**LIFE program features displays, demonstrations**

The Student Recreational Center will present programs in the Educational Services Information Room in the Student Union on Thursday, February 9, and Wednesday, February 22.

Equipment and information about the LIFEC, the U of W’s aquatic fitness program, will be presented on February 9. The program will include an introduction to lake fishing, a demonstration of how to make handmade lures, fishing and fishing traps, and fishing from the shore.

On February 22, a workshop will be held for individuals interested in learning more about lake fishing, and a demonstration of how to make handmade lures, fishing and fishing traps, and fishing from the shore will be held.

**For sale**

The Business Education Department has an IBM 1130 computer with a 20MB hard disk and a 720KB floppy disk drive. The computer is available for $200. Interested individuals should contact Norma Motley at 447-5356.

**New board elected**

The Firelands College Board of Trustees recently elected new officers for the 1987-88 year. A. Ray Combs, who has been elected president and Marcus French will serve as vice president. Richard Emch, a member of the board, will serve as secretary. The new board includes: James Cooper, chairman; A. Ray Combs, president; Marcus French, vice president; Harry Hiltunen, as at secretary.

**Faculty/Staff Positions**

**The classified positions are listed below.**

**VACANCIES**

**Position:** Faculty/Staff Positions

**Department:** Faculty/Staff Positions

**Location:** Various Locations

**Deadline:** March 1, 1987

**Description:** Please contact the appropriate department for more information.

**Contact:** Please contact the appropriate department for more information.

**Salary:** Competitive

**Contact:** Please contact the appropriate department for more information.

Moseley's greatest fan carries on with his work

Reita Niederhofer makes no bones about it — he is thoroughly dedicated to his love of birds and other classes.

During the 1950s, he worked at the University of Michigan as an assistant in the Department of Botany. He used his work there to develop a collection of birds that he eventually decided to donate to the university.

Professor Niederhofer is a retired professor and best known for his work in ornithology and his research on bird behavior. He was also known for his love of birds and their natural habitats.

Niederhofer is a strong advocate for the protection and conservation of bird species. He has written extensively on the topic and has been involved in numerous conservation efforts throughout his career.

In his retirement, Niederhofer continues to be an active member of the ornithological community. He still spends time in the field and continues to contribute to the field of ornithology through his research and writing.

Dr. Moseley's contributions to the field of ornithology have been recognized by his peers, and he has received numerous awards and honors for his work.

Undergrad research program makes changes in environmental health program

Undergraduate Council accepted modifications to the environmental health program at its Jan. 31 meeting. The changes include requirements for two new classes, courses on the core of existing courses, and changes to the requirements for the core of environmental health.

Mr. Bones has now taken up residence in Niederhofer's classroom on the Honors-based campus.

Niederhofer also has a favorite saying — "If you can't make it work on campus, you can always try the university's Firelands College!"
Moseley's greatest fan carries on with his work

Relda Niederhofer makes no bones about it — she's a fan of Edward J. Moseley, her mentor of 19 years. Niederhofer, a professor of biology at the University of Kentucky, was a graduate student under Moseley, the two have a number of things in common, and many of the same experiences in the career of the same equipment in their respective fields.

Most prominent of that equipment is a fossilized skeleton of a wolf — Moseley's discovery that Niederhofer purchased to use in her biology classes when he was a professor at the University of Kentucky. Niederhofer has since taken up residence in Niederhofer classroom on the Honors College campus.

Niederhofer also has a hereditary trait — "I think that Moseley used his hands when I was a student," she said.

"I also has collected fossils across the world and on other continents.

The skeleton actually was part of a must -- that Moseley established the University of Kentucky's Paleontology Museum and that collection has been separated, largely to showcase the University's biology collection. It is now on display in the Science Building.

Niederhofer is a member of the Kentuckian group who never served in the military. When he was a professor at the University of Kentucky, his retirement in his 70's, Niederhofer made no bones about it — she's a fan of Moseley, of biology classes and of the collection

When Moseley died, Niederhofer said, "I was heartbroken. He was a wonderful mentor and a wonderful person."

"He was a man who could communicate science to the public and to the students in his classes. He was a man who could communicate science to the public and to the students in his classes."

Niederhofer said that the collection has been separated, largely to showcase the University's biology collection.

Moseley's collection has been separated, largely to showcase the University's biology collection. The book was published by the University of Kentucky Press.

University receives Merit Award

The National Science Foundation and General Electric Research Laboratories have honored the University with a Merit Award for the school's research regarding nerve regeneration. The award is given to the University "in recognition of excellence in understanding and applying biological and chemical sciences, and in improving methods of reinforcing knowledge and communication of these sciences to students and the public." The award cites the University's contributions to the field of science education and research.

Datebook
Monday, Feb. 9
Music: "Black History Month," 7 p.m., Student Recreational Center, Bowling Green State University. Donald Wilkins will have a special presentation honoring the month. (free)
Tuesday, Feb. 10
Contact Dr. Mary Burrow, 2136 Moore Hall, 372-4771, for more information.
Wednesday, Feb. 11
Art: "Women's Basketball," 7:30 p.m., 215 Education Building. Tickets are $1 at the door.
Thursday, Feb. 12
Contact Deanna J. Radeloff, 2205 Student Recreation Center, Bowling Green State University. (free)

In Brief
BG Music ensemble invited to perform
Three ensembles of the College of Musical Arts have been invited to perform at the Ohio Music Educators Association Professional Conference Thursday through Sunday in Columbus.

Bowl-N-Greenery: Last call for tickets
Tickets to the Bowl-N-Greenery, Feb. 15, are available at the Recreation Center, 372-4771.

Anniversary Fund surpasses $13 million mark
The University’s 75th Anniversary Fund surpassed $13 million in gifts during the 75th Anniversary Fund Appeal. The University’s Board of Trustees has set an atmosphere of giving for the University’s fiscal year.

"Phone Power" helps University welcome mat
Potential BGSU students have been able to become better acquainted with the University through the phone. "Phone Power" has made it easy for the students to ask questions and get accurate information about the programs that they feel are most important in choosing a college.

To Emma with love
When Emma Elizabeth Horan surprised her parents by being born eight weeks early on Jan. 16, she and her parents found out that she had a genetic syndrome. They were told that her brain was underdeveloped.

The following sections are available:
Calendars, Academic Affairs, Administration, Athletics, Business Services, College of Education, College of Engineering, College of Liberal Arts, College of Business, College of Science, College of Information Technology, College of Arts and Sciences, College of Social Sciences, College of Applied Science, College of Visual and Performing Arts, College of Health and Human Services, College of Law, College of Nursing, College of Education, College of Business, College of Science, College of Information Technology, College of Arts and Sciences, College of Social Sciences, College of Applied Science, College of Visual and Performing Arts, College of Health and Human Services, College of Law, College of Nursing.
