Contributions of faculty recognized at awards dinner

The achievements and contributions of BGSU's faculty were recognized and rewarded Oct. 28 at a dinner in their honor.

Faculty with many years of service were honored, as were those who have recently retired. Topping the list of current faculty, at 45 years with BGSU, was Dr. Donald Rowney, history. With 40 years was Dr. Michael Bradie, philosophy. At 35 years were Drs. Vincent Corrigan, musicology/composition/theory; Donald Enholm, School of Communication Studies; Lewis Fulcher, physics and astronomy; Kathleen Hagan, art; Peter Henning, applied sciences, BGSU Firelands; Ronald Lancaster, computer science; Donald McQuarie, American culture studies, and Lee Meserve, biological sciences.

Faculty were also recognized at the 15-, 20-, 25- and 30-year levels.

Boatwright earns Master Teacher Award for special blend of advising, teaching

Helping students be successful—both in and out of the classroom—is a hallmark of Dr. Earl Boatwright. Part of his method involves continually relating his classroom teaching in the marketing department to the outside world and encouraging students to apply relevant concepts. Along with this is the extraordinary generosity of time and care he shows them.

Students rewarded his commitment by naming him the 2008 Master Teacher. The highly prestigious award was presented Oct. 28 at the Faculty Awards Dinner by the Student Alumni Connection and the Alumni Association. Along with it came \$1,000 and a plaque.

According to Ashley Timmons, a senior from Centerville who is majoring in business administration and specializing in marketing and supply chain management, "I was instantly impressed with Dr. Boatwright because instead of jumping into the course material, he talked about making the most of our college experience. He spoke about all the opportunities that BGSU has to offer and made himself available whenever and however he was needed."

Timmons was chair of BGSU's chapter of the American Marketing Association last semester when it was named one of the top 16 chapters in the association and in the top 5 percent of AMA student chapters in the world. She gave part of the credit for the success to the advising of Boatwright.

Alumnus Jacob Puhl, a former student of Boatwright's now employed by Marathon Oil, said he "exhibited a style and approach that kept me and other students constantly interested by associating the material with real-life experiences. He demonstrated a unique ability to relate material to his students."

Boatwright says, based on his own research, "it is my firm belief that, if given accurate information regarding expectations, not just in the classroom, but for post-graduation, many students will respond to the challenge and responsibility of working hard to maximize their collegiate learning experience."

Boatwright said he feels one of the most valuable experiences he can offer students is involvement in the BGAMA chapter. "Students are challenged to develop programs, strategies and activities that contribute toward their own professional development. They interact personally and professionally with some of our most important corporate donors and help with the funding of a significant number of marketing student scholarships. Business processes

such as project planning, financial and performance results reporting and effective communications techniques are utilized to enhance their education."

Boatwright's commitment to guiding his students, coupled with his belief in the value of extracurricular activities, had a pivotal effect of former student Jacob Beck, who met him while a sophomore. "Going into Dr. B.'s office I was expecting a 10-minute meeting on what class to take," Beck wrote. "It ended up being a two-hour conversation on everything in my life: my goals, my aspirations, family and life in general. He strongly advised me not only to become a member of AMA but to apply for an executive position. He even offered to let me borrow the \$60 for the cost of membership!"

Beck continued to meet with Boatwright over the next two years for guidance in academics, professional development and life skills, he said. "Without his insight and guidance I do not believe I would be where I am today. I am currently working at Nike World Headquarters in Asia Pacific Marketing . . . I am only one of many who have benefited from his wisdom."

Evans embodies life of scholarship, service

"When I hear the name 'James E. Evans,' I think of 'Distinguished Service,'" wrote Dr. Patrick Pauken in nominating his colleague for the Faculty Distinguished Service Award. Presented by Faculty Senate, the award honors one faculty member each year who has a record of outstanding continuous service to the University.

Evans, geology, is this year's winner. At the Faculty Awards dinner Oct. 28, he was presented a \$1,000 cash award and a plaque. He will also have a reserved parking space for a year.

Evans joined the geology department in 1988 and that same year began what has become a long career of contribution to his department, the College of Arts and Sciences and the University. He has been the advisor both for undergraduates and graduate students in geology, a member of 14 departmental committees and, when the department became part of the new School of Earth, Environment and Society, was part of the director search committee in 2005-06. Currently he is chair of the Geology Promotion and Tenure Committee.

As a member of the Academic Honesty Committee, his work was "powerful, objective, calming and inspiring," Pauken said of his fellow committee member. For a new member of the University community, Pauken noted, Evans' example was inspiring: "In Jim, I saw what a faculty member's service life was. I also saw how such service connects so beautifully to teaching, research, and ultimately to the humanity of people."

Evans has also been a member of the Graduate Council, Faculty Research Committee and the Intercollegiate Athletics Committee.

Evans has been a mainstay of Faculty Senate and its committees, having been a member from 1995-2002 and now again from 2008-11. He is chair this year of the Faculty Senate Budget Committee and is on the Senate Executive Committee and Committee on Committees. He was vice chair of the senate in 2000-01 and chair in 2001-02. He was instrumental in founding the Committee on Professional Affairs, which has maintained "consistent contact with state legislators, discussing and helping to answer the important questions of our day—significantly more important today than ever," said Pauken.

A prolific scholar in the areas of sedimentary geology, surface water hydrology and environmental geology, Evans has also been honored by a number of professional organizations. In 2001, he received the Distinguished Service Award from the Geological Society of America, and was chair of its Committee on Geology and Public Policy in 1999-2000 and a Congressional Science Fellow of the society in 1987-88. He was named an Honorary Fellow of the organization in 1997, and of the Ohio Academy of Sciences in 1998.

He also received the Distinguished Service Award from the American Association for the Advancement of Science in 1988.

He is vice chair of the Ohio Dam Safety Organization and has been on its executive committee since 1997. He also serves on committees for the American Geophysical Union, the U.S. and the Ohio Environmental Protection Agencies and the U.S. Department of Natural Resources, among others.

Goberman, Fallon win research awards

Dr. Alex Goberman's collaboration with recent graduate Becky Recker helped earn him the Elliott L. Blinn Award for Faculty-Undergraduate Student Innovative Basic Research/Creative Work. The honor includes a \$1,000 cash award for Goberman, communication disorders, and \$4,000 for his department for continued support of undergraduate research.

Recker, who graduated *summa cum laude* last May with a bachelor's degree in communication disorders, worked with Goberman for two years on a project to better understand communication performance of people with Parkinson's disease.

Dr. Linda Petrosino, their nominator and dean of the College of Health and Human Services, explained that individuals with Parkinson's and other neurological disorders tend to use better speech and voice when being tested than they usually do at home. Among Goberman and Recker's studies was an examination of differences in speech and voice when participants thought they were being recorded versus when they thought they weren't—but actually were by a hidden microphone.

"Assessment of the performance decline in the absence of a testing stimulus is important work because this topic has not been quantitatively examined before," Petrosino pointed out in her nomination letter.

Recker was one of 12 undergraduates who have worked with Goberman since 2001, when he came to BGSU and began developing an undergraduate research program—now institutionalized as a course—in the communication disorders department. "He started the program to give undergraduate students an opportunity to participate in meaningful research with CDIS faculty," nine of whom have since teamed with a combined 96 students in mentored research projects, Petrosino added.

She also noted that undergraduates were involved with much of the research that led to Goberman's selection as recipient of the college's Clyde R. Willis Faculty Development Award in 2005. "There is no one else in the College of Health and Human Services who exceeds Dr. Goberman in the dedication to, and the delivery of, high-quality undergraduate research opportunities and experiences," according to the dean.

Fleming Fallon

Petrosino also nominated the winner of the President's Award for Collaborative Research and Creative Work with graduate students, Dr. Fleming Fallon, public health. He received \$2,500 for use on graduate student education and research.

The graduate students in this case were the 15 members of his "Public Health Budgets and Finance" class in summer 2007. Advised by Fallon and Wood County Health Commissioner Pam Butler, the students conducted an actual public health planning and research project to determine the economic impact of an influenza pandemic on Wood County.

"This type of applied research assignment is typical of Dr. Fallon's approach in teaching mid-career and beginning public health professionals," Petrosino wrote. "He believes that working with 'live' problems and issues is the best way for graduate students to learn and be motivated about particular issues."

She added that cost estimates and implications of a Wood County flu pandemic for health care services agencies and the public had never been figured before. "So the project not only had value for the graduate students as an applied research activity of the sort that they would

have to do as public health professionals, it also created a methodology and findings that had important public policy and health policy implications as well," she noted.

"Completing this project involved integrating concepts and procedures learned throughout the student's course of study including economics, statistics, marketing and epidemiology, to name a few," wrote Dr. Deanne Snavelly, acting dean of the Graduate College, in support of Fallon's selection for the award.

The students' final report "should serve as reference material for municipalities, counties or states who may apply the methods and findings to their own regions," she said, pointing out that it has been presented to the Association of Ohio Health Commissioners and the Health Commissioners of Northwest Ohio, as well as the Wood County Pandemic Flu Task Force.

'Extreme Election: BGSU Edition'

The University has been the site of much political activity recently. Vice presidential candidates Gov. Sarah Palin and Sen. Joseph Biden both held rallies on campus, Palin on Oct. 29 and Biden on Nov. 1. And on Oct. 28, Gov. Ted Strickland and U.S. Sen. Sherrod Brown held a small "get-out-the-vote" event in Prout Chapel.

Speaking at the Palin rally, which filled the 5,500-seat Anderson Arena, were Ohio Rep. Randy Gardner (R-Bowling Green), Ohio Sen. Mark Wagener (R-2nd District), U.S. Rep. Bob Latta (R-5th District) and, introducing Palin, Betty Montgomery, former state senator, state auditor and Ohio attorney general.

Palin addressed an enthusiastic crowd, appearing with her husband and "Joe the Plumber."

Following the Palin rally in Anderson Arena, Elizabeth Vargas of ABC interviewed her in the women's locker room. Portions of the interview were later broadcast on "World News with Charles Gibson," "Good Morning America" and "20/20."

An estimated 2,500 people gathered on the University Hall lawn Saturday night to see Biden, who was introduced by his wife, Jill, and Ohio Lt. Gov. Lee Fisher, as well as two young field organizers for the Obama campaign, Corrie Keegan and Josh Thurstin, who urged the crowd to be sure to vote.

The event was covered by the local media and the traveling press corps.

Cartwright welcomes community leaders at breakfast meeting

Interim President Carol Cartwright shared the good news about all that's happening at BGSU with a number of business people, educators and civic and government leaders at an Oct. 30 breakfast.

Titled "Building Opportunities," the outreach event highlighted the many collaborations between the University and other educational institutions and with area business, and the role BGSU plays in the economic vitality of the region.

Cartwright also provided an overview of the new state system of higher education and how BGSU is meeting accountability standards.

She informed her guests of a new, executive MBA program BGSU will be beginning next fall. Classes will be held at the Northwest Ohio Regional Book Depository in Levis Town Center in

Perrysburg. The Professional Master of Business Administration is aimed at working professionals who will attend two nights a week year 'round.

Education majors welcome junior high students to campus

The College of Education and Human Development held its annual East Toledo Day Oct. 24, when education majors undergoing their methods classes welcomed students from East Broadway Middle School. Both groups are preparing for the next step in their educational careers, explained graduate assistant Sarah Griffith, and the day provides an opportunity to get together and explore possibilities.

Nearly 190 middle school students took a break from their regular routine to spend some time on campus. The students were divided into groups and participated in a variety of activities.

Doug Bell, an eighth-grade science teacher, said the experience gives his students a "better picture of what college is, and they are very lucky for this opportunity."

The event also helps the education majors prepare for their future. The students had to write lesson plans for each of the activities.

You learn "classroom discipline and how to work with specific age groups," said methods student Brittany Thomas of Liberty Twsp.

The day's educational activities included displaying data through box-and-whisker plots, learning about forces by playing table ping-pong with straws, exploring options by researching colleges on the Internet, creating roller coaster tracks for marbles with tubing and duct tape, and addressing current events such as the election through songwriting.

Eighth-grader Daniel Wilson described the day as "pretty fun." He especially enjoyed the music activity. "I made my own rap about Obama winning the election."

Festival Series to feature Jerusalem Symphony Orchestra

The College of Musical Arts will present the Jerusalem Symphony Orchestra as part of the 2008-09 Festival Series on Nov. 15. The orchestra will perform on the Lois M. Nitschke Memorial Concert at 8 p.m. in Kobacker Hall of the Moore Musical Arts Center.

Led by music director and principal conductor Leon Botstein, the orchestra has been dedicated to performing masterpieces from the baroque to the contemporary, often presenting the Israeli premieres of these works.

Founded in the 1940s as the national radio orchestra and originally known as the "Kol Israel Orchestra," the group became the Jerusalem Symphony Orchestra, Israel Broadcasting Authority, during the 1970s. During a European tour in 1996, the orchestra gained considerable international acclaim and recognition, and was invited to participate in three additional tours of South America, Europe and the United States.

The Nov. 15 performance will include "Big Ben Variations" by Ernst Toch; "Violin Concerto, Op. 24" by Miklos Rozsa, featuring violinist Robert McDuffie, and "Symphony No. 3" by Aaron Copland.

McDuffie has appeared as a soloist with most of the world's major orchestras. He is a Grammy-nominated artist whose acclaimed Telarc recordings include the violin concertos of Mendelssohn, Bruch, Adams, Glass, Barber and Rozsa. He has been profiled on NBC's

"Today," "CBS Sunday Morning," PBS's "Charlie Rose" and A's "Breakfast with the Arts," and in the New York Times and Wall Street Journal. He is a Distinguished University Professor of Music at Mercer University in his hometown of Macon, Ga. The McDuffie Center for Strings at Mercer officially opened at the beginning of the 2007-08 academic year.

Botstein has been president of Bard College since 1975 and is the editor of Musical Quarterly. He has received the award of the American Academy of Arts and Letters and Harvard University's prestigious Centennial Award for his contributions to music. He has performed with many orchestras, including the BBC Symphony, London Symphony, NDR-Hamburg, NDR-Hannover and Teatro Real in Madrid. Botstein's recordings with the London Symphony earned him a Grammy nomination earlier this year.

Tickets for the Nov. 15 concert are \$30, \$25 and \$18 in advance and \$33, \$28 and \$21 the day of the performance. For more information, call the Moore Center box office between noon and 6 p.m. weekdays at 2-8171.

IN BRIEF**Research Conference is Thursday**

The BGSU community is invited to attend the all-campus research conference this Thursday (Nov. 6), showcasing the excellence in scholarly and creative endeavors of its faculty, graduate and undergraduate students from all disciplines and colleges. The conference will be held from 9 a.m. to 5 p.m. in the Bowen-Thompson Student Union, primarily in the Lenhart Grand Ballroom with additional sessions in other rooms.

See poster presentations of current work, hear talks on wind power and STEM (science, technology, engineering and math) research and education, and enjoy a reception and presentation of awards for the best student posters.

The noon luncheon (by reservation only) will include a talk by Lynn Whitney, art, on Toledo's newest bridge. Also at the luncheon, the Olscamp Research and Outstanding Young Scholar awards will be presented.

A full schedule of events is posted at the research conference Web site: http://www.bgsu.edu/offices/spar/Research_Conference/. The conference is hosted by the Office of Sponsored Programs and Research.

BG@100 forum to look at student component of CSS

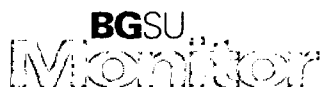

The November BG@100 Open Forum, scheduled for 1:30 p.m. Thursday (Nov. 6) in 315 Bowen-Thompson Student Union, will feature the topic "Understanding Student Records, Financial Aid, and Student Financials."

The presentation will examine these three areas from a Campus Solutions (CSS) perspective, including an introduction to how some processes may be completed, statistics, and examples of screen shots that will be available to users for viewing information.

All faculty, staff, and students are invited to attend. Project team members will also be available to answer questions regarding BG@100 and the Campus Solutions implementation.

Alumna to discuss new drug development, oncology therapy

The process of developing new drugs and the latest in oncology therapy will be Dr. Myra Patchen's topics Thursday (Nov. 6) for a College of Arts & Sciences Dean's Distinguished Alumna Lecture.

Patchen, who earned bachelor's and master's degrees in biology from BGSU in 1973 and 1975, respectively, will speak from 4-5 p.m. in 206 Bowen-Thompson Student Union. A reception will follow her talk, which is free and open to the public.

Now the president and chief executive officer of a private pharmaceutical consulting company, Patchen will discuss what the Food and Drug Administration generally requires before a drug can be tested in humans, as well as the mandated human-testing process before a drug can be considered for marketing approval by the FDA.

In addition to heading MLP Consulting Inc., Patchen is executive vice president of pharmaceutical development for Biothera Inc., a private biotechnology company. She will present the basic science and clinical research results of a product being developed by Biothera as an oncology therapy that directs the body's immune system to attack cancer through a novel mechanism.

Patchen is also former CEO and board member of Sucampo Pharmaceuticals Inc. Before entering the pharmaceutical industry, she did postdoctoral work under a National Science Foundation fellowship and managed basic laboratory science programs for the Department of Defense for more than 12 years. She has presented her scientific accomplishments at national and international conferences and published extensively in peer-reviewed scientific journals and books.

Patchen is a current member of the College of Arts & Sciences Advocates.

Array of new campus talent on display in 'Five by Ives'

The Department of Theatre and Film will offer the campus and community their first look at up-and-coming talent in this year's annual Newcomers Showcase, "Five by Ives." Performances will be at 8 p.m. Nov. 6 and 7 and at 2 p.m. and 8 p.m. Nov. 8 in the Joe E. Brown Theatre in University Hall.

The presentation of quirky, humorous one-act plays by award-winning playwright David Ives features a cast of exclusively first-year and transfer students from a variety of academic departments. The five comedies comprising "Five by Ives" were selected from the Ives collections "All in the Timing" and "Mere Mortals."

Single tickets are \$12 for students/adults, \$6 for children under 12 and \$5 for senior citizens (65 and over). Group rates are also available. To order tickets or for more information, contact the box office at 2-2719.

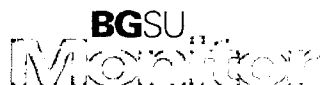

Mary Natvig to give master teacher lecture at national music meeting

Dr. Mary Natvig, musicology, has been chosen to present the master teacher lecture at the American Musicological Society and Society for Music Theory's annual meeting, set for Nov. 6-9 in Nashville, Tenn.

The AMS's Committee on Career Related Issues selected Natvig through a nomination process. Her lecture, titled "Active Learning in the Large Lecture Hall: Successes and Failures," will be presented on Nov. 7.

Natvig earned her doctorate from the Eastman School of Music and has been teaching at BGSU since 1990. Author of Teaching Music History, her research interests include music and culture of the 15th century, music and liturgy in convents during the Middle Ages and Renaissance, and women in music. She also directs the Early Music Ensemble at BGSU.

The American Musicological Society was founded in 1934 to advance research in the various fields of music as a branch of learning and scholarship. About 3,600 individuals and 1,200 institutional subscribers from more than 40 nations participate in the organization.

Bowling Green Opera Theater presents 'Albert Herring'

The BGSU Opera Theater will present Benjamin Britten's comic opera "Albert Herring" at 8 p.m. Friday (Nov. 7) and 3 p.m. Sunday (Nov. 9) in Kobacker Hall of the Moore Musical Arts Center.

Britten, who is among the most prolific and well-known British composers of the mid-20th century, based his opera on the book *Le Rosier de Madame Husson* by Guy de Maupassant.

Emily Freeman Brown, director of orchestral activities at BGSU, serves as music director and will conduct the *Bowling Green Philharmonia* in the performance.

The stage and lighting design is by Keith Hofacker, technical director at the College of Musical Arts. Voice/opera coach Kevin Bylsma, music performance studies, provided the musical preparation.

Tickets are \$9 for students and senior citizens and \$12 for other adults in advance, and \$12 and \$15, respectively, on the day of the performance. Tickets are available at the Moore Center box office weekdays from noon to 6 p.m., or by calling 2-8171.

Conference to examine moral obligation

"Moral Obligation" will be the topic of next week's conference hosted by the University's Social Philosophy and Policy Center. Slated from Nov. 13-15, the event will be an examination of moral obligation—including what it is and how it is grounded. While the topic is fascinating in its own right and of fundamental importance to applied ethics, it is important to reflect upon underlying issues before entering into discussions of particular obligations, whether concerning future generations and the environment or the more mundane aspects of life, say the conference organizers.

The keynote speaker will be Charles Larmore, a professor of philosophy and W. Duncan MacMillan Professor in the Humanities at Brown University. His lecture, entitled "Reflection and Morality," will begin at 8 p.m. on Nov. 13. Larmore is the author of several important books, including *The Morals of Modernity* (Cambridge, 1996) and *Patterns of Moral Complexity* (Cambridge, 1987).

Other prominent speakers include Stephen Darwall, John Dewey Collegiate Professor of Philosophy at the University of Michigan; Paul Guyer, F.R.C. Murray Professor in the Humanities at the University of Pennsylvania; Patricia Greenspan, a professor of philosophy at the University of Maryland, and Thomas Hurka, Jackman Distinguished Chair in Philosophical Studies at the University of Toronto and Fellow of the Royal Society of Canada.

For more details on the conference, contact Program Manager John Milliken at 2-2536 or millikjr@gmail.com.
