Right Or Wrong...

The firing of General Douglas MacArthur by President Truman certainly will prove a turning point in history. There is no question that the commander-in-chief has the power to dismiss one of the world's foremost military men. Nor is there a question of the use of this prerogative in relation to the United Nations.

There can be no doubt that Truman's action was prompted by his political advisers and that they in turn were pressured by our allies in Western Europe. England and France advocate our appeasement of Communist China and even of this and our citizens who think the United Nations should hand over both Korea and Formosa to the Reds.

This would possibly mean the abolishment of our own defense line against the bombastic Communists in the Far East Britain and France have no cause to want to fight a war in the Far East. But has the United States? Are we to protect our defense line in the Far East or are we to possibly lose valuable defendable allies such as Great Britain and France. This decision must be made in the near future.

Should we lose Formosa and Korea to the Chinese Reds what would be the next step for the Community? There is no reason for us to believe they wouldn't invade Japan. And should Japan be communized, another great step would be made toward domination by the Communist-influenced peoples of the world.

Communism is a direct descendant of the theories and principles advocated by Karl Marx. Marx believed that communism and capitalism could never peacefully coexist in the world. Whether General MacArthur was taking these things into consideration when he was president in China is not known. But the fact remains that no one knows the Far East politically and militarily better than General MacArthur.

But it seems to us that the real question which arises over the firing of General MacArthur is the question of who among one of the world's foremost military men. Nor is there a question that the commander-in-chief has the power to dismiss one of the world's foremost military men. Nor is there a question of the use of this prerogative in relation to the United Nations.
