committees, he chaired the Arts and Sciences Curriculum Revision Study in 1971-73 and was elected to several three-year terms in the Faculty Senate, serving as secretary of the Senate in 1974-75 and 1975-76.

A member of Omicron Delta Kappa leadership fraternity, he was selected as the ODK "Man of the Year" in 1969.

Although he has written and presented numerous professional papers, it is Dr. Bashore's teaching that has gained him a reputation both on and off campus. He was selected as a Representative University Teacher during the inauguration festival for former President Holts Moore, and he received the Alumni Association's Distinguished Teaching Award in 1972. That same year he was selected an Outstanding Educator of America, and in 1975 he received a University Special Achievement Award for Teaching.

Dr. Bashore will continue teaching under the Supplemental Retirement Program.

Also retiring is Dr. Hallberg, who joined the faculty in 1951 as an assistant professor of biology.

A retired lieutenant colonel with the Air Force Reserve, Dr. Hallberg has taught biology at both the graduate and undergraduate levels during his years at the University, and for six years he team-taught an introduction to Health Careers course in the College of Health and Community Services. He was interim chair of the biology department from 1974-76.

Since 1956 he has advised the University's pre-medical, pre-dental, pre-optometric, pre-pediatric, pre-osteopathic and pre-veterinary students.

A specialist in developmental biology, comparative anatomy, parasitology and embryology, he has developed courses in morphogenesis, embryology and comparative anatomy at the University.

Dr. Hallberg was a long-time member of the University Athletics Committee, chairing that group for several years. He also was the University's faculty representative to the National Collegiate Athletic Association, the North Central Association of Colleges and Secondary Schools, the Mid-American Conference and the National Association of Intercollegiate Athletics.

In 1981 he received a plaque in recognition of his service to University athletics.

A fellow in the American Association for the Advancement of Science, he served two terms as president of the Sigma Xi science honorary and also is a member of Omicron Delta Kappa leadership fraternity.

He will continue teaching under the Supplemental Retirement Program.

Dr. Donley joined the Bowling Green faculty in 1959 as an associate professor of accounting, returning to the University from the University of Evansville. Prior to that he was an instructor at the University of Missouri.

From 1967-73 he was director of graduate studies in business, and he

Biology proposal among semifinalists for Eminent Scholar Program funding

A proposal submitted by the biological sciences department for funding under the Ohio Eminent Scholars Program is among 24 semifinalists announced recently by the Ohio Board of Regents.

Nine of those 24 semifinalists will eventually receive a $500,000 matching grant from the state under the new program, designed to attract nationally and internationally known scholars to Ohio universities.

Bowling Green's proposal to bring a scholar specializing in plant biotechnology: genetic engineering to campus remains in competition for one of the $500,000 awards. The proposal Eminent Scholar would work closely with the University's genetics program in the biological sciences department, offering enhanced opportunities for the training of new scientists, collaborative endeavors with scientists at other institutions and cooperative content and grant research sponsored by private and government agencies.

Plant biotechnology is a pioneering area in the sciences, offering possibilities for such immediate and long-term applications as enhancing food production and accelerating forest breeding programs.

The fact that Bowling Green's proposal was selected as a semifinalist "is a manifestation of both our quality as a University and the quality of the biological sciences department," according to Kendall Baker, dean of the College of Arts and Sciences, who added, "This is tremendous recognition for our programs."

The regents received 57 original proposals in mid-October. Fourteen of the semifinalist proposals were submitted by Ohio State University. The other semifinalists include five proposals from the University of Cincinnati; two from Ohio University and one each from Cleveland State University and the University of Toledo.

The Ohio General Assembly funded the Eminent Scholars Program in its 1980-82 biennial budget "for the purpose of fostering the growth of eminent scholars and their academic programs while bringing educational resources to bear on compelling statewide problems."

The legislature has made available to the regents, who are administrating the program, $4.5 million to be divided among the nine finalists which will be announced in April, according to Dr. Baker.

A committee chaired by Novice Fawcett, president emeritus of Ohio State, screened the original proposals. Teams of at least three committee members will visit each of the 24 departments and areas which remain in the competition following submission of final proposals which were due Jan. 16. An on-site visit is expected here sometime in March, Dr. Baker said.

Universities receiving the $500,000 matching grants will be required to provide an additional half-million dollars for the program to attract an Eminent Scholar to their campus.

"Needless to say, a $1 million endowment would be a tremendous boon for the biology department," Dr. Baker said. "We are very excited about this possibility and are hopeful of receiving the funds."

An Ohio Eminent Scholar would be a particular boost to the University's graduate program in biology, he added, noting, however, that the work of the visiting scholars also is expected to contribute to the development and economy of the state.

HAYNE WOODY BROWN, professor of law and director of the Center for the Study of Law and Public Policy, has been named director of the Center for International Legal Education and Research.

Brown will succeed Richard C. Block as director of the Center for International Legal Education and Research. Block, who served as director for 23 years, will continue to teach at the University.

Brown, who joined the faculty in 1969, has served as a scholar in residence at the American Law Institute and as a visiting professor at the University of Cambridge. He has also been a visiting scholar at the Max Planck Institute for Comparative Public Law and International Law in Heidelberg, Germany, and at the University of Amsterdam.

Brown has published extensively on international law and the role of the United States in international relations. His most recent book, "The Law of International Organizations," was published in 1995.

"I am honored to have been selected for this position," Brown said. "The Center for International Legal Education and Research is a leading institution in the field of international law and I look forward to continuing its tradition of excellence in education and research."
**Research clinic to cure malignant warts**

New help is available for faculty and staff seeking external support for programs and projects. The State University of New York Research Foundation offers a new source of funding. The Research Assistance Service Office, 120 McCull Center, will offer a workshop in Fall Assistance (also known as RAS) for anyone planning to submit or prepare proposals for external funding. Application deadlines for RAS awards for Fall will be 5:15 p.m. Monday through Friday, during the fiscal year, for which no appointment is required. Christopher C. Cox, director of research services, and Nan Canavan, associate director, will be available for half-hour minute sessions to assist with proposal preparation and faculty and staff should arrange their session with the Research Assistance Service office, by appointment, in advance.

The workshop will provide individual assistance to proposal writers to help them develop individual and institutional proposals that can be reasonably addressed in a short meeting.

Among the areas in which the staff will offer assistance are conceptual paper review; appropriations of a proposal; purposes and types of proposals; findings and conclusions and strategies for problem areas in proposing a budget; the importance of refining and monitoring your proposal; external review; and strategies for successful proposals. The assistance will include advice on both things as finding sources of critical review articles and research drafts. The clinic hour should not be used as a forum for meeting and discussing the new week's work or to

**Faculty & Staff**

**Presentations**

Robert Anderson, geology, presented a paper on "A Late Cretaceous Marine Deposits of the Gulf of Mexico." The presentation was illustrated with slides from several sections of the Gulf of Mexico. The paper was presented at the meeting of the Geological Society of America Nov. 11 in Washington, D.C. The presentation was attended by about 70 people.

A. John Goss, associate professor of sociology, presented a paper entitled "Social Change in the Urban Area." The paper was presented at the meeting of the American Sociological Association Nov. 11 in Washington, D.C. The presentation was attended by about 100 people.

**Undergraduate Council**

Proposals for two new minor requirements were discussed by the Undergraduate Council at its meeting Nov. 12.

Ellen Williams, special education, presented a proposal to establish a minor in special education, and Jan Schonfield, English, presented a proposal to establish a minor in reading-language arts. Both proposals are scheduled for a second reading in January.

As proposed, the special education minor would provide course work, including three required courses: "Educational Psychology," "Curriculum Development," and a special education minor is a one-year program in which students would earn a minor in reading-language arts. As proposed, the reading-language arts minor would require completion of 15 of the 27 hours needed for the major program, leaving students only a 14-hour minor requirement. The Undergraduate Council would be responsible for the selection of course work for the minor, and for the selection of course work for the major. The Undergraduate Council would also be responsible for the selection of course work for the minor, and for the selection of course work for the major.

Dr. Williams explained that the state of Ohio requires that students be granted a minor in their bachelor's program. The need for a minor in regular education is generally recognized by educators, special education teachers, and reading-language arts teachers. Dr. Williams also said that the state of Ohio requires that students be granted a minor in their bachelor's program.

**Speed grants available**

The Faculty Development Committee has approved grants of approximately $250 to faculty members during the 1985-86 academic year. The grants are available for faculty members who wish to improve their teaching methods or to improve their research activities.

Professor of psychology, presented a paper entitled "The Use of Learning Centers in the Research Laboratory." The paper was presented at the meeting of the American Psychological Association Nov. 11 in Washington, D.C. The presentation was attended by about 50 people.

**PhD contributions increased**

Effective Jan. 1, 1966, the State Teachers Retirement System Board of Trustees has increased the percentage of the contributions that employees will contribute to the retirement fund. The new percentages will increase this month from 5.5 to 5.75 percent of gross income.

Employees' contributions increase from 13.5 percent to 14.5 percent.

All University employees who contribute to the State Teachers Retirement System will contribute 15 percent of their salaries to the fund in the future.

**Five new rates set for campus vehicles**

The following new rates for leasing vehicles through University Transportation Services are now in effect:

- Sedan: $31 per day plus the cost of gasoline
- Station wagon: $37 per day plus the cost of gasoline
- Van: $42 per day plus the cost of gasoline
- Truck: $54 per day plus the cost of gasoline
- Station wagon: $38 per day plus the cost of gasoline
- Van: $48 per day plus the cost of gasoline
- Truck: $60 per day plus the cost of gasoline

All rates include the cost of insurance for the vehicles, which must be paid by the lessee. The rates are subject to change as advance warnings of increased cost of insurance for the vehicles.

**Fund established in Lenhart's memory**

A memorial fund has been established in honor of Dr. Robert B. Lenhart, a member of the faculty, to provide financial assistance to students of the University. The fund was established by a group of friends and former students of Dr. Lenhart, who died in 1985.

The fund will be administered by the University's Office of Student Affairs. The fund will be used to support the activities of the University's Office of Student Affairs, and it will be used to support the activities of the University's Office of Student Affairs.

Shatzel Hall
reminded that Feb. 6 is the deadline to submit academic department offices or in the Lot 11 has been temporarily closed and fenced-in to the east.

PROPOSAL DEADLINE
Guidelines for the proposal deadline: students in CS 144
be considered for the 8800 meter.

MEETING ON MERIT
The Faculty Senate meeting scheduled at 2:30 p.m. on Tuesday, Jan. 24, has been changed to a faculty meeting on campus. The meeting will be held in the New Faculty Center Assembly Room.

RECEIVE A PROGRAM
Students enrolled in CS 144 will have the opportunity to develop computer software packages, free of charge, for a national contest designed by the University of Virginia. For further information about the free program, contact Doug Bigler, computer science, 372-6872.

Rec Center celebrates 5th birthday
The Student Recreation Center will celebrate the fifth anniversary of its opening on Thursday Jan. 19, with a birthday party from 5-7 p.m. in the Club Pool area.

Administrative staff must update forms
The forms are to be completed now for the 10-month year. The deadline for submitting the form is June 15, 1984. Also updated forms are necessary for the new academic year.

Three faculty are Fulbright scholars
Fulbright is a federal program that brings U.S. citizens to teach and study abroad. The recipients are selected by a national panel of experts and are funded by the U.S. government.
