Conservationist to speak Feb. 16

Dr. Augusto Medri, Caribbean project officer of the World Wildlife Fund, will speak on campus Thursday (Feb. 16). Information Sessions on Caribbean environmental studies are offered. The first session is 1 p.m. Monday (Feb. 13) in Room 257 of the Bisel Building. Other sessions will be 1 p.m. Tuesday (Feb. 14) and 10 a.m. Wednesday (Feb. 15) in the same room. Details can be obtained by calling 284-6205.

Classified Employment Opportunities

Faculty/staff positions

The following faculty positions are available:

• Academic Librarian
• Pay Staff

Address: Florida State University, Tallahassee, FL 32306

Application deadline approaches

High school students wanting to attend the University this summer or next fall must apply by Friday (Feb. 16) to apply for admission. John W. Martin, director of admissions, has announced that high school students must be accepted by March 15 to be considered for admission. Students applying for admission should submit a completed application file, three letters of recommendation, scores on standardized tests, evidence of extracurricular activities, any special interest and skills, and a personal statement indicating why they wish to come to Florida State. All students must be in good standing and have completed at least two years of high school to be considered for admission.

Nominations are taken for award

The deadline for nominations for the Award of Excellence in Teaching is this week. The award recognizes excellence in teaching and is open to all full-time and part-time faculty members. The award is sponsored by the College of Liberal Arts and Sciences, and the deadline for nominations is March 1.

Fulbright Scholar feels right at home in new surroundings

Dr. Hans-Jurgen Weckermann, a visiting professor from the University of Münster, West Germany, feels right at home in the United States. Although he has never been to the United States before, he said that he feels comfortable and at ease here. Weckermann, who specializes in Shakespearean studies, said that he enjoys meeting new people and learning about American culture. He also enjoys the opportunity to teach in an American classroom and to work with American students.

Deans' voting privileges are given support in council vote

With a long list of agenda items, the Classified Staff Council meetings last week covered all of its business.

Deans' voting privileges for full motions of consideration (FOMC) and for FOMC and reports that go to the Undergraduate Council to forward to the University Committee were discussed last week. Since there has been a move to make the Undergraduate Council meet monthly, it has been suggested that deans be allowed to vote on motions that are discussed before the Council.

According to the current rules, deans do not have voting privileges. The current system was set up to ensure that faculty, who are majority members of the council, would have significant influence over policies that affect students. The council did not discuss whether or not this privilege would be allowed to deans who are also faculty members of the university.

The council did not discuss whether or not this privilege would be allowed to deans who are also faculty members of the university.

text is sensory deprived children

Two faculty members are co-authors of a new book that discusses the difference between teachers and teachers with disabilities. The book, "Sensory Deprivation and Learning: How Teachers Develop Motor Skills in Sensory Dependent Children," was published last year and has been well-received.

The book highlights how teachers can incorporate sensory deprivation into their teaching methods, and how to effectively teach students who have sensory deprivation. It also provides practical strategies for teachers to use in the classroom.

Eldredge named visiting lecturer

Dr. Donald Eldredge, English, has been named visiting lecturer. His topic is "The Triumph of Medical Science in Revolutionary France, 1789-1848." During his five-week Fellowship from May 2-3, he will offer undergraduate and graduate courses on the subject. Classmates and colleagues also have named Dr. Eldredge as a leading authority in the field of the French Enlightenment.

Eldredge was named visiting lecturer for the 1988-89 academic year by the U.S. Department of Education. He is currently a professor at the University of California, Berkeley.

The American Council of Learned Societies (ACLS) has awarded a grant to the University of California, Berkeley, to support the project. The grant will provide a total of $25,000 for the project, which is expected to begin in the fall of 1988.

The grant will support the project by providing salary and travel expenses for the visiting scholar, as well as funds for travel and transportation to and from the University of California, Berkeley.

The project is expected to last for five years, and will be conducted in close collaboration with the ACLS.

The project will focus on the relationship between medical science and the French Revolution, and will explore the ways in which the Enlightenment influenced the development of modern medicine and science.

The project will also examine the role of physicians and scientists in the Revolution, and will consider the impact of the Revolution on the development of medical knowledge and practice.

The project will be conducted at the University of California, Berkeley, and will be directed by Dr. Donald Eldredge.
Deans' voting privileges are given support in council vote

With a long list of agenda items, the College of Education faculty meetings last week covered all of its business. The first two hours of the meeting were devoted to approval of the minutes from the previous two meetings, and the consideration of several motions and requests for funds. Among the agenda items were the presentation of a paper by Prof. John Smith on the use of technology in teaching. The paper was well-received, and the faculty passed a resolution supporting the continued use of technology in the classroom.

The third hour was devoted to the discussion of the budget for the upcoming academic year. The faculty approved the budget, which includes increased funding for research and student services. The fourth hour was spent on the consideration of several policy changes, including a new policy on student conduct and a new policy on faculty tenure. The faculty approved both policies, and a committee was formed to implement the changes.

The final hour was devoted to the discussion of the future of the college. The faculty discussed the possibility of merging the college with another institution, and the decision was made to continue discussions. The faculty then adjourned.

The faculty meeting was well-attended, with over 50 faculty members present. The faculty members discussed the importance of the college's role in the community, and the need to continue to support the college's mission.

Students and faculty expressed their support for the college, and the meeting ended on a positive note.

Deans' voting privileges are given support in council vote

On a related note, the council has voted to give deans voting privileges in council meetings. This decision was made after a long discussion on the matter. The council members voted in favor of the motion, with only a few members opposing. The council members were able to agree on this matter, which is a positive development for the college.

The council members also discussed the possibility of merging the college with another institution. The council members voted in favor of the motion, with only a few members opposing. The council members were able to agree on this matter, which is a positive development for the college.

Text's focus is sensory deprived children

Two faculty members are co-authors of a new book on the topic of sensory deprivation in the classroom. The book, which is titled "Sensory Deprivation in the Classroom," will be published later this month. The book will provide teachers with practical strategies for creating an inclusive and supportive learning environment for all students.

The book will be released on March 1, and is available for pre-order on Amazon. The book will be published in both print and digital formats, and is available for purchase at a discounted price for educators.

Annual Tuition Raffle being held

The University hopes Student Assistant A. J. on his upcoming annual Tuition Raffle from Feb. 29 through March 15.

Tickets can be purchased from any HSA member or at Student Assistant A. J.'s office, 231 Administration Building, for $1 per ticket or by calling 419-530-3703.

The winner will be determined by a drawing to be held at 2:30 p.m. on March 15 in the HSA office. The winner will be announced by Dr. Paul Fein or Susan Darby at 3:2/2:1021.

Awards Audited

The theatre department will hold open auditions for the play "The Golden Fleece" by John Van Druten and "Lustful" by F. X. Forster. Auditions will be held on Feb. 22 and 23 in 440 University Hall.

Production will be scheduled for 8 p.m. April 9, April 10 and April 16 in the Brown Theatre. Auditions will be held on Feb. 9 and 10 in the Brown Theatre.

Positions are filled

Several employees have recently joined the ranks of the Sanai's staff members, including:

Claudia Andrews, director of student life; and Beth Luhrs, director of the Center for Community Leadership.

Robert Flanagan, director of the Center for Multicultural Studies.

Stuart Miller, director of the Center for Academic Development.

Richard Brown, director of the Center for Academic Development.

Anniversary Celebration

The University will celebrate its 10th anniversary on March 16.

The event will feature a special dinner at 6 p.m. at 440 University Hall, followed by a reception at 7 p.m. in the Brown Theatre.

The program will include speeches, presentations, and a special performance by the university choir.

The event is open to the public and is free of charge.

Contact Dr. Paul Fein or Susan Darby for more information.

New Fiorello program turns Lake Erie into a classroom

Administrators and faculty at the New Fiorello program have recently transformed Lake Erie into a classroom to provide students with a unique and engaging learning experience.

The program, located on a 10-acre island in the middle of the lake, offers students the opportunity to learn about various aspects of life on an island, including wildlife, marine biology, and ecology.

The island is home to a variety of plant and animal species, providing students with a hands-on learning environment.

In addition to the regular classroom activities, the program includes hands-on experiences such as marine biology lessons, wildlife observations, and island tours.

Students are encouraged to participate in hands-on activities and to explore the island to gain a deeper understanding of the local ecosystem.

The New Fiorello program hopes to continue expanding its offerings and providing students with a unique and immersive learning experience in the future.
