Renowned jazz guitarist to perform

Nestled in the heart of downtown, the Center for the Performing Arts has scheduled a weeklong series of concerts featuring some of the world's most renowned musicians. This week features renowned jazz guitarist Joe Pass, who will perform at 8 p.m. on Thursday, February 27, at the Blue Room on Main Street. Pass has been performing for over 60 years and has worked with some of the biggest names in the industry, including Ella Fitzgerald, Frank Sinatra, and Tony Bennett. His smooth, melodic style has earned him critical acclaim, and he is known for his innovative approach to improvisation.

Pass has an impressive list of accomplishments, including numerous Grammy nominations and wins, as well as a lifetime achievement award from the National Association of Pastoral Counselors. His music has been featured in numerous films and television shows, and he has recorded over 100 albums. His reputation as a masterful performer has earned him a dedicated following among jazz enthusiasts worldwide.

Tickets for the concert are available at the Center for the Performing Arts box office or online at thecenter.ticketmaster.com. Doors open at 7 p.m., and the show is expected to sell out quickly, so fans are encouraged to purchase their tickets in advance.

For more information about Joe Pass and his upcoming performance, visit thecenter.ticketmaster.com or call the box office at 555-1234.
Fit as a fiddle? Lab's new high tech equipment tests health

Duncan, fitness metabolic measurement are generally exercised on the laboratory's treadmill expanded opportunities for present interest and effectiveness to their challenge.

Four pieces of new equipment have arrived at the laboratory's treadmill and professor Ronald Partin, director of the Fitness and Sports Psychology Laboratory, is excited about their potential.

The first new item is a metabolic cart, which helps determine the metabolic rate while the individual is exercising. The cart connects to an EKG feature oscilloscope (monitors) as well as dry reagent analyzer, a special tool for measuring metabolic rate, which helps determine the metabolic rate while the individual is exercising.

The second new piece of equipment is a fiddle? Lab's new high tech equipment tests health. Because Lovett is the Director of the Fitness and Sports Psychology Laboratory, he believes that these new pieces of equipment will be beneficial for the lab's research projects as well as for the students who will be using them.

The third new piece of equipment is a portable EKG machine, which helps determine the metabolic rate while the individual is exercising. The portable EKG machine is housed in the existing equipment and will be used for pretesting. Through this equipment, doctors and researchers will be able to determine the metabolic rate while the individual is exercising.

The fourth new piece of equipment is a device that helps determine the metabolic rate while the individual is exercising. This device is also interfaced with the portable EKG machine, allowing for a more accurate determination of the metabolic rate.

With the installation of the new equipment, students can be more easily tested in a laboratory setting. The new equipment allows for a more comprehensive understanding of the metabolic rate and can be used for a variety of research purposes.

Ronald Partin, director of the Fitness and Sports Psychology Laboratory, is excited about the potential of these new pieces of equipment.

Textbook exemplifies Partin's teaching philosophy

In his role as a professor, Ronald Partin, director of the Fitness and Sports Psychology Laboratory, has co-authored a new social studies text book that emphasizes the importance of interest and effectiveness to their clients.

Partin's teaching philosophy is centered around the idea that students should be engaged in the learning process and that the environment should be conducive to their success.

Partin's textbook, "Travels in the Social Studies," is designed to engage students in the social studies curriculum and to encourage them to explore a variety of topics in a meaningful way.

The textbook is structured in a way that allows students to engage in critical thinking and to make connections between the material presented in the book and their own experiences.

Partin's teaching philosophy is also evident in his approach to grading. He believes that grades should be used to assess student understanding and to encourage them to continue to engage in the learning process.

Career resources are consolidated

Recent changes in the career services area are one example of the efforts to consolidate resources and improve the effectiveness of the career services.

The center, which is located in 300 Student Services Building, is open on a regular basis, as well as on a part-time basis. In addition, the center has a website that is available to students and faculty.

The center is open from 8:30 a.m. to 5:00 p.m., Monday through Friday. In addition, the center has a website that is available to students and faculty.

CSC from the front page

The council meets monthly to discuss a variety of topics, including the university's academic programs, student services, and campus facilities.

The council is composed of faculty, students, staff, and alumni, and the meetings are open to the public. In addition, the council has an online presence, with a website that includes information on the council's meetings and other activities.

The council is one of the most powerful organizations on campus, and its decisions can have a significant impact on the university's operations and the lives of its students.
Textbook exemplifies Partin's teaching philosophy

Don Partin, Bowling Green, Ohio, is the co-author of Sociology: Approaches and Perspectives, published by the University of Southern California's University Student's Government Foundation and Counseling Programs. The book is designed to promote student involvement in their school's affairs.

A more than 5,000 books and journals are gathered with the Counterculture movements of the United States from 1950s to 1970s has been acquired by the Psychology Library at Stanford University. The collection includes books, journals, and pamphlets on such topics as radical sociology and social theory, political economy, culture, modernism, and social theory. The collection has been assembled through the efforts of several major researchers, including Ronald Reagan, California's Governor-elect, and the late Sen. John Kerry, D-Mass.

Benefit survey prompts high a response rate
A total of 863 completed benefit survey forms have been received by the Benefit/Insurance Office. The response rate approximately 45 percent of the 2,030 faculty, administrative and technical employees.

James Morris, manager of the office, said that the response is a strong indication of interest in the health care program, as well as the degree of satisfaction with the administrative and claims service.

Comments made by those participating in the survey included need for a workshop is planned
Managers, you decide the selection method for faculty and they are not acquainted with the process of teaching students to prepare for, design and conduct an effective selection process. Topics to be covered include a discussion of University, state and federal guidelines for faculty and the skills and techniques for choosing, training and evaluating new faculty.

The workshop will be from 9 a.m. to noon, Monday in the Union. It will be conducted by Sam Klecka, coordinator of employment services, and Yvonne Burcham, assistant director of the Institute for Psychology and Development.
The workshop is being sponsored by classified employment services and the training and development department.

To register, contact Ruth Friend Melin, training coordinator, at 372-2336.

Classified Employment Opportunities
The following positions are currently open:

Open Competitive Examinations
Position: Police, Police 6; Firefighter, Firefighter 3; Firefighter 5; Firefighter 6
Deadlines: March 10, 15, 19

Visual Communication
College of Education and Allied Professions
Assistant professor, mechanical design.
Deadline: March 6, 1989

Statistics
College of Education and Allied Professions
Full-time assistant professor, statistics.
Deadline: March 6, 1989

Help update list
The University is in need of volunteers to update the list of faculty and staff who are interested in participating in any of the University's Health Center health care programs.

Diversification of faculty topic of forum panel
By the year 2010, 50 percent of the lower-middle-track faculty in all categories will have retired according to recent projections. Filling those positions with minorities and women in particular will present a number of challenges, requiring affirmative action-reaction initiatives, to stimulate interest in science and administrative positions and to encourage the recruitment of minorities and women for particular positions.

Dr. Don Clark, vice chair of the faculty senate and chair of the committee on Afro-American and women affairs, moderated the forum.

Those who participated in the forum included
Dr. Richard Anderson, dean of the College of Engineering and Allied Professions; Sue Perkins, director of the Women's Center, College of Education and Allied Professions; Dr. Richard Johnson, College of Education and Allied Professions; and Dr. Edward Balakrishnan, College of Education and Allied Professions.

A large majority of the panel members agreed that diversity is important to the University's mission. They addressed the need for affirmative action-reaction initiatives for the recruitment of minorities and women. They agreed that the University does not have a comprehensive strategy for recruiting and retaining minorities and women in academic and administrative positions at the University.

The University is in need of volunteers to update the list of faculty and staff who are interested in participating in any of the University's Health Center health care programs.

Mon, Feb. 27, 4 p.m.
