Staff should note policy warning

In the event of severe weather, any decision to cancel classes will be communicated to faculty, staff and students by the Office of Public Relations, WJMN (1310 AM, 97.1 FM), WJMN-FM, World-Wide, WQUF (90.7 FM), WOAM (1360 AM), WJMN-WFB (90.7 FM) and the three Toledo television stations, channels 11, 13 and 21.

Every effort will be made to notify these media 67.5 minutes in advance of the cancellation. If a later announcement is necessary, the cancellation of afternoon or evening classes, the public relations office will notify the above-listed media as soon as possible.

Though classes may be cancelled, all University employees are expected to report to their job assignments unless a specific announcement canceling work schedules is made.

Also, employees should not be confused by the decision to delay a class because, in some instances, "broadening of classes" is used, rather than delay because of weather at Bowling Green.

Colloquium planned

The Seidenglanz Center for Career Development at Bowling Green State University will host a colloquium presented by Gary Fishman, professor of management at the University of Michigan, on "The Future of the Automobile: Energy and Air Pollution Issues," at a special colloquium on 1-23-90 (Wednesday). At 2 p.m. on Jan. 18 in the Plantarium.

Mr. Fishman, while a student at the University of Michigan, will speak on "The Future of the Automobile: Energy and Air Pollution Issues," at a special colloquium on 1-23-90 (Wednesday). Mr. Fishman, while a student at the University of Michigan, will speak on "The Future of the Automobile: Energy and Air Pollution Issues," at a special colloquium on 1-23-90 (Wednesday).

Mr. Fishman, who is currently a professor of management at the University of Michigan, will speak on "The Future of the Automobile: Energy and Air Pollution Issues," at a special colloquium on 1-23-90 (Wednesday).

Chairs reflect on a new spirit of cooperation among them

Bartley Brennan: Faculty Senate

Representing the interests of approximately 7,112 full-time and 4,567 part-time faculty members throughout the university, the Faculty Senate is the official governing body of the university's faculty. The Senate is charged with the responsibility of formulating, coordinating, and implementing policies covering a broad spectrum of issues affecting the faculty.

Bob Kreikenkop: Classified Staff Council

The Classified Staff Council is a representative body of the classified staff that meets regularly to discuss issues of concern to the classified staff and to represent the classified staff to higher levels of management.

Patrick Fitzgerald: Administrative Staff Council

The Administrative Staff Council is a representative body of the administrative staff, consisting of elected representatives, who meet regularly to discuss issues of concern to the administrative staff and to represent the administrative staff to higher levels of management.

Sometime in Administrative Staff Council meetings run a symphony and function that on the surface seems life being done by the council members. But Chief Patent Fitzgerald knows that it is easy to make the operation run smoothly when there exists a nimble of informed and well-coordinated people that work together with great enthusiasm and great attention to the business of the university. The classified staffs are paid to be teachers and issues. Continued on page 3

CSC sets criteria for service award

With the outstanding service award presented at the 1987 Classified Staff Council meeting, the Classified Staff Council has set some criteria.

1. Be a member of the classified staff.
2. Have been employed by the university for at least two years.
3. Have demonstrated exceptional service to the university.
4. Have received positive evaluations from their supervisors.

Any classification might be eligible for the award. The award is to be given annually, and the selection committee will meet each year to choose the recipient.
Chairs reflect on a new spirit of cooperation among them

Barley Brennan: Faculty Senate

Brennan did not plan to be in the position he is in this year. Having served as chair of Class of 1967 Senate during the 1987-88 academic year, he was looking forward to serving the council simply in the capacity of a senator.

But his serving as chair of last year's Executive Committee and the formation of the Senate, both of which he led, have clearly marked that as a career.

Seeing over 2,000 students and staff members at the Nov. 11 dedication ceremony for the new South Campus Center, Brennan was optimistic about the future of the university.

"I have faith that the budget cuts won't be enough to keep the college from expanding," he said. "Many people are optimistic about the future, including myself."

Brennan also said he is optimistic about the future of the Senate.

"I see a lot of potential in the Senate," he said. "I think we can really make a difference in the future."
Nobel Prize winner to lecture on Thursday

Dr. William Lipscomb Jr., winner of the 1976 Nobel Prize in Chemistry, will give the Louis D. Brandeis Lecture Series Thursday March 23. The lecture will be held at 3:30 p.m. in the auditorium of the Stroh Center.

Both presentations are free and open to all interested persons.

Lipscomb's research interests include the structure of the enzyme and function of macrocyclics in biological systems. He is also involved in the development of the relationship of genomics and proteomics to the studies of genomics and organic chemistry.

Lipscomb, who is professor of chemistry at Harvard since 1973, and named as chief of Harvard's Chemistry Department in 1982, has also been active in the development of the relationship of genomics and proteomics to the studies of genomics and organic chemistry.
