262 years of service

Fourteen faculty and staff who together have given 262 years of teaching and service to the University have retired from full-time responsibilities. Many of the 14, however, will return to campus in subsequent years under the Supplemental Retirement Program.

Those retiring include:
- Margaret J. Tucker, who retired in October as director of the Northwest Ohio Educational Television Foundation at WBGU-TV.
- In that post, which she had held since 1970, she coordinated all instructional television programming distributed to northwest Ohio schools. She also edited "Scanner," a monthly publication for teachers, and created and produced "News Six," a weekly news program for sixth grade students.

Named to the All Ohio School Board in 1985 by then-Gov. John Gilligan, she received a University Merit Award and also received an Abe Lincoln Award given to distinguished broadcasters by the Southern Baptist Radio and Television Commission in 1975. She is a member of American Women in Radio and Television, a past vice president and former secretary of the Ohio Association of Instructional Media Centers, and a past vice chair and chair of the Ohio Instructional Media Council.

- Mary Lou Glenn, home economics, was named an assistant professor emerita earlier this fall after more than 35 years of teaching at the high school and college levels — 20 of those on the Bowling Green faculty. From 1971-83 she was program director for fashion merchandising and textiles and clothing in the College of Arts and Sciences. From 1971-83 she coordinated the teaching of sociology in several foreign areas in her department. In the textiles and clothing area she developed a series of 10 40-minute videotapes for instructional use.

A member of the American Home Economics Association, she served as:
- William S. Jackson, University Professor of biological sciences, joined the faculty in 1957. The recipient of more than 60 grants totaling almost $1 million from private foundations, he conducted environmental research on a continual basis at the University. He has published extensively on his ecological studies and research on non-rodent, bird and pest control, and he has served as an environmental consultant in nations throughout the world. He frequently is invited to speak at international pest control conferences.
- Dr. Jackson has directed the Center for Environmental Research and Services since it was founded in 1970, and he currently holds positions in several state and national environmental organizations. His work has received national and international media attention; in 1979 he was interviewed on "60 Minutes" and in 1977, his feature work was published in National Geographic magazine.
- Merle Scott, English, joined the faculty in 1970 as an expert on children's literature. During her years at Bowling Green she continued her research in that area and presented numerous papers at professional meetings.

Most recently she co-authored with Linda Peterson, English, a 529-page guide to award-winning children's books. The guide was published in 1982.

- Robert W. Twymen, history, published two books and a series of journal articles during his 36 years on the faculty. His most recent book, *Encyclopedia of Southern History*, co-edited with David C. Roter, history, received the 1979 Founders Award of the Confederate Memorial Literary Society and the American Association of University Professors. He has been active in numerous scholarly journals and has contributed to books including *Violence in Animals* and *The Human Society*, both published in 1976.

During his years on the faculty he served on Faculty Senate and numerous University committees.

- Mary L. Amos, educational curriculum and instruction/library and educational media, has been best known as the University's resident story-teller. She has lectured on children's literature in libraries and at professional meetings throughout the state and developed a course at the University to teach future teachers and librarians the art of storytelling.

She joined the faculty in 1969 and during her years at Bowling Green served on Faculty Senate, the Student Affairs Advisory Board and many department and College of Education committees. She received the Distinguished Teacher Award of the College of Education in 1973 and is a member of the National Association for the Preservation and Perpetuation of Storytelling, the American Association of School Librarians and a charter member of the Ohio Educational Library Media Association, among other professional organizations.

- Robert C. Baard, health, physical education and recreation, has taught undergraduate courses in physical education since joining the faculty in 1967. A specialist in elementary physical education, he directed the University's former physical education program at St. Aloysius Elementary School. He also directed the Upward Bound Program on campus.

A member of the American Youth Hostel national board of directors, he has led cycling tours in Europe, the United States and the People's Republic of China. He also is a member of several professional organizations, and in 1977 he received a Distinguished Achievement Award from the American Association of Colleges for Teacher Education.

- Debert K. Kames, business education, came to the University in 1970. A member of several University committees, he has chaired the University Insurance and BGSU Credit Union committees.

Dr. Kames has presented papers on business math to professional organizations and has published several articles in professional journals. A revised edition of his textbook, *Business Mathematics for the Consumer*, co-authored by Merri Guthrie, business education, and William S. Olscamp, was released in 1983.

- William H. Fichtthorn, finance and insurance, chaired that department from 1966-75. He joined the faculty in 1965.

A chartered financial analyst, he has been active in a number of professional organizations, including the American Finance Association and the Institute of Chartered Financial Analysts. On campus he chaired the College of Business Administration's Executive Committee from 1967-69 and 1981-82. He also has been active in general...
Undergraduate Council

Undergraduate Council failed to decide at its last meeting Dec. 18 on a way to handle the dormitory situation before spring 1980 without action. The council met Dec. 19 to consider “handling deficiencies” in those areas after approval of the Council's report to the American Association of University Women. As of Dec. 5 meeting. The Phase II plan recommissioned to students planning to enroll in a humanities-philosophy-curricular program at Bowling Green Folk, including undergraduate and graduate students, which includes three units of English and three units of mathematics. The Council also decided to continue discussions about creating an undergraduate humanities-curricular program with emphasis on social sciences, foreign languages and art. The Council met Dec. 19 to consider the question of “handling deficiencies” in those areas and to consider the question of creating a humanities-curricular program at Bowling Green Folk, including undergraduate and graduate students, which includes three units of English and three units of mathematics. The Council also decided to continue discussions about creating an undergraduate humanities-curricular program with emphasis on social sciences, foreign languages and art.
Undergraduate Council

Undergraduate Council failed to decide at its last meeting Dec. 18 on a way to handle the Wittenberg university计算机工作间computer workroom 200-204 Science Building and return the Library to the Midwest Regional administration. By a vote: 2-2, the Council met Dec. 19 to consider the handling "dilemmas" in those areas after approval by the faculty of the university of social sciences, foreign languages and literature.

The Council met Dec. 19 to consider the handling "dilemmas" in those areas after approval by the faculty of the social sciences, foreign languages and literature.

The Board of Trustees approved a motion to set up a committee, composed of an employee from each undergraduate college to work with the Office of Registration and Records on proposals for changes in library hours in the Quad. The committee will make recommendations to faculty members and students of all colleges involved in the library's functioning. The committee will report to the faculty, fall 1984.

30-minute lunchtime workout among Rec Center spring programs

If your New Year's Resolution was to take up fitness, program the Recreation Center is ready to help. Spring semesters members are on sale now in the Rec Center office, and the center plans a full schedule of fitness activities during the coming months. Memberships are valid immediately, through May 10. Faculty, staff, alumni, and members are invited to come and try the many programs available. Presidents Club may purchase a single membership for $42. Only membership is available for $85. Also on sale are Limited Membership, which includes all courses in addition to open gym, for $120. The Lift ticket allows access to the center during the week but is valid only during the times when classes are in session, 14-March 15. The guess of a Lift membership is $125. Spring membership also can be purchased for a single member and $156 for a family.

The Rec Center's “Spring Fitness” program offers a wide variety of offerings. This semester a 3-hour weekday workout, designed especially for those who participate during their lunch hour, is available. The 3-hour workout can be split into 50-minute sessions.

Hosts and Hostesses can help with campus-sponsored events

Some five active undergraduate want to be involved in more campus events. Each year, the Office of Development and Alumni Affairs, in cooperation with the Department of Communication, is available to assist any individual or office with campus activities, including receptions, dinners, and select event programs. Each host or hostess, carefully selected and trained to “reflect hospitality and the friendly spirit of the University” to any individual or group, is assigned a coordinator of the Employment Opportunities, whose fee for services is $8.

For the past 30 years Ronald E. Seawright, history, has been collecting minerals and rocks as he has traveled throughout the world. In fact, he has collected about one and a half tons of them.

Now Dr. Seawright has donated his collection of more than 1,200 rock and mineral specimens to the Department of Geology. These will be used in teaching advanced techniques used in graduate and faculty research.

The collection, which was made over 35 years, is a perfect collection for the University of Toledo's drive to increase its mineralogy collection.

“With the donation of this collection, the University of Toledo will now have a collection of minerals and rocks that is the envy of many other universities,” Dr. Seawright said.

HISTORIAN/GEOLGIST DONATES ONE-KIND ROCK COLLECTION

The collection is a major addition to the University's mineral collection, which is housed in the Department of Geology. The collection consists of more than 1,200 rock and mineral specimens from around the world. The collection includes specimens from many different geological periods, including the Precambrian, Cambrian, Ordovician, and Silurian periods. The collection also includes specimens from many different rock types, such as granite, basalt, and marble. The collection is very valuable for teaching purposes and for research.

Dr. Seawright said that the specimens in the collection are well suited for teaching and research. The collection includes specimens from many different geological periods, including the Precambrian, Cambrian, Ordovician, and Silurian periods. The collection also includes specimens from many different rock types, such as granite, basalt, and marble. The collection is very valuable for teaching purposes and for research.
