No. 63

Graduates To Hear President Of Central

Dr. Charles H. Wesley, president of Central State College, Wilberforce, will deliver the main address at Bowling Green State University's Summer Commencement Thursday, August 22, in the Ballroom. His subject will be "Dynamic Living in an Age of Change."

A recognized scholar, educator and historian, Dr. Wesley became president of Central State College in 1947 following a five-year tenure as president of Wilberforce (Ohio) University. From 1915-42 he held several academic and administrative posts at Howard University, Washington, D.C., including the deanships of the College of Liberal Arts and the Graduate School.

Dr. Wesley is a graduate of Fisk University, Nashville, Tenn. He received his master of arts degree from Yale University and doctor of philosophy degree from Harvard University. He was a University Scholar at Yale, Austin Scholar at Harvard, a Guggenheim Fellow in London and was elected Phi Beta Kappa. Dr. Wesley, who holds honorary degrees from eight universities, also has studied at the Guilde Internationale, Paris, and at the Howard University Law School.

The speaker is vice president, member of the Executive Com-

mittee, and president-elect of the Ohio College Association; president of the Association for the Study of Negro Life and History; Chairman for the second term of the Inter-University Council of the State of Ohio, past-president of the Association of the Ohio College Presidents and Deans; former overseas secretary of the International Committee of the YMCA; and a member of numerous professional organizations.

The author or co-author of 13 books, Dr. Wesley has had more than 100 articles published in scholarly periodicals. He has received numerous awards for educational achievements including the Achievement Award of the Omega Psi Phi Fraternity, Diamond Jubilee Citation and the Gold Medal Award of the United Supreme Council of the Scottish Rite Masonry.

BGSU President Ralph G. Harshman will confer approximately 385 undergraduate and graduate degrees at the commencement exercises which begin at 3 p.m.

52 Finish Course In Driver Training

Fifty-two school administrators, teachers, and undergraduate students completed a two-week Driver Education Workshop August 2 at Bowling Green State University.

The comprehensive course, which qualified the participants as high school driver education instructors, included laboratory experience in automobile driving and care and classroom lectures on safety and administration of high school driver education programs.

Twenty-two of the participants attended the workshop through scholarships from the Allstate Foundation, which presented a \$1,500 check to the University last May for the driver training course. Allstate gifts to BGSU since 1954 now total \$27,250.

More than 1,300 persons have been trained to teach driver education through courses at BGSU during the past 10 years, according to Professor Bruce Bellard, workshop director.

Charles H. Wesley

Frosh Enrollment Up 20 Per Cent

As of July 26, 2,349 freshmen have been tentatively admitted to Bowling Green State University for the fall semester, announced Glenn I. Van Wormer, University registrar.

Compared to the same period last year, which had a total of 1,950, this represents an increase in freshman enrollment of more than 20 per cent. Of the 2,349 freshmen the women outnumber the men 1,134 to 1,215.

Total applications received by the University for admission in September are 3,422, as compared to 2,743 at the same period last year. A total of 230 admissions have been denied thus far, as compared to 167 in 1962. Ten students have their admissions pending for the fall semester.

Transfer students admitted to the University for the fall semester total 51, as compared to 69 at the same period last year. Ninety applications from students who wish to transfer to the University have been denied.

Because of late applications and filled housing conditions on campus, 131 students have been tentatively admitted to the University as freshmen for the second semester.

An all-campus dance will be held Saturday night from 8:30 until 11:30 p.m. on the ice-skating rink behind Conklin Hall. Nick Vasil, a senior in the College of Liberal Arts, will be the disc jockey. In case of rain the dance will be held in the lounge of W.R.C.

THE NEW DINING HALL, located on the site of the old commons will serve 1,200 students. Pictured is the loading dock on the north side of the building.

SEPTEMBER 8 IS the completion date scheduled for the new addition to Kohl Hall. Interior painting of the addition is to begin today.

CONSTRUCTION OF THE NEW MEN'S RESIDENCE CENTER is shown in this NEWS aerial photograph by Terry Wolf. Using a Speed Graphic Camera with a 135

MM lens at 1,100 feet above the campus, Wolf's photograph depicts the four dormitory series with its own round dining facility in the center.

Construction Of Kohl Hall Addition, Dining Facility Nearing Completion

Construction on the new addition to Kohl Hall and the new dining hall is nearing completion. Completion date for the Kohl Hall addition is set for September 8 and the new dining hall is to be ready for use September 1, F. Eugene Beatty, director of building and facilities, announced today.

The installation of cooking equipment is all that remains to be done in the new dining hall.

Six workmen are employed "round-the-clock" welding the stainless steel equipment together, and then placing it in position.

The new dining hall will have a seating capacity of 1,200 persons with four cafeteria serving lines and four dining rooms. Men students from Rodgers Quadrangle, Kohl Hall, and Conklin Hall will eat in the new facility this fall when it first opens for use.

The addition to Kohl Hall is not as near completion as the dining

hall Mr. Beatty stated. Plastering of the rooms was completed early this week. Painters are scheduled to begin work today if the plaster is dry enough. The moisture content of the plaster must not exceed 12 per cent if paint is to be applied, Mr. Beatty stated.

The new addition to Kohl Hall will contain two-man rooms with built-in dressers and desks made of maple wood. The rooms will be similar to those in the Women's Residence Center.

The older section of Kohl Hall has been remodeled in several ways. An improved communications system between the main desk and student rooms has been added. The corridor ceilings have been lowered and new corridor lights have been added. The main entrance for Kohl Hall has been moved to the new addition and will face Wooster Street on the south.

The cafeteria in the basement of Kohl Hall is in the process of

being converted to house the University laundry and a typing room for the residents of Kohl Hall.

"As soon as we are sure that the new dining hall will be ready for use this fall, we'll tear down the old commons and landscape the area around the new dining hall and Kohl Hall," Beatty announced.

Construction of the new men's residence center on the site of the old golf course is well under way also with completion date set for August, 1964.

49 Cadets From BGSU Complete Army ROTC Summer Training Program

VISITING WITH CADETS from Bowling Green during "VIP Day" at Army ROTC summer camp at Indiantown Gap military reservation, Pa., is Dr. William E. Harrington, acting dean of the College of Education. Left to right (back row) are: Jerald L. Fenstermaker, John W. Haschak, Kenton E. Travis, David E. Wilson, Lawrence W. Richards, Robert L. King, Robert E. Lelendecker, Charles D. Gas-

colgne, Tad P. Manske, Larry H. Sakal, James C. Shook, George W. Dye, and Richard D. Slack. Left to right (front row) are: Dean Harrington, Joseph F. Slovak, Robert L. Reynolds, Joseph J. Weber, Stephen E. Markwood, Richard A. Wolff, Donald R. Williams, Richard E. Coleman and Capt. James P. Johnson, assistant professor of military science at BGSU.

Forty-five juniors and four seniors in the Advanced Army ROTC program at BGSU have completed a 6-week Army Summer Camp program at the Indiantown Gap Military Reservation, Pa.

The 49 cadets, accompanied by Capt. James P. Johnson, assistant professor of military science at BGSU, were among more than 3,000 other cadets representing 65 universities and colleges from 15 states.

Conducted from June 15 until July 26, Summer Camp provided instruction in areas of practical experience and training that cannot be taught in the classroom. Summer Camp is an integral part of the Advanced Corps instruction that each cadet must undergo before receiving his commission in the Army Reserve upon college graduation.

Dr. William E. Harrington, acting dean of the College of Education, visited the 49 cadets from BGSU July 18 and 19 as an institutional representative during "VIP Day." During "VIP Day" representatives from each of the 65 universities and colleges were given a tour of the training facilities of the camp, and witnessed the cadets in action.

Dean Harrington, along with the other college and university representatives, attended a formal dinner given in their honor July 18 in the Officers' Club. Gen. Van H. Bond, commanding general of the 21st Army Corps, briefed the representatives on the conduct and responsibility of Summer Camp.

Five cadets from BGSU: Jerald L. Fenstermaker, Donald R. Kuhlman, Stephen E. Markwood, Joseph F. Slovak, and James M. Wolf became "Expert Riflemen" in the use of the M-1 rifle. "Expert" is the highest classification in the use of the M-1 rifle in the Army.

Three senior cadets: Brooks D. Anderson, Gregory G. Gaydos, and Denman R. Jones received their commissions as second lieutenants in the Army Reserve at ceremonies held July 25. General

Bond awarded the commissions. Faculty members attending Summer Camp besides Capt. Johnson included: Sergeant First Class Nicholas Kalivas, administrative assistant; and Sergeant First Class Leroy J. Jacobs, assistant instructor in military science.

Steve Davis of Rodgers Quadrangle captured the All-Campus Paddleball Tournament defeating Fritzy DeWitt of Conklin 21-16 and 21-8. Jim Pohle of Conklin took consolation honors.

The "Gardiners" won the Conklin softball championship with a 6-0 record. A perfect game by pitcher Ed Vogel climaxed the championship game. The "Gardiners" will play the Rodgers League champions for the all-campus championship at 6:30 p.m., August 19.

An All-Campus Hole-in-One Tournament will be held on the University Golf Course at 6:30 p.m., August 15. No entries are required. Contestants should report directly to the golf course. Trophies will be awarded to the men's and women's champions.

New Bistatic Radar Center Being Erected At Stanford

A new radar astronomy facility is being established at Stanford University to learn more about space and the phenomena that exist in it.

One of the activities planned for the center is the new technique of "bistatic radar astronomy" in which scientists try to bridge the gap between techniques using ground-based instruments and those using space probes to explore the solar system.

"Bistatic" radar puts transmitter and receiver at different locations—a giant transmitter on the ground, for instance, and a small receiver in a spacecraft. Ordinary systems have both the transmitter and receiver in the same place.

The Stanford scientists say the "bistatic" method—which will be used by the new center in connection with a planned probe of Mars in late 1964—gives more detailed information about the surface of a planet and character-

istics of its atmosphere. The new center is a joint project of the university and Stanford Research Institute, a privately operated organization. Financial support comes mainly from the Air Force Cambridge Research Laboratories and the National Aeronautics and Space Administration, with additional aid from the National Science Foundation, and the Office of Naval Research.

ANOTHER PERSON meets a violent death plotted by a maniacal killer in "Ten Little Indians." The victim in this rehearsal scene from the Agatha Christie mystery-melodrama is William Blore, played by Jan Stucky of Oak Harbor. Checking the body is Dr. Armstrong, portrayed by Thomas Gressler, Pittsburgh, Pa. In the background are Celeste Ramey, Cleveland Heights, as Emily Brent and Albert Ronke, Euclid, as Sir Lawrence Wargrave. The Huron Playhouse began presenting "Ten Little Indians" Tuesday at 8 p.m. EST and will continue through Saturday, August 10.

Christie's Classic Mystery Showing At Huron Playhouse

One of the most popular "who done it" plays ever produced is on view this week at the Huron Playhouse. Agatha Christie's classic mystery - melodrama, "Ten Little Indians," provides an evening of enjoyable scares and thrills. The show opened Tuesday, August 6, and will play through Saturday, August 10.

The play, based upon the old nursery rhyme, is concerned with the lives and deaths of some eight people who receive mysterious letters telling them to spend a week end at a large mansion on a lonely island.

At first none of the gathered crowd has any idea why he has been summoned to the somewhat sinister place. Nor do they know the purpose behind the bizarre letters asking them to make the week-end trip. Before long, however, the riddle starts its solution when it takes a sudden and horrible turn as one of the guests falls dead from cyanide poisoning.

At the same time the guests notice that one of the ten little wooden Indians, placed in a row on the

mantlepiece, has fallen to the floor. Before the play reaches its harrowing climax, seven more little Indians fall to the floor and seven of the week-end guests are mysteriously murdered.

The final solution to the mystery has proven to be one of the most startling and exciting climaxes ever written. The play is guaranteed to leave the audience weak from fright, yet elated at the ultimate solution.

Many of the Playhouse actors are on view in this play. The leading roles of Vera Claythorne and Sir Lawrence Wargrave are portrayed by Judy Jett of Poplar Bluff, Mo., and Albert Ronke, Euclid. Other leading roles are played by Tom Parker, St. Petersburg, Fla., as Philip Lombard; Celeste Ramey, Cleveland Heights, as Emily Brent; and Jan Stucky, Oak Harbor, as William Blore.

Others appearing in the cast are Thomas Gressler, Pittsburgh, Pa.; Steve Sasala, Lakewood; Carole Ann Williams, Cape Girardeau, Mo.; Jack Winget, Cridersville; Jim Wright, Winters, Tex.; and Ross Young, Norwalk.

Chemistry-Math Institute Will Begin September 18

Applications are still being accepted for a National Science Foundation sponsored In-Service Institute in Chemistry and Mathematics which begins Sept. 18 at Bowling Green.

Fifty area school teachers will be selected for the Institute which is divided into two basic programs — chemistry and mathematics — both of which have sequential aspects.

The participants will attend classes on the BGSU campus once a week during the school year. The \$17,120 grant provides payment for registration, incidental fees, transportation, and textbooks.

The chemistry program, designed especially for science teachers who have not taken college chemistry courses, will include modern (general) chemistry during the 1963-64 academic year, followed by organic chemistry in 1964-65, and biochemistry in 1965-66.

Calculus, the second course in the two-year sequence of the mathematics program, will be offered during the 1963-64 year. The first year course, Intermedi-

ate Analysis, has been given at previous NSF institutes at BGSU and will be offered during the 1964-65 year. Calculus will be repeated in 1965-66.

The grant also provides funds for up to four highly qualified high school chemistry teachers working toward their master's degrees to do advanced independent study in chemistry. They may be enrolled in research or graduate level courses in chemistry for as much as three credit hours a semester.

Dr. W. Heinlen Hall is institute director. Further information about the institute and application forms may be obtained at the chemistry department.

Trowbridge President Of Alumni Association

Former Student Body President Keith W. Trowbridge '61 Sarnia, Ontario, has been elected president of the BGSU Alumni Association for the 1963-64 year. Mr. Trowbridge is the first Alumni Association President to live outside of the United States.

University's 'Lawn Program' Requires Much Planning

By Martin Brown
NEWS Staff Writer

The "lawn program" at Bowling Green State University involves much more planning and work than one might suspect. The program starts early in the spring with the purchasing of about 12 tons of fertilizer and a ton of grass seed.

The first areas to be worked on, according to Earl E. Rupright, Director of Maintenance Services, are the inner campus (that area between Kohl Hall, Wooster Street, Thurstin Street, and the lawns around the Women's Residence Center and Overman Hall) and the football field.

These areas receive priority as to the type of grass sown and the maintenance on them. The inner campus and the football field have their own sprinkler system.

The next areas to receive attention are the lawns around Rodgers Quadrangle, Fraternity Row, Conklin Hall, east of the Women's Gymnasium, and the practice football field north of the Fine Arts Bldg. The third areas to be cared for are the intramural sports field and the University Airport.

Fertilization of the soil is the first step, and then grass seed is sown where it is needed. Later in the spring when the grass is ready to be mowed, as many as seven mowers are used. These mowers range in cutting edges from the 21-inch push mower to an eight-foot mower powered by a Diesel tractor.

After new construction all debris is removed from the area, and the ground is leveled. Then four

inches of top soil is leveled over the other ground.

The soil is then fertilized, and grass seed, along with domestic rye, is sown. The rye comes up in about seven days and can be mowed in three to four weeks. The rye protects and shades the grass which grows much slower. During the winter months the rye dies, and in the following spring a new lawn should result.

One big project this summer is the starting of lawns around the new Administration Bldg., the Kohl Hall addition, and the new dining hall after they are completed.

There are many problems in relation to the maintenance of the lawns. Things such as crabgrass and dandelions appear to clutter up the lawn. Sometimes, there is

a fungus which eats at the roots of the grass and kills it.

And, of course, there are the students who like to "stunt the growth" of grass by taking short cuts.

The "lawn program" also includes the planting and trimming of trees and bushes and hoeing around shrubs.

Several thousand dollars are spent annually on this program to keep the University looking at its best, and much planning and labor go into the maintenance of the lawns to insure a beautiful campus.

A marked reduction in boating accidents last year has caused the National Bureau of Casualty Underwriters to adjust downward the rates charged owners of outboard motorboats for personal liability insurance.

Farm accident fatalities are not declining in proportion with falling farm population due to increasing age of farm people, isolation and distance that prevent prompt first aid and less control of traffic on rural highways.
