New undergrad program to train technology ‘translators’

Beginning next fall the English department will be recruiting students who want to study writing. The Board of Trustees has approved a new major and minor in technical writing, English, with emphasis on technical communication.

"The major has been offered for several years and in fact, has gained in popularity," said Dr. William Coggin, the department’s head. Several courses for undergraduates also have been offered through the English department and the College of Engineering and Applied Sciences have been concerned with a planned program in science or technical communication. The existing course offerings, combined with the excellent reputation of the graduate program, lay a firm foundation for a new major and minor curriculum. Students who have had the undergraduate offerings and the new major and minor program are the result of many years of planning and preparation. Bowen Green’s program will provide students with writing, editing, production and management skills that will impact both the career and management opportunities available in the field. A new major and minor curriculum is designed to meet the demands for technical writers far beyond the University’s campus. When the program opens this fall, it will attract an estimated 15 to 20 students per year.

Offered in the new program will be a menu of career oriented classes designed to prepare students for the demands of the employment market for technical writers, graduates of a scientific or technical degree in the arts. The demand for technical writers continues to grow as science and technology expand.

"We have been talking with people in the business community about the needs for specialists in writing and publishing, and in places of employment and we believe our program will produce the kind of graduates that will be in high demand," Dr. Coggin said.

"We have been looking at the trends and the employment market for technical writers and have determined that the need will remain steady for good writers since the technological advances will remain steady in the future.

"Graduates of a scientific or technical degree in the arts. The demand for technical writers continues to grow as science and technology expand. Our program will provide students with writing, editing, production and management skills that will impact both the career and management opportunities available in the field.

"We are hoping that this program will attract more students who are interested in writing and technology. Our goal is to provide them with the skills that they will need to succeed in their careers. This program will provide them with the skills that they will need to succeed in their careers."

Exhibits

Northeast Ohio Regional Scholarship Art Show, through Feb. 15, Free, Fine Arts Building, 2 p.m. to 5 p.m. weekdays and 2:30 to 4:30 p.m. Sundays.

The juried exhibit features works by 205 students of the Kent State University Art Department. The exhibit will feature works created in studio art classes. The exhibit will be open to the public.

"The exhibit features works by students who have been accepted into studio art classes. The exhibit will be open to the public and will continue to be open to the public through the end of the semester."

Carnegie Art Hall, through Feb. 15, Free, Fine Arts Building, 2 p.m. to 5 p.m. weekdays and 2:30 to 4:30 p.m. Sundays.

The exhibit features works by students who have been accepted into studio art classes. The exhibit will be open to the public and will continue to be open to the public through the end of the semester."

Monday, Feb. 5

He's the Kreischer in the quadrangle

Evie J. Kreischer was graduated in 1960 from Bowling Green State University, and she is now the University's vice president for finance and institutional advancement. She was chosen for the Bowling Green Press faculty of the year for 1984-85.

BOWLING GREEN watched its parents as closely in Kreischer's days as it does now, adding that the financial pressures have not changed much. "You had to watch every nickel and penny," she said. "As soon as we could, we began investing in the future, so we wouldn't always be cropping our budget." Although she admits that he's not "the most tidy" student (Kreischer has remained in the house since he arrived), the University has faced since his retirement, Kreischer has remained in the press faculty of the year for 1984-85.

BOWLING Green's First Chief of Staff, who serves on the University's Finance Committee, is a native of Bowling Green. He retired from the University in 1965 after 31 years of service. Kreischer, who served as the University's vice president for finance and institutional advancement, was named Bowling Green's first chief of staff in 1965. Kreischer was later named as the University's vice president for finance and institutional advancement in 1968.

The BGSU Office of Student Affairs has announced that the Kreischer in the quadrangle has been chosen for the Bowling Green Press faculty of the year for 1984-85. The award is presented to the faculty member who has made the greatest contribution to the institution's overall mission. Kreischer has served as the University's vice president for finance and institutional advancement for 23 years.

BOWLING GREEN watched as its president as closely in 1984 as it is in 1985, Dr. Dr. DePue, music departments when he received the news. The guiding Bowling Green’s fiscal and women was dedicated in 1967 that he issued revenue bonds on the open facilities. The instructions for carrying out major (natural sciences, social sciences, core, explaining that it consists of other than one’s own) and noting that it four functional understandings. For the casey hall S&2--2747, · of the General Administration Building office in English 372--2747, · of those eight may be selected by the those students would meet general education list. In the state of Ohio determine whether an existing course was in October 1967 that She was in charge of two home economics courses and said the list of courses courses has faced since his retirement, Kreischer has visited different in the classroom. Her first ties with the program has won a 1984 award for excellence in teaching the nation’s top 12 food engineering schools.

SIC “OUT TO LUNCH,” Faculty staff who have already reserved their seats for lunch and are ready to enjoy a good meal at a good price.

DePue, whose name has been associated with Bowling Green and the state of Ohio for over 20 years, died last week. He leaves a wife, two children, and a legacy of service to the university and the community.

He was born in 1943 and received his undergraduate degree from Ohio University in 1965. He went on to earn his Ph.D. in chemistry from the University of Wisconsin in 1969. He joined the faculty at Bowling Green in 1973 and became dean of the College of Science in 1981. He was named interim president in 1984 and served as president until his death.

DePue was a respected scholar and administrator. He was known for his work in the field of biochemistry, particularly in the area of enzyme kinetics. He was a member of several professional societies and served on numerous boards and committees.

DePue was a dedicated husband and father. He was married to Janice DePue for 43 years, and they had two children, Scott and Karen. He also leaves a brother, Bruce DePue, and a sister, Janice DePue.

DePue will be remembered for his dedication to the university and the community. He was a strong and proud advocate for Bowling Green State University and the state of Ohio.

The family asks that in lieu of flowers, donations be made to the DePue Scholarship Fund at Bowling Green State University.

The funeral will be at 10 a.m. on Tuesday, Dec. 5, at the First United Methodist Church in Bowling Green. Interment will be in Greenlawn Cemetery in Bowling Green.

Faculty Senate

Faculty Senate has approved a recommendation from the Executive Committee that will recommend a 3% increase in the state budget for each faculty member’s salary. With 40% percent of the state budget going to faculty salaries, this increase is necessary to keep pace with the rising cost of living. The budget request was submitted to the Board of Trustees for their approval.

The Board of Trustees will meet on Monday, Dec. 3, at 7 p.m. at the Board of Trustees meeting room in the Paul Laurence Dunbar Center. The meeting is open to the public and will be streamed live on the university’s website.

Dr. Buckwell noted that budget requests are considered each year and are based on a variety of factors, including inflation, changes in the economy, and the needs of the university.

The university is exploring ways to increase revenue and reduce costs to offset the budget shortfall.

The Faculty Senate hopes that the university will continue to prioritize faculty salaries and the well-being of its faculty members.

The university has announced that it will begin a search for a new president to replace Dr. Buckwell, who is retiring at the end of the year.
Seminar to highlight advantages of Edison Partnership Program

Representatives from northwest Ohio business and industry will be on campus Wednesday (Feb. 17) for a seminar on how companies can benefit from the new state-sponsored Thomas Edison Partnership Program. The program is designed to provide assistance, including research, analysis, consulting and education, to companies, industries and organizations.

This partnership, funded last year by the state legislature, encourages cooperative ventures between business and industry and the state's educational institutions.

The seminar will be held from 8 to 9:30 a.m. in the Miami Center Auditorium. Attendance is free, but reservations are encouraged. For more information, call 93-229.
