Environmental programs provide unique career paths

Do you know which office is which?

Upon first glance of the undergraduate catalog, there’s something surprisingly comprehensive about environmental science. There are several programs to choose from, each offering a unique set of courses and opportunities for students interested in the field.

Thomas B. Cobb, director of the Center for Environmental Programs, described the breadth of the College's environmental offerings:

"We have a variety of programs that cater to different interests and career goals. Our philosophy is to provide students with a solid foundation in environmental science and to prepare them for successful careers in the field. We offer a bachelor's degree in Environmental Science, as well as minors in Environmental Studies and Environmental Policy. We also have partnerships with other departments, such as Geography and Biology, to provide interdisciplinary coursework for students interested in specific areas of environmental science. We believe that environmental education should be accessible to everyone, and our goal is to help students develop the skills and knowledge they need to make a difference in the world."

In addition to coursework, the College offers opportunities for hands-on experience through internships, field work, and research projects. Students have the chance to work with faculty and other professionals in the field, gain practical experience, and contribute to real-world solutions for environmental challenges.

Environmental programs are designed to meet the needs of a diverse range of students, whether they are majoring in environmental science or pursuing a minor. The College's environmental initiatives are supported by a dedicated faculty, state-of-the-art facilities, and partnerships with local and national organizations.

For more information, visit the Environmental Programs page on the College's website.
Environmental programs provide unique career paths

Upon first glance of the undergraduate catalog, there’s something surprisingly communicating about environmental programs. There’s everywhere.

A student can be a bachelor of natural science or a bachelor of arts degree in environmental science and policy from the College of Arts and Sciences. In addition, a bachelor of science degree can be obtained in environmental health, natural resources, and business from the University’s School of Business and Economics. Although the various programs might initially sound convoluted. Dr. Thomas B. Cobb, director of the Center for Environmental Programs, said there is unique and can take a student into his or her own specific field in one of the numerous areas.

"Environmental programs aren’t popular," Cobb said. "Students are interested in specific environmental issues in other areas of study. That’s what all our programs are about. To prepare students for their careers, to work in any program area."

Cobb said the majority of students in environmental programs work on an environmental science degree in the College of Arts and Sciences. Students are attracted to that program because they realize that there are a variety of career opportunities for students to design their own course of study.

Students select an area of emphasis, and with the help of an advisor, plan a program of study. They take a series of advanced courses in such fields as biology, chemistry, geography, psychology, and social science. Graduates with this degree could continue with graduate work for resource management, biological and chemical sciences, and public policies for environmental systems design.

"There are many areas of study," Cobb said. "In addition, we’re aware that the students know what they design their course of study. It’s very important to have students really want and possibly make them more realistic. The students who develop and analysis programs offer their own experience and constructive criticism.

The programs are designed to develop students interested in the technologies, legislative and organizational problems that have resulted from the impact of human activities on the natural and constructed world. Students in this program can become involved in the various programs in geology, economics, public policy, and political science. The courses taken in the program are designed to provide students with an understanding of environmental science, economics, and public policy.

The program provides students with an understanding of the environmental science, economics, and public policy.

Fulbright Scholar is in Iceland

Benefiting from recent snow storms, Blondel Green’s popularity would not be much different if Dr. James Crist, the university’s acting president, were still working as a Fulbright Scholar. Crist, a sociologist, is in Iceland doing research for the Social Science Research Council at the University of Iceland in Reykjavik. The county of Iceland is in January and will be through May.

In addition to being a professor of philosophy, Crist is a research fellow at the Institute of Peace and Development, an affiliate of the University of Iceland’s Peace and Development Center. Crist’s research focuses on international relations and environmental issues.

Auditions are set for Playhouse

The University theatre department will hold auditions for the upcoming company at Harry Blackstone, the oldest company in the country for the playhouse’s 40th season. The season will be from June 5 to Aug. 5, 1988.

Twenty actors and actresses in addition to the university staff and directors and actors will be on hand to audition. Auditions will be held at 7:30 p.m. to 10 p.m., at the Joe E. Brown Theatre in University Hall, and at the University of Minnesota’s South Building.

Equipment and training donated

The College of Technology has received $6,000 in equipment and training from the Cochrans Corporation, of Wayzata, Minn. The equipment is to be used in the College’s Natural Science program.

Rollups to lead Greece tour

As a part of the National Endowment for the Humanities, the University has organized a trip to Greece. The trip will be led by Dr. Hal D. McFall, a professor of humanities.

The trip will depart from Minnesota and will travel to Athens, the site of the Olympic games. The trip will also include a trip to Crete, the site of the Olympic games. The trip will also include a trip to Crete, the site of the Olympic games. The trip will also include a trip to Crete, the site of the Olympic games.

New credit cards benefit you and University

The University of Minnesota will offer a new credit card through the Minnesota Golden Gophers, a gift for students and alumni.

The card offering a variety of services is to be used by students and alumni. To obtain an application for the new credit card, contact the alumni office of the University of Minnesota.

Proposals due

Faculty are required to have proposals due on Feb. 15. The proposals will be submitted to the Minnesota Board of Regents. The Board of Regents is responsible for all proposals for the Minnesota Board of Regents. The Board of Regents is responsible for all proposals for the Minnesota Board of Regents.
Employees receive promotions

The following faculty positions are available:

- **Professor of Philosophy**: Computer Science & Mathematics Department. To fill a tenure-track position at the rank of Assistant Professor. Application deadline: Jan. 20.
- **Assistant Professor in Computer Science** for the 2018-2019 academic year. Application deadline: Jan. 20.

Applications are especially encouraged from candidates who can contribute to the diversity, equity, and inclusion goals of the department.

Monday, Feb. 1

**Monday matinee presentations:** "Dreams in Color" by Dr. Charles Rockwell, director of the National Center for Educational Research. 2:15-3:30 p.m. in Room 102 of the Education Building.

**Dance:** Open to the public, "The Seven Deadly Sins" by the Ohio State University Dance Company. 7:30-9:30 p.m. in the Student Union Ballroom.

Tuesday, Feb. 2

High Noon Seminar, "High Noon Seminar," presented by Dr. Gary B. Gray, professor of history, 12:30-1:30 p.m. in the Ohio State University Center for the Arts, Room 101.

Wednesday, Feb. 3

**Public Service:** Public Service Chairs for the upcoming academic year. Application deadline: Feb. 5.

Thursday, Feb. 4

**Administrative Staff Council Meeting:** 1-2 p.m. in the Ohio State University Center for the Arts, Room 101.

**Ohio State University Center for the Arts:** "Fleischmann Center," "Concert Center," and "Concert Hall." Application deadline: Feb. 5.

**Public Service:** Public Service Chairs for the upcoming academic year. Application deadline: Feb. 5.

Friday, Feb. 5

**Friday afternoon meeting:** 2-3 p.m. in the Ohio State University Center for the Arts, Room 101.

**Ohio State University Center for the Arts:** "Fleischmann Center," "Concert Center," and "Concert Hall." Application deadline: Feb. 5.

Saturday, Feb. 6

**Ohio State University Center for the Arts:** "Fleischmann Center," "Concert Center," and "Concert Hall." Application deadline: Feb. 5.

Sunday, Feb. 7

**Ohio State University Center for the Arts:** "Fleischmann Center," "Concert Center," and "Concert Hall." Application deadline: Feb. 5.
