Barney Michaelis did it all

When Maryln "Barney" Michaelis joined the plant operations and engineering staff 27 years ago, he did not foresee the impact he would have on the campus. Until his retirement, Barney served as chief maintenance technician, supervising a staff of 10, and coordinating the maintenance of some of the most critical facilities and equipment on campus.

Barney's work ethic was the model for the campus staff. He not only worked hard, but he also worked smart. His ability to anticipate problems and take preventive measures helped to ensure the smooth operation of the campus facilities.

His contributions were not limited to maintenance. Barney was also a mentor to many of the younger staff members, sharing his knowledge and experience with them. His dedication to his work and his community earned him the respect and admiration of his colleagues and students.

Barney's legacy lives on at the University of Miami through the Barney Michaelis Memorial Scholarship Fund, which provides financial assistance to undergraduate students pursuing degrees in engineering.

From washing dishes to shoveling snow

Shakespeare's 'As You Like It' to be staged in Main Auditorium

The Shakespearean comedy "As You Like It" will be presented by the University of Miami's Department of Theatre and Dance, directed by Christian Schaefer, from February 13 to 23 in the Main Auditorium. The comedy will be performed without a break, with one intermission.

The production is directed by Christian Schaefer, who has previously directed "Twelfth Night" and "Othello" at the University of Miami. The cast includes students and faculty members from the Department of Theatre and Dance.

The play is set in the forest of Arden and tells the story of the Duke of Orleans and Sir Rowland de la Tour, who are exiled from their homes. The Duke encounters a group of exiles, including a group of shepherdesses and a group of noblemen, and they all eventually come to love each other.

"As You Like It" is one of Shakespeare's most beloved comedies and is known for its witty dialogue and humorous situations. The production will be accompanied by a live orchestra and will feature a variety of costumes and set designs.

The performance dates are February 13, 14, 15, 17, 18, 21, 22, and 23, with performances at 8 p.m. and 2 p.m. on Saturdays and Sundays. Tickets are available at the Main Auditorium box office or online at the University of Miami's website.
Budget...

Meredith is 'Black History Month' speaker

Procedures change for making equipment service, repair calls

Faculty & Staff

Improvement leaves for 54 faculty

Software offered and a discount...

To be taught by staff from the Philosophy Documentation Center, the class will be limited to 25 students, and individual instruction will be provided to students who demonstrate special interest in the subject of the course or who have experience in computer or word-processing experience for a necessary prerequisite.

TAX FORMS AVAILABLE. Federal, state and local tax forms are now available in the Payroll Office, 222 Administration Bldg.

**Budget...**

Budget courses are offered in the fall and spring semesters. Courses are open to the public.

**Improvement leaves for faculty**

Fifty-four faculty have been granted Faculty Improvement Leave at 20 or 39 percent of the salary for the entire academic year. The program is designed to encourage professional development and to reward achievement in the discipline and teaching.

**Faculty & Staff**

Faculty and staff members have reported several developments:

1. **Budget Courses**
   - The courses are designed to improve the knowledge and skills of the faculty.

2. **Improvement Leaves for Faculty**
   - Fifty-four faculty members have been granted leaves to focus on professional development.

3. **Grossman**
   - His work includes the development of systems for the analysis of economic data.

4. **Maitland**
   - He is working on a book titled "Budgeting for Educational Institutions."
Advisory committee to help ensure asbestos safety
An Advisory Committee has been established at the University to plan asbestos removal and correction projects.

The committee was formed in response to a state mandate requiring the identification and removal of asbestos from all University buildings. According to the advisory committee, "The university has been called upon by the state to begin a systematic study of all campus buildings to determine where asbestos has been used."

The University has been conducting a study to determine where asbestos has been used. The study has involved the collection of data about the presence of asbestos in various campus buildings. The advisory committee was established to help ensure that asbestos safety measures are adequately planned and implemented. The committee is composed of representatives from various departments, including environmental services, engineering, and facilities management.

The advisory committee's responsibilities include:
- Developing a plan for asbestos removal and correction
- Coordinating with other University departments involved in asbestos management
- Educating faculty and staff about asbestos safety
- Monitoring the implementation of asbestos safety measures

The advisory committee was formed in response to the state mandate and is an important step in ensuring asbestos safety on the University campus.

Nuts and Bolts
crew does ‘down to earth’ tasks

The University's ground crew has spent much of the past several weeks in one of its least favorite chores—snow removal. Above all, they have learned that the job is not only physically demanding but also requires a lot of teamwork.

Many of the ground crew members have been working long hours and in challenging conditions. One of the most common tasks they have performed is to clear snow from walkways and driveways around campus. They have used shovels, brooms, and snow blowers to remove the snow. Some members have also used snowplows to clear large areas.

In addition to clearing snow, the ground crew has also been responsible for maintaining the grounds of the campus. They have been regularly mowing lawns, trimming hedges, and planting flowers. They have also been responsible for Keeping the campus grounds clean and presentable.

The ground crew members have been working together to complete these tasks. They have shared stories and jokes while working, and have provided support and encouragement to one another. They have also been able to share their knowledge and expertise with each other, which has helped them improve their skills and work more efficiently.

The ground crew members have been working hard to improve the appearance of the campus. They have been recognized for their efforts, and have received positive feedback from the campus community.

Students to be hosted at receptions
Faculty, staff, and students will travel to New York City between Feb. 24 and March 4 to meet with prospective students.

High school students will have the opportunity to ask questions and discuss their future with University staff. The University will have the opportunity to introduce themselves to prospective students and their families.

More than 900 students and their families are expected to attend the receptions, which are being held in Alumni, Delaware Heights, and the International Center. Democratic Thomas Glick, admissions director, said all students have received invitations to attend the University for fall 1985 by students and their families. Glick said he is excited about the opportunity to meet prospective students and their families.

The program at each reception will include presentations by University staff, opportunities for students and their families to ask questions, and a meal.
