It's that time again! Classrooms are but half filled, the Lib is empty, term papers are forgotten, the streets are deserted, and«coals are starry-eyed. The Browns are back.

Ever since Coach Paul Brown decided to bring his first professional football team here five years ago, Bowling Green State University has played host to the Cleveland Browns during their pre-sea-son.

This year Brown paid BGSU a great compliment when, facing the tough season a professional NFL team would mean, he called upon to meet, he again elected to return. The Browns contingent eats and sleeps in style at the Field Club and at the Alpha Xi Delta sorority house respectively. The Nest is closed to students from 6 to 8 p.m., from 11 to 12, and from 1 to 4 p.m. in the afternoon.

In return for this inconvenience, the students will be treated to the opportunity of watching the Browns practice twice a day, morning and after-

Clemencia Diaz Will Get Degree in Aug.

Clemencia Diaz, niece of the late Domingo Diaz, former President of the Republic of Panama, will receive her Master of Arts degree from Bowling Green State University this August.

Mencia came to the United States early in 1946 to act as the Panamanian Vice-Consul at Toledo. A short time later, after visiting friends who were attending school here at Bowling Green, she decided to resign her position to enroll for the summer session.

She liked Bowling Green and decided to stay on. Although she had graduated from the University of Panama in the field of physical education, here she majored in English. In June, 1945, she received the degree of Bachelor of Arts.

Mencia, who is assistant house director at Shatell Hall this summer, plans now to return to Panama in September, after visiting friends in this area.

Beyond that, she hasn't decided. Several teaching opportunities are open to her, including a position at the University of Panama. Moreover, she has been offered her former position of Vice-Consul.

Others of Mencia's family have held Panamanian governmental posts. In addition to her uncle, the former President, her brother, Manuel A. Diaz, is President of the Tribunal, an organization comparable to the United States Supreme Court.

This Is The News...

The summer NEWS is always something of a problem, but this year it has been even more so. During the year, the student body generally ranges in age from 18 to 25 years. In the summer, however, the latter number may extend all the way up to 60—and sometimes does.

The editors' problem, then, is to produce a newspaper aimed at both younger and older students' interests. The younger summer student looks upon more serious material as "irrelevant." Thus, a compromise must be attempted.

However, this year, it would seem, the majority of the summer students are in the "older" category. At any rate, the lighter regards a lighter treatment as "frivolous." Thus, a summer student looks upon more serious material as "stuffy."

Besides this, the innovation of micro-film and micro-print may extend all the way up to 60—and sometimes does. The editors' problem, then, is to produce a newspaper aimed at both younger and older students' interests. The younger summer student looks upon more serious material as "irrelevant." Thus, a compromise must be attempted.

Rosenberg's theme, "Academic Growth Was Matched by PhysicOal Expansion," is one that is particularly true of this year. For instance, last year the University of Chicago opened a course of study in physics, but this year it has been even more so.

## Books, Books, Books...

If anyone had any occasion to doubt former KEY Editor Al Rosenberg's theme, "Academic Growth Was Matched by Physical Expansion," the attitude will be resolved by the recently proposed Library addition.

Oftentimes prospective college students (and certainly graduate) students judge an institution by the book capacity of the library. Sometimes the physical size of the structure is also taken into consideration. Our Library now contains roughly 110,000 bound volumes and 75,000 government pamphlets. The proposed addition will provide space for an added 87,000 volumes.

Besides this, the innovation of micro-film and micro-print will extend all the way up to 60—and sometimes does. The editors' problem, then, is to produce a newspaper aimed at both younger and older students' interests. The younger summer student looks upon more serious material as "irrelevant." KENT, O. — Contractors build-
ing the new million dollar Physi-
cal Education Bldg. at Kent State
University have an unusual prob-
lem.

The Western Reserve Construc-
tion Co. of Warren recently had to
hire a watchman to guard the
building after hours. It seems
youngsters in the neighborhood of
the campus were using the flat
roof of the huge building for a
baseball diamond.

The gym measures 235 by 300
feet and covers more than one
and a half acres. It will house
18,000 persons for basketball
games.

Library Addition
(Continued from Page One)
The firm has designed the addi-
tion to harmonize with the old
building. Terra cotta will again
be used.

The Watts Construction Co., of
Toledo, is scheduled to receive the
general contract on the structure.
The Watts bid is $107,107.

Other low bidders are: Gesling
Co., Lancaster, $15,000 for plum-
ning, heating, and ventilation;
Columbus Brick Mfg. Co., Col-
umbus, $7,898 for Library
stock; and Procter Electric Co.
Toledo, $7,665 for electrical work.
