Some budget woes traced to enrollment

Changes in the level of state funding for public institutions of higher education have led to increased budget woes this year for fiscal 1988-89.

Christopher Dulan, vice president for planning and budgeting, cited "the very large decline in the number of students in this area" as a significant factor in the enrollment decline.

"It's probably the result of a number of factors," Dulan said. "It's the economy, the amount of money the University receives from the state. The state has a lot of dollars to distribute in enrollment and the kinds of students that are served."

Dulan noted that "the amount of dollars that have been diverted into areas where Bowling Green has grown more slowly than it has elsewhere in the state has increased."

In particular, he noted, "In the last year, enrollment in state institutions in this area has fallen, and the amount of money coming to Bowling Green has increased."

Dulan said that "the amount of money coming to Bowling Green has grown more slowly than it has elsewhere in the state."
Forget the vegetable. Squash has a new meaning here

Squash is not just an orange, custard-like vegetable, but a racquet sport. Despite its reputation as a shy and somewhat aggressive sport, squash is becoming increasingly popular among students at the University. The squash courts, located in the lower level of the University Club, have been the site of intense competition among students, faculty, and visitors.

This year, the University has expanded its squash program by adding two new teams, making it the largest and most diverse squash program in the nation. The new teams, the Men's and Women's Squash Teams, have already demonstrated their competitive prowess, winning several key matches against top-tier opponents.

The success of the squash program is a testament to the University's commitment to providing opportunities for hands-on learning and interdisciplinary collaboration. The Department of Physical Education, under the leadership of Dr. John Huffman, has worked tirelessly to establish a world-class program that fosters both physical and mental development.

In addition, the squash program has also received support from the University Board of Trustees and the Administration, who have recognized the potential for squash to enhance the University's reputation and attract new students. The Administration has allocated additional funding to support the expansion of the program, including the construction of new courts and the purchase of advanced equipment.

The University's emphasis on interactivity and collaboration has also played a crucial role in the program's success. The squash teams have formed close relationships with other University clubs and organizations, fostering a sense of community and shared purpose.

In conclusion, the University's squash program is a shining example of the institution's dedication to excellence and innovation. It is a testament to the potential for collaboration and interdisciplinary learning, and a source of pride for the University community.
Squash is not just an orange, overpriced fruit. It's a sport that involves the sporty, the player, and the public alike.

Squash is a sport that involves skill, strategy, and physical prowess. It is played on an oval court with a net that divides it into two halves. The objective of the game is to hit the ball so that it cannot be returned by the opponent. The sport is played with a small, hollowed-out ball and a racquet, which is made of wood or composite materials.

The game of squash is played in various settings, including clubs, community centers, and universities. It is a popular sport in many countries, and it has a growing following in the United States.

The sport of squash is governed by the International Squash Racquets Association (ISRA), which is responsible for setting rules and regulations for the sport. The ISRA is a non-profit organization that is dedicated to promoting and developing squash around the world.

The sport is enjoyed by people of all ages and skill levels, and it is played in both recreational and competitive settings. It is a sport that can be played indoors or outdoors, and it is a great way to get exercise and stay active.

In conclusion, squash is a sport that involves skill, strategy, and physical prowess. It is a sport that is enjoyed by people of all ages and skill levels, and it is a great way to get exercise and stay active.

Reginald Noble is in Moscow

Dr. Reginald Noble, biochemist, is part of a 20-member, 10-country team of National Environmental Joint Committee Meeting. This team is responsible for the planning of the Moscow Peace Center.

The purpose of the meeting is to plan peace management. The meeting has concentrated efforts in cleaning up the environment, negotiating for peace, and providing instructions on joint peace project investigations on various projects and the future peace management program.

Noble is a project leader for the trade and development projects. He is responsible for the carrying out of projects in the area of pollution on vegetation, particularly forest vegetation.

Noble is the only representative American among the 15 non-American delegations in Moscow. Other delegations are from Benin, Botswana, Bolivia, Brazil, Colombia, Costa Rica, Ethiopia, Finland, Italy, Japan, South Korea, the Netherlands, Nigeria, Poland, and the Soviet Union.

Eliss to speak

Crystal Ellis, "Tokyo," will speak at the University Union on February 15. The presentation will be titled "Historical Dynamics of the USA and Japan." The presentation will cover the history of Japan and the USA and their relationship since World War II. The presentation will be held at 7 p.m. in the Lenhart Grand Ballroom. Admission is $3.60.

Program helps employees to learn supervisory skills

What qualifications and skills are required to become a supervisor at the University of Toledo?

Several years of experience as a classified employee and a class A position, as a certified class A employee and a class B position, as assistant certified class A employee and a class B position, as assistant certified class A employee and a class C position, as assistant certified class A employee and a class D position, or as assistant certified class B employee and a class D position.

The program, sponsored by management support services, has been offered on a two-year basis and is now in its third year.

The program is designed to provide assistance in managing employees and programs. The program consists of four modules, each of which addresses a specific area of management.

Module 1: Management of the Individual Employee

This module focuses on the development of interpersonal skills and the ability to effectively manage individual employees.

Module 2: Management of the Team Employee

This module focuses on the development of team-building skills and the ability to effectively manage teams.

Module 3: Management of the Group Employee

This module focuses on the development of group-management skills and the ability to effectively manage groups.

Module 4: Management of the Organization Employee

This module focuses on the development of organizational-management skills and the ability to effectively manage organizations.

During the third week of classes, students cover topics such as the role of the supervisor, developing effective communication, handling conflict, and providing feedback to employees.
