Inventory staff knows 'where it's at'

From test tubes to tubas

Inventory staff knows 'where it's at'

The staff in the inventory management department have their hands full keeping up with the new "item" in campus operations — the delivery van. The department provides moving and delivery service, maintains a warehouse that stocks everything from supplies to equipment and supplies used around the campus.

The last in a series of delivery trucks, a 20-year familiar sight around campus, is no longer seen by its original name. Kathy Phillips, coordinator for the cardboard box service, said, "I hope you want something for me to order out of our program so quickly as we can..."

"The inventory management is the warehouse that keeps track of the quantities of canned food items, paper products and custodial supplies purchased at bulk discounts and stocked until needed by departments on campus.

Bill Streat supervises the warehouse, which contains 450 different items.每一个人 must be careful with the boxes used by the custodians and the major items purchased on campus. Some..."

Canadian offers studies expansion

continued from page 1

From its humble beginnings, the University of Illinois at Chicago, Illinois, has experienced a 13,000% increase in enrollment over the past 10 years. Now the University is planning to open a new campus in the Caribbean. The new campus will be located on the island of St. Thomas, and will offer degrees in business, education, and health sciences. The University will also provide financial aid to students who meet the eligibility requirements.

New undergrad program to train technology ‘translators’

Beginning next fall the English department will be recruiting students who wish to become technical writers or translators.

The Board of Trustees has approved the creation of a new major and minor in scientific and technical writing. A course sequence has been offered for several years, and in fact, has gained an increasing number of students. Several courses for undergraduates also have been offered through the English department and the Social Sciences and Arts have developed a course in technical communication. The new major is intended to fill a need in the community for technical communication/translator personnel.

The existing courses, combined with the excellent reputation of the graduate program, lay a firm foundation for the new major and minor. Currently, the school is attempting to fill the positions of faculty. The school is also looking into the employment market for technical writers and translators, but it may be some time before we can say that programs have been implemented.

Dr. Coggin, according to Dr. Coggin, said that he is looking forward to this new major.

The Office of Admissions has received numerous applications for the fall’s new freshman class which is looking forward to the new technical writing options.

Students on the surface, "things look good," according to Dr. Coggin. Seeing the interest in the "Phone Power" program, he is looking forward to seeing the results throughout the year. There are a few open questions for the enrollment of students in the fall classes, but the University actually shows up truly in the fall.

That’s when two programs to be conducted in the next few weeks start.

Beginning last Sunday, Feb. 12, the annual "Phone Power" campaign will bring a student center member of the University in touch with every student and prospective student in the fall. Telephone numbers have been set up in the main hall of the student union where called students can meet with us from 8:00 p.m. to 9:00 p.m. every Tuesday through Feb. 19 and 26.

The “Phone Power” campaign, the admissions office will join forces once again with the undergraduate admissions office to host a series of receptions in major cities for high school students who have applied to the University.

In addition to the "Phone Power" campaign, the admissions office will join forces again with the undergraduate admissions office to host a series of receptions in major cities for high school students who have applied to the University.

The role of Poulimenos is Figaro in upcoming opera

For Andreas Poulimenos, who has been described as "an ideal candidate for the role of Figaro in the upcoming opera The Barber of Seville," the role fits him like a glove. "It’s a role that I’ve always wanted to play," says Poulimenos, who is Figaro in upcoming opera Figaro is a "policeman," as singing, playing the guitar, and acting in the opera are all part of his repertoire.

Poulimenos joined the faculty in 1971. He has been in a number of operas and concerts, and has performed in many different countries.

Poulimenos is Figaro in upcoming opera Figaro, Glick said, that Poulimenos is Figaro in upcoming opera Figaro is a "policeman," as singing, playing the guitar, and acting in the opera are all part of his repertoire.

"I’m a comedian, always trying to make things go well with me in the air," says Poulimenos, "I think I’m Figaro in upcoming opera Figaro, Glick said, that Poulimenos is Figaro in upcoming opera Figaro is a "policeman," as singing, playing the guitar, and acting in the opera are all part of his repertoire.

"I’m a comedian, always trying to make things go well with me in the air," says Poulimenos, "I think I’m Figaro in upcoming opera Figaro, Glick said, that Poulimenos is Figaro in upcoming opera Figaro is a "policeman," as singing, playing the guitar, and acting in the opera are all part of his repertoire.
