In Bob Wu building a dynasty? For the second consecutive year, the marketing team has been advised and advised that the team has won a major competition. Earlier this month, the team received news that they had won the competition.

In its latest success, Bob Wu building a dynasty? Three of the four students that Wu has advised recently joined the Manitoba Marketing Management competition title (also known as the Marketing Management Program). Their efforts were honored by the University of Manitoba team.

The objective of the Manitoba Marketing Management competition is to provide students with the opportunity to apply the knowledge and skills they have gained through practical applications and exercises. The contest gives students the chance to work independently or as part of a team to develop marketing concepts and strategies for a given scenario.

Wu, whose initial task was to put together a team of four students who not only would benefit from the challenge but also would benefit from the challenge but would maintain a high level of interest and motivation over a four month period. We said the goal of the team was to represent Winnipeg for the competition's first round. To be declared the undisputed winner of its industry teams, a team had to prepare and present a formal report defending and justifying its strategies in the business environment.

Each week for nine weeks the team met with the team to discuss the next steps and make sure they were on the right track. The goal was to develop a clear understanding of the concepts and strategies that would be needed to succeed in the competition.

Chatting with the team, Wu said, "The team was willing to work so diligently to learn the concepts and how those concepts fit into a total business environment, making the competition a learning opportunity." Wu said he was pleased with the team's performance, adding that its success was not surprising.

The team's success in the competition shows the high level of interest and motivation that students can exhibit when they are given the opportunity to apply their knowledge and skills.

Wu is modest about his role in the team's success, saying "I think the team's hard work and determination are what really made the difference." He added that the team's success is a result of their dedication and commitment to the competition.

Chatting with the team, Wu said, "The team was willing to work so diligently to learn the concepts and how those concepts fit into a total business environment, making the competition a learning opportunity." Wu, marketing team make hard work pay off

In Bob Wu building a dynasty? For the second straight year, he has assembed and advised a major marketing competition. Earlier this month, Wu's engineering team won a major competition at the University of Michigan. It was the third competition in as many years that Wu's team had won.

The University of Michigan has a long history of success in marketing competitions. In Wu's first year as the team's advisor, his team placed second. Last year, they placed first.

Wu, who was advised by Linda Lutkehaus, the associate dean of the College of Business, and his colleague Brian Seaver, said that the team's success this year was due to several factors.

"We worked hard all year," he said. "We had a great group of students who were willing to work hard to achieve their goals. And we were able to get the right people in the right positions to make sure that we could win."
In Brief...

**LIFE program features displays, demonstrations**

The Student Recreation Center will provide an exhibit featuring a collection of historical items, educational materials, and a sportsmanship exhibit to observe on Wednesday. Debrief with a look at the sportsmanship exhibit on 9/8 at the Student Recreation Center.
