Deadline: Monday, February 18, 2008

Adapting College Counseling Center

With an average family spending more than $30,000 per year on higher education, the challenge of preparing students to succeed in college is greater than ever. The College Counseling Center has adapted to meet this challenge by expanding its services and increasing its reach.

- The College Counseling Center has added new programs, such as the Student Success Program and the College Readiness Program, to help students prepare for college
- The College Counseling Center has expanded its counseling services to include individual, group, and family counseling
- The College Counseling Center has increased its outreach efforts, including community outreach, to reach a wider audience

Faculty/Staff Positions

The following faculty positions are available:

- Assistant Professor of English
- Assistant Professor of History
- Assistant Professor of Mathematics
- Assistant Professor of Philosophy
- Assistant Professor of Psychology
- Assistant Professor of Sociology
- Assistant Professor of Theatre
- Assistant Professor of Women's Studies

Bowling Green State University honors program gets good start

When Carl Riegel arrived on campus last month to assume the directorship of the Hospitality Management program, he was pleasantly surprised to find a strong interest in the program among students. The program has received a $25,000 award from the Edward M. King Foundation, which will be used to expand the program's capabilities. The program has received a $25,000 award from the Edward M. King Foundation, which will be used to expand the program's capabilities.

The Hospitality Management program, which received its first grant in January, will continue to grow. The program's impact on the hospitality industry is expected to be significant, as students from the program are expected to fill many of the jobs in the industry.

British philosopher finds U.S. to his liking

The British philosopher Antony G. Flew is spending his 80th birthday in Bowling Green, a university city in the U.S. He is visiting here for the first time to give a series of public lectures on the University's campus. Prof. Flew recently retired from the University of Reading, England, where he has taught philosophy since 1945. Among his many books are "The Concept of God," "Theology and the Philosophy of Religion," and "Theology and the Scientistic Outlook." Prof. Flew is well known for his controversial views on a number of subjects, including the existence of God, the possibility of extraterrestrial life, and the ethical implications of scientific advances.

Obituaries

Former professor George R. Snyder, St. Sarasota, Fla., died recently at his home in Sarasota. He was 88 years old. Prof. Snyder was a noted scholar of languages and literature and a professor of English at Indiana University for many years. He is survived by his wife, Mrs. Snyder, and three children.

Two alumni featured at benefit performance

Two alumni of the University of Sarasota, Fla., featured in a benefit performance at the University's campus last week. The alumni, who have been active in the community since their graduation, were featured in a program that included readings from their alma mater, a performance of a musical piece, and a q&A session with the alumni. The alumni discussed their experiences at the University, their careers, and their contributions to the community. The event was attended by students, faculty, and alumni, and raised funds for the University's scholarship fund.

In Brief

The University of Sarasota will hold its annual alumni reunion this fall. The event will feature a variety of activities, including a reunion dinner, a reunion dance, and a reunion parade. The event will be held on the university's campus, and all alumni are invited to attend.

Computer Services prepares for open house

The Computer Services department at the University of Sarasota is preparing for an open house event scheduled for this week. The open house will be held in the Computer Services building, and will feature a variety of activities, including demonstrations of the latest computer technologies, workshops on computer literacy, and opportunities to network with faculty and staff. The event is open to all members of the university community, and is free to attend. The open house will be held from 9 to 5, Monday through Friday, and is expected to attract a large number of participants.

Philosophy

Philosophy is a social science that studies the nature of human knowledge, reality, and morality. It is concerned with the study of concepts such as truth, beauty, goodness, and reason. Philosophy also deals with questions about the nature of reality and the universe, the nature of the mind and consciousness, and the nature of the self and the soul.

Philosophical study

Philosophical study involves the investigation of fundamental concepts and questions, and the development of theories and arguments to address these questions. Philosophical study can take many forms, including research, teaching, and writing. Philosophers use a variety of methods to study philosophical questions, including critical thinking, analysis, and reflection.

Philosophers

Philosophers are professionals who study philosophy, and who engage in philosophical research and teaching. Philosophers may work in a variety of settings, including universities, research institutions, and private industry. Philosophers may also work as consultants or as independent scholars.

Philosophical study in the United States

Philosophical study in the United States has a long and distinguished history. The United States has a rich tradition of philosophical thought, and has produced many important philosophers and scholars. The American philosophical tradition is characterized by a focus on empirical investigation and the use of scientific methods.

Philosophical study today

Philosophical study today is characterized by a variety of approaches and perspectives. Philosophical study is conducted in a variety of settings, including universities, research institutions, and private industry. Philosophers may also work as consultants or as independent scholars.

British philosopher finds U.S. to his liking

British philosopher Antony G. Flew is in the process of abandoning his lifelong belief in an afterlife, his change of faith is an opportunity to top his biggest book on the subject, "TheAnthony Flew.

Flew's books, which he is writing in his Woody Hollow, Maine, will be published by Routledge in the United Kingdom and by HarperCollins in the United States.

Flew, who is known for his sharp wit and his iconoclastic views, has been a leading figure in the study of philosophy for more than 50 years. He has written extensively on topics such as ethics, metaphysics, and the philosophy of religion.

But his latest book, "The Wisdom of Religion," is a departure from his previous works. In it, Flew argues that the idea of an afterlife is not supported by empirical evidence and is not necessary for a fulfilling life.

"I don't think there's an afterlife," Flew told The Associated Press. "I think it's a myth, and it's a very important myth to get rid of because it's holding people back from living their best lives."

Flew's shift in thinking is not the first time he has surprised his readers. In 1966, he famously announced that he had abandoned his earlier belief that theists were more likely to be on the team of light.

"I've written it off for the last time," Flew said. "I don't think there's a future life."

Obituaries

Former professor George R. Snyder, 82, Sarasota, Fla., died recently at his home in Sarasota. He was a University of Cincinnati College of Education and Allied Professionals, retired in 1982, after teaching for 15 years. He had attended the University of Chicay, graduated from the University of Cincinnati, and started at the University.

Snyder was born in Miami, Ohio, and received his bachelor's degree from Western State College in 1969. He was also a graduate of Miami State University.

Snyder was a member of the Sarasota County Board of Education and the Sarasota County School District Board of Education.

He is survived by his wife, Margaret, and three children, Robert, David, and William.

Professors

The funding is the first portion of a $50,000 grant to the project "Students With Disabilities: A Data Base to test a filtering technique which identifies students with learning disabilities as identified by college instructors." The project is being conducted by Patricia R. Kellogg, director of the Office of Student Services.

Kellogg said that the goal of the project is to develop a system for identifying students with learning disabilities that can be used by college professors.

"Our hope is that this system will help college professors identify students with learning disabilities early in the course and provide them with appropriate support," Kellogg said.

Kellogg added that the project is being funded through a grant from the National Institute of Disability and Rehabilitation Research.

The project will be conducted at the University of Illinois at Urbana-Champaign.

The project will involve a team of researchers who will develop a database of student information and a filtering system to identify students with learning disabilities.

The researchers will also develop a system for training college professors to use the filtering system.

"We believe that this project will provide valuable information for college professors and will help them to better identify and support students with learning disabilities," Kellogg said.

The project is expected to be completed in 2006.

Computer Services prepares for open house

University Computer Services will be holding an open house on Friday, Feb. 23, from 1-3 p.m. in the Computer Services Laboratory.

The facilities will be on display for visitors to review.

Kohl Microcomputer Laboratory, located in the residence hall, features the residence hall microcomputer lab, which offers computer resources for students and faculty.

A university-wide lecture will be given by Dr. Badia, a professor of computer science, to discuss the lecture and the lab.

The lab is open to the public, and visitors are encouraged to attend.

There will be a tour of the lab, which will include a demonstration of the lab's microcomputers.

The tour will be led by Dr. Badia, who will discuss the lab's resources and facilities.

Visitors will have the opportunity to use the lab's computers and to ask questions of lab staff.

The event will also include a raffle for a chance to win a microcomputer.

University Computer Services is located in the basement of the Student Center.

For more information, contact Student Assistant Monica Karrer, 216/368-4199.
