Seminar to highlight advantages of Edison Partnership Program

Representatives from northwest Ohio businesses and industry will be on campus Wednesday (Feb. 15) for a seminar on how they can cooperate with the University in new partnerships and development projects.

"There are many ways that Ohio businesses and industry can work together with the University," said Jeffrey L. Adams, director of the University's Northwest Ohio Regional Resource and Research Financing, partially funded last year by the state legislature. "Each partnership encourages collaborative ventures between business and industry and the state's educational institutions."

Adams will discuss funding available for companies, nonprofit organizations and educational institutions that wish to undertake research and development projects that potentially will improve the state's businesses and industry. The purpose of the seminar will be to discuss guidelines for developing partnerships and program opportunities that assist for northwest Ohio businesses and industry times to cooperate with the University in new partnerships and development projects.

STRS changes retirees' medical health care plan

The State Teachers Retirement System has implemented a series of changes in the STRSA/MA Health Care Plan available to retirees. The plan is administered by the computer education lab services varied "students"

A visual computer classroom has been established by the College of Education to accommodate students, teachers, and school administrators who need to make extensive use of computerized material. The classroom is located in the STRS Building and is equipped with the latest computer equipment. The equipment includes IBM and Apple computers, and a color TV. The classroom is available to the chapter an any student with an interest in computer technology. The computer laboratory is designed to help with the needs of retirees and other educators. The lab is open from 8:00 AM to 5:00 PM, Monday through Friday. The lab is well-equipped with the latest computer technology, and is available for use by all educators. The lab is also equipped with a comprehensive range of instructional materials, including hands-on training sessions and workshops. The lab is open to all educators, regardless of their level of expertise. The lab is open to all educators, regardless of their level of expertise.

In addition to providing hands-on training, the lab is also equipped with a comprehensive range of instructional materials, including hands-on training sessions and workshops. The lab is open to all educators, regardless of their level of expertise. The lab is open to all educators, regardless of their level of expertise.

Lawton Family

Karen R. Milne, aged 78, of the University of Michigan, has been appointed the new director of the Lawton Family. The appointment is effective immediately. The Lawton Family is a nonprofit organization that provides legal services to indigent clients.

Faculty and Staff

Grants

Laurence J. O'Brien, professor of economics, has been awarded a $10,000 grant from the National Science Foundation to support his research on the economics of information technology. The grant will fund his research on the economics of information technology.

Richard P. Keeney, assistant professor of political science, has been awarded a $5,000 grant from the Social Science Research Council to support his research on the political economy of information technology.

Muriel J. Seidman, professor of accounting, has been awarded a $5,000 grant from the American Accounting Association to support her research on the role of information technology in accounting education.

Reception

The reception for the opening of the new Faculty and Staff Office will be held on Thursday, March 10, from 4:00 PM to 6:00 PM. The reception will be held in the new Faculty and Staff Office, located in the new Faculty and Staff Building. The reception will feature refreshments and a chance to meet the new Faculty and Staff members.

Presentations

The presentations will be held in the Faculty and Staff Building, on the second floor.

Computer Bits

University computer services will hold a Q&A session from 1:30 PM to 3:30 PM on Thursday, March 10, in the Faculty and Staff Building. The session will be held in the Faculty and Staff Building, on the second floor. The session will feature a presentation on the latest technology and a chance to ask questions.

WANTED WOMEN’S STUDIES FACULTY

The Women’s Studies Program is looking for faculty members interested in teaching courses in women’s studies. The program is looking for faculty members interested in teaching courses in women’s studies. The program is looking for faculty members interested in teaching courses in women’s studies. Education computer lab serves varied "students"

A third computer classroom has been established by the College of Education to accommodate students, faculty, and staff. The classroom is located in the Education Building, room 4A-22, which is normally used by the Math Clinic. It is equipped with 15 Apples II computers equipped with disk drives and color monitors. A projection TV system is connected to the instructor's computer to facilitate learning.

The new facility will be open to faculty, staff, and students but will have a computer classroom that is available to all those who have a computer at home, said Steve Lieb, educational technician and instructor. "Computer Utilization in the Classroom," a new class is available to all faculty members and others who are interested. The course is designed to provide a survey of the uses of computers and to introduce the variety of ways in which computers can be used.

"We encourage the faculty to use the computer classroom, which is not available to students and staff, and strongly encourage the use of the second classroom," said Dr. St对此人，乐乐在很大程度上是活塞买的。

WBGTU-TV celebrates 20 years of broadcasting

According to Dr. Katzner, the University's television station has been a valuable resource for students and faculty alike. "It has provided a platform for educational programming, community events, and student initiatives," he said. "And in the future, it will continue to be an important part of our campus culture." The station has also benefited from partnerships with local organizations, including the Bowling Green Symphony Orchestra and the Bowling Green State University Student Union.

Fall admissions to close March 20

Martin said that with the application deadline approaching, the University is urging interested prospective students to submit their applications soon. The fall semester begins on August 21, and students will have until that date to complete their applications. The University is currently accepting applications from both domestic and international students.

New channel added to CityLink system

The University will be launching a new channel on CityLink cable this spring. The channel, called "WBGTU," will be available to residents of Bowling Green and surrounding areas. The new channel will feature educational programming, community events, and student initiatives.

SalvageURT: Donors requested

The University is seeking donations of items in good condition for the SalvageURT program. The program sells donated items at a reduced price to support the University's mission.

President expresses optimism on enrollment, capital budgets

Last year, the University had a total of 15,000 students, with 8,000 undergraduate and 7,000 graduate students. This year, the University is projecting a slight increase in enrollment, with a total of 15,500 students. The University is also optimistic about its capital budgets, with a 5% increase in the budget for the current fiscal year.

Natural extension of the maker's movement as an educational tool

The University is committed to integrating maker education into its curriculum, with a focus on providing students with hands-on experience. The University is also working with local organizations to develop partnerships and offer maker education programs to K-12 students.

If initiated, the doctoral program could provide new opportunities for research and collaboration. The University is currently working with other universities to explore the feasibility of a collaboration.

The additional work would make students more attractive to prospective employers. The University is also exploring ways to make the doctoral program more accessible to students through online coursework and flexible scheduling.

The actual design for a program that matches the needs of the grant-funded study. In the first phase, the two-year project will be held with potential employers. One session will be held in partnership with the Bowling Green State University Career Center and with executives from organizations located throughout the region.

From these meetings, Dr. Katzner hopes to learn about what skills potential employers would want in students and what types of positions might be available to them. The University will use this information to design a program that matches the needs of the grant-funded study.

A program of this type will be needed in the near future. Once that information is available, the grant proposal will be revised to ensure that it reflects the needs of the grant-funded study.

Ultimately, the program will require additional funding and resources to be successful. The University is currently exploring partnerships with local organizations and seeking grant opportunities to support the program's development.
