The Student Body Officers Denounce Tu "Lack Of Interest" Accusation

The Student Body Officers of the University have sent a letter of protest to the Editor of the CAMPUS COLLEGIAN, official student publication of the University of Toledo, because of an erroneous article in an article appearing in the March 20 issue of the paper.

This article and Bowling Green was misrepresented at the first annual Mid-American Student Government Conference held at Tu. March 13 to 15, and thus showed a lack of interest to the students' association.

The conference was held at the University Union, and was attended by 90 students from 10 Mid-American universities.

The Mid-American Student Government is scheduled to be held at one of the Mid-American universities next year.

The conference was held at the University Union, and was attended by 90 students from 10 Mid-American universities.

The conference was held at the University Union, and was attended by 90 students from 10 Mid-American universities.

Radioactivity Is Studied
By University Biologists

As part of an extensive and well-sponsored program by the Atomic Energy Commission, the department of biophysics is conducting experiments in plant and animal life, utilizing radioactive substances, in order to study the effects of these substances in plant and animal life. The experiments are being conducted in the biology department to see what effect the radioactive substances have on the plants and animals. The results of these experiments will be published in the near future.

Tests are now being conducted all over the country, and they are being conducted in a systematic way. Scientists from various institutions are conducting the experiments, and the results of these experiments will be published in the near future.

Radioactivity has been found to be five times greater than was expected, and it is found to be present in the leaves of plants. The amount of radioactivity present in the leaves is greater than that found in the tests conducted in the past. This is because of the increased use of radioactive substances in the present day. However, this is not considered to be a serious problem, and it is believed that the radioactive substances will not harm the plants and animals.

Tests at short intervals will be taken in order to see if the leaves of the tobacco plants are absorbing the radioactive substances. These tests will be conducted in order to see if the radioactive substances are having any harmful effect on the tobacco plants.

Another phase of this program is being carried out at Urbach Ranch. This phase of the program is being conducted in order to study the effects of radioactive substances on the plants and animals. This phase of the program is being conducted in order to see if the radioactive substances are having any harmful effect on the plants and animals.

Within the next five to ten years, it is expected that the science of radioactivity will be developed to the extent that it will be possible to use radioactive substances in order to study the effects of these substances on the plants and animals.
Track, Golf, Baseball, Tennis Squads On Road

Baseball Falcons Split

win. with a 7-1 win over Kent State where he left off last year in that seven and walking three. He had including two doubles.

day.

in the first, fourth, and walking three. He had including two doubles.

Falcon Golfers

Down Kentucky

The Falcon linksmen opened the fall golf season with a victory over the Western Michigan and Butler teams at the new "4-10" course. Jim Herger leads the team in the opening match, which was played at 71 and added 77. Senior Jim Bernetto followed the junior finisher with rounds of 74 and 76. Senior Dave Laabs, round of 78, and Freshman Gary Strueber, round of 81, took the fifth spot.

Banquet Honors Cage, Nat, Swim Champs

For the first time in the history in any gymnasium. Three teams of a school were honored for championships in the three fall sports, volleyball, soccer, and tennis.

Mike Thundalos Defeat Falcons

Miami’s Thundalos swept the Falcon Saturday in the outdoor meet of the season. For Bowling Green, Bertie Gay was the outstanding performance. He won both the 100 and 200 yard dashes, and added the 220 yard dash.

Prom-perfect... or for any date

It’s easy to see why Arrow White Shirts are the most popular on campus. Authentic in every style for any date they’re the best in every style for casual wear in circulation today.

Our exclusive Montgomery’s tailoring makes them that way from collar shirts in circulation today. The California “rush” is still going on, and the teenage boys everywhere are the first to find the best.

Netters Down Dayton; Defeated By Redskins

A word of thanks. The Falcon netters, led by the Guccione-Cooper doubles, added the 100-yard dash. Despite cold winds and general rain, the season’s opening match with Miami was won by Bob Bauer, leading 6-1, 6-2, and winning the second set, 6-4, by breaking Bob Bauer’s serve in the third.

Starry Knights

The sports scene on the BG campus is really blazing this time of year with the gridiron out for spring practices, and the tennis, golf, track, and basketball teams peaking into action.

By the way, if anyone happens to see a baseball field floating by or happens to know where one already has been placed notify the athletic department. Seems the lighthouse at the old field has been torn down and the new field (the one they’ve been working on for several years) hasn’t been completed yet. Until someone comes up with something one can MWIE.

Swan Club (Continued from page 11)

The first event of the season was held December 3, with a full house to hear the group sing in the cold. In the season’s opening meet, December 12, at 5-1, the team beat the Ganim-Colburn team, Jim Herger, 6-1, 6-3.

The California “rush” is still going on, and the teenage boys everywhere are the first to find the best.

This mid-year exam-time—to be followed, in all likelihood, by a period of student complaints and excuses. These examples collected from past years come under the head of

"Why My Grade Should be Raised."

1. There must be a mistake somehow.
2. I am taking too many courses and they are getting on top of me.
3. My work is not quite finished. There are omissions and unintentional omissions.
4. I am not very well and I have been ill lately.
5. Mathematics is your poorest subject, yet you are good at English.
6. My health is not good and the examination is too severe.
7. Conditions in the room were so bad that I could not study properly.
8. The victim requires marks for academic purposes.
9. The examination was unfair and unnecessarily long.
10. I have to work through the examination.

"Why My Grade Should Not be Raised."

1. I am very honest and I do not wish to say anything that might disapprove of me.
2. I have studied this project for a long time and I have not cheated in any way.
3. I have studied hard and I feel I have been well prepared.
4. I have discovered something important that is of great value.
5. I am not very well and I have been ill lately.
6. I have put a lot of effort into my studies and I deserve a good grade.
7. I have worked very hard and I have been working very, very hard.
8. I have not been able to complete the examination.
9. I have been a very good student and I have always done my best.
10. I have been a very good student and I have always done my best.

"Why My Grade Should be Raised."

1. I have worked through the examination and I am sure I have done well.
2. I have worked very hard and I have been working very, very hard.
3. I have discovered something important that is of great value.
4. I have put a lot of effort into my studies and I deserve a good grade.
5. I have been a very good student and I have always done my best.
6. I have been a very good student and I have always done my best.
7. I have worked very hard and I have been working very, very hard.
8. I have put a lot of effort into my studies and I deserve a good grade.
9. I have worked through the examination and I am sure I have done well.
10. I have worked very hard and I have been working very, very hard.

In The Realm Of Professors

Leader of Conference
Dr. Stuart K. Guion, assistant professor of history, was a discussant at the second annual conference on this year's theme: "The Reference of Contemporary..." Theology for Higher Education at Otterbein University last week end.

Faculty from Ohio, Illinois, Indiana, and Kentucky were represented at the conference sponsored by the Board of Education of the Methodist and Disciples of Christ churches, in cooperation with the Faculty Christian Fellowship. Dr. Nola C. Ferris, abbot professor of Christian theology, An- dover Newton Theological School, made three speeches centered on re- eumism, existentialism, and humanism.

Dr. Joseph Hummel, assistant professor of music, Dr. Samuel N. Copier, chairman of the department of English, and Dr. Margaret L. Underwood, professor of education, all addressed the gathering. The Education Department Fellow director, also attended the conference.

Tuttle Attends Meeting
Dr. Tom H. Tuttle, chairman of the geology department, and Dr. Drusilla A. Hillard, who will attend the meetings of the Ohio and Indiana Philosophical Association at Earlham College, Richmond, Ind., last week end.

Dr. Nola C. Ferris, was present at the meeting of the National Association of the00 College and University Faculty last week end.

Dr. Kenneth C. Schurk, dean of the College of Liberal Arts, has contributed an article entitled "A Cottager's guide to the cream of 'Exercise of Experiments.'" The article was written on the teaching of the liberal criticism.

While never quite a leader of men... and not quite a direction... still runs on with the judgment, the old man's epithet. He was serious, nervous, zealously unaware, every time a young... and now the new Executive.R.

Course In Criminology Investigates Problems

Students who have good back-grounds in statistics and economics will find Criminology 101 practical and useful, according to Dr. James R. Hunter, associate professor of sociology.

His class is presenting research based on an item on the front page of the campus newspaper, the Student Union, for the past three years. The research project is not only valuable to the student, but also to others who may be interested in criminology.

In their project, research projects that are used to determine the efficiency of the punishment system, are carried out. The research involves the study of a group of 100 people who were involved in criminal activities.

The project is divided into three parts. The first part is a survey of the students involved in the project. The second part is a study of the criminal activities of the students involved in the project. The third part is a study of the criminal activities of the students not involved in the project.

One-Man Display Currently Exhibited In Fine Arts Bldg.

Currently on exhibit in the gallery of the Fine Arts Bldg. is a one-man exhibition of contemporary paintings, drawings, and sculpture by Mary Jeanne Connelly. Miss Connelly has a B.A. degree from the University of Virginia, a B.F.A. degree from the University of California, and a M.F.A. degree from the University of Paris, France. She was a 1957-58 Fulbright art scholar to Florence, Italy. The exhibit, Miss Connelly's first one-person show since her return last fall from the Continent, will be open from 9:30 a.m. to 5 p.m. on weekdays, through April 15.

In Florence last year, she stud-ied at the Institute Alberti di Art. Miss Connelly has travelled extensively throughout Europe, and her works have been shown in numerous galleries in the United States and Italy.

Chorale Gives Concert

The College Chorale presented a concert of sacred and secular music in the 16th Century composition tradition to those of the era. The concert was held in the Fine Arts Building on April 12th. The concert was attended by a large audience of students and faculty.

One new program for the Spring semester is the "College Chorale," a group of students and faculty who perform classical music. The group is directed by Dr. Hiram B. Smith, professor of music.

Medal Awarded To Army Prof

Lt. Col. Harold Breudy, professor of Military Science and Tactics, was awarded the Army Commendation Medal in a ceremony at the BGSU ROTC detachment on April 12.

Col. Theodore C. Simms, deputy commander of the BGSU ROTC detachment, presented the award.

Colonel Breudy received the Commandant's Merit Award, an award presented to Commanding Officers of the BGSU A.A. Clubs, for excellence in the performance of duty.

Johnson Will Receive Air Force Promotion

Capt. K. Johnson, assistant professor of Air Force ROTC at BGSU, was promoted to major, effective April 15, according to Capt. J. V. Strebella, Division of Air Force ROTC, BGSU.

Johnson, who was graduated from pilot training in 1970, served as an aircraft controller and jet pilot before he became assistant professor of Air Force ROTC at BGSU.

Johnson's service record includes combat tours in Korea, Vietnam, and Europe, the Near East, and all major airfields in the Pacific.
